The Authours Epistell to the kynges grace.

¶ To the most hygh and puyssant prince kyng Henry the eyght by the grace of god/ kyng of Englãde and of France/ defensor of the fayth/ and lorde of Irelãde. Johñ Palsgraue his most humble and most obeissaũt subiect and dayly orator/ desyreth long durance of good lyfe/ and prosperous felicite.

Desirous to do some hũble seruice vnto the nobilite of this victorious realme/ & vniuersally vnto all other estats of this my natyfe coũtrey. After I was commaũded by your most redouted hyghnesse/ to instruct the right excellent princes/your most dere and most entirely beloued suster quene Mary douagier of France / in ỹ frẽche tong. As one whiche had conceyued some lytell hope and confidence/ that there had chaũsed me a cõuenient occasion/ by rayson of that charge/ to employe my labours about ỹ thyng/ whiche myght in tyme to come/be vnto your noble grace an euident argument and declaration/ of the towardnesse of my moste humble and most obeissaũt hert / in the accomplysshement of any your hyghnesses most dradde cõmandementes. I oftymes began thus to cõsider and debate with my selfe. This lyke charge haue dyuers others had afore my dayes/ and many others vndouted shall also hereafter be/ sith we theyr tyme in suche lyke studious exercise. Whiche thyng amongest others hath bene a great occasion / that many sondry clerkes haue for theyr tyme taken theyr penne in hande/ and to shewe theyr good willes and towarde diligẽce/ sufficiẽtly to acquite them on theyr behalfes/ wherby they myght of the princes our souerayns most renoumed progenitours/ and other hygh estates of this noble realme/ whom for theyr tymes in this exercise they serued / worthely attayne some lytell thanke and fauour/ some thyng haue they in writyng lefte behynde them/ conternyng vnto this mater/ for the ease and forthera ũce/ as well of suche as shulde in lyke charge after them succede/ as of thẽ whiche from tyme to tyme in that tong were to be instructed. Wherfore/ syns it hath pleased our most redouted souerayne/to commyt vnto me of others the most vnworthy and vnsufficient this lyke roume and exercise. I shall also by theyr exemple/ endeuour me for my party/ of this my necessite/ by reason of his highnesses pleasure and most dradd cõmandement / to make some lytell towardnesse vnto vertue/ and takyng light and erudition of theyr studious labours / whiche in this mater before me / haue taken paynes to write. I shall assaye some small thyng to adde by my poore diligẽce/ wherby/ nat onely I may the more suffyciẽtly acquite me in my charge/ but also/ that by mean of my poore labours taken on this occasion/ the

frenche tonge may herafter by others the more easely be taught / & also be attayned vnto by suche/ as for their tymes therof shalbe desyrous. Abidyng therfore vpon this my intended purpose / I dyd my effectuall deuoire to enserche out suche bokes/as had by others of this mater before my tyme ben compyled/of whiche vndouted/after enquery and enserche made for them/dyuers came vnto my hādes/as well suche whose authours be yet amongest vs lyueng/as suche whiche were of this mater by other sondrie persons longe afore my dayes composed. And pceyuyng/that they all by one accorde and agrement/chefely treated of two thynges/whiche they iuged vnto suche of our nation/as were mynded to lerne that langage/ of all others to be most chefely requisyte/ that is to saye/ Howe the Frenche tong ought to be pronounced/ and to shewe wherin their trewe Analogie dyd rest/so that after a frēche worde were ones vnto vs knowen/ we myght wotte for the kepynge of trewe congruyte in that tonge (if the worde of hym selfe were varyable) how to welde hym/ in his cases/gendre/nombres/modes/tenses/ and persons. I also on my partie/ dyde my poore dilygence in two sondrie bookes/ (vsyng suche order/ as semed vnto my poore iugement/ for that mater most cōuenyent) to entreate and write of the selfe thynges. Whiche after I had (so as it wolde be) fynysshed: nat estemyng the symplenesse of my poore labours in that behalfe/ in any wise worthy to come before your highnesses presens. I offred them vnto your noble graces sayde most dere and most entierly beloued Suster/ and to the highly renoumed prince Charles Brandon duke of Suffolke / her moost worthy espouse / supposyng it vnto me largely to be suffycient / if my poore labours myght vnto their graces/ to whom for their manyfolde benefyts I was so highly bounden/ in any parte be acceptable. But whan they had thorowly visyted my said two bokes/of their great goodnesse and synguler fauour towardȝ me/ moche more estemyng them than they in dede were worthy/their graces dyde than put me in a farther hope and confort/ that your highnesse/ whiche of your great boūtyousnesse and notable benignyte/ nat onely encorage well doers in any kynde of vertue/ to encrease & to do better/ but also gratiously dissymule your most humble subiectes errours/to confort them to amende/and afterwarde be more dilygent/ wolde nat refuse benignely and in good parte to accept the thyng/ wherof your noble grace was the meer causer and very chefe occasion/so I on my ptie to make my pore gyfte some lytell thing more acceptable/ wolde yet in this mater take a farther dilygence/ and wolde assay/if I coulde by the order of the letters fyrst set forthe in our tonge/ and than declared in Frenche/sette out worde for worde & phrasis for phrases/ affyrmynge that though my labours were some thynge

cōmodious

cõmodious for an Introduction towardes the better arraynyng of this langage. yet were they nat fully sufficient for any of our nation/by his owne study to attayne the Frenche tonge by/ except after their trewe pronunciation and arte Grãmaticall ones knowen/ we myght haue plenty of frenche wordes also/to expresse our myndes withall. Whose good aduertisementes and pleasures/ accordyng to my most bounden duetie to obey. But most especially / aboue all other thynges/ desyrous to leaue some lytell monument vnto your noble graces posterite/ howe that sõe tyme it stode with your highnesses pleasure/ that I your most humble and most obeisaunt subiecte shulde / employ my tyme about this study and exercise. I haue nat onely assayde so to mary our tonge & the frẽch togider/that there shulde fewe wordes in comparison of bothe the tonges be wantyng/nor phrases where the tonges differe/ & haue nat worde for worde be vnfetforthe/and by examples expressed/ But farthermore/ folowyng the order of Theodorus Gaza / in his grãmer of the Greke tonge / I haue also added vnto my former labours a thirde boke / whiche is a very cõment and expolytour vnto my seconde. So that the accidentes/ vnto the partes of reason in the Frenche tong / and other preceptes grãmaticall / whiche I haue but brefely and in a generaltee touched in my secõde boke/and so/ as vnto an Introduction dothe suffise. In my said thirde boke cõsequently & in due order be declared/ dilated/ & sette forthe at the length. Wherin most high and mighty prince/ howe soeuer beyllable my poore dilygence hath ben / were it nat that ỹ great and weighty affayres/whiche cõtynually without intermyssion lye vnder the orderyng of your most puyssaunt septre royall / at all tymes require the presence of your most gratious eye/ wherby my most symple labours ofsmall and vtterly no cõdigne importaũce coulde gete no leyser conuenyent by your highnesses most profoũde iugement to be loked vpon/by the generall testymony and cõmen reporte of all maner ꝑsons/ whiche haue ben admytted vnto your most gratious speche / nat onely your most hũble subiectes/ but also the Ambassadours of all outwarde princes/ of all other ꝑsons/ whiche at this present tyme be lyueng/with in the boundes of your right ample domynions/ It shulde haue ben to me most highly requisyte/ to haue made my most instaunt sute / for the benygne aduyse of your noble graces moste expert opynion in this behalfe/ afore I shulde haue dared to take vpon me/ to dedycate this my poore labours vnto your highnesse/whiche in the Frenche tonge/ amõgest your noble graces other manyfolde sortes of excellent erudytion and lyttcrature/ haue also in this tonge so clere and parfite a sight/lest that myne audacite for want of dewe circũspection/ myght in any poit offende your hyghnesse. But with all dewe humylite and most lowly

obeissaunce/ I submytte bothe me and my poore labours vnto your noble graces most benigne correction/ protestyng no maner thynge in my hole worke/ to be eyther well or sufficiently done/ but that whiche your highnesse/as most worthy iuge and clere discerner in this behalfe/shall vouchsafe to alowe & approue/ Onely of this thyng/puttyng your highnesse in remẽbraunce/ that where as besydes ỹ great nombre of clerkes/ whiche before season of this mater haue writtẽ nowe sithe ỹ beginnyng of your most fortunate and most prosperous raigne / the right vertuous and excellent prince Thomas late duke of Northfolke/ hath cõmanded the studious clerke Alexãdre Barkelay/to embusy hym selfe about this exercyse/and that my sayd synguler good lorde Charles duke of Suffolke / by cause that my poore labours required a longre tracte of tyme/ hath also in the meane season encouraged maister Petrus Vallensys/ scole maister to his excellent yong sonne the Erle of Lyncolne/to shewe his lernynge and opinion in this behalfe / and that the synguler clerke/ maister Gyles Dewes somtyme instructour to your noble grace in this selfe tong/ at the especiall instaũce and request of dyuers of your highe estates and noble men / hath also for his partye written in this matter. If any one of vs all/whiche syns ỹ begynnyng of your said well fortuned raygne of this thyng haue written/ or we all amongest vs/ haue by our diligent labours nowe at the last/ brought the frenche tong vnder any rules certayn & precepts grãmaticall/lyke as the other thre plite tõges be/ we haue nat onely done the thyng whiche by your noble graces progenitours/of all antiquite so moche hath ben desyred/ that besydes all other maner polycies by them essayd/ whiche myght serue to the adnaũcement and forderance of that purpose/ they neuer cessed to encorage suche clerkes as were in theyr tymes / to proue and essay what they by theyr dyligence in this matter myght do. But also vnder the studyous eyme of your most prosperous raigne/in whiche all ingenious exercises/ thus hyghly do haboũde / we haue here within the lymits of your most fortunat obeyssance and domynions / done the thynge whiche by the testimony of the excellent clerke/ maister Geffray Troy de Bourges (a late writer of the frenche nation) in his boke intituled Champ Fleury/ was neuer yet amongest them of that contrayes selfe hetherto so moche as ones effectually attempted. In so moche that the sayd clerke / about the beginnyng of his boke/spekyng of Hercules Gallicus or Francois and shewynge the naturall inclination that the frenche men haue vnto eloquence and facundite / and howe theyr tong for the most generall is corrupted for want of rules and preceptes grãmaticall/ and wisshynge that some studious clerke shulde by mean of his exhortation nowe take the thyng in hande / and farthermore rehersyng the names of suche Authours

thours whiche he eſtemeth in the frenche tong to be moſt excellent / and which he wolde chefely ſhulde be ouer vſyted and thoꝛowe ſtudyed/ togather theyꝛ grãmaticall rules out of / he hath foꝛtuned to name ſuche and the very ſame whiche my chaũce hath ben / foꝛ the auctoꝛiſyng and coꝛroboꝛatyng of my ſaid thyꝛde boke with all/chefely to alledge/ to folowe and to leane vnto. Wherby moſt hyghe and puiſſaunt pꝛince/ my moſt entyꝛely honoured and moſt redouted ſouueraygne/amongeſt the other manifolde hyghe benifites / whiche by your moſt pꝛouident cure/ and diligent circumſpection/ you dayly mynyſter vnto your moſt humble and moſt obeiſſaũt ſubiectes/and amongeſt the other manifolde ſoꝛtes of erudition and litteratur/ whiche by your highneſſes moſt amyable exhoꝛtation / and eſpecially by euident exemple in your owne noble perſon / as moche flouriſhe nowe vnder your ryght ample dominions/ as thoꝛowe the reſidewe of Europa/you haue alſo pꝛocured and pꝛoutded foꝛ them the parfit knowlege of the frenche tong/of all antiquite by your noble pꝛogenitours/ſo moche couited and deſired/ & by this mean where as your ſayd ſubiectes foꝛ your manifolde great benifites vnto them ſhewed/ be as moche boũden vnto your noble grace/as euer were ſubiectes vnto theyꝛ liege and ſouerayne loꝛde / by reaſon of this great cõmodite / pꝛocured alſo by your hyghneſſe/ that they may nowe in the tyme of your moſt happy raigne/ thus eaſely attayne vnto the frenche tong / and foꝛ ſo moche as it hath pleaſed your hyghneſſe/ of your moſt excellent goodneſſe / thus benygnely and thankfully to accept my pooꝛe labours employed in this behalfe/ your noble grace hath yet moꝛe highlye and moꝛe largely boũden/both them/ and of all others lyuyng moſt eſpecially me/ to pꝛay foꝛ your pꝛoſperous eſtate long to endure/ in all felicite and woꝛldly welth amongeſt vs. A M E N.

The Epistell of Andrewe Baynton.

T Andrewe Baynton/ to the ryght noble and excellent yong gēttlmen/ my lorde Thomas Hawarde/ my lorde Geralde/ and maister Charles Blont/sonne and heyre to the lorde Montioye / his late scole felowes.

Where as I perceyue by your ryght louyng letters that diuers parsons / whiche were moche desyrous of our maisters Esclarcissement de la langue francoyse/afore he had presented it to the kyngs hyghnesse. Nowe that his boke is publisshed & to be had amōgest the printars/ whan they loke vpon the greatnesse of the volume/ they be therby in party discouraged/ and thynke that the more the worke is in bygnesse/the greattar labours must of the lernars be therto required. But I am sure/ that you whiche here in knowe our maisters hole intente and consyderation/haue at the full/ satisfied and quieted all suche parsons/ whiche you haue herde vnder that maner reason / for as you haue well by hym parceyued/he hath willyngly and a purpose/moued of good and tendre zele/taken in this matter the greattar paynes vpon him/to ease and forther all maner parsons of our nation / whiche be desyrous of that langayge/ of theyr great paynes and studies/ whiche els of necessite must nedes haue ben required in this behalfe. And where as afore his tyme/ men of our nation/ dyd in maner dispayre/ that the frenche tong could euer by any meanes be gotten / sauf onely by an importune and long continued exercise/and that begon in yong and tender age/ our maister hath here in done so moche that he ꝑ wyll seke may fynde / and in a brefe tyme attayne to his vtterest desyre / and that nat onely concernyng the parfyte knowlege & redy vse of the tong/but also briefly and with smale payne to gete theyr naturall pronunciatyon / whiche here afore season hath ben supposed amongest vs in maner a thyng impossyble/ howe be it here in to knowlege the very truthe / rather it is to be supposed that suche of our nation as shall effectually be desyrous of the frenche tong/ shall thynke his boke to lytell and in some thynges to moche abreuiate/ than in any one poynt superfluously to moche / whan after the rules of ryght pronunciation / and the preceptes grāmaticall of this tong ones knowen/whiche two thynges in comparison to the hole volume be contayned in a ryght smale space/ and than to practyse those rules for to enioye the frute of them / shall fortune by theyr owne studye to translate any sentence or matter out of our tong in to frenche / and shall parchaūce loke for a worde amongeste the vocabulistes / whiche shulde serue for theyr purpose/ and shall nat straycht and all redy at hande fynd out the thyng they loke for/ But to ease & satisfye the lernar in that behalfe/ our maister

maister / as you knowe/ hath often shewed vs two generall rules/ one/ nat onely expedient for this purpose/but also brefly to haue a great plẽ/ ty of substantiues and adiectiues in the frenche tong / for if any nowne of many syllables vsed in our tong/approche any thyng towarde latine cõmenly that worde is also frenche / for lyke as the frenche men borowe theyr wordes immediatly of the latines / so do we borowe a great nom/ ber of our substantiues and adiectiues immediatly of the frenche men/ whiche thyng for substantiues / he declareth some thyng at the length / in his thyrde boke/ in the .lb. lvi. and .lxii. chapiters/ before the table of substantiues/ and for adiectiues in his sayd thyrde boke in his annota/ cions vpon the .vi. accident belongyng vnto adiectiues / whiche be set next before the table. And yet haue we farder more/ as he hath euidenly proued vnto vs/ a great nombre of other substantiues and adiectiues/ whiche in dede be very frenche wordes / saufe that our Englyshe tong hath some thyng altred theyr later terminations/ but after theyr trewe orthographie and ryght pronũciatyon/ be ones knowen/ they be by any parson of our tong perceyued/and also lerned atones/ and that for euer after. So that if the lernar whan he begynneth to practise/shall fortune to mysse of any worde in the tables of substantiues or adiectiues / lette hym fyrst haue recours vnto this general rule/afore he iudge the tables vnsufficient. An other rule he ham also gyuen vs / that if any parte of speche fortune to be vnset out in his owne table/ let the lernar seke out an other of lyke sens and synnifycation/ be it nowne/ verbe/ aduerbe/ or any other parte of speche that is wantyng / and he shall by that meas/ nes be competently satisfyed / and so be able to make forth the sentence that he shall for ỹ tyme fortune to haue in hande. Howe be it as you haue herde our maister dyuers tymes say / where as it is aboue a thousande yeres sens clerkes haue laboured to set forth the latin tong / and dayly yet in that kynde of study fynde matter ynough to exercyse theyr witt/ with all/ where by continually / they whiche succede/ indeuour thẽ some thyng to adde vnto the diligence of suche as were before them / lyke as to our maisters selfe for his partie in that behalfe hath chaunsed / for af/ ter he had in cõmandement by our most redouted souerayne / To in/ structe the duke of Richemontes grace/in the latin tong/he brought all the hole Analogie of the Romane speche/ in to .xx. letters/ that is to say/ theyr fyue bowelles/and M/ N/ R/ S/ cõsonantes/ whiche thyng was neuer/ as yet/ of no clerke that he wotteth of afore his tyme obserued. Sauyng that Marcus Varro/ whiche was in Tullyes tyme / in his thyrde boke de Analogia/ in very darke and brefe wordes/ sheweth that Aristotles Parmenius/ & Dionisius Sidonius / supposed that suche a thyng was possible to be brought to passe of the Greke tong. It is thẽ

no mar/

no marueyle / thoughe this bolume of oure mayſters / whyche leaueth nothynge vnattempted that ought to be deſyred / for the grãmaticall ꝓfection of the frenche tonge / and therto dothe his dyligence / to declare wordes for wordes / and phrafys for phrafis / thoꝛowe bothe the tonges / do nat in euery poynt vtterly ſuffife and ſatiſfy. Sens he hath ben the firſt outher of oure nation or of the french mẽnes ſelfe / that hath ſo farre waded in all maner thynges neceſſary / to reduce that tong vnder rules certayne / And of how we great a difficulty it is amongeſt ſo many thouſande wordes / in bothe the tonges to ſee / that vtterly none be wantyng / ſeyng that he hath alſo ben the firſt / which in that kynde of exercife hath begon to labour / ſuche as haue ſtudied in the thre parfyte tonges / and haue experience how they ꝛ vocabuliſtes / whyche haue ben of ſo many yeres / and by ſo londry clerkes agatheryng / and yet to this day fully do nat ſatiſfy / can in this behalfe ſufficiently decerne. But as touchyng his rules / how the frenche tong ought to be pronoũſed / and to knowe the parfyte Analogie and congruite of the frenche tong / that is to faye to decerne the changes / whyche happen in that langage by reaſon of diuerſite / in caſe / gender / nomber / mode / tens / and perſon / and to knowe by ſome certayne examples / how to cõiugate they ꝛ verbes parfyte / and what verbes be with them anomales / and whyche be defectiues / By cauſe his labours can in no wyſe be profitable to no maner perſon / except he haue in all theſe thynges / at the leeſt ſome generall knowelege / or euer he can be hable by his owne ſtudye / to tranſlate any ſentence out of oure tong in to frenche. To do vnto all maner perſones of oure natyon deſyrous to haue the frenche tong / yet a farther and more thankefull pleaſure / he hath brought all the pythe and effect of his two firſt bokes in to a very ſmale roume and quantite / whyche compendious tractyfe if it be but ones rede ouer / the lernar ſhall incontinẽtly haue ſo euident and clere a lyght in the frenche tong / that he ſhall for euer after be paſte all maner myſtruſt or diſcouragye in this behalfe / and parceyue euydently / that a lytell labour ſhall ſuffyſe hym to haue the full frute and cõmodite of this his hole bolume / of whyche bycauſe I am certifyed / to moche expedient and commodyous for this purpoſe / I ſende you here a Copy.

The Introduction of the authour.

¶ A brefe introduction of the authour/ for the more parfyte vnderstandyng of his fyrst and seconde bokes here folowyng.

The difficulte of the frenche tong/ whiche maketh it so harde to be lerned by them of our nation / resteth chefely in thre thynges / In the diuersyte of pronũciation/ that is betwene vs and them/ in their analogie and maner of congruite/where in they be moche more parfyte and equalyte than we be/ and moche more approche towardes the parfection of the latin tong/than we do/And thyrdly in their propertes of spekyng where in their phrasys be dyfferent frome ours / and letteth vs / that thoughe we shulde gyue worde for worde/ yet the sens shulde moche dyffer betwene our tong and theyrs / of whiche thre thynges here brefely and by maner of an introduction to entreate. The frenche men in their pronunciation do chefly regarde and couet thre thynges. To be armonious in their spekyng. To be brefe and sodayne in soundyng of their wordes/ auoydyng all maner of harshenesse in their pronũciation/ and thirdly to gyue euery worde that they abyde and reste vpon / their most audible soũde. To be armonyous in their spekyng/ they vse one thyng which none other nation dothe/but onely they/that is to say/ they make a maner of modulation inwardly / for they forme certayne of their bowelles in their brest/and suffre nat the soũde of them to passe out by the mouthe/but to assende frõ the brest straight vp to ỹ palate of the mouth/ and so by reflection yssueth the sounde of them by the nose. To be brefe and sodayne/and to auoyde all maner harshenesse/ whiche myght happen whan many consonantes come betwene the bowelles / If they all shulde haue their distincte sounde. Most commenly/they neuer vse to sounde past one onely consonant betwene two bowelles/ though for keping of trewe orthographie/ they vse to write as many consonates/ as the latine wordes haue / whiche their frenche wordes come out of/ and for ỹ same cause/they gyue somtyme vnto their cõsonantes but a sleight and semisshe sounde/ and farre more dyuersly pronounce them/than the latines do. To gyue euery worde that they abyde vpon his most audible sounde/where as in the Greke tong/the accent hath thre dyuers places/that is to say/ the last syllable/the last saue one/and the thyrde syllable from the ende/ and in the latin tong/ at the leest hath twayne/that is to say/ the last syllable saue one / or the thyrde syllable from thende / the frenche men iudgyng a worde to be most parfaytly herde/ whan his last ende is sounded hyghest/ vse generally to gyue their accent vpon the last syllable onely / except whan they make modulation inwardly / for than

gyueng theyr accent vpon the last syllable saue one/and at ỹ last syllable of suche wordes / they sodaynly depresse theyr voyce agayne / formyng the vowell in the brest/as I haue afore discribed. But to the intent that these thynges vsed of the frenche men in theyr pronounciation / and all others concernyng the very grounde of theyr analogie / may nat seme vtterly fortuyt and done by chaunce / but rather by some secret mistery gyuen by maner of a syngular priuiledge vnto this most christened nation. Let vs se howe ternarius numerus/ that is to say/the nombre of thre / whiche of all other is most parfyte/ excellent/and also mystycall/ dothe secretly with them/ and thorowly worke in this behalfe.

¶ For the soundyng of theyr vowelles.

WHere as I haue sayd that to be the more armonius they make a maner of modulation inwardly / that thyng happeneth in the soũdyng of thre of theyr vowelles onely A/E/ and O/and that nat vniuersally / but onely so often as they come before M/ or N/ in one syllable/ or whan E/ is in the last syllable/ the worde nat hauyng hys accent vpon hym / remyttyng the lernar for examples/ bycause of breuite/ vnto the seconde/thyrde / and fyfth chapiters of my fyrst boke / so that these thre letters M/ N/ or E/ fynall/nat hauyng the accent vpon hym/ be the very and onely causes why these thre vowelles A/E/O/ be formed in the brest and soũded by the nose. And for so moche as of necessyte/ to forme the different sounde of those thre vowelles they must nedes at theyr fyrst formyng open theyr mowth more or lesse/ yet whan the vowell ones formed in the brest/ ascendeth vpwardes and must haue M/ or N/ sounded with hym / they bryng theyr chawes togetherwardes agayne / and in so doyng they seme to sounde an V/ and make in maner of A/ and O/ dipthonges/ whiche happeneth by reason of closyng of theyr mowth agayne/ to come to the places where M/ and N/ be formed/but chefely bycause no parte of the vowell at his expressyng shulde passe forth by the mowth/ where as els the frẽchemen soũde the same thre vowelles/ in all thynges lyke as the Italiens do/ or we of our nation/ whiche sounde our vowelles aryght/and as for in theyr vowell I/ is no difficulty nor difference from the Italien sounde/sauyng that so often as these thre letters I/L/L/ or I/G/N/ come before any of the fyrst thre vowels A/E/or O/they sounde an I/ brefely and cõfusely betwene the last consonant and the vowell folowyng / where as in dede none is writen / for examples remyttyng the lernar to ỹ seuynth chapiters of my fyrst boke / whiche soundynge of I/ where he is nat writen they recompence in theyr V/ for thoughe they wryte hym after these thre

conſonantes F/ G/ and Q/ yet do they onely ſounde the vowell next folowyng v/ as I declare in the .ix. chapiter of the fyrſt boke. So that for the moſt generalte/ the frenche men ſounde all theyr fyue vowelles lyke as the Italiens do/ except onely theyr v/ whiche euer ſo often as they vſe for a vowell alone hath with them ſuche a ſounde as we gyne this diphthong ew / in our tong in theſe wordes / rewe an herbe / a mewe for a hawke/ a clewe of threde.

¶ For the ſoundyng of theyr diphthonges.

¶ And as touchyng theyr diphthonges beſydes the ſixe/ whiche be formed by addyng of the two laſt vowelles vnto the thre fyrſt/ as ai/ei/oi/ av/ev/ov/ they make alſo a ſeuynth by addyng of the two laſt vowelles together vi/ vnto whiche they gyue ſuche a ſounde as we do vnto wy/ in theſe wordes/ a ſwyne/ I twyne/ I dwyne/ ſoũdyng v/ and y/ together and nat diſtynctly/ and as for the other ſixe haue ſuche ſounde with them as they haue in latyn except thre/ for in ſtede of ai/ they ſoũde moſt commenly ei/ and for oi/ they ſounde oe/ and for av/ they ſounde moſt commenly ow/ as we do in theſe wordes/ a bowe/ a crowe/ a ſnowe/ remittyng alſo the lernar for the more certaynte herof vnto my layd fyrſt boke/ where I ſpeke of the diphthonges. All whiche diuerſyte vſed by them in ſoundyng of theyr vowelles and diphthonges/ an accuſtumed erre may euidently obſerue that they thus do apurpoſe / nat onely to be the more armonious and playſant in ſoũdyng of theyr wordes/ but alſo to auoyde all maner diſſorꝫpyte whiche myght happen by reaſon of any barbarous ſoũde. Whiche thynge ſo moche they ſtudye to obſerue that they preferre it ſometyme before theyr cõgruite / as I ſhewe herafter in my ſeconde introduction/ where I ſpeke of theyr grãmaticall concordꝫ And for the ſame cauſe/ to auoyde the cõcurrence of ſeperat vowelles in diſtyncte wordes/ they be more curious in the obſeruyng of the fygure called Apoſtrophe/ than the Grekes be them ſelfe/ as I declare from the xlix. chapiter conſequently to the .lv. in my fyrſt boke.

¶ For the ſoundyng of theyr conſonantes.

¶ And nowe as touchyng the ſeconde poynte whiche is to be breſe and ſodayne without any maner of harſhneſſe in theyr pnoũciation/ what conſonantes ſo euer they write in any worde for the kepyng of trewe orthographie / yet ſo moche coupt they in redyng or ſpekyng to haue all theyr vowelles and diphthongꝫ clerly herde/ that betwene two vowellꝫ whether they chaunce in one worde alone/ or as one worde fortuneth to folowe after an other / they neuer ſounde but one conſonant atones/ in ſo moche that if two different cõſonantes/ that is to ſay/ nat beyng both

of one

of one ſorte come together betwene two vowelles / they leue the fyrſt of them vnſounded/ and if thre conſonantes come together/they euer leue two of the fyrſt vnſoũded/ puttyng here in as I haue ſayd/ no differẽce whether the conſonantes thus come together in one worde alone/ or in the wordes do folowe one another / for many tymes theyr wordes ende in two conſonantes/ bycauſe they take awaye the laſt vowell of the latin worde/ as Corps / cõmeth of Corpus / Temps / of Tempus / and ſuche lyke/ whiche two conſonantes ſhalbe lefte vnſounded / if the next worde folowyng begyn with a conſonant/as well as if thre cõſonantes ſhuld fortune to come together in a worde by hym ſelfe. But yet in this thyng to ſhewe alſo that they forget nat theyr ternarius numerus of all theyr conſonantes /they haue from this rule priuyleged onely thre/ M/ N/ and R/ whiche neuer leſe theyr ſounde where ſo euer they be founde written / Except onely N/ whan he cõmeth in the thyrde parſon plurell of verbes after E/ for the particuler certaynte alſo of this thyng/ remittyng the lernar to the.xxv.xxvi.xxvii. and .xlviii. chapiters of the fyrſt boke. So that where as afore ſeaſon this ſeyng of conſonantes written for kepyng of trewe orthographie / and leuyng of them vnſounded in pronoũciation/ hath ſemed vnto vs of our nation a thyng of ſo great difficulte / by cauſe we neuer hetherto had no maner rule to ſtaye vs in this behalfe/ that vnneth an importune labour/and that taken in youth by a holeyere or twayne/ was ſufficyent by vſe to attayne hervnto. In ſo moche that where as there be hunderdes in this realme/whiche with a lytell labour employed and by the ayde of latyn/do ſo parfytly vnderſtande this tonge / that they be able to tranſlate at the fyrſt ſyght / anythyng out of the frenche tong/ in to ours/yet haue they thought ỹ thing ſo ſtrange to leue the conſonantes vnſounded / whiche they ſawe written in ſuche bokes as they ſtudyed/ that they haue vtterly neglected the frenche mẽnes maner of pronounciation / and ſo rede frenche as theyr fantaſy or opinion dyde lede them / and by that meanes parceyuyng in them ſelfe a want and ſwarueyng from the trewth/ whiche they wot nat howe to amende / vtterly leue to ſpeke or exercyſe the langayge / as a thyng whiche they diſpayre of/ where as nowe the very groũde and cõſyderatiou of the frenche men in this behalfe/ ones knowen/it hath ben proued by experience/ that it is but a fenyghtes labour / or at the moſte a fourtnyghtes to lerne this poynt concernyng to theyr pronoũciatyon and to be ſure herof for euer.

¶ For the keppyng of trewe accent.

¶ And nowe to ſpeke of theyr thyrde poynt/where I haue ſhewed that the frenchemen ſtudye to gyue euery worde that they abide and reſte

vpon they? moſt audible ſoũde. The hole reaſon of they? accẽt is groũ-
ded chefely vpon thre poyntes / fyr?ſt there is no wo?de of one ſyllable
whiche with them hath any accent / o? that they vſe to pauſe vpon / and
that is one great cauſe why they? tong ſemeth to vs ſo bre?e and ſodayn
and ſo harde to be vnderſtãded whan it is ſpoken / eſpecially of they?
paylantes o? cõmen people / for thoughe there come neuer ſo many wo?-
des of one ſyllable together / they pronouce them nat diſtinctly a ſonder
as the latines do / but ſounde them all vnder one voyce and tenour / and
neuer reſt no? pauſe vpon any of them / except the cõmyng next vnto a
poynt be the cauſe therof. Seconde / euery wo?de of many ſyllables
hath his accent vpon the laſt ſyllable / but yet that nat withſtandynge
they vſe vpon no ſuche wo?de to pauſe / except the cõmyng next vnto a
poynt be the cauſer therof / and this is one great thyng whiche incline th
the frenchemen ſo mochꝫ to pronounce the latin tong amyſſe / whiche cõ-
trary neuer gyue they? accent on the laſt ſyllable. The thyrde poynte is
but an exteption from the ſeconde / fo? whan the laſt ſyllable of a frenche
wo?de endeth in E / the ſyllable next afo?e him muſt haue the accent / and
yet is nat this rule euer generall / fo? if a frenche wo?de ende in Te / o?
haue s / after E / o? be a preterit partycyple of the fyr?ſt conugation / he
ſhall haue his accent vpon ỹ laſt ſyllable / accordyng to the ſeconde rule /
fo? the mo?e certayne knowledge alſo here of / remyttyng the lernar to
the .lvi. chapiter and the reſydewe next folowyng vnto the .lx. chapiter
of my fyr?ſt boke.

¶ Whan a vowell ſhalbe pronounced long o? ſhort.

¶ But as touchyng to knowe whan a vowell ſhalbe with them longe
o? ſhort in his pronunciation / I ſuppoſe there be no tong that hath here
in a mo?e playn and ſymple conſyderation / than the frenche men haue.
Fo? whan they leue any conſonant o? conſonantes vnſounded / whiche
folowe a vowell that ſhulde haue the accent / if they pauſe vpon hym by
reaſon of cõmyng next vnto a poynt / he ſhalbe long in pronounciation /
So that there is no vowell with them / whiche of hym ſelfe is long in
they? tong / fo? the mo?e particuler knoledge here of / remittyng the ler-
nar alſo to the .lxii. chapiter of my fyr?ſt boke / and as fo? Encletica I
note no mo but onely the primatiue pronownes of the fyr?ſt and ſeconde
parſones ſyngular / whan they ſolowe the verbe that they do gouerne.
So that albeit that the frenchemẽnes pronounciation be neuer ſo diffe-
rent from others / In ſo mochꝫ that it hath gyuen occaſyon to clerkes of
other nations to ſay they? pleaſure of the tong / yet if the conſyderations
whiche hath moued them ſo to do / be indifferently conſyd?ed / they ryſe

nat vpon

nat vpon a barbarus rudeneſſe but rather of a great/curioſyte to make
theyr ſpeche more cõmendable | but that all other nations do in dede ſo
moche eſteme it / and that as well chriſtened as hethen / that impute I
rather vnto the ſecret force of this ternarius numerus/ whiche thoughe
it hath here ſome thyng appered cõcernyng their pronoũciation/ it ſhal
moche more euidently here conſequently appere in all the theſe grounꝛ
des of theyr analogie / whiche they haue inuented proper and peculyer
to themſelfe/ for thoughe the great nombre of theyr vocables be euidẽtꝛ
ly deryued forth of latin / and that in dede they lerned at the fyrſt with
the latin wordes the latin analogie/ and in many thinges yet do folowe
them/ as ſhall here conſequently appere/ yet is theyr analogie nowe at
theſe dayes far re differẽt from them/ as I ſhall here alſo next folowyng
declare.

¶ The introductyon of the Authour to his ſeconde boke.

The frenche men vſe onely .xxiii. letters / ſuche
and the ſame whiche the latines haue/ for Y/ with them is
nat onely a ſygne of aſpiration / but alſo hath often tymes
the ſtrenght and power of a conſonant/ as I declare in the
xxiiii. chapiter of my fyrſt boke/ and howe they ofte tymes
write Y/ at the begynnyng of theyr wordes for kepyng of trewe orthoꝛ
graphie / and yet ſounde hym nat / I haue in the ſame boke declared in
the .xx. chapiter where alſo I ſhewe in what wordes of the frenche tong
Y/ hath his aſpiration/ and howe ſeldome the frenche tong vſeth nowe
this letter K/ I declare in the .xxiv. chapiter of the ſame boke. Theſe
xxiii. letters be deuyded in to thre dyuers ſortes / for beſydes theyr voꝛ
welles theyr conſonantes be deuyded in to mutes and liquides or ſemi
vocalles / whiche conſonantes haue in the frenche tong dyuers maners
of ſoundyng/ lyke as I declare of euery of them particulerly in my fyrſt
boke after theyr order. But in the namyng of the ſayd conſonantes the
frenche men diffre from the latin tong/ for where as the latines in ſoũꝛ
dynge of the mutes begyn with the letters ſelfe / and ende in E/ ſayꝛyng/
Be/ Ce/ De. &c. the frenche men in the ſtede of E/ ſounde Oy/ and name
them Boy/ Coy/ Doy. &c. and where as the latines in ſoũdyng of theyr
liquides or ſemi vowelles begyn with E/ and ende with them ſaynge
El/ Em/ En/ the frenche men double the liquide or ſemi vocalꝛ / & adde
alſo an other E/ and name them Elle/ Emme/ Enne/ geuyng the acꝛ
cent vpon the fyrſt E/ and at the laſt E/ depreſſyng theyr voyce / but in
theſe thynges it is nat greatly materiall to be to curyous / and therfore

I paſſe ouer to ſpeke thorowly there of. Of theſe letters/lyke as it is in all tonges/ be made ſyllables of ſyllables/ wordes of wordes/ſentences or reaſons.

¶ Of the.ix.partes of reaſon in a generalte.

¶ Partes of reaſon/ if we ſhall here in take example of the Romayns/ they haue thyſe.viii.for beſydes the.viii. partes of ſpeche cõmen betwene them and the latines/ that is to ſay/ Nowne/ pronowne/ verbe/ participle/ prepoſytion/ aduerbe/ conunction/ and interiection/ they haue alſo a nynth part of reaſon whyche I call article/ borowyng the name of the Grekes.

¶ Of the Article.

¶ Articles they haue but twayne/ Yng/ and Le/ & they haue but two accidentes/ as I declare in the begynnyng of the ſeconde boke.

¶ Of the nowne ſubſtantiue.

¶ Nownes ſubſtantiues haue thre chefe accidentes/ gender/ nombre/ and parſon.

¶ To knowe the gender of ſubſtantiues.

¶ Genders they haue thre/ the maſculyn/ feminyn/ and the cõmyn both to the maſculyne and femenyn. Cauſes whyche moue them to vſe a ſubſtantiue of the maſculyne gender be thre/ ſygnifycation/ termination/ and cõmyng out of a latin nowne of the newter gender endyng in vm/ Diuerſytes of ſygnifications/ whyche moue them to make a ſubſtãtyue of the maſculyne gender/ be of thre ſortes/ for if the ſubſtantyue betoken any name belõgyng onely to man/ or be ỹ name of any he beeſt/ or be the name of any tree/ they vſe all ſuche ſubſtantyues onely of the maſculyne gender/ as Roy/ cheual/ cheſne. Terminations whyche moue them to vſe a ſubſtantyue of the maſculyne gender be in a generalte all/ ſauyng onely E/ ſo that if a ſubſtantiue in the frenche tong ende in any vowell/ diphthong/ or cõſonant/ except onely E/ he ſhalbe of the maſculyne gender/ and the exceptions be but fewe as appereth in the ſecõde boke/ but chefly in the thyrde/ and yet thoughe they ſubſtantyue ende in E/ if he cõe out of a latin ſubſtantyue endyng in vm/ they vſe hym alſo of ỹ maſculyne gender as/ Conſile/ edifice/ domicile/ be vſed with them as maſculynes for they cõme of Edificium/ conſilium/ domicilium/ and ſo of ſuche lyke. Sygnifycations whyche moue them to make a ſubſtantiue of the feminyn gender/ be alſo of thre ſortes/ for if a ſubſtantyue betoken any name that belongeth onely to women/ or be ỹ name of any ſhe beeſt/ or the

or the name of any frute/they vſe euer all ſuche ſubſtantiues of the femi-nyn gender/as Ropne/rument/poyre/ Terminations whiche moue the to make a ſubſtantyue of the feminyn gender/is chefely E/ whiche rule is generall vnto thefe thre ſortes/alſo pnownes/ adiectyues and parti-ciples/for the feminins of all theſe thre partes ende in E/as I ſhall here after in theyr places more plainly declare/but for ſubſtantiues this rule hath many exceptions/as I declare at the length in my thyrde boke/ in my annotations vpon the fyrſt accident belongyng to ſubſtantiues/Of the cõmen gender I haue noted onely but fyr ſubſtantyues in this tong as Deufue/ aduſtere/ eſclaue/ guyde/ garde/ and hoſte/ as I declare in my thyrde boke.

Of the ſeconde accident nombre.

Nombres if we ſhulde herin be curyous as the Grekes be/they haue alſo thre/ for beſydes the ſyngular nombre and the plurell commyn be-twene them and the latines/ they vſe to expreſſe all ſuche ſubſtantyues as we in our tong circũlocute by payres/by one onely worde in the plu-rel letter/as for a payre of hoſen/a payre of tongs/ a payre of ſpectacles/ they ſay Unes chauces/ũes tenailles/ũes lunettes/ as I declare in the liii. chapiter of the thyrde boke/ before the table of ſubſtantyues. But nowe to ſpeke of theyr two nombres moſt generally vſed with thẽ/albe-it that theyr ſynguler nõbre hath a great meyny of dyuers terminatiõs/ yet haue they excepted thre letters/in whiche there is no ſubſtantyue en-dyng in theyr tong/that is to ſay A/O/and K/but in what letter ſo euer theyr ſynguler nombre ende in/ for the expreſſyng of theyr plurell nom-bre they haue but onely thre letters S/X/ z/whiche they adde to the ter-minations of the ſyngular nombre/ and ſo moche kepe they theſe thre onely letters to ſerue for theyr plurell nombres/ that if any ſubſtantyue in theyr tong/ in his ſyngular nombre ende in any of theſe thre letters S/X/ z/than is the ſynguler nombre and the plurel of all ſuche nownes with them all one/for the more particuler knowledge of this matter/re-mittyng the lernar to the annotatiõs vpon the ſeconde accident belong-yng to ſubſtantyues in the thyrde boke. Howbeit/ for ſo moche as the chefeſt poynt/ whiche concerneth the keppyng of trewe congruyte in this tong/reſteth vpon the knowledge of the gendre and nombre of the ſubſtantyue/for by cauſe that with hym muſt agre the adiectyue/ the p-nowne/ and the pticiple/ as I ſhall herafter in this introduction more playnly declare whan I ſpeke of theyr cõgruite. Beſydes all the rules written vpon theſe two accidentes in the ſayd thyrde boke/ I haue yet alſo for the more farther eaſyng of the lernar/ in the table of ſubſtãtiues after euery ſubſtantyue/ ſet forth alſo his gendre/ and the letter of his plurell nombre/ that he maye atones herin be ſatiſfyed.

Of the

¶ Of the thyrde accident Parson.

¶ Where as this tong hath thre parsones in bothe the nombres of theyr verbes/as the latines haue. Euery substantyue is onely of the thyrde parson that is to say/whan he is nominatyue case to any verbe/the verbe to agre with him must euer be of the thyrde parson / as I shall more playnly declare amongest the concordes.

¶ Of the nowne adiectiue.

¶ Nownes adiectiues haue also thre chefe accidentes/gendre/nombre/ and compartion.

¶ Of the gendre of adiectiues.

¶ Gendres/ adiectyues haue thre/ the masculyne/ femynyn/ and cõmen to the masculyn/ and femynyn. The masculyn gendre thoughe he haue neuer so sondry termynations/yet except they nat onely ỹ thre letters A/ O/ and K/ in whiche no substantyue endeth / but also they except other thre letters B/P/and Z/ So that in these syxe termynations endeth no masculyne adiectyue syngular. The femynyn gendre of all adiectyues endeth euer in E/ formed out of his masculyne by addyng of E/ vnto his last ende / for the more particuler knowledge of this mater/ remyttyng the lernar to the annotacions vpon the fyrst accident belongynge to adiectiues in the thyrde boke / of the cõmen gendre be all adiectiues/ whiche in theyr masculyne gendre ende in E/ for than is the masculyne and femynyn bothe one/in this tong.

¶ Of the accident nombre belongyng to adiectyues.

¶ Nombres they haue also twayne/ the syngular nombre and the plurell/ In the syngular nombre/nownes adiectyues haue as many sondry termynations as nownes substantyues haue / sauynge that as I haue sayd in B/P/ and Z/ endeth no syngular adiectyue. The plurell nombre hath onely thre letters small S/X/ and Z/ added vnto the letters of the syngular/lyke as they forme the plurelles of theyr substantyues. In so moche that if any masculyne adiectyue in his syngular nombre ende in S/or X/ the syngular and plurell is all one/ and euery femynyn plurell endeth in S/added to the E/small of his syngular. Remittyng the lernar for the particulers herof vnto my annotations vpon the seconde accident belongyng to adiectyues in the thyrde boke. Howbeit in this thyng also to ease the lernar I haue in the table of adiectyues/ set forthe the gendre and nombre of euery adiectyue as he commeth in order in the table of adiectyues.

¶ Of the comparation of adiectyues.

¶ Adiectyues haue thre degrees of comparation / lyke as they haue in our tong or in latin / but with this difference where as we & the latines

forme our comparatiues and superlatyues out of our posytiues/ by addyng of certayne letters to his ende/the frenche men kepe theyr adiectyue euer vnchanged/ and by addyng of Plus/before hym make theyr posytiue/and by addyng of Le plus/ or some pronowne dirivatyue/forme theyr superlatiue as/ I declare in the seconde boke/in the foueth accidēt belongyng to nownes adiectyues.

¶ Of the pronownes.

¶ Of pronownes there be thre chefe sortes/ primityues/ derivatyues/ and demonstratyues. Pronownes primityues be fyue/ Je/ Tu/ Se/ Nous/ Vous/ and of them be derived other.v. Myn/Ton/Son/Nostre/ Vostre/ all.x. wordes beyng of suche syngnifycation as they be in latin Pronownes demonstratyues/ they haue but thre Mi/ Le/ and Dy/ or Ley/ we may also contayne vnder the pronowne other thre dyuers sortes relatyues/as Qui/ or lequel/ interrogatyues/as Qui/ and numeralles as Vng/ deux/ troys. &c. And I speke also amongest the pronownes in my seconde bo..s of nownes partityues and distributyues/ as Tout/ Nul/ Aulcun/ Quelqun/ Chascun. &c.

¶ Of the accidentes belongyng to pronownes.

¶ Pronownes haue nat onely the thre accidentes belongyng vnto substantyues/that is to say/ gendre/nombre and parson/but also other thre accidentes/ case/ declination/ and composytion. But forso moche as these accidentes be not generally cōmen vnto all pronownes/ I shall here bredy speke of suche pronownes as be declyned in this tong/ for ỹ residue/remittyng the lernar to my secōde boke/the .xxxiii. lefe where I speke bredy of the pronownes in this tong.

¶ Of the thre declynations of pronownes.

¶ I fynde no maner partes of speche whiche be declyned in this tong/ that is to say/ haue case/gendre/ and nombre/ but onely the pronownes whiche be of thre sortes.

¶ Of the fyrst declynation.

¶ Pronownes of the fyrst declynation be two Je/ and Tu/ whiche be of the cōmyn gendre and syngular nombre onely & haue but thre cases/ nominatyue/ accusatyue/ and oblique/as Je/ me/ moy/ Tu/ te/ toy.

¶ Of the seconde declynation.

¶ Of the seconde declynation is onely Se/ whiche beyng of the cōmen gendre hath both his nombres/ but he wanteth his nominatyue cases/ lyke as Sui/ doth in latin as Se/ soy/ syngular/ and Se/ soy/ plurell.

¶ Of the

¶ Of the thyrde declination.

¶ Of the thyrde declinatron/ they haue but onely Jl/ with his feminin Elle/ whose declynation doth moche more approche towardes the parfection of the latin tong / for besydes that they haue distyncte gendres and nombres/ they haue also .iiii. cases synguler and .iiii. plurell/ that is to say/the nominatyue case/ the datyue case/ the accusatyue case / and the oblique case / as Jl luy / le luy / Jlz leur/ les eulx / Elle luy / la elle/ Elles leur/les elles/and of all the other sortes of pronownes for the more particuler knowlege of them/remittyng the lernar to my seconde boke/ but specially to my thyrde boke where J speke of the pronownes/ and the vse of them at the lengthy / and shewe whiche verbes in this tong do gouerne the datyue case of Jl/ and Elle.

¶ Of the verbe.

¶ Of verbes in the frenche tong be two dyuers sortes/for some be parsonall/and some be inparsonall/verbes parsonall be of thre sortes/parfyte/anomales/and defectyues/ verbes parfyte be of thre dyuers sortes/ actyues/passyues/& meanes/ Ybes actyues haue.iii.diuers cõiugatiõs.

¶ Of the fyrst coniugation.

¶ The fyrst is chefly ruled by E/ cause that in his dilfynites he tourneth in to Al/ and hath his thre chefe rotes/ that is to say his theme/his preterit participle/and his present infynityue euer of many syllables/and all thre of equal syllables/as .Je parle/iay parle/parler.

¶ Of the seconde coniugation.

¶ The seconde throwe all his coniugation/ is hoolly ruled by y/ and hath his chefe rotes also euer of many syllables and equal/ as Je cõuertys/ iay conuerty/ conuertyr/ and after these two coniugations/be ruled mo than thre partes of foure of the parfyte verbes in this tong.

¶ Of the thyrde coniugation.

¶ The thyrde hath his theme most cõmenly in S/ and in maner euer of one syllable/ except he be a compounde/ and than his symple is but of one syllable/ and his seconde rote is somtyme of one syllable / somtyme of many/and somtyme changeth his last bowell/ from the bowell of the theme/and his thyrde rote is euer of many syllables / endyng in Re/ or in yr/ as Je boys/ iay beu/ beoyr. Je prens/iay puis/prendre. Je dis/ iay dit/dire. symples & Je reuoys/ iay reueu/reueoyr. Je reprens/iay repuis/ reprendre. Je redis/iay redit/ redire/ cõpoundes. Coniugation is the dyuers alterynge of the last ende of a theme/by reason of these thre accidẽtes/ mode/tens/and declination parsonall.

Of the

¶ Of the .vi. modes.

¶ Modes / euery parfyte verbe hath .vi. the indicatyue / imperatyue / optatyue / or potenciall / the subiunctyue / the condicionall / and the infynitiue / of whiche the thre fyrst serue to make a parfyte sentence by one verbe alone / the other thre be used whā a verbe is nat ỹ principall verbe in a sentence / but dependeth vpon some other verbe / as Ie parle / parle / Bien parle ie / Doules vous que ie parle / Si ie parle ie me repentray / Ie doybs parler.

¶ Of the syxe Times in the modes.

¶ In these syxe modes be dyuers tymes / in some mo / in some fewer / but the indicatyue mode besydes the thre generall distinctions of tyme / present / parfytly past / and to come / deuydeth yet the tyme past in to other thre dyuers tymes / imparfytly past / indifynitly past / and more than parfytly past.

¶ Of the forma tion of theyr tymes.

¶ These tymes be formed out of theyr themes by addyng of certayne letters or syllables to theyr endy / in whiche for the fyrst cōiugation / by cause the theme endeth in E / if the addition begyn with a vowell the E fynall of the theme is taken away. The additions fynall be these syxe / Oye / Ay / Ray / E / Se / Roye / and theyr pſent infynityues haue but only thre terminations / Er / Ir / or Re / and the indifynite indicatyue of the thyrde coniugation endeth euer in S / hauyng before S / one of these thre letters I / U / or N / and the preterit participle of the same conjugation endeth outher in S / with I / or N / before hym / or in one of these thre letters T / U / or y.

¶ Of theyr declination parsonall of theyr tymes.

¶ Declination parsonall serueth to shewe howe the fyrst parson syngular of a tens is changed by reason of his seconde and thyrde parson syngular / and by reason of his fyrst / seconde and thyrde parsons plurell. Of these fyue parsons the secōde syngular endeth euer in S / the thyrde syngular somtyme in A / somtyme in E / but most commenly in T / the fyrst parson plurell endeth most cōmenly in Ons / and somtyme in Es / the seconde plurell endeth euer in Ez / and the thyrde parson plurell euer in Nt / with E / or D / before N / for the particular declaration of all these thynges / remyttyng the lernar to the .xxxix. leffe in the seconde boke / where I conjugate Ie parle / and ie conuertis / at the length / and consequently shewe the rules by example of Ie fays / hawe to conjugate the verbes of the thyrde conjugation.

¶ Of the verbes passyues.

¶ Verbes passyues in the frenche tong be circumlocuted / thorowe all theyr modes / tenses / and declination parsonall / with the modes / tenses /

and parsons of Je ſuis/put before theyr partycyples preterit/lyke as we do in our tong circumlocute our verbes paſſyues with the modes/ tenſes/ nombres/ and parſons/ of I am/and our partycyples preterit. As where we ſay/ I am loued / thou art loued / he is loued / I was loued/ thou waſt loued/he was loued. ꝛc. So ſay they Je ſuis ayme/ tu es ayme/il eſt ayme/ ie eſtoye ayme/ tu eſtoys ayme/ il eſtoyt ayme. ꝛc. but with this difference for theyr participle preterit altereth his gendre and nõbre/ accordyng to the nominatyue caſe to the tenſes of Je ſuis / though our participle remayne euer vnchanged/as I declare more at length in my ſeconde boke the. li. leffe.

¶Of the mean verbes.

¶The mean verbes haue alſo thre dyuers ſortes of cõiugations/ where in they chefly folowe and be ruled by the vowelles of the verbes actiues for the fyrſt coniugation of mean verbes is chefly ruled by E/ the ſecõde by I/ both of many ſyllables / and the thyrde hath his theme but of one ſyllable/lyke as I haue afore ſhewed in the verbes actyues. But theſe mean verbes in theyr coniugatyng differ from verbes actyues in thre thynges/ In theyr ſygnifycation/ in the circumlocutyng of theyr preterit tenſes/ and in theyr declination parſonall. In ſygnifycatyon/ for where as the verbes actyues betokyng ſome acte to paſſe from the doer/ without forth/ by whiche acte ſome other thyng doth ſuffre. The acte of the mean verbes palleth nat from the doar / but retourneth to the doars ſelfe agayne/or is done within the parſone of the doars ſelfe / ſo that cõmenly all ſuche verbes as be vſed in the latin tong/lyke neuters or deponentes be vſed in this tong lyke mean verbes. They differe alſo from verbes actyues in circumlocutyng of theyr preterit tenſes/ for where as all the preterit tenſes of verbes actyues / ſauyng the two indifynites/ and the preter imparfyte tens / by circumlocutyng with certayne tenſes of this verbe Je ay/ and theyr preterit participle / lyke as we in our tõg do circumlocut all our preterit tenſes / ſaue our preter imparfyte tens/ with the tenſes of this verbe/ I haue/ and our participle preterit as for I haue ſpoken / I had ſpoken. ꝛc.they ſay Jay parle/ iayuoye parle. ꝛc. In theyr mean verbes they circumlocute all thoſe preterit tenſes / with the tenſes of Je ſuis/ and theyr preterit participle changyng the gendre and nombre of the participle lyke vnto the gendre and nombre of the nominatyue caſe to the tenſes of Je ſuis/ lyke as thoughe they were paſſyues/ where as the participle vſed in the tenſes of verbes actyues after Je ay/remayneth in maner euer vnchanged. They differe alſo thyrdely from verbes actyues in theyr declination parſonall / for where as the

actyues

actyues haue but the pronowne or substantyue before the verbe/ as Je parle/ tu parles/ il parle / yng homme parle / in mean verbes to sygnyfye that the acte retourneth to the doar agayne/ they double the pronowne/ and in the thyrde parsones vse reciprocation/ as Je me maruaille/ tu te maruailles/ il se maruaille/ yng homme se maruaille. &c. All whyche differences of conugation betwene the actyue verbes and theyr meanes/ I declare at lenght in my seconde boke / the .xlviii. lefe by the exampies of Je me fie/ and ie men esbahis/ and ie men fuis.

¶ Of the verbes anomales.

¶ Verbes anomales in the frenche tong I note but thre Je ay/ cõiugate in the seconde boke the .xlv. lefe / and Je suis/ conuugate in the seconde boke the .li. lefe / and Je men vas/ conugate in the seconde boke the .l. lefe/ whyche in this tong haue the very propertes of verbes anomales/ For where as all the pfyte verbes of the frenche tong thorowe all theyr hole conugation/ kepe styll in all theyr modes/tenses/nombres/ and psons/ the fyrst letters of theyr theme euer vnchanged / these thre verbes do nat so/ for Je ay/ tourneth his A/ in to E/ as Je eus/ ie ay eu/ que ie eusse/ and in one place into O/ as Ilz ont/ and Je suis/ chãgeth his S/ somtyme in to F/ as Je fus/ que ie fusse/ and somtyme into E/ as Je estoye/estre/ and Je vas/ tourneth his cõsonant somtyme in to A/as Nous allons/ ie alloye/ aller/ somtyme in to Y/ as Je iray/ and this changyng from the fyrst letters of the theme happeneth thorowe all the tong/ as I haue sayd in these thre verbes onely. And as for verbes neutropassyues I fynde none in all the tong sauf onely Je nays/ whose sygnifycation/ and also conugation I haue set forth in the seconde boke the.li.lefe.

¶ Of the verbes imparfyte or defectyues.

¶ And of verbes imparfyte or defectyues / there be thre dyuers sortes for some want but a tens or twayne in some of theyr modes/ as Je puis/ wanteth his present imparatyue/ and his present optatyue as I declare in the seconde boke the.xliiii.lefe/ and some want theyr present & indifinit optatyue/ sauyng onely the thyrde parson synguler/ as Vueille dieu/ and Vouisist dieu/ and no more as I declare in the seconde boke/ in the same lefe. And some be yet more deffectyues for they want all theyr preterit tẽses/as Je seuls/ I am wont/ for he borowoeth all his preterit; that be circumlocuted of Je accoustume/ or ie aprens/ sayng Jay accoustume/ or iay apryns/ as I declare in the seconde boke the.xliiii.lefe. But where as in the same lefe immediatly after Je seuls/ is shewed that Je ensenelis/ is also a verbe deffectyue/ that thyng passed my correctours handes or I was ware therof/ for Je ensenelis/ is a parfyte verbe of the seconde

coniugation / and ſygnifyeth to ſowe vp a cloꝛs in his wyndyng ſhete / and Je enterre / is alſo a paſſyte verbe of the fyꝛſt coniugation / and ſygnifyeth to bury one in the erth. Of the thyꝛde ſoꝛt of verbes deffectyues / be the verbes imparſonalles in the tong / foꝛ verbes imparſonalles haue no moꝛe but the thyꝛde parſone ſyngular onely thoꝛowe all their modes and tenſes / as I declare in the .lvi. leſe of the ſeconde boke. Verbes imparſonalles lyke as they be defectyues in theyꝛ parſons / ſo want they one of the thꝛe coniugations / foꝛ after the ſeconde coniugation is conſtugate / no verbe imparſonall in theyꝛ tong / as I declare in the ſeconde boke the .lvi. leſe. And albeit that all theſe thynges here ſhewed in this introductyon / concernyng the verbes / do moche moꝛe playnly appere in the ſeconde boke / and ſpecially in the thyꝛde / yet in this thyng bothe to eaſe and quiet the lernar / I haue in the table of verbes ſhewed the cõiugation of euery verbe in this tong / in his place as he cõmeth in oꝛdꝛe / In ſo moche that if any verbe be of the thyꝛde coniugation / I ſet out all his cotes and tenſes / wherin the lernar myght haue any diffyculty / as the latin grãmariens haue done the pꝛeterites and ſupines of ſuche verbes as in that tong be of any diffycultye.

¶ Of the particyple.

¶ Participles / this tong hath but twayne / the pꝛeſent participle actyue / whiche euer endeth in ant / what ſo euer coniugation the verbe be of / as Parlant / Conuertiſſant / and Fayſant / and the pꝛeterit participle paſſyue / whiche foꝛ the fyꝛſt coniugation endeth euer in E / hauyng the accent vpon that E / foꝛ the ſeconde euer in y / and the thyꝛde endeth outher in S / with I / oꝛ N / befoꝛe S / oꝛ in one of theſe thꝛe letters T / U / oꝛ / y.

¶ Of the accidentes belongyng to theſe two participles.

¶ Pꝛeſent participles haue no mo accidẽtes but onely nombꝛe and geꝛdꝛe / as Parlant / parlans. Conuertiſſant / cõuertiſſans. Fayſant / faiſans / whiche ſerue to be ioyned vnto all maner ſubſtantyues maſculyne oꝛ feminyne without any farther changyng / by cauſe all ſuche participles be of the cõmen gendꝛe / So that Elegant / elegans. Elegante / elegantes. and ſuche lyke / whiche in this tong haue two diſtincte gendꝛes / be adiectyues and no pꝛeſent participles. Paſſyue participles haue two gendꝛes diſtincte and two nombꝛes / as Parle / parlez. Parlee / parlees. Conuerty / conuertys. Conuertee / conuertees. Faict / faictz. Faicte / faictes. And thus as I ſuppoſe I haue here ſufficiently declared / how the analogie of ỹ frenche tong thoꝛowe all theyꝛ partes declinable is chefly groũded vpon this ternarius numerus / foꝛ the knowledge of theyꝛ partes indeclynable /

clinable/remyttyng the lernar to the secõde boke/but especially to their tables in the thirde boke. Onely here touchyng/ that lyke as we out of our adiectyues forme our aduerbes of qualite by addyng to of ly/ as of good/goodly/fayre/fayrely/ and suche lyke/ so the frenche men of theyr feminyne adiectyues forme theyr aduerbes of qualite by addynge to of ment / as of Bonne/ bonnement. of Belle / bellement. &c.

¶ Of the thre Concordes of grãmar in the frenche tong.

¶ As touchyng theyr congruite wherby they ioyne theyr adiectyues/ pronownes / and participles / vnto theyr substantyues or pronownes/ whan they stande for substantyues / and theyr verbes vnto theyr nominatyue cases / & theyr relatyues vnto theyr antecedentes. They therin be moche more partyte than we be / and moche more resemble the latine tong. In so moche/ that lyke as the latines haue thre concordes of grãmar/that is to say/betwene the substantyue and the adiectyue/ betwene the nominatyue case and the verbe / and betwene the relatyue and his antecedent. The frenche tong hath the selfe and the same/but with this difference / for where as theyr substantyues haue no cases/ therfore all theyr thre sortes of adiectyues haue none/ and so they agre onely in gẽdre and nombre/but theyr verbes agre with theyr nominatyue cases/in nombre and parsone/ in all thynges lyke as they do in latin / and so do theyr relatyues with theyr antecedentes in thre gendre/nombre / & parsone. And so moche attayne they towardes the perfection of the latine tonge in this thyng/ that they vse also conceptyon/ bothe in gendre and parsone. And in one thynge they passe the latines / for they cause theyr participle preterit after the tenses of Je ay/ to agre with the accusatyue case that is gouerned of hym/ & nat with the nominatyue case that goth before hym / as I declare in my seconde boke in the .liiii. lefe / where I speke of the participle. But yet so moche do the frenchmen couyte to auoyde all maner displesaunt sounde in theyr pronũciation/ ẏ they preter it sõtyme afore theyr congruyte (as I haue afore touched) in so moche/ that if they must ioyne any of the thre fyrst pnownes deriuatyues with a feminyne substantyue begynnyng with a vowell/they vse nat Ma/ta/ sa/ but Mon/ton/son/ to auoyde the yuell sounde of the two vowelles/ If they shulde be sounded one after an other/ as I declare in the secõde boke the .xxxvi. lefe/and for the same cause/breke they somtyme the congruite betwene the substantyue and the adiectyue / as I declare in the adiectyue in the thyrde boke. Of these other concordes and conceptiõs/ for examples remyttyng the lernar to the seconde boke / to theyr places/ but especially to the thyrde boke.

¶Of the differences of phrasys betwene our tong and the frenche tong.

¶And nowe here somthyng to speke of the thyrde and last thyng where in our tong and the frenche speche differeth. The phrasys of our tong and theyrs differeth/chefely in thre thynges. Fyrst bycause they haue lō tyme mo wordes in a sentēce than we haue in ỹ same/whiche happeneth ptly by cause they haue thre wordȝ to exp̄sse the name of a thyng whiche we exprelle by one word alone/as where we say a pollare/they say Dng becq de faulcon/ and contrary by cause we haue mo wordes than they as for holde thy pece/ they say Tay toy/ Seconde by cause whan we vse a verbe as parsonall they vse the same verbe as imparsonall/as for I care nat / they say Jl me mey chault / and for I must Jl me fault / and suche lyke. And thirdly by cause thoughe we gyue worde for worde out of our tong in to theyrs / yet we shall nat exprelle the sence that they mean in theyr tong / whiche thyng somthynge here in a generalte to exprelle I shall cōsequently shewe the different vse betwene vs and them thorowe all theyr.ix. partes of speche.

¶Of the phrasys belongyng to the article.

¶Thoughe we vse A/euer before our substantyues in the syngular nōbre/ they vse Dng/ in the plurell nombre if the substantyue of hym selfe be plurell/ as Dnes noupces/ Dnes lettres.

¶Of the phrasys belongyng to the substantyues.

¶Where we vse to name dyuers thynges by payres / as a payre of bellowes / a payre of tylers / they vse them by one worde in the plurell lettre with the article plurell/ as Dngz fuffletz/ Dngz aiselets. Also where as we seme to haue a genityue case/ for so moche as by addyng of is/ to our substantyue we lygnifye possellyon / as my maisteris gowne / my ladyis boke / whiche with vs contreuailleth as moche as the gowne of my maister / the boke of my lady / they haue no suche fynall addition to lygnifye possellyon in theyr tong/ and yet farthermore they take awaye the prepolytion and say La robbe mon maistre. Le lieure ma dame. and thyrdely where as we adde any wordes for a difference to any substantyue we put the difference before/and say a wynde myll/ a wedder cocke a fyer pan / and suche lyke they torne the order contrary / and adde this prepolytion A/ as Dng cochet au Dent. Dng moulyn au Dent. Dne poille a feu.

¶Of the phrasys belongyng to adiectyues.

¶Where we put our adiectyue before the substātyue whan he is put to hym bycause of a difference/ as say a whyte hors/ a rounde cappe/ a long

gowne

gowne / they tozne ꝯ ozder and say Dng cheual blanc. Dng bonet rond. Dne robbe longue. also where as we make cõparison by addyng of certayne letters to the ende of our polytiues / as whyte / whyter / whyteſt / blacke / blacker / blackeſt / they kepe the adiectyue vnchanged / and adde Plus / oz le plus / before hym as I haue afore declared in the thyrde accident of adiectyues

¶ Of the phrasys belongyng to pronownes.

¶ Where we vſe to put our pronownes primitypes after the verbes ꝯ gouerne them and say I loue hym / he beteth me / I defende her / they say Je le ayme. Il me bat. Je la deffens. puttyng euer the pronowne of the acculatyue caſe before the verbe that gouerneth hym. Also where as we vſe our pronownes poſſeſſyues whan we betoken an acte oz hurte to be done to a parſon / as he hath hurte my hande / thou burneſt thy here he ſhall breke his necke / they tozne the poſſeſſyue into his primitypue ⁊ in his ſtede vſe the article Le / as Il ma bleſſe la mayn. Tu te bruſſes les cheueulx. Il ſe rompera le col. vſyng in the thyrde parſon reciprocation / whiche in this tong is moche moze precisely vſed than in latin / ⁊ as foz doublyng of the ꝓnowne in the declynation parſonall of mean verbes I haue afore ſpoken there of.

¶ Of the phrasys belongyng to verbes.

¶ Somtyme in affyrmation they put En / before the verbe / moze than we haue in our tong in the ſame ſentence / as foz He is dedde / they ſaye Il en eſt en fuy. Also in negation they vſe one of theſe thre wordes / Pas / point / oz mye / moze than we haue in our tong / as foz I wylnat do it / they ſaye Je ne le feray pas. oz point. but mye / is an olde Romant worde and nowe is out of vſe / as I declare in my ſeconde boke the. xlvi. leke / in the. ix. accident. There be alſo other ſoztes of phrasys betwene our tong and theyrs / whiche happen by reaſon of the verbes / as foz I can nat do withall / they ſay Je ne puis mais. and ſuche other whiche were to long here to make reherſall of / foz I ſuppoſe they be nat ſo fewe as nerehande a thowſande / and therfoze / foz the certayne knoledge of them I remyt the lernar to the table of verbes where all ſuche phrasys be ſet out at the length after as they come in ozder.

¶ Of the phrasys belongyng to participles.

¶ The frenche tong dyuers tymes in the ſtede of our participle vſeth the preterit parfyte tens of the infynitypue mode / as where we ſay / is this my rewarde foz ſeruyng of you trewly / the ſay Eſt ce cy mon guerdon pour vous auoir loyallement ſeruy. foz the particuler knowledge of this thyng / remyttyng the lernar ſpecially to my thyrde boke / where I ſpeke of theſe thynges at the length. And howe they vſe ſomtyme to agre theyr participle with the acculatyue caſe of the pronowne whan he

is go-

is gouerned of the nolatyue case to the tenses of Je ay/ J declare in the seconde boke/the.liii.lefe in the. v. accident belongyng to participles.

¶ Of the phrasys belongyng vnto prepositions.

¶ For/to the/ in the/ and of the/ beyng two distyncte wordis in our tong they vse Au/ du/ and ou. day/ dee/ and es. as J declare in my seconde boke the .lv. lefe in the fourth accident belongyng vnto prepolytions. And whan we shewe a thyng to haue more or lesse of any substance/ they vse to adde theyr prepolition De/ more than we in our tong haue in the same sentence/ as formoche payne/ lesse cōyng/ more bred/ lytell wyne/ they say Beaucoup de peine/ peu de science / plus de payn / moyns de vyn. as J declare in the sayd seconde boke the .lvi. lefe in the .v. accident belongyng to prepolytions. And howe somtyme they leue out de/ where we vse of/ in our tong / J haue afore touched in the phrasys belongyng to substantyues/ & declare it in the seconde boke in the sayd .v. accident belongyng to prepolytions.

¶ Of the phrasys belongyng to the aduerbes.

¶ Whan they vse any aduerbe of comparation with Que/ folowynge hym syguifyng than / theyr verbe must haue Ne/ before hym / though we vse nat in our tong to put Nat/ before our verbe/ as for more than J say/ lesse than J deserue/ better than he doth/ they say Plus que ie ne dis/ moins que ie ne merite / mieulx quil ne fait. as J declare in the seconde boke the .lviii. lefe in the accidentes particuler belongyng to aduerbes/ And in the same accident J declare also/ that if any aduerbe in hym selfe contayne a playne negation/ or syguifie dimynisshyng or priuation/ the verbe in the frenche tong shall haue Ne/ before hym/ though we put nat this worde Nat/ before our verbe in the same sentence/ as where we say J shall neuer se hym / J t pleaseth me nothyng / J loue hym but a lytell/ they say Je ne le verray iamais/ il ne me plait en rien/ ie ne laime guaires. Theyr be also dyuers other sortes of phrasys betwene our tong & theyrs by reason that they and we expresse ỹ sence of one selfe aduerbe/ be farre different wordes / whiche were here to longe to be rehersed / for at the leest they be nat moche vnder a thowsande / but vnto the lernar it is no difficulte to come to the very parfyte knowledge and vse of them all/ for they may easely be foūde out vnder the question that they belong/ to make answere vnto in the table of aduerbes.

¶ Of the phrasys belongyng vnto the cōiunctyons/ and Interiectyons.

¶ Phrasis generall betwene our tong and theyrs/ concernyng theyr cōiunctyons or interiectyons J fynde none / but of particular Phrasys/ there is a great nombre/ as may appere to the lernar in the table of conjunctyons in the thride boke.

¶ A cōclu-

of the authour.

¶ A conclusyon of the Authour concernyng these two introductyons.

¶ Thus haue I here for an introduction/ suffyciently declared the thre chefe thynges where in the frenche tong so moche differeth from ours/ and semeth vnto them of our natyon so harde to come by/ whiche introductyon/ if it be attentyfly ouer redde/ and the conjugation of the thre parfyte verbes in the seconde boke Je parle/ ie conuertis/ and ie fais/ and the thre verbes anomales Je ay/ ie suis/ and ie mey vas. parfytly cõned without boke/ the lernar may than by the helpe of my tables by his own study be able to translate any matter or sentence he wyll/ out of our tong in to frenche/ and so incontynente accustome hym to haue theyr cõmen speche/ whiche by this meanes with a lytell study is sone attayned vnto But if any of our nation be desyrous to be exquisyt in the frenche tong/ and by traycte of tyme/ couyte to come vnto suche parfyte knowlege therin/ that he may be able to do seruyce in the fait of secretarishype or other wyse in to those partyes to haue farther charge/ or to vse amõgest thẽ the fait of marchandyse/ let hym rede ouer all ỹ thre bokes by order/ and he shall euidently parceyue that the frupt of his labour shall farre passe any traueyle/ which shalbe nedefull or requisyte to be there about employed.

Wherin the true ſowndynge of the frenche tonge reſteth. Capitulum primum.

THe true ſoundynge of the frenche tonge reſteth in gyuyng to euery frenche woꝛde by hym ſelfe/ his naturall frenche ſounde/ and in ſoundynge frenche woꝛdes/as they come to gether in ſentences/lyke as the frenchemen vſe to do. Regula prima.

¶The true ſoundynge of euery frenche woꝛde by hym ſelfe reſteth in gyuyng vnto euery vowell diphthonge/and conſonant / with whiche they be wꝛitten/theyꝛ true frenche ſounde / and in leauynge ſuche conſonantes vnſounded as be vſed with them to be wꝛitten foꝛ the keppynge of true oꝛthographie / and yet in redynge and ſpekyng be left vnſounded. Regula ſecunda.

¶The true ſoundyng of frenche woꝛdes as they come to gether in ſentences / is to gyue to euery woꝛde his true accent / and to euery vowell his iuſte tyme of pꝛonunciation longe oꝛ ſhoꝛte / and in the leauynge of ſuche vowels oꝛ conſonantes vnſounded beynge the laſt letters of frenche woꝛdes by reaſon of the letters / that the woꝛdes nexte folowynge them begynne with / as the frenche tonge vſeth to do. But as foꝛ vowelles in frenche woꝛdes by them ſelfe / there is none wꝛitten / but they be ſounded eyther diſtinctly oꝛ ſhoꝛtly and confuſely (ſaue ſomtyme v)as ſhall here after appere. Regula tertia.

The ſoundyng of this vowell a. Capitulum ſecundum.

¶A in the frenche tonge hath two dyuerſe ſoundes / foꝛ ſomtyme they ſounde hym lyke as we do in our tonge / and ſomtyme they ſounde hym lyke this diphthong au/and a lyttell in the nooſe.

¶The ſoundyng of a / whiche is moſt generally vſed thꝛough out the frenche tonge / is ſuche as we vſe with vs / where the beſt englyſſhe is ſpoken / whiche is lyke as the Italians ſounde a / oꝛ they with vs/that pꝛonounce the latine tonge aryght. Regula prima.

¶If m oꝛ n folowe nexte after a / in a frenche woꝛde / all in one ſyllable / than a ſhall be ſounded lyke thys diphthong av / and ſome thyng in the nooſe / as theſe woꝛdes ámbre, chámbre, mandér, amánt, tant, quant, parlánt, regardánt, ſhall in redynge and ſpekynge be ſownded aumbre, chaumbre, maunder, amaunt, taunt, quaunt, parlaunt, regar-

daunt, ſoundyng the a lyke au and ſomethynge in the nooſe / and ſo of all ſuche other.

Exceptio a ſecunda regula. ¶ But this rule hath one exception / for if the ſyllable next folowynge of any ſuche wordes begynne alſo with a lyke conſonant / that is to ſay / with an other m or n / as in theſe wordes flámme, gámme, bannýr, tannýr / in all ſuche a ſhalbe ſounded lyke the generall ſoundynge of a / and nat as I haue here afore declared.

Exceptio ſecunda. ¶ Excepte alſo that any of theſe thre letters / c / g / or p / folowe nexte after them / belongynge to the ſame howell / that they do / as blanc, ſang / champ, and ſuche lyke / for in all ſuche a ſhalbe ſounded after his moſt generall ſoũde / and nat lyke ab / and as for áme, dáme, láme, ráne, and all ſuche lyke / ſhall ſownde theyr a / after the generall ſowndynge of a / and nat lyke ab / though m or n folowe next after the a / for as I haue ſayd here before that rule is nat kept / but where as a and m or n come both to gether in one ſyllable.

Regula tertia. ¶ As I fynde nat written to gether through all the frenche tong / ſaue onely in theſe wordes aáge, aagér, aayſér, and the wordes that come of them: yet Iehan le Mayre lieth to writte them eayge and eaygér, but where ſo euer in any writtyng a a ſhall fortune to come to gether / euery of them ſhall haue his diſtinct ſounde / after the generall ſoundynge of a / accordyng as I haue here declared.

The ſowndynge of this howell e.
Capitulum tertium.

Regula prima. ¶ E in the frenche tong hath thre dyuerſe ſowndes / for ſomtyme they ſownde hym lyke as we do in our tonge in theſe wordes / a beere / a beeſt a peere / a beene / and ſuche lyke. Sometyme they ſounde hym lyke an a / and a lyttell in the nooſe: and ſometyme almoſt lyke an o / and very moche in the nooſe.

Regula ſecunda. ¶ The ſowndyng of e / whiche is moſt generally kepte with them / is ſuche as we gyue to e in our tong in theſe wordes aboue reherſed / that is to ſay / lyke as the Italianes ſounde e / or they with vs that pronoũce the latine tonge aright: ſo that e in frenche hath neuer ſuche a ſownde as we vſe to gyue hym in theſe wordes / a bee ſuche as maketh honny / a beere to laye a deed corps on / a peere a make or a felowe / and as we ſounde dyuers of our pronownes endynge in e / as we / me / the / he / ſhe / and ſuche lyke / for ſuche a kynde of ſoundynge both in frenche and latine / is allmoſte the ryght pronounciation of i / as ſhall here after appere.

Regula tertia. ¶ If m or n folowe nexte after e / all in one ſyllable / than e ſhall be ſounded

ſounded lyke an Italian a / and ſome thynge in the nooſe / ſo that for theſe wordes thus written / embler, amendrir, endementiers, humblement, and ſuche lyke: in redynge and ſpekynge they ſounde ambler, amendrir, andementiers, humblemant, and ſo of all ſuche other / and this ſounde alſo they gyue vnto e / though the nexte ſyllable folowynge begynne alſo with an other m or n / as femme, mienne, tienne, ſienne, be ſounded with them famme, mianne, tianne, ſianne, and ſo of all ſuche other: as for demenér, denotér, benedictión, tenement, and ſuche lyke / ſhall nat ſounde the e in theyr fyrſte ſyllables lyke a / thoughe m or n / folowe next after them: for as I haue ſayde / this rule holdeth nat / but where as e and m or n come all together in one ſyllable.

¶ But yet nat vnyuerſally throughe all the frenche tong / where e commeth next afore m or n in one ſyllable / he ſhall haue the ſounde of a / for where as the thyrde perſonnes plurelles of verbes actyues / in the frenche tonge / almoſt in euery of theyr modes and tenſes in wrytynge / ende in ent / as aÿment, aymóyent, aymérent, aymeróyent, aymáſſent, cõuertiſſent, conuertiſſóyent, conuertirent, conuertiróyent, conuértiſſent, diſent, diſóyent, dirent, diróyent, diſſent, in redynge or ſpekynge they they ſounde all ſuche thus / aymet, aymoyet, aymeret, aymeroyet, aymaſſet. Conuertiſſet, conuertiſſoyet, conuertiret, conuertiroyet, conuertiſſet. Diſet, diſoyet, diret, diróyet, diſſet, leauynge the n in all ſuche vnſowded / and pronounſynge the e / after the moſte generall ſowndynge of e. Exceptio a tertia regula

¶ But where as dyuerſe thyrde perſones ſyngular of verbes ende in ent / as well perſonall / as il prent, il rent, il ſent, as imperſonall / as il couient, il deuient, il apartient, il luy ſouuyent, all ſuche ſhall folowe the rule of e / comynge before m or n in one ſyllable / and in redynge or ſpekynge / be ſounded il prant, il rant, il ſant, and ſo of the reſydue / and all ſuche lyke. Regula quarta.

¶ If e be the laſte vowell in a frenche worde beynge of many ſyllables eyther alone or with an s folowynge hym / the worde nat hauyng his accent vpon the ſame e / than ſhall he in that place be ſounded almoſte lyke an o / and very moche in the nooſe: as theſe wordes hómme, fémme, honéſte, párle, hómes, fémmes, honéſtes, auécques, ſhall haue theyr laſte e ſounded in maner lyke an o / as hommo, femmo, honeſto, parlo, hommos, femmos, honeſtos / auecquos, ſo that if the reder lyft vp hys voyce vpon the ſyllable that commeth nexte before the ſame e / and ſodaynly depreſſe his voyce / whan he cometh to the ſoundynge of hym and alſo ſounde hym very moche in the nooſe / he ſhall ſounde e beyng wrytten in this place accordyng as the frenchemen do. Whiche vpõ this Regula quinta

warnynge if the lerner wyll obserue / by the frenche mens spekynge / he shall easely perceyue.

Exceptio a quinta regula.

¶But if e be the last letter of a frenche worde eyther beyng of one syllable or of many / haynge his accent vpon the same e / than shall he in all suche wordes be sounded after the most generall soundyng of e/ and nat as I haue here afore described/as in the wordes beyng of one syllable in this sentence/il me le faict de bon gré/ and in these wordes of many syllables bonté, beaulté, parlé,regardé,and in all other of lyke sort/there e shalbe sounded after the most generall soundyng of e /and nat almost lyke an o / or any thynge in the noose / whiche cometh by reason that in all suche wordes the accent falleth vpon the same e. And of this sort also is ciprés, excés, exprés, procés, and suche lyke / thoughe s folowe after e / bycause theyr accent is vpon the same e: as shall here after in his place appere. But whiche wordes / in the frenche tonge endynge in e / haue theyr accent vpon the same e / and whiche vpon the syllable that cometh next before hym / it shall here after appere in the chapters accent.

Regula sexta.

¶And here it is to be noted/that e in this place / that is to say / beynge the last letter in a frenche worde / may nat vtterly be left vnsounded(except the worde folowyng be cause of it)as we do for the most part in our tong in nowyse/for that writtyng of e and natsoundynge of hym/haue we taken of the Saxon tong/or rather douche tong: whiche/if we will rede or speke frenche naturally/we must nedes amende.

Regula septima.

¶If e e come to gether in a frenche worde in the meane syllables/whiche often happenneth / as preeminénce, beér, heér, neemént, uergondeemént, and suche lyke: in all suche wordes both e e shall haue theyr distinct sounde by them selfe/after the most generall soundyng of e.

Regula octaua.

¶If e e come to gether in the last ende of a frenche worde/whiche happenneth in dyuerse substantyues / as matinée, uesprée, soyrée, and suche lyke: and also in all the femyne genders of participles of the fyrst conjugation in the frenche tong: as aymée, parlée, gardée, tormentée, troublée, and suche lyke: in all suche the fyrst e shall haue his sounde after the most generall soundynge of e / hauyng the accent of the worde vpon hym: and the last e shalbe sounded almost lyke an o / accordyng to the rule here afore declared.

The soundyng of this vowell i.
Capitulum quartum.

Regula prima.

¶I in the frenche tong hath.ii.dyuerse maners of soũdynges/the soũdyng of i/which is most generally vsed in the frẽche tong/ is like as the Italians

Italians ſounde i / and ſuche with vs as ſounde the latin tong aright/ whiche is almoſt as we ſoũde e in theſe wordes a bee a flie/a beere for a deed corps/a peere a felowe / a lee a reward/a litell more ſoundynge towardes i / as we ſounde i with vs.

¶ If i be the firſt letter in a frenche worde or the laſte / he ſhall in thoſe two places be ſounded lyke as we do this letter y / in theſe wordes with vs / by and by/a ſpye/a dye/awry/and ſuche other: in whiche places in thoſe frenche bokes / as be diligently imprinted / they vſe to writte this letter y: but whether the frenche worde be written with i or y / in theſe two places he ſhalbe ſounded / as I haue ſhewed here in this rule / as in ymage, conuerty / ydole / eſtourdy / in whiche the y hath ſuche ſounde/ as we wolde gyue hym in our tong. Regula ſecunda.

¶ I / to come to gether in a frẽche worde / I fynde vſed of none auctor ſaue onely of Iehan le Maire / whiche vſeth to writte feſtiier / criſtiién/ glorifiier / ſpecifiier / magnifiier / whiche Alayn Chartier wolde writte/ feſtoyér / criſtién / glorifier / ſpecifier / magnifier / whiche orthographye I more commende: for as I ſhall here after declare/ it is agaynſt the nature of the frenche tonge / to haue i i come to gether/ eyther both as vowels/or the firſt as conſonant belongynge to the i folowyng. Regula tertia.

The ſoundyng of this vowel o. Cap. v.

¶ O in the frenche tong hath two diuers maners of ſoundynges / the ſoundyng of o / whiche is moſt generall with them / is lyke as we ſoũde o in theſe wordes in our tonge a booze / a looze/a cooze/and ſuche lyke/ that is to ſay/like as the Italians ſounde o / or they with vs that ſoũde the latin tong aright. Regula prima.

¶ If m or n folowe next after o in a frenche worde / both in one ſyllable / than ſhall the o be ſounded almoſt lyke this diphthonge ov / and ſome thyng in the nooſe: as theſe wordes mon / ton / ſon / renóm / ſhalbe ſownded / movn / tovn / ſovn / renovm / and ſo of all ſuche other / and in like wyſe ſhall o be ſownded though the next ſyllable folowynge begynne with a nother m or n / as in theſe wordes hóme / ſómme / bónne / tónnerre whiche they ſoũde houme / boune / ſoumme / tounner / and ſo of ſuche other. Regula ſecunda.

The ſoundynge of this vowel v. cap. vi.

¶ U / in the frenche tong / where ſoeuer he is a vowel by hym ſelfe / ſhall be ſownded like as we ſownde ew in theſe wordes in our tong / rewe an herbe / a mew for a hauke / a clew of threde / and ſuche lyke reſtyng apon the pronounſyng of hym: as for theſe wordes plus, nul, fus, uſér, humble Regula unica.

uertu, they ſounde plevus, nevul, fevus, evuſer, hevumble, uertevu, and ſo in all other wordes / where v is a vowel by hym ſelfe alone: ſo that in the ſoundynge of this vowel / they differre both from the latin tong and from vs: and as for w is no letter vſed in the frenche tong / but belongeth to the ſaxon tong / of whom we haue taken it: and therfore / as impertinent / I paſſe it ouer.

In what wordes this vowel i ſhalbe ſounded / where he is nat writtē. Cap. vii.

Regula prima. ¶ Beſydes the diuerſe ſoundynges of theſe fyue vowels in the frenche tong / where as they be writtē / they ſoūde this vowel i ſomtyme ſhortly and confuſely / where he is nat writtē. For whiche thynge it is to be noted / that whan ſoeuer theſe. iiii. letters illa / ille / or illo / come to gither in a nowne ſubſtantiue or in a verbe / the i nat hauyng an o / commynge next before hym / they vſe to ſounde an i ſhortly and confuſely / betwene the laſt l and the vowel folowyng: albe it that in writtyng they expreſſe none ſuche / as theſe wordes / ribaudaille, faille, baillér, gailiárt, ueilliart, billárt, fueille, fille, cheuille, quocquille, ardillón, baſtillón, covillón, and ſuche like / in redyng or ſpekynge they ſounde thus / ribaudaillie, faillie, baillier, gailliart, ueilliart, billiart, fueillie, fillie, cheuillie, quocquillie, ardillion, baſtillion, covillion, but as I haue ſayd / if the i haue an o cōmyng next before hym / in all ſuche wordes they ſounde none i / after the latter l / ſo that theſe nownes ſubſtantyues moylle, uoille, toille, and ſuche lyke be except from this rule.

Regula ſecunda. ¶ And note that though in theſe wordes aboue reherſed this vowell i / be ſounded where he is nat writtē / that thyng ſhall nothynge do in the alterynge of the accent of any ſuche wordes / no more than thoughe he were nat ſounded at all: for in that thyng / the reder ſhall regarde / how they be writtē onely. Except alſo from this rule uille / whiche ſoundeth none i after his latter l.

Regula tertia. ¶ Alſo whan ſoeuer theſe. iii. letters / gna / gne / or gno / come to gyther eyther in a nowne ſubſtantiue or in a verbe / the reder ſhall ſounde an i ſhortly and confuſely / betwene the n / and the vowel folowynge: as for gaigná, ſeigneur, mignón, champignón, uergoigne, maintiéngne, charoigne, he ſhall ſoūde / gaignia, ſeignieur, mignion, champinión, uergoignie, charoignie, maintiéngnie, nat chaungynge therfore the accent / no more than though the ſayd i were vnſounded.

Exceptio. But from this rule be excepted theſe two ſubſtantyues ſigne and régne / with theyr verbes ſignér and regnér / whiche / with all that be formed of them / the reder ſhall ſounde as they be writtē onely.

And note/ that many tymes I fynde ſuche nownes/whiche haue the i in writting betwene the a and g/but whether he be writen or nat in redyng or ſpekyng he ſhalbe ſounded accordyng as I haue here ſhewed by example. ¶Alſo whan ſoeuer this worde ex commeth in the compoſicion of any worde in the frenche tong/or at the begynnynge of a worde/the reder ſhall ſounde an u/betwene the ſayd e and x: as for exémple, experiénce, expedient, exprimér, they ſoũde euxemple, euxperienſe, euxpedient, euxprimer. Example of wordes/where i and v be vowelles/and belong to the vowell goyng before them/ſayón, payén, layétte, gáye, avóſt, eáve eaveúx, hévre, mévre, mevriér. Example/where i and u be conſonantes/ and ſhall belonge to the vowelles folowynge / aieunír, aiourner, gaier, bourión, haulberión, auoýr, auoýne, auortýne, póure, oevure, háure, naurer, leuryér. Example/where i and v haue theyr diſtinct ſounde / horÿón, aÿde, haÿr, bevrÿav, avnér, oyſÿáv, as for haÿoÿe, croÿoÿe, ovÿoÿe/ and ſuche lyke/where many vowels come to gether by reaſon of the formation of tenſes/ all though that I expreſſe them nat in the vocabular/ yet the lerner ſhall knowe howe to ſounde all ſuche/ by reaſon of the rules that I ſhall gyue for the formation of tenſes / as ſhall more playnly appere in the thyrde boke. And as for all ſuche wordes as begynne eyther with i or v / hauyng a vowel next folowyng the ſayd i or v/ can neuer make any cõfuſion to the lerner/ with what caracters ſo euer they be wrytten : for generally throughe out all the frenche tonge / whan any worde begynneth eyther with i or v/the next letter immediatly folowyng beyng a vowell / the ſayd i and v be euer conſonantes : except begynnyng with i ÿurér to make or ware dronken / and ſuche as come of hym/and ÿuoíre for yuery : in whiche the y is a vowel / and the u next folowyng them a conſonant/and as for yuér for wynter/ his true orthographie is with an h . and except begynnyng with v onely vydér to go out or voyde/ whiche I fynde wrytten uvyder/ where the fyrſt v is a cõſonant and the ſeconde a vowell . By reaſon wherof the lerner maye alſo be ſure/that whan compoſicion is made with any of theſe wordes/ begynnyng with i or v / and theyr prepoſicions/as reſioýr auilenér the i and v ſhall euer be conſonantes / as they were afore in the ſimple / ſo that the i before o/ and the v before i be cõſonantes in theſe compoũde wordes/bycauſe theyr ſimples be ioyr and uilenér. But yet in theſe places/leſt the lerner ſhulde accuſtome any miſpronunciation / I ſhall vſe euer the caracters afore mencioned. But if a frenche worde haue no mo vowelles in hym but one onely diphthonge / in all ſuche wordes it can make no cõfuſion/how ſo euer the vowelles of the ſayd diphthonges be wrytten/ſaue that in aÿde, paÿs, and boÿs/eche of the vowelles maketh a diſtinct ſillable by it ſelfe/and ſo inhaÿr to hate/whiche as oftẽ as a and i come to gether in his conjugatyng they make diſtinct ſillables.

Regula unica. ¶ Ai in the frenche tong is ſounded lyke as we ſoũded ay in theſe wordes in our tong rayne/payne/fayne/diſdayne/that is to ſay/a/diſtinctly and the i ſhortly and confuſely.

Exceptio prima. ¶ Except in theſe wordes paÿs,aÿde,haÿr,in whiche i hath his diſtinct ſounde by hym ſelfe/as ſhall by his writtyng in the vocabular appere.

Exceptio ſecunda. ¶ Except alſo the fyrſt parſones ſingular of the future tenſes of verbes actiues in the frenche tonge / for where as all ſuche vniuerſally ende in ray / whan they be written/as diray / feray / parleray / conuertiray / in redyng and ſpekyng in ſuche contrays as theyr tonge is moſt parfit/they ſay direy / ferey / parlerey / conuertirey / ſoũdyng the a / lyke the moſt generall ſounde of e : and ſo of all ſuche other.

The ſoundyng of this diphthong oy. Cap. xiii.

Regula prima. ¶ Oi in the frenche tonge hath .ii. diuerſe ſoundes / for ſometyme it is ſoũded lyke as we ſoũde oy / in theſe wordes/a boye/a froyſe/coye/and ſuche lyke/and ſomtyme they ſounde the i of oy almoſt lyke an a.

Regula ſecunda. ¶ The generall ſoundyng of oi is ſuche in frenche as I haue ſhewed by example in our tong/ſo that theſe wordes/oyndre/ ioyndre/ poyndre/ moytie/ moyen/ roy / moy / loy / be ſonwded with them lyke as we wolde ſoũde them in our tonge.

Regula tertia. ¶ If s t or x folowe next after oy/in a worde of one ſyllable/ in all ſuche the i ſhalbe ſoũded in maner lyke an a/as for boys / foys / ſoyt / croyſt uoix / croyx / they ſounde boas / foas / ſoat / croaſt / uoax / croax / and in like wyſe in wordes of many ſillables/if oi be the laſt vowels of ỹ wordes/ hauyng s or t folowyng them/all ſuche ſhall ſounde theyr i of oi lyke an a/as aincoys / francoys / diſoyt / liſoÿt / iaſoyt / ſhalbe ſoudded aincoas francoas / diſoat / liſoat / iaſoat / and ſo of all ſuche other. But o and a in all ſuche wordes ſhalbe ſoũded as though they alſo made a diphthong/ and nat diſtinctly by them ſelfe. Except from this rule this worde boÿx for boxe/in whiche o and i haue eche theyr diſtinct ſounde.

The ſoundyng of this diphthong av. Capitulum.xiiii.

¶ Av in the frenche tonge ſhalbe ſounded lyke as we ſounde hym in theſe wordes in our tonge / a dawe / a mawe / an hawe. Except where a frenche worde begynneth with this diphthong av / as in theſe wordes / avlcún, ávltre, av, avſſi, avx, and auctévr, and all ſuche lyke: in whiche they ſounde the a / almoſt lyke an o / and as for in avner / a and v be diſtinct ſyllables / as ſhal appere by his writtyng in the frẽche vocabular. The ſoundyng of this diphthong ev. Cap. xv.

¶ Ev in the frenche tong hath two dyuerſe ſoundynges / for ſometyme they ſounde hym lyke as we do in our tonge / in theſe wordes / a dewe / a ſhrewe / a fewe / ſomtyme like as we do in theſe wordes / trewe / glewe rewe / a mewe.

¶ The ſoundyng of ev / whiche is moſt general in the frenche tong / is ſuche as I haue ſhewed by example in theſe wordes / a dewe / a ſhrewe / a fewe / that is to ſaye / lyke as the Italians ſounde ev / or they with vs / that pronounce the latine tonge aryght / as evrévx, irévx, liev, diev. Regula prima.

¶ If ev be the laſte letters in a frenche worde / eyther alone or with an s folowynge the worde beyng eyther a nowne adiectiue or a participle or the indiffinite tenſe of any verbe / than ſhall ev be ſoũded as I haue ſhewed by example / in theſe wordes / trewe / glewe / rewe / a mewe. Regula ſecunda.

Example of nownes adiectiues / of whiche adiectiues Iehan le Maire leaueth the e vnwritten / lyke as they ſhulde in dede be written / as iourchév, barbév, bovſſév, tortév. Example of participles / as decév, recév, bév, eſmolév, dev, crev, repév. Example of indiffinite tenſes / as docévs, recévs, bévs, crévs, repévs, with all other nombres and perſons / of them whiche participles and indiffinite tenſes alſo after the true perfection of the tonge ſhulde be written onely with v / and ſo I often tynde them but in decus, recus, decu, recu, leſt the reder ſhulde gyue vnto c before v the ſounde of k / they haue added alſo e / and in the other rather by cauſe of ſimilitude than for any trewe ſoundynge / for v alone hath ſuche a ſoũde / as I haue afore declared: but this ſhall in the thyrde boke / whan I ſpeke of the formation of tenſes / more playnly appere.

The ſoundyng of this diphthong ov. Cap. xvi.

Regula unica. ¶ Ov in the frenche tong ſhalbe ſounded lyke as the Italians ſounde this vowell v / or they with vs that ſounde the latine tong aright / that is to ſay / almoſt as we ſounde hym in theſe wordes / a cowe/a mowe/a ſowe/as ovltre, ſovdaÿn, ovbliér, and ſo of ſuche other.

The ſoundynge of this diphthonge vi / whiche is only proper to the frenche tonge. Capitulum. xvii.

Regula unica. ¶ For as moche as v and i come often together in the frenche tonge/ where as the v hath with them his diſtinct ſounde and the i is ſounded ſhortly and confuſely / whiche is the propertie of a diphthonge. I reken vi alſo among the diphthonges in the frenche tong / whiche whan they come to gether/ ſhall haue ſuche a ſoũde in frenche wordes/ as we gyue hym in theſe wordes in our tong/a ſwyne/ Idwyne/ I twyne/ ſo ỹ theſe wordes agvyſér, agvyllón, condvýre, dedvýre, aviourdhvy meſhvy, and all ſuche lyke ſhall ſounde theyr v and i ſhortly to gether / as we do in our tong in the wordes I haue gyuen eſtãple of/and nat eche of them diſtinctly by hymſelfe/as we of our tong be inclined to ſoũde them whiche wolde rather ſay aviovrdhv̈ỹ, dedv̈ỹt, ſaufcondv̈ỹt, gyuynge both to v and i theyr diſtinct ſounde/than to ſoũde them as the frenche men do in dede / whiche ſay aviourdhvy, dedvyt, ſaufcondvyt, ſoundyng them both ſhortly to gether/and ſo of all ſuche other.

What difference in ſounde is betwene i and y. Ca. xviii.

Regula unica. ¶ The writtynge of i and y / in any frenche worde eyther alone / or as part of a diphthong/cauſeth no difference in ſounde contrary to the rules/that I haue here afore reherſed / ſaue that y / where he is written alone / without an other vowell / eyther beyng the fyrſt letter of a worde or the laſte / ſhall haue ſuche a ſounde as I haue ſhewed before/ where I haue ſpoken of the ſoundynge of this vowel i.

That no vowell is left vnſounded/though there come neuer ſo many to gether in a frenche worde. Capitulum. xix.

Regula unica. ¶ Thoughe there come neuer ſo many vowelles to gether in a frenche worde / or that a worde be made onely of vowelles / as ovÿoÿe, haÿoÿe, and diuers

and dyuerſe ſuche other: yet in all ſuche wordes euery vowel/that they be written with / muſt be ſounded eyther diſtinctly or confuſely / accordyng to the rules that I haue here afore gyuen / ſo that where as we in our tong/that haue nat lerned how to rede the frēche tong / vſe to ſoūde mon per, ma mer, un hom, un fem, for mon pére, ma mere, ung hómme, une fémme. and alſo vſe to ſoūde premerment, dovſment, tenderment, for primieremént, dovicemént, tendremént, errynge both in the true ſoundyng of the vowelles/and alſo in the accent: we muſt leaue that kynde of redyng and pronounſynge/if we woll ſoūde the frenche tong aright. for as I haue ſayd / there is no vowell written in a frenche worde / but whan he is red or ſpoken by hym ſelfe/he muſt haue his ſounde ſhort or diſtinct/after the rules that I haue herafore reherſed. But as for queſſe for que eſt ce, and queſſy for que eſt ce cy, where in writtyng the letters be chaunged / that is nat vſed of any proued auctor / but oncly of ſuche/as writte farcis / and contrefait the vulgar ſpeche. And this for the trewe ſoundynge of vowels and diphthonges in the frenche tonge/ I ſuppoſe to be ſufficient/and howe they conſonantes ought to be ſounded/it ſhall hereafter appere: But fyrſt I ſhall ſpeke of the ſoundyng of this letter h / apart by hym ſelfe.

The ſoundynge of this letter h/whan he hath his aſpiracion / and whan he hath it nat/and what is ment by aſpiration. Cap. xx.

¶This letter h/where he is written in frenche wordes/hath ſomtyme ſuche a ſoūde as we vſe to gyue hym in theſe wordes in our tong/haue/ hatred/hens/hart/hurt/hobby/and ſuche lyke: and than he hath his aſpiration/and ſomtyme he is written in frenche wordes/& hath no ſoūde at all/no more than he hath with vs in theſe wordes/honeſt/honour/habundaunce/habitacion/and ſuche like: in whiche h is written/and nat ſounded with vs. whiche thynge alſo happenneth in the frenche tonge in all ſuche wordes as be deducted out of latin wordes/ whiche be written with h / and ſounde hym nat in that tong/as in theſe wordes habit, hérbe, homicide, hóſte, humble, the h ſhall nat haue his aſpiration: for the latin wordes that they come of/though they writte h ſounde it nat/ as apereth by habitus, herba, homicida, hoſpes, humilis, and ſo of all ſuche other: and to make the lerner ſure of this thyng in the frenche tong: I ſhall reherſe in order all theyr wordes/whiche hauyng h at theyr begynnyng/giue hym his aſpiration/ſo that if h be written in any worde nat conteyned among theſe/the reder may be ſure/that he ſhal nat haue his aſpiration/and that the h is written only for kepyng of true orthographie/and nat to be ſounded. Regula unica.

Here after folowe all ſuche wordes in the frenche tong/as hauyng h written at theyr begynnynge/gyue hym his aſpiracion. Cap. xxi.

¶ Notynge fyrſt that all proprе names begynnynge with an h/ gyue hym his aſpiration/as Henry, Huét, Húges.

To knowe how conſonantes ought to be ſounded in the frenche tonge. Cap. xxiiii.

Regula unica.

NOwe that I haue declared / howe the vowelles and diphthonges of the frenche tonge ought to be ſounded / and alſo whan h ſhall haue his aſperation / and whan nat / reſteth to ſhewe & declare / howe they ſoũde theyr conſonantes / and what conſonantes they vſe to writte for the keppynge of true orthographie : and yet in redynge or ſpekyng they ſoũde them nat : for the ſhewynge of whiche thynge / I ſhall fyrſt by certayne generall rules expreſſe / howe all maner conſonauntes ſhulde be ſounded / as they be written in any worde by hym ſelfe / both in theyr fyrſte ſyllables / meane ſyllables / and laſt ſyllables : and after intreat particularly of the ſowndynge of euery conſonant by hym ſelfe / referrynge the lernar to the generall rules / where as they folowe them : and all ſuche particular ſounde as any of theym hath / I ſhall in his place / whan I ſpeke of hym / apart declare it at length : and after I wyll ſhewe howe frenche wordes ſounde theyr conſonantes / as they come to gether in ſentences.

A generall rule for the true ſoundyng of cõſonantes as they come to gether in the fyrſt ſyllables of any frenche worde by hym ſelfe. Ca. xxv.

Regula prima.

WHan ſo euer at the begynnyng of a frenche worde afore the vowell / there cõmeth eyther one cõſonant or .ii. they ſhal euer in that place haue theyr diſtinct ſounde / ſuche as the latine tonge vſeth to gyue them / as baniére, cáuſe, dart, famine, garcón, iávne, máyn, nation, payn, quant, ráine,

ráine, ſáin, tant, ſcabélle, pláyndre, clamévr, cráynte, ʒéle, ʒoliáque, in whiche the conſonantes afore the fyrſt vowell/haue ſuche ſoũde as they haue in latine/or as we wolde ſounde them in our tonge. Excepte p s/ whiche they ſounde but s/ ſayeng for pſálme pſaltére ſalme ſaltere, by= cauſe they can nat gyue p s/ whiche is a greke letter/ his true ſounde. Except alſo x/ if he be the fyrſte letter of a worde/ as xenotróphe xylo= balſóme, whiche they ſounde but s/ ſayenge ſenotrophe ſylobalſome/ for they can nat gyue x/ whiche is alſo a greke letter/ his true ſownde. Except alſo tyis verbe ſcauóir/ and all the modes and tenſes of hym/ in whiche they ſounde s and c lyke s onely/ ſayeng ſauoir, as for ſcience, deſcéndre, and ſuche other/ in the frenche tong they ſounde alſo they= ſc but lyke ſ/ for they can nat gyue ſc in latine wordes they= trewe ſo= mayn ſounde.

Exceptio prima.

Exceptio ſecunda.

Exceptio tertia.

¶ And note that it is nat the nature of the frenche tonge/ to haue many conſonantes at the begynnynge of they= wordes/ to come before the vo= well/ ſo that for the moſt part/ where as the latine worde hath .ii. con= nantes or .iii. cõmyng before the vowel/ in the frenche worde/ that is ta= ken out of the latine/ they vſe to put re or e at the begynnynge of the worde before theſe conſonantes/ ſo that where the Latins ſay ſplendeo, ſcribo/ ſtringo, ſtudeo/ ſcandalũ/ ſchola/ ſcutum/ ſpecies/ ſpada/ ſpero/ ſpi= ritus, ſtabulum, ſtella, ſtola/ they ſay reſplendír/ eſcripre/ eſtráyndre/ eſtu= diér/ eſclándre/ eſcóle/ eſcú/ eſpéce/ eſpée/ eſperér/ eſpirit/ eſtáble/ eſtoille/ eſtólle/ and ſo for the moſt part of all ſuche like/ ſo that I fynde nat in the frenche tong any auctor/ that hath a worde/ hauyng .iii. conſonantes be fore his firſt vowel/ ſaue only in Jehã le Maire/ whiche vſeth ſplendeúr and ſtrideúr: But I iuge hym among other writers in the frenche tong to be like/ as amonge Latine auctors lerned men iudge Apuleius. But what my iudgement is of hym/ ſhall in my prologue vpon the ſeconde boke more playnly appere.

Regula ſecunda.

Six general rules for the true ſoundyng of conſonantes/ as they come in the mean ſillables of frenche wordes. Cap. xxvi.

Regula ſecunda.

Regula tertia. ¶ Thyrde/whan ſo euer two conſonantis come to gether in any meane ſillable both belongyng to the vowell folowyng/they ſhall eche of them haue theyr diſtinct ſounde/as nóble, ácre, ſóvple, dóvble.

Regula quarta. ¶ Fourth/whan ſo euer two conſonantis come to gether/ of whiche the firſt belongeth to the vowel that goeth before/& the next to the vowel folowyng/the fyrſt of them only ſhalbe left vnſoũded/as ſovldaín, lvictér, dictón, adiugér, dígne, multitúde, deſpéns, reſpit, ſhalbe ſoũded ſoudaín, diton, aiuger, dine, moutitude, depens, reſpit, and ſo of all ſuche other.

Regula quinta ¶ Fyft/whan ſo euer.iii.conſonantis come to gether betwene.ii.vowelles/of whiche the fyrſt belongeth to the vowel goynge before / and the other.ii.to the vowell folowyng / the fyrſt onely ſhalbe left vnſounded/ as óvltre, aſſoúldre, tíltre, epiſtre, ſubſtánce, ſhalbe ſounded ovtre, aſſovdre, titre, epitre, ſuſtánce, and ſo of all ſuche other.

Regula ſexta. ¶ Syxt / whan ſo euer.iii.conſonantis come to gether / of whiche two belong to the vowel that goeth before/ and but one to the vowell folowyng both the fyrſt ſhalbe left vnſoũded or one of them/ if the other be m/n/or r/ as ſcovlptúre, movlctúre, domptér, ſumptuévx, ſhalbe ſounded ſcouture, movture, domter, ſumtéux.

Regula ſeptima ¶ And note that by theſe rules it doth appere/that ſome.iii.cõſonantes may haue theyr diſtinct ſounde/ though they come together in mean ſillables/as in theſe wordes ſímple, óncle, paÿndre, faÿndre, and ſuche like for theyr fyrſt conſonant muſt nedes be ſoũded bycauſe of the fyrſt rule/ and the other.ii.bycauſe of the thyrde rule.

ouer/ referryng the lernar in all ſuche to the general rules/and ſuche as haue any other diuerſite in ſoūde or ꝑticular exceptiō/ I ſhal declare it in euery of theyr places at lēgth. And for bycauſe ꝑ b differeth nothyng from the generall rules aboue reherſed/ I ſhall by exāple of hym ſhewe the lernar/howe he ſhall in lyke wyſe apply the generall rules to the other conſonantes/that in lyke wyſe differre nothyng from them.

A declaracion of theſe generall rules by the example of this conſonant b. Cap. xxviii.

Regula prima. ¶ If b be the fyrſt letter in a frenche worde / eyther alone or with an other conſonaunt with hym / he ſhall in that place be ſounded lyke as he is in the latine tong or in our tong/ accordyng as I haue ſhewed in the fyrſt general rule of the ſoūdyng of the fyrſt ſyllables/as bátre, benigne, bigáme, bonté, bviſſón, blanc, bragvér, and all ſuche lyke/ ſhalbe ſoūded in frenche like as they be in latine.

Regula ſecunda. ¶ If .ii. b come to gether in the mean ſyllables/than accordyng to the ſeconde rule of meane ſyllables / eche of theym ſhall haue theyr diſtinct ſounde/as rabblér.

Regula tertia. ¶ If b/ ioyned with an other conſonant / belong both to the vowell folowynge / than ſhal b / accordyng to the thyrde rule there/haue his diſtinct ſounde/as nóble, ſóbre, dóvble.

Regula quarta. ¶ If b and an other cōſonant come to gether in the mean ſyllables/the b belongyng to the vowell that goeth before/than/ accordyng to ꝑ .iiii. rule there / he ſhalbe left vnſounded/as ſovbdain, dóubte, ſhalbe ſounded ſovdain, dovte.

Regula quinta ¶ If b be one of the .iii. cōſonantes/cōmyng betwene .ii. vowels/the b belōgyng to the vowell that goeth before/tha accordyng to the fyft rule there/he onely ſhalbe left vnſoūded/as ſubſtánce ſhalbe ſoūded ſuſtance.

Regula ſexta. ¶ If b /where there is .iii. conſonantes cōmyng betwene .ii. vowelles/ be one of the .ii. belongyng to the vowell that goeth before: than/accordyng to the .vi. rule there / b ſhalbe left vnſounded/ as ſovbſtrayt, ſovbſtrayre, ſhalbe ſounded ſovſtrait, ſovſtraire.

Regula ſeptima ¶ Alſo if any frenche worde ende in b onely / as I remembre none/thā accordyng to the .iii. rule of laſt ſyllables/he ſhuld be remiſſely ſoūded.

Regula octaua. ¶ If a frenche worde ende in b / the next letter goyng before beyng m/ n/or r / than/accordyng to the .iiii. rule there / he ſhalbe remiſſely ſounded/and in maner left vnſounded/as plomb, cólomb.

Regula nona. ¶ If a frenche worde ende in .ii. conſonantes / b / beyng the fyrſt : than accordyng to the fyft rule there / he ſhalbe left vnſounded / as deſſóubz. and ſo of the other .ii. rules folowynge there / if b ſhall fortune to come in any

in any worde in suche ordre as the rules speke of: and this applyenge of this consonaunt b / to the rules aboue rehersed / I wolde the lernar shulde diligently note / for lyke as I thynke it but superfluous to kepe suche ordre in all other consonantes/ whiche folowe the generall rules / so thynke I it necessary of one to gyue a playne example/ for I may the better be shorte whan I come to the residue/saue onely where nede is.

The soundyng particular and propre to this consonant c. Cap. xxix.

Regula prima.

C C / cõmynge next before the vowelles in the frenche tonge/hath two diuerse soundes: for c / comyng before e or i / shalbe soũded with them lyke as he were an s / as for cẽdres, cent, ceynctúre, cire, ciel, ciercle, cité, they sounde sendres, sent, seincture, sire, siel, siercle, site, and so of all suche other/lyke as the Latins do.

Regula secunda.

C C / cõmyng before a/o/or v / shal haue the soũde of k / as cávse, cóste, custóde, shalbe sounded kavse, koste, kustode, and so of suche other.

Exceptio prima.

Except where c cõmeth before a or o/ in the formatiõ of suche tenses as come of verbes of the fyrst conjugation in the frenche tonge/hauynge c before er in theyr infinitiue mode: for in all suche tẽses through al theyr nombres and parsons/c shall haue the sounde of s / as where as of corroucér cõmeth after the formation of tenses in the frenche tonge corrovcóye corrovcáy corrovcánt, and of groncér groncóye groncáy groncánt, despecér despecóye despecáy despecánt, in al suche c/comyng before oye/ a y / or ant / shall haue the sounde of s / and nat of k. But many tymes I fynde in suche tenses an e added next after the c / as lacér laceóye laceáy laceánt/ whiche they vse to writte / to shewe that c in suche verbes may nat haue the sounde of k. Except also these. ii. present tenses ie recóys and ie decóys, bycause they be formed of recipio and decipio, whiche shulde make decus and ay decu, recus and a y recu. But lest the reder shulde gyue c the sounde of k / they vse to adde an e / as I haue afore touched/ where I spake of the diphthõg ev. And this nowne lecón bycause of lectio, and these wordes here after folowyng. Ca/eyther by hymselfe/or whan he is compounde with other wordes / as decá, piecá, deflorsencá, orcá, and suche lyke. And rancón ranconnér, estancón, estanconnér, facón faconnér, limacón, hamacón, plancón, arcón, hericón, garcón, suspecón, chancón, tencón, aincóys, frãcóys, and cáyndre, whiche I wolde writte céyndre. in whiche/and all the wordes formed of theym / c cõmyng before a or o / shall haue the sounde of s/and nat of k.

Regula tertia.

C And note that like as they sounde c alone/cõmyng before e or i/ like an s / so do they whan s is ioyned vnto hym/as scéptre, sciénce, and all suche

ſuche like/ſo as I haue afore touched in the.xxv. chaptre. In all other wordes in the frenche tonge/how c ought to be ſoũded/whan he is ioyned with other conſonantes/I haue ſufficiently ſhewed in the generall rules aboue reherſed/and declared by example of this conſonant b.

The ſoundynge of this conſonant g. Cap.xxxii.

Regula prima. ¶ G/ cõmynge next before the vowels in the frenche tong/ hath.ii. diuers ſoundes/for g cõmyng before e or i ſhalbe ſoũded with them like i/whan he is a conſonant/as géndre, gingémbre, ſhalbe ſounded iendre, iingembre.

Regula ſecunda. ¶ G/ cõmyng before a/o/or v/ ſhall haue ſuche ſoũde as he hath in latin in theſe wordes gaudium, gomorra, gula, whiche is almoſt lyke a k. Except where g cõmeth before a or o/ in the formation of ſuche tenſes/ as come of verbes of the fyrſt coniugation in the frenche tong/ haunge g before er in theyr infinitiue mode: for in all ſuche tenſes thrugh all theyr nombres and perſons/ g ſhall haue the ſounde of i/ whan he is a conſonant/as where as of longér after the formation of tenſes in frẽche is formed/ longoye longay longant, of oubliger oubligoye oubligay oubligant, & of corriger corrigoye corrigay corrigant, in all ſuche g/cõmyng before oye/ay/or ant/ ſhall haue the ſounde of i/whan he is a cõſonant/ and nat as he hath in the latin tong. how be it for the moſt part thrugh out all the frẽche tong/ in all ſuche tenſes I fynde an e written betwene the g and the a or o folowyng/as longeoye longeay longeant. obligeoye oubligeay oubligeant. corrigeoye corrigeay corrigeant/ whiche they do/leſt the redar ſhulde ſounde g/ in ſuche tenſes amyſſe: lyke as they writte for mengús, and, mengúſſe mẽgeus & mengeuſſe, and ſo of al ſuche where

where as by reaſon of coniugation g and b / ſhulde come to gether / ſo oft as ỹ infinitiue mode endeth in ger / where as i the rules of fo;ma tion of tenſes in this tonge were kept / there ſhulde none e be wꝛitten. fo; like as they ſay aſſorber aſſorboye aſſorbay, corroycer corroycoye corrovcay, tardér tardóye tardáy, truffér truffóye truffáy, covier covloye cov láy, aymér aymóye aymáy, acharnér acharnóye acharnay, harpér harpóye harpay, danſér danſóye danſay, hevrtér hevrtóye hevrtay, kepyng alway befoꝛe oye and ay the conſonant that cõmeth befoꝛe er in the infinitiue mode / ſo ſhulde we vp lyke reaſon wꝛitte ſonger ſongoye ſongay. but of theſe two I ſhal ſpeke moꝛe at length in theyꝛ place in the thirde boke. Except alſo g cõmynge beꝛoꝛe o in theſe woꝛdes bourgóys, bourgoyſe, bourgón, havlbergón, dongón, how be it many tymes I fynde theſe woꝛ des wꝛitten with an e / betwene the g and o / and ſometyme with i the conſonant in the place of g.

Excepti ſecunda.

Of this letter h / whan he hath the power of a con= ſonant and whan nat. Cap. xxiii.

¶ Though it appere ſufficiently / where as I ſpake of h beſoꝛe / that he is no conſonant in the frenche tong / but onely an addynge of a ſtronger ſounde to the bowell that folowyth hym. yet if h come in the mean ſyl= lables of a frenche woꝛde / hauyng his aſpiration / the ſyllable next com= yng beſoꝛe hym endynge in a conſonant / than ſhall h haue the power of a conſonãt / and cauſe the conſonant belonyng to the bowel that goth beſoꝛe / to be left vnſoũded / accoꝛdyng to the .iiii. rule of mean ſyllables / as eſhontér, deſhontér, deſhovſér, treſhavlt, ſhalbe ſoũded ehonter, de= honter, dehovſer, trehavlt.

Regula prima.

¶ But if h cõmyng in the mean ſyllables haue nat his aſpiration / than he changeth nothyng the ſounde of the conſonant goyng beſoꝛe hym no moꝛe than if he were nat wꝛitten / as in treſhonevre, deſhoneſte, deſhabi= tuér, and ſuche like: in whiche the s hath his diſtinct ſounde. And lyke power hath h / hauynge his aſpiration / whan he is the fyꝛſte letter of a frenche woꝛde: foꝛ where as woꝛdes ỹ be wꝛitten with h / nat hauynge his aſpiratiõ admitteth certaine woꝛdes cõmyng beſoꝛe them to be toy= ned to them in wꝛittyng as wel as woꝛdes begynnyng with vowelles / as dhonnévr, lhomme, lhabit, in ſuche woꝛdes as haue theyꝛ aſpiration / we can not do ſo / no moꝛe than though they began with conſonantes / ſo that we can nat ſay dhonte, lhayne, lheavime, but de hónte, la háyne, la heávime, bycauſe that in theſe laſt woꝛdes h hath his aſpiration. but of this thyng I ſuppoſe in this place ſufficient to warne the lernar / foꝛ I ſhall heꝛe after in the ſeconde rule of the .lv. chaptre in this boke / ſpeke

What wordes there be in the frenche tong endyng in e or a/ whiche in writtyng alſo leaue out theyr e or a/ and ioyne theyr conſonantes to the vowell of the wordes folowyng. Cap.l.

¶There be certaine wordes in the frenche tong endyng in e/and ſome fewe endyng in a: whiche nat onely in redyng or ſpekynge leaue theyr vowels vnſounded/ but alſo whan ſo euer they writte them in any ſentence/they leaue out theyr laſt vowel/and ioyne the laſt cõſonant or letters cõmyng next before the vowel/to the vowel of the next worde folowyng/or vnto h/ if the worde next folowyug begynne with h/ nat hauyng Regula prima.

uyng his aſpiration / as though they were the firſt letters of the worde folowyng / whiche myght cauſe a great dout to the lerner / whā he ſhuld fynde no worde ſo written in the frenche vocabular: or paraduenture if he founde a worde written with ſuche letters / it myght be of a far diſferent ſignification from the ryght worde in dede / whiche of hym ſelfe begynneth with a vowell: and therfore I ſhall here conſequently reherſe al the wordes in the frenche tong that be of that ſort. Notyng firſt that in nownes / verbes / participles / and interiectiōs of the frēche tong there be no wordes that be of this ſort.

What pronownes ende in e or a / whiche in writtyng leaue out theyr vowel / and ioyne theyr conſonantes to the wordes folowyng. Cap. li.

Regula prima.

¶ Pronownes of the frenche tonge of this ſort / there be. viii. Je / me / te / le / la / ſe / ce / and que for quid. Je as for ie ayme, ie endure, they writte iayme, iendure, leauyng out the e of ie / and ioynyng the conſonant to the vowel of ỹ verbe folowyng. And in lyke wyſe for ie me habite, il me áyme, il me endúre, they writte and ſownde thus / ie mhabite, il mayme, il mendure. and alſo for ie te áyme, ie te endúre, ie tayme, ie tendure, and for ie le áyme, ie le endúre, ie layme, ie lendure. and for il ſe áyme, il ſe endúre, il ſayme, il ſendure. and for ce eſt they ſay ceſt. and for que auēz uous, quauez uous. but as for ella tort for elle a tort, and ſuche like is only vſed of ſuche as writte in ryme / like as they ioyne tel and quel / and ſuche other adiectiues endyng in el / to nownes of the femine gendre / as tel paóur, quel amour, mortel pláye, memóire perpetuél, wherof I ſhall ſpeke more in the thirde boke / whiche I wolde the lerner ſhulde wel note. for thoughi I ſhall here after in the ſecōde and thyrde bokes writte the verbes from the pronownes / & nownes from theyr articles: & in likewyſe alſo ſeuer ỹ other partes of ſpeche that folow this rule / bycauſe I wold the lerner ſhulde the more diſtinctly perceue one worde by an other: yet if he writte them in any ſentence / he muſt in euery poynt kepe this rule / accordyng as I in this place declare vnto hym. And note that this kinde of writtyng they vſe ſpecially / whan the verbe beginneth with a / e / or o / and but ſeldome or neuer with verbes begynnyng with i / or v / for before ſuche / they vſe for the moſt part to writte theſe pronownes at length.

Regula ſecunda.

¶ But where as in maner of all ſuche auctors as vſe to writte in ryme / I fynde vſed gy or ge / ſayeng nayge, ferayge. Se gy oſſaſſe la main tendre, and ſuche lyke for ie / y / nay ie, feray ie, changyng the i of ie in g / whiche thyng / whan they writte in proſe / they vſe nat. And I can ſe no cauſe

cauſe/why they ſhulde change the letter / but bycauſe it is agaynſt the nature of the frēche tonge to haue two Ĵ Ŧ or Ĵ y/ or y Ĵ/to come immediatly togyder/ as Ĵ haue ſōthynge afore touched. Except where the firſt ꝑſon of the ꝑterimpfectens endeth in yoye, as fvyóye ouyóye, & ſuche like for ſythe all ſuche in their firſt & ſeconde perſons plurell ende in yous and yez, we muſt nedes haue two ï ï come togupder/ & ſaye Fuÿÿons fuÿÿez, ouÿÿous ouÿÿes, For if we wrote but one ï/ we ſhulde confounde the perſons of this tens/ with the ſame perſons of their preſentenſes.

What prepoſitions leaue out their e in writynge and toyne their conſonantes or letters to the worde folowyng. Cap. lii.

Regula unica.

¶ Prepoſitions of this ſorte be foure/ Cóntre, éntre, de, and re, whiche is onely vſed in compoſiton/Contre, as for contre eulx, contre élles, cóntre hómmes, cóntre áme, they write contreulx, contrelles, contrhómmes, contrame. Entre, as for éntre énlx, éntre élles, éntre áultres, they write Entreulx, entrelles, entraultres, which alſo they vſe in cōpoſitpon with entre/and verbes begynnynge with vowelles/ as for Entre aymér, éntre eſpouſér: entraymer entreſpouſer. De as for de or de argént, de auécques, de hómme, de auóyr, de áme: they write Dor, dargent, dauecques, dhōme dauoyre, dame. Re, whiche as Ĵ haue ſayde/ they vſe onely in compoſytion with verbes/ as for Re auóyr, re appellér, reamendér: Rauoir, rapeller remander. and ſo of ſuche lyke.

What aduerbes leaue out their e/ in writyng/ and toyne their conſonant to the wordes folowyng. Cap. liii.

Regula unica.

¶ Of aduerbes in the frenche tonge beyng of this ſorte / Ĵ fynde no mo but Ne and que for than: As for Ie ne áyme, Ie ne endúre, ie ne óſe: They write Ie nayme, ie nendure, ie noſe, and for non plus que a moy: moyns que a ung áultre, ains que aymér, they write nō plus qua moy, moyns qua ung aultre ams quaymer, and ſo of ſuche lyke. But whan the verbe begynneth with ï or v/ they vſe ne on this maner but ſeldome. And as for Iuſquavmourír, iuſqvadix & ſuche lyke/ vſed of ſuche authours as write in ryme/ for iuſq̄s av mourír, iúſques a dix, it is nat by reaſon of this rule/ no more than encor vſed for encóre, or hom or com for hóme or cóme, & ſuche lyke/ whiche auctors do rather by a lycēce poetycall/ than for the aduoydyng of any yuell ſounde: For thoughe the olde Romayne tonge vſe many ſuche wordes/

wordes the trewe frenche tonge leaueth neuer the e/ of ſuche wordes on writtē/thoughe they maye be lafte vnſounded/accordyng to the rules afore reherſed.

What conſunctions leaue out their E in writyng/ and ioyne their conſonantes to the worde folowyng. Cap. lxiii.

Regula unica. ¶ Conſunctions in the frenche tonge of thisſorte I fynde but ſe, whiche is often tymes writtē ſi. as for Si aulcun, ſe elle, ſi il: they write Saulcun ſelle ſil, and ſo of ſuche other.

Of le and la, whiche though they be comprehended vnder none of the latyn. viii. partes of ſpeche/ yet alſo folowe this rule. Cap. lv.

Regula prima. ¶ Beſydes theſe wordes aboue reherſed/ they be two other whiche haue the ſame propertie: That is to ſaye/ Le and la, whiche I haue nat reherſed vnder any of the .viii. partes of ſpeche/ of the latyn tonge: for the latyns haue no ſuche wordes/ but we in our tonge haue wordes of lyke ſignification/ whiche is this worde/ The: as where they ſaye in frenche/ Le máiſtre la dáme, we ſaye in our tonge/ the mayſter the lady: So that this worde / the/ with vs/ counter vayleth bothe le and la. And therfore ſythe the latyn tonge hath no ſuche wordes/ and that the frenche tong hath certayne other that be of lyke ſorte/ I ſhall in the ſeconde boke whey I make reherſall of the partes of ſpeche in the frenche tonge call them articles/ borowyng a name for them of the grekes/ whiche alſo haue wordes of lyke ſignifycation and propertie in their tonge: But nowe to ſhewe howe the ſayde le and la folowe this rule / Le, as for le abbé, le ennemÿ, le hóme, le habit, le innocént, le oyél, le vſaige: they write Labbe, lennemy linnocent lhómme lhabit loyel luſage, alſo of all other. La as for la abbéſſe, la enuie, la ymáge, la ouertúre, la vnión, la habitatión, la habitúde, they write Labbeſſe, lenuie, lymage, louuerture, lvnion, lhabitation, lhabitude, and ſo of all ſuche other.

Regula ſecunda. ¶ And note/ that where as I haue in all this chapiter gyuen example of h/ whan he hath nat his aſpiration: I meane therby that h whan he hath his aſpiration is excepted from this rule/ for he hathe than the power of a conſonant/ as I haue ſhewed before/ ſo that though I maye write for La habitión, la habitúde, la humilite: Lhabitation, lhabitude, lhumilite, by cauſe h hath nat his aſpiration/ I can nat write lhayne, lhevrt, lheaulme, for

foꝛ la hayne, le heure, la heaulme, foꝛ the h in theſe woꝛdes is aſpirate/ as apereth by my rules herafoꝛe declared: and therfoꝛe ſo often as I cometh befoꝛe h hauyng his aſpiracion/ as I fynde hym cõtyme in Mayn Charter/ it is the errour of the pꝛinters/ whiche knowe nat their owne tonge. And this difference appereth euydently in this woꝛde hevre / whiche hauynge his aſpiratyon/ betokeneth a Booꝛes heed/ hauyng it nat/ it betokeneth an houre/ ſo that lhevre betokeneth the hour/ and nat the Booꝛes heed: foꝛ I muſt nedes in that ſignifycation wꝛite le hevre. And this foꝛ the trewe ſoũdyng of bowelles/ diphthonges/ & conſonantes in the frẽche tonge/ bothe in the frenche woꝛdes by them ſelfe and as they come togu̇yder in ſentences/ I ſuppoſe to be ſuffycient.

To kepe true accent in the frenche tonge/ and what this woꝛde accent ſignifieth. Cap. lvi.

¶ Accent in the frenche tonge is a lyftinge vp of the voyce / vpon ſome woꝛdes oꝛ ſyllables in a ſentence/ aboue the reſydue of the other woꝛdes oꝛ ſyllables in the ſame ſentence /ſo that what ſoeuer woꝛde oꝛ ſyllable as they come togu̇yder in any ſentence/ be ſowned higher than the other woꝛdes oꝛ ſyllables in the ſame ſentence vpon them/ is the accent: and vpon whiche woꝛdes oꝛ ſyllables the redar ſhall lyfte vp his voyce / and vpon whiche nat/ it ſhall here after appere. And note/ that ſuche lyftinge vp of the voyce happeneth euer by reaſon of ſome vowell oꝛ diphthonge/ & neuer by reaſon of any conſonant. Regula unica.

That no woꝛde of one ſyllable in the frenche tonge/ hath any accent. Cap. lvii.

¶ Generally there is no woꝛde of one ſyllable in the frenche tonge that hath any accent/ except the compyng next vnto a poynt be the cauſe of it/ ſo that whan a woꝛde oꝛ two oꝛ thꝛe oꝛ mo/ beyng but of one ſyllable folowe one another/ the redar ſhall ſounde them all vnder one tenour/ and neuer reſt vpon thẽ noꝛ lyft vp his voice/ tyll he come to the next woꝛde of many ſyllables that foloweth / as Il a vng corps fort ámiable, tu dis vray mayntenánt, ſhalbe ſounded in redyng and ſpekyng / Il avncor, fortamiable tv disvraymantenánt, lyfting nat vp the voyce/ but vpon the ſeconde a of amiable and mayntenánt onely/ and ſo of all other of one ſyllable thoꝛowe the frenche tonge. Regula prima.

¶ But if it happe that all the woꝛdes in a ſentẽce be of one ſyllable/ than ſhall Regula ſecunda.

ſhall they be all reed ſhortely togyder/ tyll the redar come to that worde of one ſyllable that cometh next vnto the poynt/and they ſhall he lifte vp his voyce and pauſe/rather by reaſon of the poynt/as I haue ſayd/ that nert foloweth/ than by reaſon of the wordes ſelfe/ as ſhall appere by example in theſe ſentẽces De ſon bon gré il me faict tórt. Ie ne ſcay pas que céſt, quil veult de móy. Car mõ las cueur, pour vous ſe meúrt, & al ſuche other ſhalbe ſoũded in redyng & ſpekyng/ Deſonbongré ilmafaitórt. Ieneſaypaquecét quí uendemóy carmonlacueur pourvouſemeúrt, lyſtyng nat vp the voyce but at gre, tort, ceſt, moy, cueur, and meurt. & ſo of all ſuche other. And this is an other great cauſe/ why the frẽche tong ſemeth ſo brefe and ſodayne in pronounciacion / and ſo harde to be perceyued by a lernar. And note that in al interrogations and anſweres they vſe to ſoũde the laſt vowel hygheſt without pauſyng / tyll they come thervnto: excepte the laſt worde ende in e / and wyll haue his accent vpon the laſt ſillable cõmyng before: but euer the laſt worde ſhalbe ſounded hygheſt: as Le roy, ou ſen ua ilz combien me baillez uous? and ſo of all ſuthe other.

That all the wordes in the frenche tonge beyng of many ſillables haue theyr accent eyther on theyr laſt ſillables or on theyr laſt ſillables ſaue one. Cap. lviii.

Regula prima.

¶ Generally all the wordes of many ſillables in the frenche tong/haue theyr accent eyther on theyr laſt ſillable / that is to ſay / ſounde the laſte vowell or diphthong that they be written with / hygher than the other vowels or diphthonges cõmyng before them in the ſame worde. Or els they haue theyr accent on the laſt ſillable ſaue one/ that is to ſay/ſounde that vowel or diphthong/that is the laſt ſaue one hygher thã any other in the ſame worde cõmyng before hym: and whan the redar hath lyftyp his voyce at the ſoũdyng of the ſaid vowel or diphthong/he ſhal whan he cõmeth to the laſt ſillable/deprẽſſe his voyce agayne: ſo that there is no worde throughout all the frenche tonge/that hath his accent eyther on the thyrde ſillable/or on the forth ſyllable frõ the laſt / like as diuerſe wordes haue in other thonges: but as I haue ſayd / eyther on the very laſt ſillable/or els on the next ſillable onely.

Regula ſecunda. Exceptio

Except diuerſite in ſignification cauſeth it/where the worde in writtyng is alone/as I ſhall here after declare / reherſyng ſuche wordes in the frenche tong as be of this ſort.

¶Generally all the verbes of the fyrſt conugacion in the frenche tong haue theyr fyrſt parſons ſingular of the preſent tenſe in the indicatyue mode and theyr partycyple preterit / wrytten with lyke letters / onely the dyuerſite of accent ſheweth the dyfference / as I ſhall here after declare. Exceptio prima.

¶Alſo nownes in the frenche tonge there be diuerſe of this ſort / as pesché betokeneth ſyn / péche a peche a kynde of frutte / coſté a ſyde / cóſte a rybbe / paſté a paſty / páſte paaſte to baake with / foſſé a dytche aboute a towne / fóſſe a pytte / conté an erledome / cónte an erle / cúre a cure a perſonage / curé a curate a parſon / bále a bale of any marchandiſe / balé a bales a precioullone / márche a bondes or a marke betwene contrey & cõtrey / marché a bargen or a marketſtede or cheepe / as good cheepe bon marchié / parenté a kyndred / paránte a kynſwoman / clére clerce / cleré clary a kynde of wyne / pére a father / peré pery a kynde of drynke / pie a ppe bryde / pié a foote / whiche I wolde wrytte pied / plánche a planke a brydge / planché the flozth of any thyng that is bourded / ápres ſharpe in plurali, aprés afterwarde / fille a daughter / fillé a ſpyndel with threde vpon it / or a haye for coonys. and of this ſort I fynde fewe ſuche other. What wordes in the frenche tonge haue theyr accent on theyr laſt ſyllable ſaue one. Capitulum. lx.

¶Generally through out all the frenche tonge / all maner of wordes of many ſyllables / what partes of ſpeche ſo euer they be / if they ende in e / or in es / they ſhall haue theyr accent on theyr laſt ſyllable ſaue one / as hómme, fémme, dovlovrévſe, cóntre, éntre, óultre, áyme, whan he is the fyrſt parſone of the preſent tenſe / aymóye, conuertíe, aymée, aymáſſe aymeróye, a lencóntre, cómme, hómmes, fémmes, dovlevrévſes, aymées, auécques, dónques, and ſo of all other: ſo that the redar ſhall in all ſuche wordes lyfte vp his voyce / whan he cõmeth to the vowell or diphthong next afore e or es / and whan he commeth to the ſoundynge of them / ſodaynly deprelſe his voyce agayne / whiche ſodayne fall of the voyce at the ſoundyng of the ſayd e or es / cauſeth that e / cõmyng in that place / is ſoũded in a meane voyce betwene e and o / and moche in the noſe / as the lernar ſhall eaſely perceyue / if he aſſay to ſounde the wordes that I haue here reherſed for example / accordynge as I haue here and in his place before deſcribed. But this general rule hath two exceptions. Regula unica.

Exceptio prima. ¶ Fyrſt/for all ſuche nownes in the frenche tonge as ende in te / whoſe englyſſhe alſo with vs endeth in te / bycauſe we vſe the ſame wordes in our tonge/or whoſe englyſſhe endeth in heed/as godheed/manheed/ or in neſſe/as goodneſſe/fayreneſſe/al ſuche nownes in the frenche tong with theyr plurell nombres / ſhall haue theyr accent on theyr laſt ſillable: as charité, humanité, deité, bonté, beavlté, charités, deités, humanités, bontés, beavltés, and ſo of all ſuche lyke. But in other wordes / to theym that be lerned / to expreſſe thys thynge more playnely / all ſuche ſubſtantiues as in the latine tonge ende in tas / eſpecially yf they be ſuche as the logicyens call abſtractes / the frenche worde that is formed of any ſuche/yf he ende in te / ſhal haue his accent vpon the ſame te: as for bycauſe that out of theſe abſtractes bonitas, ueritas, deitas, humanitas, be formed theſe frēche nownes bonté, uerité, deité, humniaté, they ſhal/ accordynge as I haue here declared/ haue theyr accent on theyr laſt ſillable: and ſo of all ſuche lyke. And in lyke wyſe bycauſe that of ętas, ciuitas, pietas, paupertas, be formed eſté, cité, pitié, poureté, though they be none abſtracts/yet bycauſe they come of nownes endyng in tas/they folowe this rule. And of this ſort alſo I fynde theſe nownes folowyng/ congé, dicté, traicté, whyche Alayn Charter writteth congié, dictié, traictié. like as he writteth planchie, marchié, & pechié, for planché, marché, and peché. and alſo theſe nownes ſurlimé, eſchaulde, degré, eueſché, archeueſché, abbé, priovré, laicté, and fewe ſuche other. And of this ſort be excés, procés, and aprés, though they ende in es. But where as there be diuerſe wordes in the frenche tong/ whyche ende in te / that be nat formed of nownes in latine endyng in tas/as hónte hávlte, and femine adiectiues/as cóvrte, fórte, and alſo femynyne participles / as fáicte, dicte, all ſuche wordes folowe the generall rule of frenche wordes endyng in e/ and haue theyr accent on the laſt ſillable ſaue one.

Exceptio ſecunda. ¶ Seconde/for all the participles preterit of the fyrſt conjugation in tye frenche tonge with theyr plurell nombres/ ſhal haue theyr accent on the laſte ſyllable / lyke as I haue ſome thyng touched here afore / as regardé, aymé, ordonné, regardés, aymés, ordonnés, & ſo of all ſuche other.

Regula ſecunda. ¶ And note/that where as the preter perfect temps actyue and paſſyue in the frenche tonge / is circumloquuted by theſe verbes Ay and ſuis / and the participles preterit of the verbe: ſo that in verbes of the fyrſte conjugation / they ſay ay aymé, ay regardé, ſuis aymé, ſuis regardé, and ſo of all other / in all ſuche tenſes the participle of the maſculyne gender / haue theyr accent on theyr laſte ſyllable: as for theyr femynine genders folowe the common rule: as I touched in the trewe ſowndyng of this vowel e / as aymée, regardée, and ſo of al other.

What

What wordes in the frenche tonge haue theyr accent on theyr laſt ſillable. Capitulum. lxi.

¶Generally through out all the frenche tonge/all maner of wordes of many ſillables/in what letter ſoeuer they ende/be it vowel/diphthong/or cõſonant/if they be none ſuche as I haue made mẽcion of in the rules here next before/that is to ſay/ende nat in e nor es/as the plurel nõbres of ſuche nownes/whoſe ſingulers ende in e/all ſuche wordes ſhal haue theyr accẽt on theyr laſt ſillable: as aymá aymáy aimé, beav, colómb, auéc, accórd, bretif, diév, deſdaíng, ioly, conuerty, cheuál, renóm, poyſſon, paſtóy, beaycóvp, cordelier, apprentis, honorablemént, uaincú, covrtávlx, bontéz, and the ſecõde perſons plurels of al verbes/whiche euer ſhulde ende in ez with an z/for a difference from theyr ſinglar nombres whan they ende in es: So that of all ſuche wordes as ende in es/in ſounde the writtynge of an s or z after the e/declareth the diuerſite of accent: and where the redar ſhulde gyue the accent: for all that ende in ez/haue theyr accent vpon theyr laſt ſillable. Except from this rule the thyrde perſons plurels of al verbes endyng in ent/as áyment aymóyent aymérent aymeróyent aymáſſent, and ſo of all ſuche other: whiche all haue theyr accent on theyr laſt ſyllable ſaue one/though they ende in t/and that the n in all ſuche ſhalbe lefte vnſounded/as I haue here afore in diuerſe places declared. Except alſo the ſeconde perſons plurels of the indefinit tenſes of the indicatif mode in verbes of the frenche tong/of what conugacion ſo euer they be/as parláſtez, conuertíſtez, díſtez, and ſo of al ſuche lyke: whiche though they ende in tez/yet they haue theyr accent on theyr laſt ſillable ſaue one: and this/to kepe true accent in the frenche tonge/I ſuppoſe to be ſufficient.

Regula unica.

Exceptio prima.

Exceptio ſecunda.

To knowe whan a vowell ſhalbe longe in pronounciation/and whan nat/and to ſhewe what is ment therby/by example in certayne wordes of our tong. Capitulum. lxii.

¶Lyke as we in our tong gyue our vowels ſomtyme ſo long pronoũciation/that for the expreſſyng of ſuche ſoũde/as we gyue them we double ỹ vowel in writtyng/as doth appere in theſe wordes/a baare caape a leene beere/a ſooze booze: ſo happeneth it many tymes/that the frẽche men reſt vpon the ſoũdyng of theyr vowels/and gyue them/where they be written alone/ſuche long pronounciation as we vſe to do/whan we double them in writtyng in our tong: for ỹ declaryng of whiche thyng thze thynges be to be preſuppoſed.

Regula prima.

Regula secunda.

¶ Fyrst/that this long pronounciation is gyuen onely vnto theyr vowels whan they come alone by themselfe/ and nat whan they be toyned to gyther in diphthōges for diphthōges shall euer kepe suche a maner of soundyng as I haue before declared/where I spake of them.

Regula tertia.

¶ Seconde/there is no vowel in the frenche tong/ whiche of his owne nature is longe in pronoūciation / saue onele v / whose kynde of soūde I haue afore declared in his place. Except it be the finall vowelles of all indefinite tenses/whether they be of one syllable / as dis, fis, bus, tins, or of many/as mauldis, forfis, fuÿs, corrumpús, and suche like:for they be euer long in soundyng/in what place so euer they come in a sentence. So that the causes/ why any of the other vowelles be longar in pronounciacion at one tyme than at an other / be .iii. Firste by reason that the vowel fortuneth nert vnto a poynt in any sentence. Seconde / that the accent of the worde falleth vpon the same vowell. And thirdly/by reason that eyther a consonant or .ii. of diuerse sortz folowe the same vowel : so that al these .iii. thynges must be cōcurrant/to cause a vowell in the frenche tong to haue suche a longe pronounciacion / as I haue afore described.

Regula quarta.

¶ Thirde/if m / n / or r / eyther alone or toyned with any other consonantes folowe next after a vowell or .ii. consonantes/beyng both of one sort/cōmyng so as I haue here afore described/they let the vowell /that he shall nat be long in pronoūciacion/but folowe the comon sort of pronounciation/like as they shulde haue in the latine tonge/ or like as we wolde gyue them in our tong. And these .iii. thynges supposed it is easy to the lernar to discerne/whiche vowell shalbe longe in pronounciation/and whiche nat. Howe be it by example I shall more playnly declare this thynge.

Example of sentences/where a / shall be longe in pronounciation.

¶ In these sentēces/Cest ung terrible cás. ie ne le feráy pás . il a abatú son mást . il luy baillá conseil, quil y regardáſt, and in all suche lyke: in these wordes/ cas, pas, mast, and regardast, bycause a cometh nexte vnto the poynt/and hath a consonant or two folowyng yhm / and that the accent is vpon the same a / they shalbe sounded as we wolde do in englisshe/ if they were written caas, paas, maast, regardaast. and so of all other. Except where the worde endynge in a / hath eyther t or p alone folowyng the same a / for in all suche wordes / bicause the sayd t or p must haue his distynct sounde/accordynge as I haue in the generall rules of laste syllables declared / the a shalbe sounded short / like as we wolde

sounde

ſounde hym in our tong/as in theſe ſentences / Il a batú ſon chát. állons ueoir le combát. il boyt en ſon hanáp, the a ſhalbe ſounded ſhort. Howe be it hanap is olde romant/though I fynde it vſed in Froiſſart.

Example where e / beyng the laſt vowell of a worde ſhalbe longe in pronounciation.

¶ In theſe ſentences / Ceſt ung grant ieveúr aux déz, Les Romáyns one uaincus les Grecz, Il a faict de grans crualtéz, On luy a ceſte quátre citéz, ¶ of theſe wordes / dez, Grecz, crualtez, citez, bycauſe he cõmeth in ſuche order and place / as I haue before deſcribed/ ſhalbe ſounded as though they were written/ deez, Greez, crualteez, citeez, and ſo of all other.

Example where e / comyng in the laſt ſyllable ſaue one / ſhalbe long in pronounciation.

¶ In theſe ſentences / Elle a une maluáiſe téſte, Ceſt une bélle béſte, Ie le feráy a uóſtre requéſte, Ceſt ung hómme fort honéſte, Dieu uous doint bon uéſpre, Il eſt bon a déxtre. e/ in theſe wordes/ téſte, béſte, requéſte, honéſte, uéſpre, dextre, ſhalbe ſoũded as though they were written/ teeſte, beeſte requeeſte, honeeſte, ueeſpre, deextre, and ſo in al ſuche like: And though two the laſte wordes haue r folowynge, theyr e / he letteth nat the e to be long in ſoũde / for he is nat toyned to the vowell that the accent falleth of.

¶ And note that in ſuche wordes as haue theyr accent on theyr laſt ſyllable ſaue one / the accent may as well fall vpon any of the other vowelles as vpon e: vpon a / as Il eſt bien áſpre, Tout ua en gáſt, vpon i / as il neſt pas digne, il a bon tiltre: vpõ o / as Baille le a mon hóſte, Ie ſuis tout uóſtre, in whiche wordes the ſayd a / i / and o / bycauſe they come in ſuche place and order / as I haue afore deſcribed / they ſhalbe ſounded aaſpre, gaaſt, diigne, tiiltre, hooſte, uooſtre. So that a great cauſe why the vowell is longe in pronounciation / is bycauſe that accordyng to the rules aboue declared / the conſonant next folowynge hym / is left vnſounded. And by lyke reaſon in wordes of one ſyllable / where one conſonant onely foloweth the vowell/ he ſhalbe ſo remyſſely ſounded/ that in maner he ſhall nothyng be harde.

Example where i / beynge the laſt vowell/ ſhal be longe in pronounciation.

¶ In theſe ſentences / Plus que ie ne dis, Dieu ſcaît, quélle chiére il fiſt.

Ie layme come mon fílz. Adonc elle enrovgíſt, parainſi lheretique ſe cõuertíſt. The i of theſe wozdes dis, fiſt, filz, enrovgíſt, conuertiſt, ſhalbe ſoũded diis, fiiſt, fiilz, enrovgiiſt, conuertiiſt, and ſo of all ſuche lyke.

Example where o / beyng the laſt bowell/ſhall be longe in pzonounciation.

¶In theſe ſentences / Apportéz moy ung fagót, que ie párle a luy troiz mótz, il a uvide tous les pótz, nous ſommés maintenant en avóſt, The o of theſe wozdes fagot, motz, potz, avoſt, ſhalbe ſoũded fagoot, mootz, pootz, avoóſt, and ſo of all ſuche other. And this foz the knowlege / whan the bowels in the frenche tonge be longe in pzonouncion and whan nat/ ſi ſuppoſe to be ſufficient.

To ſhewe by example the great difference betwene the wzittynge of the frenche tong and the ſoundyng of it in redyng and ſpekyng. Cap. lxiii.

¶Al be it that I haue / in the chapters conteyned in this pzeſent boke/ ſufficiently declared/ wherin the true ſoundyng of the frenche tong conſiſteth/ and what great difference there is betwene the wzittynge of it / after the obſeruyng of theyz ozthogzaphie/ and the ſoũdyng of the ſame in redyng and ſpekyng. yet to ſhewe this notable difference to the lernar moze playnly at the eie/ and to make a parfect and complet recapitulacion / and callyng agayne to memozie of all the rules gyuen by me in this pzeſent boke: I ſhall ſhewe here / howe ſuche auctozs / as I eſtyme to be moſt excellent in the frenche tonge/ begynne theyz bokes/ as well ſuche as haue wzitten in ryme/ as they that haue wzitten in pzoſe/ and after writte the ſame ſentences in euery thyng / accozdyng as they vſe to ſoũde the wozdes in redyng and ſpeking: And foz the moze playn ſettyng out hereof / I ſhall fyrſt wzitte a lyne in euery condicion lyke as they do/ and after immediatly wzitte the ſame line accozdynge as it ſhulde be ſounded/ lyke as by my rules in this pzeſent boke I haue declared: ſo that the often redyng of theſe examples and cõferryng of one lyne to an other ſhalbe to hym that hath ones accuſtomed to rede this boke a meanes to impzint al the rules contayned in the ſame in faſt memozy and cauſe hym to ſounde the frẽche tong in all maner thynges like as ỹ frẽchemen do them ſelfe/ where as the tong is of it ſelfe moſt pertit.

pon

pon what occaſions this great alteracion cometh/ I ſhall ſhew the lernar/howe many of the ſayd rules be vſed in the ſeconde line/ and lympt the chaptres/where I make mencion of them. Fyrſt the ſeconde line is wꝛitten / Alatrehautoeeuꝛſellántomaieſtédeprinſos / without any maner diſtinction betwene woꝛde and woꝛde: wherby I declare the bꝛeneſſe that the frenche tong vſeth in ſoundyng of theyꝛ woꝛdes/whiche in redynge and ſpekynge neuer ceſſe oꝛ pauſe / tyl they come at ſuche woꝛde/ where the poynt ſhulde be: as I haue declared in the.xlviii.chaptre/in the.iiii.rule of the ſame. Second/all the woꝛdes of one ſyllable be ioyned in wꝛittyng to the woꝛdes of many ſyllables as though they were partes of them to declare / that there is no woꝛde in the frenche tong of one ſyllable whiche of his owne nature hath any accent / but is ioyned in ſounde to the next woꝛde folowyng hym of many ſyllables / accoꝛdyng as I haue declared in the.lvii.chaptre / in the fyrſt rule of ỹ ſame. Thirde/the ſ oftres is left vnwꝛitten/bycauſe that h/hauyng his aſpiration hath the power of a conſonant: as I haue ſhewed in the.xxxii. chaptre/in the fyrſt rule of the ſame.

Fourth/the l / of this woꝛde hault/is left vnwꝛitten/ to declare / that l / ſo comyng befoꝛe a nother conſonant/is left with them vnſoũded: as I haue declared in ỹ.xxvi.chap.in the.iiii.general rule of mean ſillables.

Fyft/there is a ſtryke aboue the hed of au/bycauſe the accent of ỹ woꝛde is there: accoꝛdyng as appereth in the.lx.chaptre/in the fyrſt rule.

Sext/the e of haulte is wꝛitten like an o / bycauſe that e / beynge the laſt letter ſhalbe ſounded almoſt like an o / and moche in the nooſe: as appereth in the.iii.chaptre/and the.v.rule of the ſame.

Seuenth/why the t of et is lef vnwꝛitten/I haue ſhewed in the.xliiii. chaptre/in the thirde rule.

Eight/why I haue wꝛitten an u betwene the e and x of excellente / I haue ſhewed in the.viii.chaptre/and the ſeconde rule.

Nynth/why x is chaunged in to ꝛ / I haue declared in the.xlvi. chaptre/and the fyrſt rule.

Tenth / why I haue tourned the c of excellente in to ſ / I haue declared in the.xxix.chaptre/the fyrſt rule.

Leuenth/why I haue tourned e / commynge befoꝛe n / in to a / I haue ſhewed in the.iii.chaptre/and the.iii.rule.

Twelfeth/why the accent is apon a of euꝛſellánte/I haue ſhewed here afoꝛe in the fyfte nombꝛe.

Thꝛetene/why e is changed into o / I haue alſo ſhewed here befoꝛe in the.vi.nombꝛe.

Fourtene/why the s / of this woꝛde mateſte/is wꝛitten contrarie to the vi. generall rules of meane ſillables/in the.xxvi.chaptre/ appereth in

the

the.xliii. chaptre/amonge the wordes begynnyng with m.
Fyftene/why the laſt e / of maieſte is lefte vnchaunged/appereth in the thirde chaptre/in the exception from the fyft rule.
Sixtene/why the accent of maieſte is vpon the laſt e / appereth in the lx.chaptre/in the fyrſt exception.
Seuentene/ why the s of des is left vnwritten/appereth by the.xlviii. chaptre in the fourth rule.
Eyghtene/why the accent is vpon i in princes/ I haue ſhewed here before in the fyft nombre.
Nynetene/why c of princes is tourned into s / I haue before touched in the.xi.nombre.
XX.why e is tourned into o / I haue afore declared in the.vi. nombre.
XXi.why the s comyng next the poynt is left written/I haue afore ſhewed in the.xlix.chaptre / and howe he ſhulde be ſoũded/I haue ſhewed in the.xxvii.chaptre/in the thirde rule.
So that if the lernar wyll accuſtome hym to marke a ſentence as it is written in any auctor/and writte it with ſuche vowels and conſonantz/ as they vſe to ſoũde in redyng and ſpekyng/it ſhalbe a very ſpedy mean to come to the true and perfect ſoundyng of the frenche tonge.

Example/howe thynges written in ryme ſhulde be ſounded/by the begynnynge of the Exile of Alayne Chartier.

¶For the true pronounſyng of thynges written in ryme/ it is to be noted/that the laſt wordes of the lynes ſhall euer ſounde theyr conſonantz whiche folowe after theyr laſt vowels/accordyng as I haue afore declared in the.xxvii.chaptre/whether the poyntes of the ſentences fall vpon ỹ ſame wordes or nat/that to is ſay/the redar ſhal gyue al theſe wordes ſuche ſoũde/as I haue ſhewed/that frenche wordes muſte haue/whan they be red by them ſelfe by cauſe that by the diſtinct ſoundyng of ſuche wordes the kynde of ryme/wherof there is many ſondry ſortes vſed in the frenche tong / is clerely diſcerned/and by the herer perceyued.

Finis

¶ Thus ende I of my. iii. bokes the fyrſt: in whiche I haue as wel by rule as by example/ſufficiently declared: howe the frenche tong in redyng and ſpekyng ought to be pronoũced. In the often redyng of whiche boke/ if the lernar be ſtudious/notyng ſpecially what I haue ſayde (cõcernyng this matter) in my prologue: and therto exerciſe hymſelfe/ accordyng to ſuche conſayles as I haue in the ſayd prologue and boke declared: he ſhal vndouted/attayne to the right and naturall pronounciation of this ſayde tonge.

IN the frenche tong be .ix. partes of speche / article/ nowne/ pronowne/ verbe/ participle/ aduerbe/ prepo-sition/ coniunction/ and interiection. of whiche .v. be declined/ that is to say / varie their last letters/ article nowne/ pronowne/ verbe / & participle. and the other iiii. be vndeclined/ that is to say / remayne vnuaried in their last letters for all maners of spekyng.

Of the article.

Articles they haue but .ii. vng a/ and le the/ whiche be thus declined.
The masculine singular vng, the masculine plurell vngz.
The feminine singular vne, the feminine plurel vnes.
The masculine singular le, the masculine plurel les.
The feminine singular la, the feminine plurel les.

The .ii. accidentes belongyng to articles.

So that articles haue .ii. accidentes/ gender and nombre / whiche they alter after the gender and nombre of the substantiue that they belonge vnto.

¶ But howe le and la lese their vowels comyng next before adiectiues or substantiues begynnyng with vowels or with h/ nat hauyng his aspiracion/ I haue/ in the .iv. chaptre of the first boke/ al redy declared. Regula prima.

¶ And howe vng is toyned to feminine substantiues begynnyng with a vowel/ or with h / nat hauyng his aspiration/ for to auoyd the harshe soũde of two vowels together/ I shall here after in the thirde boke/ whan I speke agayne of the article/ appere. Regula secunda.

Of the nowne.

¶ Of nownes some be substantiues/ of whiche I wyl fyrst entreat/ and some be adiectiues/ of whom I wyll here after speke. Diuisio nominis.

¶ Nownes substãtiues be suche as wyl haue one of the .ii. articles before them/ as seignévr, dáme, pére, fille, be substantiues/ for we may say vng seignévr a lorde/ vne dáme a lady/ le pére ỹ father/ la fille ỹ daughter. Descriptio substan.

Substantyues haue .vi. accidentes. Gender / nombre/ parson/ deriuation/ composicion/ and declination.

The fyrst accident.

Genders be .ii. the masculine gender and the feminine.

The masculine gender by reason of signification/ as Henrý Harry/ royng. And all other names of dignities/ offices/ or craftes belongynge onely to men. By reason of terminatiõ. for all other substãtiues/ whose gender can nat be knowen by his signification endyng in any vowel or diphthong/ except e. And also the most parte of substantiues endyng in any consonant/ be of the masculine gender/ except endyng in vowelles/ mercý and uertú, and in diphthonges laý, peáv, foy, and loy. Regula prima. Regula secunda. Exceptiones.

The femynine gendre by reason of ſignifycation/ as Katherine Katherine/ Royne quene: and all other names of dignyteis/ offyces/ or crafftes/belongyng onely to women.

Regula tertia. ¶By reaſon of termynation/ for the mooſt parte of all ſubſtãtyues endynge in E/ and certayne endyng in conſonantes/be of the femyne gẽder. ¶And note that there is no ſubſtantyue in this tonge/ but he is of the maſculyne gendre/or of the femynine certaynly.

Exceptiones duæ. Saue that I fynde ſixe vſed of the cõmen gendre/ lyke as homo is in latyne: and other ſixe vſed of their auctours incertaynly/ſometyme as maſculynes/ſometyme as femynines: and therfore I calle theym of the doutfull gendre. And as for neutre gendre they haue none/ reſemblyng therin the Hebrew tonge: Whiche alſo haue no mo but the ſayd two gẽders/ here expreſſed. So that in maner/ all ſubſtantyues of the neutre gendre in latyne/be in this tonge of the maſculyne gendre/ all thoughe they ende in E/ eſpecially if their latyne worde ende in um/as Conſile, mirácle be maſculynes/ for they come of Conſilium and miraculum, and ſo in maner of all ſuche lyke. But theſe thynges ſhall hereafter in my annotations vpon this accydent in the thirde booke more playnly/ and at the lengthy appere. The seconde accident.

Nombres they haue two/ the ſynguler nombre and the plurell.

Regula prima. ¶The ſynguler nõbre hath as many ſondrie terminatyõs / as there be ſondrie vowelles/diphthonges/or conſonantes/finall with them vſed:

Exceptio Except of vowelles a and o/ and of conſonantes onely k. For in theſe thre letters endeth no ſubſtantyue in this tonge.

Regula ſecũdã. ¶The plurell nombre endeth euer in s/ x/ or z/ what ſoeuer termynation the ſynguler nombre ende in/ as mercy, aigneáv, lovp, make for theyr plurels mercýs, aigneávx, loupz.

Regula tertia. ¶And al ſubſtantiues/ whoſe ſingular nõbres ende in any of theſe.iii. letters/haue theyr ſingular nombre and plurel all one/as corps, paix, & nez may ſerue indifferently for both nombres.

Regula quarta. ¶And al that ende in e /nat hauyng their accẽt vpõ the ſame e/in theyr ſingular nõbre by adding to of s/forme theyr plurels/as hómme hõmes.

Regula quinta Regula. ſexta. ¶And note that diuerſe ſubſtantiues in this tong be vſed in the plurel nombre onely. ¶Notyng here alſo / that though the ſubſtantiues of this tong alter theyr laſt letters/ by reaſon of theyr diuerſe nombre that they ſerue for/accordyng as I haue here ſhewed by exãple.yet there is no ſubſtãtiue in the tong/but he kepeth his firſt letters ſtyll, what nõbre ſoeuer he ſtande for/ſaue onely oéil for an eie/whiche maketh for his plurel nombre yéulx/changyng both his firſt and laſt letters. But all theſe thynges ſhal in my annotacions vpon this accident in the thyrde boke/ more playnly appere.

The thirde accident.

¶Persones they haue but onely the thirde in eche of these two nõbres/ That is to saye/ suche worde of the verbe as agreeth with Il, agreeth with all substantyues of the synguler nombre/ and suche worde of the verbe as agreeth with Ilz, agreeth with all substantyues of the plurell nombre: As lyke as they saye/ Il párle he speketh/ ilz parlént they speke/ So say they/ Vng hómme parle, a man speketh/ les hómmes parlént, the men speke. Regula unica.

The fourthe accident.

¶Derivatyon or formation/ that is to saye/ substantyues somtyme be fourmed of other substantyues/ as of Pómme an apple/ pommiér an apple tre: Of Tencévr a man chyder/ tencerésse a woman chider: Of Covsturiér a taylyour/ covsturiére a taylyours wyfe or a woman taylyour: Of León a lyon/ leonceáv a lytell lyon: Of Liure a boke/ liurét a lytell boke: Of Fémme a woman/ femmétte a lytell woman: Of Iehán Johñ Iehannét yonge or lytell Johan: Of Matýn a mornyng/ matynée a mornynge tyde: Of Córde a corde/ cordaige, store or plentie of cordes: Of Amý a frende/ amytýe frendshyppe: Of Ribavlt a rybaude/ ribavldáille a company or plentie of rybaudes: Of Belistre a man beggar/ belistrésse a woman beggar. Que formantur a substantiuis.

¶Somtyme they be fourmed of adiectyues/ as of Bon good/ Bonté goodnesse: Of Covrte short/ covrtávlt a courtall/ a horse. Somtyme they be fourmed of verbes/ as of Parlóye, I dyde speke/ parlévr, a man spekar/ and parlemént a spekyng: Of Engendrér to begette/ engẽdrévre a begettynge. Que ab adiectiuis. Que a verbis.

The .v. accident.

¶Compolytion/ for where as dyuers substantyues be symple/ that is to saye/ be nat compounde with any other wordes/ as Hómme, fémme/ and suche lyke. Many in the tong be compounde/ some of two wordes vnparfyte/ as Dymánche: some of two wordes/ of whiche the first onelye is vnparfyte/ as Licól: Some of two parfyte wordes/ as Beavpére, savfcondvyt: Some be expressed by thre wordes/ of whiche the myddle is a prepolytion/ as Becq de favlcón.

The sixte accident.

¶Declynation in substantyues is none other thyng/ but therpressyng what difference there is bytwene the termynations of the synguler nõbre and the plurell/ by addyng of an artycle or an adiectyue/ & an artycle of suche gendre & nombre as the substantyue requyreth: for cases in substãtyues the frenche tong hath none. as Vng bon hómme, vne bónne fémme: Les bons hómmes, les bónnes fémmes. Regula prima.

¶And note/ that suche gendre and nombre as the substantyue is/ of su-

the lyke gēdre and nombre shall the article adiectiue/pronowne/ꝑticiple passyue be of/ so that in the well knowynge of the gendre of the substantyue/ whose gendre all these four partes of speche must folowe/ and in the true formacion of the plurell nombres of the sayd fyue ptes of speche/out of their syngulers resteth no small parte of conguite and certayne of knowledge/ howe to kepe true orthography in this tonge. And therfore of all these thynges I shall in the thirde boke in their places more at length entreate.

Of the nowne adiectyue.

Descriptio adiectiuoꝝ. ¶Nownes adiectyues be suche in this tong/as maye haue with vs Er and Est, added to their endes/whan we make comparyson in our tong/ as Blanc noyr blev/be adiectyues in frenche: For we saye/ white/whyter/whitest: Blacke/blacker/blackest: Blewe/blewer/blewest. Adiectyues haue seuyn accidentes: Gendre/nōbre/ agreyng with their substantyues/ Comparation/declynacion/deryuation/and order.

The first accident.

Regula prima. ¶Genders be two/the masculine gendre whiche hath as many sondrie terminatiōs as their substātiues haue/ Saue that in a/o/oy/b/k/p/ꝛ/ endeth no masculyne adiectyue in this tonge. The femyne gendre endeth euer in E/ So that all adiectiues whose masculyn gēdre endeth in E/haue their masculynes and femynines all one/as of these masculyne adiectiues Blanc white/tardif slowe/beformed these femynines/ Blache tardifve, and these adiectyues/Large, triste, sobre, and all suche lyke remayne euer vnchaunged/ what soeuer gendre their substantyue be of. But howe all other femyne adiectyues be formed out of their masculynes/ I shall hereafter in my annotatiōs vpon this accident in the thirde boke declare.

Exceptio Regula secunda.

Regula tertia.

The seconde accident.

Regula prima. ¶Nombres be two/the singuler nombre as Hardÿ, beáv, layt: the plurell nombre as Hardÿs, beávx, laytz: so that in what termination soeuer their synguler nombres ende in/their plurell nombres ende euer in S/ꝛ/or z/ lyke as their substantyues do: And all adiectyues endyng in E in their synguler nombre/by addyng to of S/from their plurelles.

Regula secūda. ¶And all that ende in S or in ꝛ/ in their synguler nombres / ende in the same letters without any chaungyng in their plurell nombres/ and that none ende in z/ I haue here before shewed in the firste accident/ as Gros, hontévx, ioyévx, and all suche lyke without any chaūgyng/serue indifferently for bothe the nombres. But howe euery plurell nombre is formed out of his synguler/ I shall in my annotacions vpon this accident in the thirde boke more playnly declare.

Regula tertia.

The thirde accident.

¶Agreynge with their substantyues/ for suche gender and nombre as the

the ſubſtantyue is/ſuche lyke gender and nombre ſhall the adiectyue be of/as Vng bon hómme, vne bónne femme, les bons hómmes, les bonnes fē= mes: but what cōgruite they vſe bitwene their ſubſtātiues & adiectyues & what adiectyues in their maſculyne tminations wyll be ioyned with fempyne ſubſtātyues: & alſo howe the maſculyne gendre cōceyueth the fe mine/ſhall herafter in the thirde boke in this place more plainly apere. Regula unica.

The fourthe accident.

¶ Comparation/ the poſityue that is euer the adiectiues ſelfe/as blanc noyr fort: The comparatyue addeth to his poſityue plus, without any chaungyng of the adiectyues ſelfe/ for any expreſſyng of comparatyon as Plus blanc, plus noyr, plus fort: The ſuperlatyue addeth to his com= paratyue one of theſe ſixe wordes. Le, mon, ton, ſon, noſtre, voſtre, leur, of ſuche gendre and nombre as the adiectiue repreſenteth/ without alſo any chaūgyng of the adiectyues ſelfe/ by reaſon that he ſtandeth for the ſuplatyue degre/ as Le plus blanc, le plus noyr, le plus fort: mon plus blāc ma plus banche, mes plus blancz, mes plus blāches: and ſo of all other ad= iectyues in their tong. And note/ that the ſuplatyue degre in this tong is neuer expreſſed/ but by the addyng of one of theſe ſixe wordes onely to plus, ſo that Nul plus blanc, vng plus blanc, deux plus blancz, riēs plus blanc: and all ſuche lyke be cōparatyues and no ſuplatyues: By reaſon wherof appereth/ that in this thyng our tong is moche more pfyte and more reſembleth the latyne tongs: For we ſaye white/ whiter/ whyteſt: blacke/ blacker/ blackeſt: ſtronge/ ſtronger/ ſtrongeſt: Expreſſyng the degrees of comparyſon/ by addyng of certayne letters to thende of our adiectyues. Except frō this rule Bon, whoſe comparatiue is meillévr but his ſuperlatyue addeth one of the ſixe wordes to meillévr, as le meil levr, mon meillevr, Maluays, whoſe cōparatyue is pire, and for his ſu= perlatyue he addeth to Pire, one of theſe ſixe wordes/ as Mon pire, ton pire. &c. but I fynde alſo oftymes vſed/ plus malvays & le plus malvays after the cōmen rule. Grant alſo hath for his cōparatyue greignévr and le greignévr/ for his ſuperlatyue: Howe beit I fynde oftymes vſed plus grant and le plus grant/ of whiche ſorte is alſo Petit, whoſe cōparatyue I fynde móyndre and his ſuperlatyue le móyndre, but for the moſt parte they vſe plus petit and le plus petit, after the cōmen rule. And note/ that ſo often as they wyll extende or dyminyſſhe the qualyte of any thynge/ without makyng of cōparyſon therof to another/ they vſe to adde theſe wordes before their adiectiues/ trop, fort, moult, tres, peu, guáyres, góvtte, and ſuche lyke: As trop bon to good/ fort bon very good/ moult bon moche good/ tref bón right good/ peu bon ſmally good/ guáyres bon but a ly tell good. &c. But theſe thynges ſhall in the thirde boke in this place/ more playnly appere. Regula prima. Regula ſecunda. Regula tertia. Exceptiones.

The.v. accident.

Regula prima. ¶Declynacion as thus/ The masculyn singuler Blánc, the masculyne plurell blánc: The femynine synguler Blánche, the femynine plurell blánches: whiche lyke declinacion serueth in his degrees of cõparision as plus blanc plus blánc, plus blánche plus blánches, le plus blanc le plus blánc, le plus blánche le plus blánches. So that euery nowne adiectiue in this tong hath.iiii.distinct wordes/whiche he altereth after the gender and nombre of the substantyue/that they be ioyned withall. Except adiectyues / whose masculines singulars ende in s or x: for they haue but.iii.distinct wordes/bycause theyr singular and plurell / in the masculin gender/ende both alike. And all adiectiues /whose masculin syngular endeth in e: for all suche haue but.ii.distinct wordes: for so moche as theyr masculyne and femine singular be both one: and to forme theyr plurels they adde but onely s to theyr singular: as by my rules here afore in the fyrst and seconde accident declared/ doth appere.

Regula secunda.

Exceptio prima.

Exceptio secunda.

Exceptio tertia. Except also these.ii.comparatiuis meillévr and greignévr/whiche with out any changyng / serue for both the genders/where after my general rule theyr femmines shulde ende in e. But these thynges shall hereafter in myn annotations vpon this accident / in the thyrde boke / more playnely appere.

The.vi.accident.

The fyrst accident.

¶ Modes they haue.vii. The indicatiue mode/ whiche they vse/ whan they shewe or tell a thyng to be done/ as ie párle I speke.
The subiunctiue mode/ whiche they euer vse folowyng an other verbe/ and addyng this worde que before hym/ as uovlés uovs que ie párle wyl you that I speke.
The potẽciall mode/ by whiche they vse to expresse wyll or myght to do a dede/ as ie parleróye I wolde shulde or myght speke.
The imperatyue mode / whiche they vse whan they cõmande a dede to be done/ as párle speke.
The optatiue mode/ whiche they vse/ whã they wisshe a dede to be done as bién párle il wel speke he or well myght he speke.
The cõdicional mode/ whiche they vse/ whan they expresse condicion if a dede to be done/ as sy ie párle if I speke.
The infinitiue mode/ whiche they vse / whan we vse to put to before a a verbe/ as parlér to speke.

The seconde accident.

¶ Tenses or tymes they haue in euery of these modes / in some mo and in some fewer.
The indicatyue mode hath sixe tenses. The present tens / as ie párle I speke. The preter imperfit tens/ as ie parlóye I dyd speke. The indifinite tens/ as ie parláy I spake. The preter perfit tens/ as ie ay parlé I haue spoken. The preter plusperfit tens/ as iauóye parlé I had spoken. The future tens / as ie parleráy I shall speke.
The subiunctyue mode hath fyue tenses. The present tense / as Que ie párle that I speke. The indiffinite tens / as que ie pariáſſe that I wolde speke shulde speke or myght speke/ wolde haue spoken shulde haue spoken or myght haue spoken / or had spoken: whiche dyuersites of signification is euer lymytted by the verbe/ that goeth before que / by whom may easely be gethered for whiche of these englysshes the frenche indiffinite tens serueth.
The preter parfit tens/ as que ie áye parlé that I haue spoken.
The preter plusperfit tens/ as que ie évſſe parlé that I had spoken.
The future tens/ as que ie avráy parlé that I shall haue spoken.
The potenciall mode hath two tenses: whiche / al be it that they signifie rather a maner and an affection in doyng of a dede / than any directe tyme/ yet let vs call ie parleróye I wolde speke shulde speke or myght speke the present tense: and ie avróye parlé I shulde haue spoken wolde haue spoken or myght haue spoken the preter parfit tens.
¶ The iperatiue mode hath.ii. tenses/ whiche he borowe weth of the other modes here afore reherſed. His present tens borowe weth his parsones of the same

the ſame tenſes in the indicatiue and ſubiunctiue mode / as párle ſpeke.
The future teus/whiche bozoweth al his parſons of the pzeſent tens of the ſubiunctiue mode/as Que ie párle let me ſpeke.
The optatiue mode bozoweth alſo his.ii.tẽſes of the ſubiũctiue/the pzeſent tens/as bién parlé il well ſpeke he oz wel myght he ſpeke/ the indiffinit tẽs/as bien parláſt il wel myght he haue ſpokẽ oz ſhuld haue ſpokẽ.
The condicional mode bozoweth al the tenſes of the indicatiue mode/ ỹ ſubiunctiue mode and the potencial mode/ ſaue only the pzeſent tens of the ſubiũctiue mode: and to hym ſelfe ꝑpze he hath no tens in this tong/ as ſy ie párle,ſy ie parlóye,ſy ie parláy,ſy iay parlé,ſy iauóye parlé ſi ie parleráy,ſy ie parláſſe,ſy iáye parlé,ſy iévſſe parlé,ſy ie avtáy parlé,ſy ie parleróye,ſy ie avróye parlé. The infinitiue mode hath.ii.tenſes/the pzeſẽt tens/as parlér to ſpeke/the pzeter pfit tẽs / as auoyr parlé to haue ſpokẽ.
And note/that though we vſe indifferently in our tong/ I dyd ſpeke oz I ſpake/ in the freche tong/betwene the pzeter perfit tens and the indiffinite tens there is a great difference/as I ſhal moze playnely in the thyzde boke in this place declare. Regula

And uote that the participle pzeterit after the tenſes of ie ay remayneth foz the moſt part vnchanged/ what ſoeuer nombze oz parſon the tenſes of ie ay repzeſent/as by the examples of all the.iii.cõiugatiõs here after playnly ſhal appere: but of this tyng I ſhal haue better occaſion to ſpeke here after/and ſpecially in ỹ thyzde boke/in the chapter of participles. Regula conuertý conuertýr. And these for the most part be circūlocuted in our tong with I make or I ware / as Ie blanchís I make or ware whyte / ie noyrcís I make or ware blacke: and so in maner of al other colours may be formed a verbe of this conugation.

The thirde conugation hath his present tens in maner euer endyng in s / sometyme of one syllable / as Ie bas I beate / ie tens I bende / ie romps I breke / ie mets I put : sometyme of many syllables : and suche for the most part be compoundes of other verbes of this coniugation / that be of one syllable / as Ie combás I fyght / ienténs I vnderstande / ie corrómps I corrupte / ientreméts I meddyll : Whose indiffinite tenses ende euer also in s / hauynge before s eyther y / in / ev / or v / as ie fís, ie prins, ie recévs, ie bvs : Sometyme of one syllable / sometyme of many. And theyr participles preterit ende euer in s / t / v / or y / as iay prins, iay dit, iay batú, iay recév, iay dormy : sometyme of one syllable / sometyme of many. Theyr infinite modes ende eyther in re or in yr / euer of many syllables / as bátre, téndre, corrómpre, méttre, dormýr.

les/lyke as the Latins vse: for the fyrst and mean sillables of all verbes of these.iii.conjugations remayne euer vnchanged/ saue that I fynde sixe verbes/whiche hauyng in the.iii.parsons of theyr singular nombre/ in theyr present tenses/this diphthong ev/ change it through all the residue of theyr conjugatynge into ov/ as I shall here after in this boke touche/and in my thyrde boke at the length declare: So that hauynge any parson of a verbe/of eyther of these.ii.conjugations/ if the lernar can perfitly these two exemples/he may easely fynde out the first parson of the present tense of the indicatyue mode/ and than conjugate theym through al theyr modes/tēses/nombres/and parsons/ by addyng of suche terminations to the sayde fyrst parson/ as he fyndeth added to in ie párle and ie conuertys.

Of the thyrde conjugation.

¶In verbes of theyr thyrde conjugation I fynde a litell more difficultie: howe be it by certayne generall rules of this conjugation also to bryng the lernar to a certaynte.x.rules be to be noted.

Ten general rules to instruct the lernar/howe he may be sure to conjugate all verbes/ actiues/ parsonals/ of the thyrde conjugation in this tong.

Regula prima. ¶Fyrst of the present tens of the indicatiue mode/ the fyrst and seconde parsons singular be euer lyke/endyng in s/ and the thyrde parson singular is formed of them/by changyng s into t: so that hauyng the first parson singular of this tens/this rule serueth for the other.ii.parsons. But in the.iii.parsons plurel of the same tens/I fynde no generall certaynte in the vowelles and cōsonantes that they put before ons, ez, and ent: Howbeit for the most parte the seconde and thyrde persons plurell kepe euer the same vowelles and consonātes before es and ent. that the first persone plurell hath before ons. Example/ where the letters of the thre persons plurell before their finall terminations be dyfferent/ nous faisóns uovs fáictez ilz font, novs disóns uovs dictez ilz disent, novs bevuōs uovs bevuéz ilz bóyuent. Example where the sayde letters be lyke/ novs prennóns uovs prennéz, ilz prénnent, novs mettóns, uovs mettéz, ilz métent. novs mordóns, uovs mordéz, ilz mórdent. So that for the most pte it shall suffice if I hereafter in the table of verbes expresse the first persons singuler and plurell of this tens onely/Howbeit somtyme it shall be nedefull to sette forthe as well the first persone singuler as all the thre persons plurell distinctly/ for so moche as I can nat conteyne these said persons vnder any generall rule certayne.

Regula secūda. ¶Seconde/the fyrst parson singular of the preter imperfit tens of the indicatyue

indicatiue mode/is euer formed of the fyrst parson plurell of the present tens of the same mode/by changyng of ons into oye/as of fayſons is formed fayſóye, of diſóns diſóye, of bevuóns bevuoye, of prennóns prẽnóye, and all suche be conuugate lyke parlóye or conuertiſſóye: so that hauyng the fyrst parson singular of this tens / the other parsones may easely be conuugate by example of the other conuugations.

¶Thyrde/of the indiffinite tense of this mode the fyrst and secõde parsones singular be euer lyke/endyng in s / as I haue afore touched: and the thyrde parson singular is formed of them/by chyangyng of s into t / hauyng before s and t / eyther y / v / ev / or in/as I haue also afore declared: and his.iii.parsons plurell ende in ſmes, ſtes, and rent, like as the same parsons do in the fyrst and secõde conuugations / hauyng euer before the sayd terminations the vowel or diphthong of theyr singular nombre. if there come a vowel or diphthong imediatly before theyr s / if there come an n before s/than they adde to d before rent, as ie dys, tu dys il dit, nous diſmes vous diſtes ilz dirẽt. ie fis tu fys il fit, nous fiſmes vous fiſtes ilz firent. ie bus tu bus il but, nous buſmes vous buſtes ilz búrent. ie decévs tu decévs il decévt, nous decévſmes vous decévſtes ilz decévrent. Ie prins tu prins il print, nous prinſmes vous prinſtes ilz prindrent. So ỹ onely the fyrst parson singular of this tens is vncertayne/ but that ones had/the lernar may be certayn by this rule to forme the residue of al his parsons in both nombres. Regula tertia.

¶And note/that often tymes it happenneth / that the singular nombre of this tense is lyke the singular nombre of the present tense in the same mode specially in the seconde conuugation/as appereth by Ie conuertys. Regula

¶Fourth/syns al ỹ preter parfit and pluparfit tenses of al modes/ and also the future tens of euery subiũctiue mode / of al verbes actiues personals/be circũlocuted with the tenses of ie ay / and the participle preterit / as I afore declared and shewed by example of ie párle and ie conuertis, in althese tenses is no maner difficulte/but the participle preterit ones had/the lernar may conuugate all these tenses by therenple of the other.iii. conuugations / as bycause the participle preterit of ie fais, is faict, I must say iay faict, iauóye faict, iáye faict, iévſſe faict, ie avráy faict iavróye faict, auoýr faict/puttyng suche and as many tẽses of ie ay before faict/as I haue done before parlé and conuertý. quarta.

¶Fyft/onely the fyrst parson singular of the future tens in this mode/ is vncertayne/but that ones knowen / he may certaynly be cõiugate by terenple of ie parleráy or conuertiráy, as feráy ferás ferá, feróns ferés feront: and lyke as of parleráy is formed parleróye, so of the fyrst parsone singular of this tense is euer formed the fyrst parson syngular of the present tens of the potencial mode: whiche pson ones knowen/al his other parsons Regula quinta.

parſons may eaſely be conuugate by exemple of parleróye, as of feráy is fo3med feróye, by changyng of ray into roye, and cõiugate ieróye, feróys feróyt, ferións feriéz feróyent. of prendráy prendróye prendróys prendróyt, prendrións prendriéz prendróyent. and ſo of al other.

Regula ſexta. ¶ Sixt/the fy3ſt and thy3de parſons ſingular of the p3eſent tens of the ſubiunctiue mode be euer like/endynge in e/ and ỹ ſeconde parſon ſyngular addeth to s. The fy3ſt and ſeconde parſons plurell change e of the fy3ſt parſon ſingular into ions and iez. The thy3de parſon plurell addeth nt to the fy3ſt parſon ſingular: ſo that onely the fy3ſt parſon ſingular of this tens is vncertayne: whiche ones haue/howe the reſidue ſhulde be fo3med/ I haue ſhewed the lernar in this rule/ as if he ones knowe that the fy3ſt parſon ſingular of this tens is Que ie táce, he may knowe by my rule/that he maketh que tu táces quil táce, que nous facións que uous faciéz quilz fácent. and in likewiſe q̃ ie díe q̃ tu dies quil die, que nous dións que uous diéz quilz dient, puttynge no conſonant befo3e ións and iez: except the fy3ſt parſon ſingular haue one/ as q̃ ie préigne que tu préignes quil préigne, q̃ nous préignóns q̃ uous preigneż quilz préignent.

Regula ſeptima ¶ Seuenth/ by the addynge of theſe ſixe terminations ſe, ſes, t, ſións, ſiéz, ſent, to the fy3ſt parſon ſingular of the indifinit tens in the indicatyue mode/ the lernar ſhal fo3me the ſame tens in the ſubiunctiue mode in all his nõb3es and parſons: as of ie fis is fo3med ie fiſſe tu fiſſes il fiſt, nous fiſſións uous fiſſéz ilz fiſſent. and in like wyſe of ie receus is fo3med ie recéuſſe tu recéuſſes il recéuſt, nous recéuſſións uous recéuſſiéz ilz recéuſſent. ¶ of ie prins ie prinſſe tu prinſſes il prinſt, nous prinſſións uous prinſſiéz ilz prinſſent. and of ie tins ie tinſſe tu tinſſes il tinſt, nous tinſſións uous tinſſiez ilz tinſſent, kepynge euer in this tens/ befo3e the terminations/ the vowell of the ſame tenſe in the indicatyue mode/ and n alſo/ if the ſayde tenſe haue n.

Regula octaua. ¶ Eyght/of the p3eſent tens of the imperatiue mode the thirde parſons ſingular ¶ plurel be euer lyke the ſame p̃ſons in like tens of the ſubiunctyue mode/ and the fy3ſt and ſeconde parſons plurell be euer lyke the the ſame parſons of like tens in the indicatiue mode: ſo that onely the ſeconde parſon ſingular is vncertayne: howbe it fo3 the moſt part the ſeconde parſon ſingular of this tens is like the ſame parſon of the p3eſent tens in the indicatyue mode: ſo that ſo often as the ſeconde parſone ſingular of this tens is like the ſame parſon of the p3eſent tens in the indicatyue mode/ I ſhall in the table of verbes leaue this parſone vnre-herſed/remittyng the lernar to this generall rule: and whan he differeth from the ſayd ſecõde parſon I ſhal exp3eſſe hym in the table of verbes next befo3e the infinitiue mode: but of this thyng I ſhall in my annotacions vpõ this .viii. rule in my thirde boke intreat mo3e at length.

¶ Nynth/the future tense of the imperatiue mode/and the present tens of the optatyue mode be euer like to the present tense of the subiunctiue mode/and the indiffinite tẽse of the optatyue mode is lyke the same tens in the subiunctiue mode. And the condicional mode in this cõiugation is vsed before suche and so many tenses as he is in the other. iii. conuga-tions/without any maner change. Regula nona.

The.ix.accident.

Addyng of ſyllabicall adiections in affirmation and negation.

In affirmation.

For often tymes they put en next before theyr verbes/whan they affirme a thyng to be done/whan he ſignifieth nothyng/ but onely as a ſigne of affirmation/ vſed rather to make the ſentence more fulle in ſoũde to the eare/than for any neceſſite : and yet before ſome verbes they vſe hym twyſe for the ſayd cõſyderatiõ : as uovs en avrés, nen parlés plus, il ſen eſt en álle, il ſen eſt en fovy, and ſuche lyke/ where the ſence is alone if I leaue en out and ſay uovs avrés, ne parlés plus, il ſeſt álle, il ſeſt fovy.

In negacion.

For where as they put ne before theyr verbes/ſo ofte as they expreſſe negation/like as we vſe nat in our tong after our verbes. They put alſo after theyr verbes pas, poynt, or mye / whiche of theym ſelfe ſignifye nothyng/but onely be as ſignes of negation: Howe be it/it is nat in the ſpekars pleaſure to vſe one of the ſayd.iii.wordes or nat/lyke as it is often in theyr affirmations : for in maner there is no verbe that hath ne afore hym/but he muſt haue eyther pas, poynt, or mye after hym. Regula
And note that betwene pas and poynt is no maner difference / but it is in the ſpekars or writtars election/whether he wyll vſe the one or the other/but as for mye is an olde Rommant worde / and nowe out of vſe/ where the ryght frenche is ſpoken.

The.x.accident.

Order different from our tonge in interrogations : for where as we whã we aſke a queſtiõ of a nowne ſubſtãtiue/ whether he betoke a proper name or nat/vſe in maner euer to put the ſayd ſubſtantiue as the laſt worde of the interrogatiõ:as whyther goeth the kyng? where is Charles? is my gowne clene? haue you ſadled my horſe? in the frenche tonge they name the ſuſtantyue fyrſt/and demaunde theyr queſtion of hym afterwarde/as le roy ou ſen ua il? Charles ou eſt il? ma róbe eſt élle nétte? mõ cheual laués uovs ſélle? And though this order be ſometyme broken / the ſurer way is for ſauyng ỹ right grace of ỹ tong/to vſe ſuche order in q̃ ſtiõs demaunded by ſubſtantiues/ as I haue here ſhewed : Howe be it in queſtions demaũded by pronownes/the pronowne in the frenche ſentence is euer the laſt worde/whether he be ſo in our tong or nat:as whither go you? Ou'allés uovs? whan ſhal he come? quant uiendrá il? where dwell they? Ou demévrent ils? Howe be it they ſay for / is he come? Eſt il uenu?

uenú: and therfoze moze certaynly I differ to speke of this matter/tyl I shall come in the thyrde boke in this place.

Of the verbes meanes.

¶ Whiche be verbes meanes in this tong I haue in a generalte al redy declared: vnto whom I haue gyuen this name foz.ii.causes: One / foz so moche as determynatly they betoken neyther action noz passion: foz where as the doar and sufferer ought to be distinct parsons / the acte of these verbes retourneth euer to the doar agayne. An other/foz where as of euery verbe/whiche signifieth an acte to be done without forth / may be circumlocuted a passiue with the tenses of ie svis and theyr participle preterit: whiche shal in dede betoken sufferyng by the act of some parson without forth: in suche verbes as be meanes we can nat do so: but these thynges shal in the thirde boke in this place moze playnly appere. Howe be it some thynge moze playnely here to shewe the lernar/howe he shall knowe suche verbes as in the frenche tong be vsed as meanes.

Regula In maner generally all suche verbes as signifie a parsone to do au acte eyther with his mynde/hole body/oz any part therof/of whiche the dede retourneth to the doars selfe agayne/and betoken none acte to passe frō hym without forth/al suche verbes in this tong be vsed as meanes.

Example of suche verbes as signifie the actes of the mynde.

¶ I maruayle/I wōder/I trust/I dispaire/I reioyce/I take though/I doubt/I agree/I consent/I cōplayne/I waxe angrye/I waxe soze/I waxe prowde/and in maner all suche verbes as signifie any passion of pleasure oz displeasure to the mynde.

Example of suche verbes as signifie the actes of the hole body.

¶ I lye downe/I aryse/I bowe downe/I stande vp/I go/I walke/I moue/I flye away/I dye/I ryse from dethe/and in maner al suche verbes as signifie the hole body to be in occupacion/and the acte taketh his effect in the body selfe.

Example of suche verbes as signifie the particular actes of the partes of ones body.

¶ I mocke/I laugh/I syt downe/I leane/I knele/I holde my peace/I crye out/I frowne/and suche lyke: Whiche verbes greatly differ frō I see/I heere/I feele/I smell/I handel/I pull he/I stryke/I beholde/I call/and suche other/though these actes be also done with the ptes of ones body: foz the fyrst signifie none acte to passe frō the doar without forth/ and the other betoken/that there is some other thyng that is seen/herd/felt/smelled/hādled/pull hed/ strykē/behelde/oz called. But foz so moche as this rule is nat so vtterly general / but that I fynde exceptiōs

in al

in al these sayd.iiii.sortes of vbes: for I fynd ie pénce, ie sónge, ie mónte, ie descéns, and certayne other/ whiche thoughe they signifie the actes of the mynde or body/and betoken no dede without forth/ yet they be euer vsed in this tonge as actiues. And farther more/that where as we haue one worde/the frenchemen vse circumlocution/and somtyme contrary: where we vse circumlocution/the frenchemen haue one onely worde/as where we say I stande/they say ie me tiéns de bout: and where we saye I holde my peace/they say ie me tays.

To bryng the lernar out of all maner doubtes / whiche verbes in this tong/beside them that I haue here rehersed / be vsed as meanes / and whiche nat: and also whiche be circumlocuted/and whiche be expressed by one onely worde / I shall more playnely declare this thynge in the thyrde boke in this place: but specially in the table of verbes/where after the order of a/b/c/so often as any verbe of our tong shall fortune to come in place/it shall appere in the frenche verbe/ nat onely what cõiugation he is of/but also whether he be vsed in theyr tong as a meane or nat: and whether he be circumlocuted in our tonge or in theyrs: or els be expressed in both the tonges or in one of them by one onely worde.

Verbes meanes haue.xi.accidentes: of whiche.x. be suche and the selfe same that verbes actiues haue: that is to say/mode/tense/nombre/parson/coniugation/formation/composicion/ addynge of syllabicall adiections/and order different from our tong in interrogations.

¶ In the thyrde accident/that is to say / circumlocutynge of the preter tenses they differ moche from verbes actiues: for where as verbes actiues circumlocute theyr preter perfit and plusperfit tenses throughe all theyr modes/and the future tense of the subiunctiue mode/with the tenses of ie ay and the participle preterit / All verbes meanes circumlocute all the same tẽses/with the tenses of ie suis and the same participle/with a farther difference also: for where as the participle preterit / ioyned to the tenses of ie ay, remayneth in maner euer vnchãged/ as I haue afore in the fyrst note of the thyrde accident belongynge to verbes actiues / al redy declared. Whan he is ioyned to the tenses of ie suis / he altreth his gender and nombre/accordyng to the gender and nombre of the nominatyue case/that gouerneth the sayd tenses of ie suis.

¶ And note/that though the tenses of ie suis be of farre different signification from the tenses of ie ay / yet so often as any of his tenses is put before a participle of a meane verbe / they haue the selfe same signification that the tenses of ie ay haue/as shal here after in theyr cõiugatynge playnely appere. Regula

¶ The.xi. accident / by whiche also they differ from verbes actyues/is doublyng of the pronowne / for in token that the act of all suche verbes retorneth

returneth to the boar agayne / they put for the most part before euery of theyr first and secõde parsons / the accusatiue case of the pronowne that gouerneth them / and before the thyrde parsons aswell singular as plurel se, what so euer pronowne or substantiue be nominatiue case to any suche verbe: whiche thyng playnely by example to declare vnto the learnar/ I shall here immediatly conjugate ie me lie, ie me esbahys, and ie men tuys, Notyng first that though I double the pronowne before euery parson of them for exemple/ I fynde them many tymes vsed without any suche doublyng/ and in all thynges lyke actiues/ especially in theyr fyrst and seconde parsons: but in theyr thyrde parsons of both the nombres/ I fynde them very seldome vsed without se before them/ as I shal in the thyrde boke in this place more playnely declare.

Of

Of the participle.

¶ Participles be suche in frenche/ as in some accidentes resemble vnto their verbes/and in some accidentes vnto their nownes adiectyues. Of participles be two soztes/ some betoken doyng as aymánt, parlánt, regardánt: and suche with vs ende euer in yng/ as louyng/ spekyng/ beholdyng. Some betoken suffryng/as aymé, conuertý, faict: loued/conuerted/done. Participles betokenyng doyng haue thze accidentes/fozmacion/tyme/and declynacion/with dyuersite of gendze and nombze.

The first accident.

¶ Fozmacion foz all participles endyng in ant/be fourmed of the firste parsone singuler of the pzeterimparfitens/by chaungyng of óye in ant, as of parloye, conuertissóye, and faisóye, be fourmed/parlánt, conuertissánt, and faisánt: and so of all suche other in the tong/ Except onely Saichánt, whose pzeterimparfitens is scanóye of ie scay, I wot oz I knowe.

The seconde accident.

¶ Tyme foz all partyciples endyng in ant, betoken the acte of the verbe/to be pzesently in executyng.

The thirde accident.

¶ Declynation with diuersyte of gendze and nombze/ as thus.
The masculyne and femyn.singuler Parlánt conuertissánt and faysánt.
The masculyn and femyne plurell parláns conuertisáns faysáns.
¶ So ỹ if any wozde declynable in this tong be founde endyng in ant in the syngular nombze and in ántes in the plurell / they be syngulars & plurelles of some femynine adiectyues/ whose masculyne endeth in ant, and of no participle in this tong. Participles betokenyng suffring/haue fyue accidentes: Fozmation/ tyme/ termynation/ declynacion/ with diuersyte of gendze and nombze/ & agreynge with the relatyue oz some other accusatyue case gouerned of the verbe. Regula

The first accident.

¶ Fozmation foz all participles betokenyng suffrynge/ belongynge to tye first and seconde coniugations/ be fourmed of their infynitye modes/by puttyng awaye of ẽ/as of parlér and conuertýr/be fozmed these participles/aymé and conuertý, but in the participles of the thirde coniugation /howe they be fourmed I fynde nat so great certayntie.

The seconde accident.

¶ Tyme foz all suche/ thoughe whan they be ioyned to the tenses of ie suis, betoken suffryng: yet if they be added to the tenses of ie ay, they expzesse the tyme that is passed/ except in futures of the subiũctyue mode.

The thirde accident.

¶ Termynacion foz all participles pzeterit/ oz betokenynge suffrynge ende outher in E/ y/ s/ t/ oz u: as parle of the first/conuertý of the secõde

partie/

partý, prins, faict, batú of the thirde/ whiche generally by addynge to of e/forme their femynines/as parlée, conuertýe, prinſe, faícte, batúe: by addyng to of ȝ/ forme their maſculyns plurelles/ except ſuche as ende in s/ whiche remayne vnchaunged: as parlés, partýȝ, prins, faictȝ, batúȝ, and by addyng to of s/ vnto their femynes forme alſo their plurels/ as Parlées, conuertýes, prinſes, faictes, batúes, and this maner of formation of the femyne gendres out of their maſculynes/ and their plurell nombres out of their ſyngulars/ is generall to all preterit or paſſyue particyples in this tonge/ſo that if they befounde otherwyſe written/ it is by the erroure of the printars.

The fourthe accident.

¶ Declynation whiche maye appere/ by the accident here nexte before/ as aymé, aymeȝ, aymée, aymées: conuertý, conuertýȝ, conuertýe, conuertýeȝ,: partý, partýȝ, partýe, partýeȝ: prins, prins, prinſe, prinſeȝ: faict, faictȝ, faícte, faíctes: batú, batúȝ, batúe, batuésȝ.

The fifte accident.

¶ Agreyng with the relatyue or with ſome other acculatyue caſes gouerned of the verbe/ for though the participle paſſyue folowyng the tenſes of ie ſuis/ is euer of ſuche gẽdre and nombre as the pronowne or ſubſtantyue/ that is nominatyue caſe to the ſame tenſes dothe requyre/ as I haue ſufficiently declared hereafore/ whan I ſhewed howe verbes paſſyues in this tong be circumlocuted. yet whan the participle preterit foloweth the tenſes of ie ay/ it is nat euer generall that he ſhall remaygne vnchaunged/ but as I ſomthyng touched in the note vpon the thirde accident of verbes actyues perſonalles/ yf the tenſes of ie ay haue a relatyue before them/ or gouerne an acculatyue caſe eyther of a pronowne or ſubſtantyue/ the participle for the moſt parte ſhall agree with the ſayd acculatiue caſes in gendre & nombre/ and in ſuche ſentẽces nat remayne vnchaũged: as The letters that I haue ſent you/ Les lettres que ie uous ay ennoyées, Helas I haue loued her/ helás ie lay aymée, my huſbande hath beate me/ mon máry ma batúe, He hath anon taken an arowe/ il a tãtóſt prinſe vne fléche: But this ſhall in the thirde boke in this place more playnly appere/ where I wyll alſo declare howe with their paſſyue participles/ they vſe cõception of gendres. Onely in this place it is ynough to warne the lernar herof/ that he maye the better obſerue it/ for there is nat a more ſtraunger conſtruction in all this tonge.

Of the prepoſition.

Diſcriptio ꝓpoſitionis

¶ Prepoſitions be ſuche/ as whan ſoeuer they come in any ſentence being dyſtinct wordes by them ſelfe/ and nat compounde with other/ they ſuppoſe a ſubſtantyue or pronowne to come after them in the ſame ſentence/ wherunto they do belong.

¶ Prepo-

¶ Prepositions be thus many: A, to/ or at. De, of/ or fro. En, in. Sur or sus vpon/ soubz vnder/ dessús aboue/ dessóubz vndereth/ auéc or auécques with/ cóntre agaynst/ uers or enuérs towardes/ selón, tóvxte, aprés after enuirón about/ óvltre ouer/ beyond/ or through/ permy through/ éntre betwene or amongest/ deuánt before/ derriére behynde/ pour for/ and par by and as for re is neuer vsed alone but incõpositon/ as I haue aforesayd/ in the.lii. chapiter of the first boke. Prepositiones. xxiiii.

So that this discription is generall to all these.xxiiii.prepositiõs/ and they neuer befounde belongynge to any of the other partes of speche. Regula

Saue that A, de, and pour may come before infinityue modes/ as I shall hereafter in the thirde boke in my annotacions vpon the vse of the infinityue mode appere. Exceptio prima.

And saue that dessús, dessoúbz, deuánt, derriére, and óvltre, maye sõtyme be vsed as aduerbes/ declaryng or answeryng to a question made of the place where a dede is done. Exceptio secunda.

¶ Prepositions haue fyue accidentes. Gouernyng of the oblique cases of pronownes/ Commynge fardest from the substantyue/ Composition with dyuers partes of speche/ where they be kept hole and vnchaũged. Confused/ composition with these articles le and les. Sõtyme addyng/ somtyme leauyng awaye of this prepolytion de, otherwyse than we do in our tonge in the same sentences.

The first accident.

¶ Gouernyng of the oblique cases of pronownes/ for whan soeuer any of the pronownes primatyues folowe a prepositon and is gouerned of hym/ they vse euer their oblique cases/ as Pour moy, cóntre toy, a luy en elle. &c. and so of all the resydue/ whiche I haue somtyme alreby touched in the fyfte accident of pronownes primitiues.

The seconde accident.

¶ Cõmyng fardest from the substãtyue/ for if any of the declinable wordes/ article/ adiectyue/ or pronowne/ or two of them/ or all thre at ones come before a substãtyue/ the prepositon must come before them all/ and that as well in our tong as in the frenche tong/ as I haue also afore touched in ỹ rule that folowyth/ whiche be muneralles. Folio.xxiiii.as for my good maister/ pour mon bon máistre, and so of suche lyke.

And note that these two accidentes be generall to all the.xxiiii.prepositions without any exception. Regula

The thirde accident.

¶ Cõpolytion/ for somtyme prepositions be compounde with substantyues/ as Surśávlt, entróeyl, póvrpris, and suche lyke. Somtyme they be compounde with verbes / as Abordér, departir, enterrér, surpréndre, soubz méttre, contergardér, entreméttre, ovltrocvidér, povrueóyr, parue-

nir, rappellér, redire. Sõtyme they be cõpounde with other prepoſitiõs as deſſús, deſſoúbz, davécqués, enóvltre, depár, enapres, encóntre, deuers pardeuánt, parderriére, and ſuche lyke/whyche all be in maner euer vſed as aduerbes/and ſyldome as prepoſitions. Somtyme they be cõpoũde with aduerbes: as Decá, delá, enauánt, dehórs, delorſencá, & ſuche lyke.

Regula prima. And note/that of theſe.xxiiii.prepoſitions onely/ten be vſed in compoſition/eyther with verbes/ſubſtantyues/ or any of their other partes of ſpeche/that is to ſay: A, de, en, ſur, ſoubz, cóntre, éntre, óultre, pour, par and re: as appereth by tyexamples here afore reherſed, and as for any of the other be ſyldome or neuer founde in compoſition.

Regula ſecunda. So that Enuironnér is no compounde verbe / but fourmed of enuirón, lyke as ovltrér is fourmed of óultre.

Regula tertia. And as for Accvmvler, abſtenir, adivgér, inuadér, conióyndre, preparér, ſubivguér, prométtre, and ſuche lyke be no verbes compoundes of the frenche tonge/ but holly borowed out of the latyn/ lyke as I haue afore touched/in the rule which foloweth the.viii. accident of verbes actyues parſonalles.

Regula quarta. Note alſo/ that where as dyuers verbes and ſubſtantyues in the french tong begyn with des, as deſhonéſt, deſdáyng, deſméttre, deſployér, deſpéndre, déſhonovrér, and many ſuche lyke. They be nat cõpounde with this prepoſytion de but of this worde des, whiche out of compoſytion in this ſence betokeneth nothynge/ no more than do theſe wordes Mes & For: Wherof I haue made mencion in the.viii.accident of verbes actyues parſonalles/whiche worde we alſo call dis in our tonge. Whan we borowe any ſuche verbes or ſubſtantyues out of the frenche tong: Saying/diſdayne/diſhoneſt. I diſmyſſe/ I diſplaye/ I diſpende/ I diſhonour/and ſuche lyke.

Regula. buinta. Note alſo/ that E of this prepoſition En/ ſo often as he is compounde with any verbe or ſubſtantyue/ begynnyng with B/ m/ or p: he chaungeth n in to m/ as Embraſſér/ emmvrér/ empirér/ embás.

Regula ſexta. And howe entré and re / whiche be often vſed in compoſytion with the verbes of this tong leſeth their E/ if the verbe or ſubſtantyue folowyng begyn with a vowell or with h/ nat hauyng his aſpiratyon: as entrayméř / entrhabitér / rauóyr / rappellér / I haue alredy declared in the.lii. chapiter in the firſte booke. Where I alſo ſhewed howe De leſeth his vowell/ whan the worde that he is ioyned withall/begynneth with any of the ſaid letters/ as Dor / dhonéſte / conuerſatiõn/ davóyr/ & ſuche lyke.

Regula ſeptima

The fourthe accident.

Confuſed compoſition/ with theſe artycles Le and les. For ſo often as the ſentence falleth/ ſo that theſe wordes/ A le/ de le/ or en le/ do come togyder/they vſe for a le/ to write av/ for de le dv/ and for en le ov/ as for

to the

to the mayſter/they ſaye nat a le máiſtre, but av máiſtre, and in lykewyſe nat de le máiſtre but dv máiſtre, noꝛ en le maiſtre but ov máiſtre, and ſo of ſuche lyke thoꝛowe all the tong.

Except the maſculyne ſubſtantyue/ his adiectyue oꝛ pꝛonowne/ whiche nexte foloweth after this artycle le, begyn with a vowell oꝛ with h, nat hauyng his aſpyꝛation/ foꝛ than they take awaye the vowell of the artycle/and ioyne the L to the vowell oꝛ h nexte folowyng/kepyng ſtyll the pꝛepoſition vnchaũged: as foꝛ to the abbe/of the man/ in the ſoule: they ſay a lábbe, de lhómme, en láme, as I haue alredy declared in the.lv.chapiter of the firſt boke. Exceptio

And note/ that thoughe they vſe this confuſed compoſytion/ with theſe thꝛe pꝛepoſitions ✠ the maſculyne artycle ſynguler/ they vſe it nat with la, whiche is the femyne artycle ſinguler/thoughe la do leſe his vowell as well as le, by reaſon of the woꝛde folowyng hym/ lyke as I haue in the ſayde chapiter of the firſte boke declared/ ſo that I ſhall nat ſaye av fémme, but a la fémme, de la fémme, en la fémme. Regula prima.

But ſo often as the ſentence falleth/ ſo that any of theſe pꝛepoſitions do come befoꝛe this artycle les, whether he belong to a maſculyne ſubſtantyue oꝛ a femyne/they vſe to compounde theſe pꝛepoſitions and les confuſedly togyder/ and tourne a les in to avx, de les in to des, and en les in to es, as foꝛ a les hõmes, de les fémmes, en les mayſóns, they ſaye avx hómmes, des fémmes, es mayſóns, ✠ ſo of all ſuche lyke thꝛough all the tong. Regula ſecunda.

The fyfte accydent.

¶ Somtyme addyng ſomtyme leauyng out of this ꝓpoſition de, other wyſe than we do in our tong in the ſame ſentences.

Addyng of De.

¶ Foꝛ whanſoeuer they vſe any of theſe woꝛdes Plus, móyns, beaucóup peu, tant oꝛ aſſes befoꝛe a ſubſtãtyue/ they adde to de moꝛe than we haue in our tong in the ſame ſentẽces/as where we ſaye/moꝛe golde/leſſe ſyluer/moche wytte/lytell diſcrecion: They ſaye/ Plus dor, móyns dargént beaucóup dentendément, peu de diſcretión, lyke as they ſaye / Il compoſa des liúres, novs trovueróns des ávltres.

Leauyng out of De.

¶ Foꝛ where as we ſaye/ my maiſters gowne/ my ladyes beedes/ whiche countreuayleth as moche as the gowne of my maiſter/ the beedes of my lady: They ſaye/ La robe mon máiſtre, le patenóſtres ma dáme, lyke as they ſaye/ Il deſcendit du havlt mont gordievs,il vint iuſqnes av fléuue armis, But this is nat euer generall/ and therfoꝛe I ſuppoſe ſuffycient in this place onely to warne the lernar here of.

Of the aduerbe.

¶ Aduerbes be ſuche as belongyng vnto verbes/ſerue to make declara

tion/or answere vnto suche questyons as be demaũded of a dede/and to expresse the tyme/place/maner/or some other circumstaunce belonging to the same. And where as there be sondrie sortes of aduerbes/ I shall here in this boke reherse a certayne of eche sorte/suche as come moost in vse/ for the residue/ referryng the lernar to the table of aduerbes in the thirde boke.

Regula prima. Notyng here first/that where as all the other ptes of speche in this tonge/ be so vtterly distynct one from another/ that there is no worde cõtayned vnder any one of them/whiche is contayned vnder another. In aduerbes this thyng is nat so precisely kept/for though there be some fewe wordes/ whiche onely be aduerbes/ and contayned vnder none of their other partes: There be fewe also of the said other partes/ but they may be vsed as aduerbes/ nat onely word alone by thẽ selfe/ but cõtyme two wordes beyng sondrie partes/somtyme thre/ and somtyme four or fyue/ ye/and somtyme hole sentences/as Matin, bas, fort, avlcvnefoys, en alemánt avsóyr, aviovrdhvy tout astévre, quant et quant, cest adire, cest ascavóyr, and many suche lyke/ as I shall here consequently in this boke/but specially in the thirde boke in this place appere. So that if an aduerbe seme to be but one worde/and in dede be made of many: It shall moche helpe the lernar to the parfite vnderstandyng of them/if he can enserche out of what and howe many distynct wordes the sayd aduerbes shulde be made/ as astévre is made of a céste hévre depvisnagáyres, of de pvis il ny a guayres/ of whiche sorte be also certayne other.

Regula secunda. Notyng here also/ that for so moche as many of the aduerbes here after folowyng serue to make answere vnto suche questyons/ as be demaunded in ths tong/ I shall here first shewe by what wordes they vse to make their interrogations/ whiche be these.

Quant whan/ov or ove where or wheder/cómment howe/combien howe moche or howe many/ combien de foys or quant defóys howoften/ enquél endróyt wheraboutes/depvis quant sithe whan/ dont frõwhens or wher of/ povrquoy wherfore/ a quoy faire what to do/ par quel móyen by what meanes/ascavóir mon si to wytte whyder: As for a qui to whome/a quoy to what thyng/de qui of whom/de quoy wherof or of what thyng/en qui in whom/en quoy in what thyng/and suche lyke questyons whiche may be demaunded by all the prepositions: They serue nat to demaunde a questyon of any dede but of a thyng.

Regula tertia. And note/that suche maners of interrogatyons differe from the first/ for whan soeuer a questyon is so demaunded that the first worde is a prepo sition/ the first worde of the answere must also in maner euer be a prepo sytion / as En qui me fieráy ie? en diev, En quoy le metteráy ie? en vóstre bovrse/ but in these other it is nat so/as I shall herafter appere by ỹ diuy?

dyng

Apres after/ as apres nonne, apres noel. &c. Hvy to day/ which is seldom vsed but in cōpositiō as avjourdvy or mesvy to day/ avmátin in the morning/ a mydy de noon: avsoyr at euyn/ a nvyt at nyght/ demáyn to morowe/ apres demáyn two dayes hens or two dayes hereafter/ hyer yesterday/ devanthyer two dayes a go/ mátyn early tart late/ iadis in olde tyme/ avtēps iádis aforetyme/ touiours alwayes/ ónques euer/ iamáys or onques wyan/ ne cometh before his berue neuer/ and generally all substantyues betokenyng tyme/ wyan they be vsed as answeres to this question/ wyan.

Some betoken order in place/ as Devánt before/ derriére behynde/ de ca or tyrayde/ de la beyonde/ avmyliev in the myddest/ av havlt bout at the vpper ende/ av bout dembás at the nether or lower ende/ av destre on the right side/ av senéstre on the lefte syde/ du cóste a syde halfe or beside/ premier firste/ dernier laste: And so of all nombres whan we vse them/ hauyng respecte to any order had in place.

¶ Some betoken qualite and ſerue to declare or anſwere to a queſtion howe a dede is done: as Bien well/ mal yuell/ tellément quellément ſo ſo/ entredevx bitwene twayue.

Regula quarta. ¶ And note/that of euery feminine adiectiue in the frenche tonge maye be formed an aduerbe of qualite/by adding to of ment, as of Belle bellement, diſcrete diſcretemént, but bién and mal be more in vſe than bonnément and mallément, and this rule hath ſome.

Exceptiõs wherof/ I defer to ſpeke tyll I ſhall cõe to the thirde boke in my annotatiõs vpon this rule onely here I ſuppoſe it ſufficiẽt to warne the lernar/that lyke as we in our tong: Of good forme goodly/of wyſe wiſely/ of diſcrete diſcretely: And ſo of other adiectiues fourming our aduerbes of qualite by adding to of ly/ſo do the frenchemen to their feminine adiectiues adde ment.

Some betoken comparation/whiche added before theſe aduerbes betokening qualite ſerue to compare one dede to another: as Plus ſaigemẽt more wiſely/ móyns diſcretément leſſe diſcretely: and ſo of all other aduerbes betokening qualite/ſaue that mievlx and le mievlx,pis and le pis be vſed without adding of puls: but hereof I ſhall hereafter in ỹ thirde boke in this place ſpeke more at length.

Some betoken vehemence/and ſerue to extende or diminyſſhe the qualite of a dede/without makyng of cõpariſon therof to any other/wherof I haue made mencyon in the fourthe rule of the fourthe accident belongyng to nownes adiectiues/whiche be theſe. Accidentes to aduerbes generall.

Acci-

Accidentes particular.

Regula prima. ¶Particular vnto all aduerbes/by whiche one dede is cõpared to another: it is belõgyng to haue ne cõmyng before the later verbe ꝑ foloweth this worde Que, signifyenge than/ more than we haue in our tonge in the same sentence: as where we saye/ I thynke more than I saye/ I haue lesse than I deserue/ I drynke better than I syng/ you dauce worse than you tumble: They say/ Ie pense plus que ie ne dis, I ay móyns que ie ne rite, Ie boys mievlx que ie ne chánte, Ie dánse pis que ie ne túmbe: and so of all other lyke sentences/ where we vse to compare one dede to another/ by plus or moyns, commynge before an aduerbe of qualite: as Il párle plus saigément que uovs ne faictes. Il beſóigne moyns discretément que ie ne cvidóye. and so of all other. But as for Ie ne lestéme ne que devx pómmes, & suche like: where they leaue out plus, I shall hereof in the thirde boke in this place more entreate.

Regula secunda. ¶ And

¶And thys for an introductyon and in a generalytie / to shewe howe many partes of speche there be in the frenche tonge/ and what accydentes belong vnto them/ I suppose to be suffycient: Endynge thus of my thre bokes the seconde/ In whiche I haue so oppyned all the hole frenche tong/ Notwithstandyng/ any breuite that I haue herin vsed/ that if the lernar haue this seconde boke parfitely/ he maye by the helpe of the frenche Vocabuler / be sure to vnderstande any authoure that is writtен in the frenche tong/ by his owne studye without any techar: Except some fewe sentences/ whiche the lernar shall fynde gathered in an order/ before the begynnyng of the sayd Vocabulyst.

Reſteth nowe vſyng / the ſame order agayne/ to ſhewe accordyng as I haue afore promyſed more exquiſitely/what other accidẽtes and properties the ſayde partes of ſpeche haue/ ſo that the lernar maye be aduertiſed/nat onely what gendre all their ſubſtãtyues be of (whoſe gendre the other declynable ptes muſt folowe) and howe the ſayd ſubſtantyues forme their plurell nombres out of their ſingulars/ and whyche of their ſubſtantyues be vſed in the plurell nombre onely. But alſo howe the other declynable partes forme their plurell nombres oute of their ſingulars/their femmynes out of their maſculynes/ & howe their verbes forme one mode and tens out of another/and alſo whan & whye they vſe ſomtyme one mode and tens/ and ſomtyme another. And farder more/ what order and congruite they vſe in the couenable ioynyng of euery of the ſayd partes/one with another/ as they come togyder in ſentences. After euery of whyche partes ſo cõpletely entreated of/ I ſhall folowe certayne tables/cõtaynyng all the wordes in our tong/ after the order of a/b/c/with the frenche wordes ioyned vnto them/To thentent that after the lernar can by the helpe of the ſayde firſt boke/ pronounce this frenche tong truely/and by the meanes of the ſeconde/ with the frẽche vocabulyſt (whyche I ſhall folowe whan the thirde boke with his tables is completely finiſſhed) vnderſtande any authour that writeth in the ſayd tong by his owne ſtudy/ without any other teacher.

He maye alſo by the helpe of this thirde boke and tables thervnto belõgyng/knowe howe to ſpeke any ſentence/ or truely and parfitely to endyte any mater in the ſame tong: So that/if he well note the preceptes in this thirde boke cõtayned/and gyue hym to the often redyng and dilygent obſeruyng of ſuche authours/as in the ſayd tong be mooſt excellent: Or els/if he be ſo mynded/do note well the ſtyles of ſuche ſecretaries/as in the fayt of enditynge be moſt approued. He ſhall here in this ſaid thirde boke fynde all thynges/whyche to haue the ſayd tong inparfection/ outher to ſpeke or write in it maye be requyred.

Notynge here firſte/that the order whyche I haue taken in the ſeconde boke is in this thirde boke/ſo preciſely kept agayn: that the hole ſecõde boke maye ſeme to be but as a table vnto this thirde boke. For euery ac

Seconde/ some be compounde of two wordes/ of whiche the last is a substantyue distyncte by hym selfe/ thoughe the first be vnparfyte: as Printemps the spring of the yere/bersault a quyntine/ licol a halter/mynuyt mydnight/and suche lyke: and all suche also be of suche gendre as their later substantyue is alone by hym selfe.

Thirde/some be compounde of two wordes/ of whiche the one is a sub-

ſubſtantyue and the other an adiectyue / as Mon ſieur, the heyre appa-raunt of Fraunce/ madame the heyre of apparauntes wyfe / or the kyn-ges mother/ bon hõmme a poore huſbande man / bonne femme a poore woman/ gentyl hõmme a gentyll man / gentyl femme a gentyll woman/ beavpere a father in lawe or a beaupere a felowe/ belle mere a Mother in lawe/ grant pere a graunt father/ mere grant a graunt mother / and ſuche lyke: and all ſuche be of ſuche gendre as the ſubſtantyue is alone by hym ſelfe ſhulde be.

Fourthe/come be compounde of two wordes/of whiche the one is a ſubſtantyue the other ſomtyme alſo a ſubſtantyue/ and ſomtyme ſome other parte of ſpeche / as Garderobe a wardroppe / portebuffet he that hath charge of a great mãnes plate/ ſavluecõduit a ſafe conducte/ ortie-griache a wylde nettell/ quareſme prẽnant ſhraftyde/ furſault a ſodayne ſtarte/ ſomerſault a tumblyng caſte/ barbedieu the fede of dandelyon/ whiche chyldren call preeſtes crownes/ & ſuche lyke: and all ſuche be of ſuche gendre as the ſubſtantyue is alone by hym ſelfe: But they which be made of two ſubſtantyues / as Barbediev, chanſſe trappe, ſhalbe of ſuche gendre as the later ſubſtantyue is alone by hym ſelfe.

But if they be expreſſed by thre wordes/of which the myddle worde is a prepoſytion/ as Bec de faulcon a pollax/ tablier a femme a womans napern e/ huſche a petrir a knedynge troughe/ and ſuche lyke: all ſuche ſhalbe of ſuche gendre as the ſubſtantyue is that cometh before the pre poſition. And this for to knowe the gendres of all the ſubſtantyues in the frenche tong bothe ſymple and of ſuche as be compounde/ I thynke to be ſufficient.

Annotations vpon the thirde accident. Capi. liiii.

¶ Upon the thirde accident I fynde nothynge to be noted/ Saue that ſubſtantyues vſed in ſuche wyſe/as the latyns do their vocatyue caſes/ haue the ſeconde perſons of the verbes of ſuche nombres as the ſubſtãtyues be: as of O homme aduiſe toy, o hommes amendez uovs.

And note/that if two ſubſtantyues or many come before a verbe/ beinge ioyned togyder with a conιunctyon copulatyue/ or elles diſtyncted from a ſondre with this ſtryke / the verbe ſhalbe of the plureil nõbre/wheder the nownes be ſynguler or plurell. Deſirãt la mort qui tant me tarde, que ie la regrete chaſcun iour comme celuy qui courrovx, fain, et deffiãce de cõfort, mainent doulovrevſement a ſon dernier iour.

Si polution ou ſacrilege eſt faicte ou temple, I ſuche like.

Annotations vpon the fourthe accident/ and firſt what ſubſtantyues be formed out of other ſubſtantyues. Capi. lv.

¶ Of euery ſubſtantyue endynge in E, betokenynge the name of any frute/ maye be fourmed another by chaungyng the E in to ier, whiche ſhall ſignifie the tree that beareth the ſame frute: As of Pomme an apple/ pommier an apple tree/ poire a peare/ poirier a peare tree / ceriſe a chery/ ceriſier a chery tree/ and ſo generally of all other.

Except

Excepte noyſette an hayll nutte/ whoſe tree is named covldre and more/ bothe for a mulbery and a mulbery tree / howe be it I fynde alſo morier.

Excepte alſo royſin a reyſyn/ whoſe tre is named uigne, and noix for a walnuttte maketh noier for a walnut tre/ chaungyng x in to E R.

Alſo of euery maſculyne nowne verball in the frenche tong/ whiche euer ende in evr, maye be fourmed his femyne verball/ by chaungynge of evr in to reſſe, as of Tencevr tẽcereſſe, but howe the maſculyne nownes verballes be fourmed ſhall here after appere.

Alſo of euery maſculyne ſubſtantyues endynge in ier, be tokenyng the name of a man of crafte by addynge to of E, maye be fourmed a femynine ſubſtantyue betokenyng the wyfe of the ſame crafte is man or a woman/ exerciſyng the ſame crafte: as of Covſturier a tayllyour/ covſturiere a tayllyours wyfe / bovlengier a baker / bovlengiere a bakars wyfe/ and ſo of all ſuche lyke.

And note/ that the mooſt parte of all ſuche maſculyne ſubſtantyues be fourmed out of the ſubſtantyues / whiche betoken the thynge that they muſt occupye or ſerue for/ As of Barbe a berde/ barbier a barbour of bovrſe a purſe/ bovrſier a purſar/ of drap a clothe/ drappier a draper of pot a potte/ pottier a potter/ ſo that if the firſt ſubſtantyue ende in e, by chaungyng of E in to ier, he ſhall forme his name of crafte.

And if the firſt ſubſtantyue ende in a ſyngle cõſonant/ by doublyng of the conſonant and addyng to of ier, he ſhall forme his name of craft But this is nat generall/ for I fynde Chavſſetier a hoſyer/ cocquetier a huckſtar/ clovtier a nayle maker/ pantier a panter/ whiche adde a T before ier, for their ſubſtantyues that they be fourmed of be Chavſſe, cocque, clov, and pan for payn: And lingiere addeth to G, and as for boulengier a baker/ freppier an vpholſtar/ and menuyſier a ioyner/ be formed of no ſubſtantyue vſed in the tong.

And note/ that all the handy craftes in the frenche tonge/ and alſo dyuers names of offices ende outher in ier, as treſourier a treaſourer/ or in evr, as brodevr a broderar/ or elles they be circumlocuted with thre wordes/ of whiche the myddle worde is a prepoſytion: as Fayſevr de bahus a lether coofer maker or a bouge maker / fayſevr de chapperons hoode maker/ But eſcripuayn a ſcryuenar/ macon a maſone/ charron a whele wright/ uigneron a tyllar of vygnes/ payntre a paynter/ tiſſerant a weauer/ mareſchal a farrer or a ſmythe that ſhoeth horſes/ and apothecaire a pothecary be excepte.

Alſo all diminutyues ende outher in ceav, as Laronceav a lytell theefe/ herõceav an hernſhawe: or in et, as Liuret a lytell boke/ corpſet a lytell body: or in ette as fẽmette a lytell woman/ whoſe gẽdre is euer ſuche as

the ſubſtantyue that they be fo3med out of/ as I haue afo3e declared: & all that ende in ceav, be fourmed of maſculyne ſubſtantiues endyng in on, by addyng to of ceav, as Lion lionceav: Howbeit I fynde homonceav fourmed of homme, and rainceav a lytell bough fo3med of rame, differyng in gend3e from his p3imitye/ as I haue a3o3e touched: and garconet a lytell boy of garcon, & coyſchonet a lytell pygge of coyſchon and of chancon a ſonge/ and mayſon a houſe/ chanconette a lytell ſong and mayſonette a lytell houſe/ bycauſe they be of the femynine gend3e. But all maſculyne ſubſtātyues endyng in E by addyng to of T, fo3me their diminutyues: as Sygne a ſigne/ iignet a ſynet.

All whiche ende in any other conſonant by adding to of et, fo3me their diminutyues/ as Corps corpſet, ſo that all ſuche ſubſtātyues as ende in eav, whoſe olde Romant wo3de dyde ende in el, by addynge to et, to their olde Romant wo3de/ fourme their diminutyues: as Aigneav aignel, aignelet, a lytell lambe/ oyſeav, oyſel, oyſelet, a lytell by3de/ tōneav tonnel, tōnelet, a lytell tonne/ and ſo of all the reſydue: and in lykewiſe all femyne ſubſtantyues endyng in E, by addyng to of tte, fo3me their diminutyues/ as of Folle a ſhe foole/ iollette a lytell foole/ muſe a bagpype/ muſette a lytell bagpype: all other endyng in any other termynation by addyng to of ette, fo3me their diminutyues/ as Pavr feare/ pauorette a lytell feare/ but of brebys a ſhepe/ I fynde brebiette a lytell ſhepe fo3 brebiſette/ and of boitte a box/ boytelette a lytell box/ & many I fynde in the termitation of diminutyues that be none/ as Foret a gymlet, chenet an aundyron/ and ſuche lyke.

And note/ that they fo3me diminutyues alſo of p3oper names/ as of Iehan Iehannet, of Iehanne Iehannette, of Eſtien Eſtiennon, of Eſtiene Eſtiennette.

Alſo of dyuers ſubſtantyues betokenyng tyme/ be fo3med other ſubſtantyues endyng in EE, whiche ſygnifie the ſeaſon o3 the tyde of the ſame tyme/ as of An a yere/ annee the ſpace of a yere/ of iovr a daye/ iovrnee the ſpace of a daye/ of matyn a mo3nyng/ matinee the ſeaſon of a mo3nyng/ of ueſpre an euenyng/ ueſperee an euenyng tyde/ of nuyt a night/ nuytee a night tyde/ and mo I fynde nat in the tong of this ſo3t.

Alſo of all ſuche ſubſtātyues as ende in art, if they betoken any cōdicion to a man belongyng/ fo3me a femynyne/ by tournyng T in to de, as of Baſtart baſtarde, braggart braggarde, cocquart cocquarde, paillart paillarde, fetart fetarde, and ſuche lyke/ wherof I haue ſpoken here be-fo3e.

Alſo other ſo3tes of fo3mations of ſubſtantyues I fynde/ whiche be nothyng ſo generall no3 ſo certayne/ of whiche ſo3te be ſuche as ende in Aige, as of Corde cordaige, of baggve baggaige, of frinct frinctaige, of

Other ſoꝛtes of diriuatyons there be/wherof I haue made mencion here beforꝛe/ about ẏ begynnyng of the firſt accident/ where I ſhewed howe the gendꝛe of ſubitantyues may be knowen by reaſon of their ſignification/which bycauſe I can bꝛing vnder no generall rule I paſſe ouer/repoꝛtyng the lernar to the well notyng of the ſame ſubſtantiues in the ſayd place.

What ſubſtantyues be fourmed of adiectyues. Capi lb.

¶ Of euery adiectyue in this tong is ſourmed a ſubſtantyue/ ſuche as the latyns call abſtractis/But howe they be foꝛmed I can obſerued no maner generall rule to be certayne: ⁊ therfoꝛe I ſhall defarre to ſpeke of euery of them tyll they ſhall come in place/ in the table of nownes ſubſtantyues: Howe be it foꝛ the mooſt parte/ all ſuche adiectyues as haue their maſculyne gendꝛe and femyne / bothe endynge in E, by addyng to of Te, foꝛme tyeir abſtractis/as of Lache ſlacke/ lachete ſlackeneſſe/ of amyable amyable/amyablete amyableſſe: but foꝛ this thynge our tonge is moche moꝛe certayne/ Foꝛ in maner all oure abſtractis ende in neſſe: as fayꝛneſſe/blackeneſſe/goodneſſe/wyſeneſſe/ foꝛyſſheneſſe/ ⁊ ſo of all other/except they be ſuche as we take of the frẽche tong as Humilite, fragilite, grauite, whoſe right Engliſſhe woꝛdes be hũbleneſſe/fraylneſſe/ſadneſſe/ after the generall rule.

Alſo of ſome femyne adiectyues may be foꝛmed ſubſtantyues/ by chaũge of their finall E, in to ault, as of Courte covrtault, lourde lovrdault.

But note/ all that ende in ault, be fourmed of ſuche adiectyues/ foꝛ I fynde ſavlt, berſavlt, and many ſuche lyke whiche be foꝛmed of no adiectyues.

What ſubſtantyues beforꝛmed of verbes. Cap. lbii.

¶ Of euery pꝛeterimparfitens in the frenche tonge maye be fourmed a maſculyne verball/ by chaungynge oye in to evr, as of Parloye parleur, of danſoye danſeur, conuertiſſoye conuertiſſeur, but as foꝛ Domina-

teur, gubernateur, conducteur, and moderateur, prenuciatereſſe, and ſu che lyke vſed of Johan le Mayze/ they folowe rather the latyn to[illegible] cion/ than the right frenche tonge.

Alſo of euery preterimparfitens maye befourmed a ſubſtãtyue/ whoſe Englyſſhe endeth in yng/by chaungyng of oye in to ement, as of Par loye parlement a ſpekyng/ of conuertiſſoye conuertiſſement, of ſentoye ſentement, and ſuche lyke.

I fynde alſo certayne ſubſtantyues fourmed of the infinitye modes/ whiche ende in vre, as of Engendrer engendrvre, of novtir novriture, of eſcripre eſcripture, of enfler enflvre, of murmvrer murimvre, of deſ-comfire deſcomfitvre, and ſuche lyke: But the fozmation of theſe ſubſtã tyues I can nat bzing vnder a generall rule certayne.

Regula ¶And note/ that it is moche requiſyte foz the lernar/ to haue regarde to theſe rules/ wherby I declare the ryght fozmation of ſubſtantyues in the frenche tonge/ foz the better vnderſtandyng of my frenche voca-bular/ wherby if any of theſe ſubſtãtiues whiche after my rules be foz-med of other/happen to be lafte vnwzitten/if he call to mynde my ſayd rules/he maye fozme all ſuche hym ſelfe: and therfoze to put all ſuche in the vocabular I reken it but ſuperfluous.

And here it is to be noted that in the frenche Vocabular/ euery ſubſtã-tyue whiche is expzeſſed by thze wozdes/ of whiche the myddle wozde is a pzepoſition/ ſhalbe ſette fozthe in the wozde that cometh befoze the pzepoſytion: as Bec de favlcon, ſhall folowe after bec, and chavlderon de mer, ſhall folowe after chavlderon: & therfoze whan the lernar hath founde out bec and than favlcon, and yet can nat fynde out any wozde of ſuche ſence as he loketh foz/ let hym tourne backe agayne to bec, and there folowynge he ſhall fynde the ſayde thze wozdes expzeſſed: But hereof I ſhall haue occaſion agayne to ſpeke in the pzologue of the frẽ che Vocabular.

¶Where

¶ Where we in our tonge vſe to putte/ S, to oure ſubſtantyues whan we wyll expreſſe poſſeſſyon/ſayeng a mannes gowne/a womans hoſe/ and ſuche lyke/ So that our ſubſtantyues ſeme to haue a genityue caſe with them/without any chaungyng of the laſte letters of their ſubſtãtyues/ Suche ſpekynge is expreſſed by this prepoſition/ A, as where we ſaye/ a mannes gowne/ a womans hoſe/ they ſaye/ Robe a homme, chauſſea femme, and in lykewiſe if we adde the pronowne poſſeſſyue to any ſuche ſubſtantyue/ as this is my maiſters gowne/ he dyd fette his maiſters cloke/ ¶ They ſay/ Ceſt la robe a mon maiſtre, il alla querir le mãteau a ſon maiſtre, Whiche rule is well to be noted / and howe the adiectyues and participles folowe the gendre and nombre of the ſubſtantyues/ and what congruite they vſe in that behalfe/ I ſhall hereafter in euery of the ſayd partes as they come in order more playnly appere.

¶ And nowe that I haue here in this thirde boke declared at length/ what accidentes and properties belong vnto all the ſubſtãtyues in the frenche tong/ I ſhall here cõſequently ſet forthe/ what and howe many ſubſtantyues there be in the ſame tong/ whiche to thentent they may of euery lernar the more eaſely be foũde/ whan he hath any ſentence or matter to be made out of our tong in to the frenche/ I ſhall ſet forthe all the engliſſhe ſubſtantyues in our tong/ after the order of a/b/c/ and in the ſame lyne ſhewe what ſubſtantyues in the frenche tonge is of lyke ſignification.

And fardermore / for a more helpe and ſpedy forderyng of the ſayd lernar/ if he be nat parcyte in my rules herafore declared/ I ſhall expreſſe in the ſame lyne/ what letter the ſayd frenche ſubſtãtyues haue in their plurell nombres/ and what gendre they be of in the ſayd frenche tonge: for if they be of the maſculyne gendre/ the lernar ſhall fynde after ỳ letter of the plurell nombre Ma, if they be of the femyne gendre Fe.

And fardermore/ if we in our tong haue but one worde/ whiche the frẽche tong circumlocuteth with thre or four wordes/ of which one of thẽ is a prepoſition: I ſhall ſet for the plurell nombre and the gẽdre of the firſt worde onely/ whiche ſhall ſuffice / for the other wordes remayne vnchaunged for bothe the nombres. As where we ſaye/ a pollax/ They ſaye/ Bec de faulcon, Of whiche thre wordes I ſhall onely ſette forthe the plurell nombre and gendre of Bec, as Bec de faulcon ; ma. For as I haue ſayd/ the other wordes remayne vnchaunged/ and ſo of all ſuche other.

Here endeth the table of ſubſtantyues / and here after foloweth the Adiectyue.

¶ Annotacyons vpon the fyrſt accydent belongyng to nownes Adiectyues/ and howe they forme their Femynyne genders out of their maſculynes.

HOwe Adiectyues folowe the genders of ſuche ſubſtantyues as they belong vnto / I haue afore in the ſeconde boke ſome thyng touched/ and ſhall here after more playnly expreſſe: but how they forme their Femynin genders out of their maſculyns/callyng firſt to remembraunce what generall rules I haue gyuen afore in this accydent / in the ſayde Seconde boke / here conſequently ſhall appere by order after the fynall termynations that the ſame adiectyues ende in.

¶ Howe all maſculyn Adiectyues endyng in any vowell or diphthong forme their Femynynes.

¶ All adiectyues endyng in any vowell or diphthong except Au by addynge to of E. forme their Femynines: As Hardy hardye, Barbu barbue, Vray uraye, Gay gaye, Menu menue, Corpſu corpſue.

¶ Howe all maſculyne Adiectyues endyng in au/ forme their Femynynes.

¶ Maſculyne adiectyues endyng i au/ I fynde no mo but two/ beau and nouueau, whoſe Femynines be belle and nouuelle, formed of bel and nouuel, whiche yet kepe the termynacyon of the olde Romant tonge/ as ſhall herafter appere.

¶ How maſculyn adiectyues endyng in any cõſonant forme their Femynines/ and firſt how adiectyues endyng in ¶/ forme their femynines.

¶ All adiectyues/ whoſe maſculyne gender endeth in ¶/ by addyng to Y/ and E/ forme their Femynins: as Blanc blãche, ſec ſeche, franc franche, and ſo of all other.

¶ Howe adiectyues endyng in D/ forme their Femynines.

¶ Maſculyn adiectyues endyng in D / I fynde none written in the Frenche tonge afore Johan le Mayres tyme / for Johan de Meun/ Alayn

Alayn Chartier/and all that haue wrytten afore twenty yeres paſſed haue more regarded to conforme them in writyng / vnto the naturall pronunciatyon of their tonge/whiche neuer ſounde D/in the ende of a worde/ but in the ſtede therof T. But Johan le Mayre and all ſuche as haue wrytten ſythe his tyme/wryte all their adiectyues that be formed of latyn adiectyues endyng in dus/or in dis/ with a D/fynall: as bycauſe the latyns ſaye/ Rotũdus, frigidus, calidus, blundus, profundus, facundus, ſurdus, rigidus, tepidus, uiridis, grandis, crudis, rudis, and ſuche lyke. They ſaye/ Rond, froyd, chauld, blond, parfond, facond, ſourd, royd, tied. uerd, grand, crud. rud: wherin the orthography of this tyme appereth to me amended ouer / it was of olde tyme for the Femynines of all ſuche adiectyues haue euer ended in de: As

Ronde, froyde, chaulde, bothe of olde tyme
and ſo yet be contynued.

Howe adiectyues endyng in F/ forme their femynines.

All adiectyues/ whoſe maſculyne gendre endeth in F/ by addyng to E/ and E/ forme their femynines: As Tardyf maketh tardiſue, haſtyf haſtyfue, penſyf penſyfue, bretyf bretyfue, and ſo of all ſuche lyke and therfore where as in dyuers bokes the femynynes of ſuche adiectyues be wrytten without F / it is the ignorraunce of the Prynters/ whiche knowe nat their owne tonge/ For generally there is none adiectyue of the femynyn gendre/but he hath the conſonant of his maſculyne/ whiche he is formed out of / except adiectyues endynge in X/ whiche in their Femynines chaunge X/ in to S / by reaſon of the vowell folowyng/ whiche is more eaſyer ſounded with S/ than with X/ as ſurcux eureuſe, and ſo of ſuche lyke.

Howe adiectyues endyng in G/ forme their femynynes.

All Adiectyues/whoſe maſculyne gendre endeth in G/by addyng to of E/ and E/ forme their femynynes; As Long longue, excepte brehaing, whiche maketh brehaingne.

Howe adiectyues endyng in L/ forme their femynynes.

All Adiectyues/whoſe maſculyne gendre endeth in L/ by addyng to L/ and E/

to L/ and E/ fozme their Femynines: As Liberal liberalle, cruel cruelle, iſnel iſnelle, and ſo of all ſuche lyke.

¶ Howe adiectyues endyng in N/ fozme their femynines.

¶ All Adiectyues endyng in N/ if they haue E/ oz O/ cõmynge bezfoze N/ by addyng of another N/ and E/ they fozme their Femynines: As Chriſtien chriſtienne, terrien terriẽne, bon bonne, mignon mignonne, if they haue I/ cõmyng befoze N/ outher alone oz in a dyphthong/ by addyng to onely of E/ they fozme their femynines: As diuin diuine, cheualin cheualine, fin fine, uain uaine, uillain uillaine, plain plaine.

¶ Howe adiectyues endyng in Q/ fozme their Femynines.

¶ All Adiectyues endynge in Q/ whiche Johan le Mayze writeth euer with cq/ by addyng to of U/ and E/ fozme their femynines: As Angeliq oz angelicq, angelique oz angelicque, diabolicq oz diabolicque, and ſo of all ſuche other/ as after the latyn fozmation ende in cus/ as Mirificus, magnificus, &q; whyche I wolde rather fozme Miriſiq, magnifiq, than Mirilicque, magnificque.

¶ Howe adiectyues endyng in R/ fozme their femynines.

¶ All adiectyues endyng in R/ by addyng to E/ fozme their femynines: As Dur dure, obſcur obſcure, pur pure, and ſo of all ſuche lyke.

¶ Howe adiectyues endyng in S/ fozme their femynines.

¶ All adiecctyues/ whoſe maſculyne gendze endeth in S/ beyng of one ſyllable/ and hauyng a/ oz o/ foz their vowell/ by addyng to of S/ and e/ fozme their femynines: As Bas baſſe, gras graſſe, gros groſſe, All other/ whider they be of one ſyllable oz of many/ by addyng to of e/ onely/ fozme their femynines: As gris griſe, gorgias gorgiaſe, maluais maluaiſe, except eſpes, whyche maketh eſpeſſe.

¶ Howe adiectyues endyng in T/ fozme their femynines.

All adiecty/

¶ All adiectyues whose maſculyne gender endeth in T/ if they haue a conſonant cõmyng next before T/ by addynge to oncly of E/ they forme their Femynines: As Suſpect maketh ſuſpecte, droict droicte, hault haulte, aduenãt aduenãte, benoiſt benoiſte, court courte, And ſo of all ſuche lyke/except they be ſuche (as I haue made mentyon of) where I ſhewed that the right Frenche tonge hath none Adiectyues whose maſculyns ende in D/ for all ſuche Frenche adiectyues as be formed of latyn adiectyues endynge in dus/ or in dis/ though their maſculyns ende in T/ after the olde maner of ortography/ their femynynes ende in de/ by chaungyng of t/ in to de: As Froyt froyde, And all other that ende in T/ hauyng a vowell cõmyng next before T/ by addyng of another T/ and E/ forme their femynynes: As Plat platte, ingrat ingratte, net nette, mignot mignotte,

¶ Howe adiectyues endyng in U/ forme their Femynines.

¶ All adiectyues endyng in U/ by addyng to of E/ forme their femynynes: As Herbu herbue, Barbu barbue, creſpu creſpue, menu menue, but in theſe adiectyues I fynde nat the orthography of the Frenche tonge/ as yet certayne/ for I fynde them wrytten with eu: as herbeu, barbeu, creſpeu, howbe it I approue more the fyrſte maner of wrytyng/ and where as I fynde Cru for rawe and crue Johan le Mayre writeth it crud and crude, whiche orthography is more trewer/ by cauſe it cometh of crudis. And ſo wolde I rather write nud and nude bycauſe of nudus, than nu and nue, but as yet the authors do folowe the vulgar tong/ for Johan le Mayre ſayth: Puis apres Paris ſe metoit a luicter tout nu auecques les plus fors ſur lherbe uert.

¶ Howe adiectyues endyng in X/ forme their femynines.

¶ All adiectyues whoſe maſculyn gendre endeth in X/ by chaũgyng x/ in to s/ and addyng to of E/ forme their femynines: As Douloureux douloureuſe, honteux honteuſe, terreux terreuſe.

Regula. And note/ that in what cõſonant ſoeuer the maſculyne gender ende in/ the femynine alwayes endeth in E/ except theſe two cõparatyues meilleur and greigneur, whiche ſerue bothe for the maſculyn and femynyne/ as ſhall here after appere. Except alſo grant, whiche ſerueth for the moſt parte for the maſculyn and femynin/ for grande is but ſil dome vſed/ as ſhall herafter appere.

And note

Note also/that these four Adiectyues/ Bel, nouuel, uiel & mal, haue also for their masculyn gendres/ Beau, nouueau, uieulx, and maluais, of whiche the four first be sted afore substantyues/ begynnyng with a vowell or with H/ nat hauyng his aspyration: As Vng bel anneau, ung bel homme, ung nouuel estatut, ung ueil homme, ung mal appetit, but mauluais, is more cõmenly sted before all substantyues/ and mal gre betokeneth dispyte or magrye / Mauluais gre, yuel thanke: As Ie le feray maulgre uos dens. De uostre mescant faict. Ie uous en scay mauluays gre.

Also frais is out of rule/ for after the Frenche formation it shulde be frec, And so I fynde hym written in Johan le Mayre/ whiche is euydent/aswell by the plurell nõbre frecz, as by the femyn freche.

¶ Annotacions vpon the seconde accident belongyng to adiectyues/ and first what adiectyues haue their plurell nombres endyng in S.

All adiectyues endyng in any vowell/ the vowell being alone and no parte of a dipthong by addynge to of S/ forme their plurell nombres: As Triste tristes, hardy hardis, ioly iolis, ossu ossus, membru membrus, by whiche rule appereth / that generally the plurell nombre of all femynine adiectyues in the Frenche tonge/ endeth in S / For (as I haue afore declared) their synguler nombre endeth euer in E.

Also all Adiectyues endynge in Eu / by addyng to s / forme their plurell : As Meneu meneus.

Also all adiectyues endyng in N / R/ or T/ hauyng N/ and R/cõmyng before T/ haue their plurell nombres endynge in s/ but with this difference : for they that ende in N/ or R/ by addynge to of S/ forme their plurell nombres : As Villayn uillayns, plain plains, dur durs, obscur obscurs, they that ende in t/ and haue N/ or R/ cõmynge next before T/ by chaungynge T/ in to S/ forme their plurell nombres: As Vaillant uaillans, expert expres.

¶ What adiectyues in the Frenche tonge/haue their plurell nombre endyng in X.

¶ All adiectyues endyng in Au/ by addynge to of L/ and X / forme their plurell nombres: As Beau beaulx, nouueau nouueaulx.

All adiectyues endynge in Al/ by addynge to of L / and X / forme their femynines : As Egal egaulx, liberal liberaulx.

The Adiectyue

What adiectyues in the frenche tonge haue their plurell nombres endyng in Z.

All adiectyues endyng in any other letter/that is to say/C/F/G/T/ nat hauyng M/ nor R/ cõmyng before hym: el, il, ol, or ul, by addyng of Z/ forme their plurell nõbres: As Sec secz, blanc blancz, hastyf hastifz, uif uifz, long longz, brehaing brehaingz, discret discretz, petit petitz, ingrat ingratz, cruel cruelz, isnel isnelz, subtyl subtylz, gentil gentilz, mol molz, fol folz, nul nulz: and so of all suche lyke.

Annotacions vpon the thirde accident.

Adiectyues agree nat onely with substantyues in gendre and nombre/ but also with the Pronownes primatyues: As Ie suis blanc, vnderstandyng a man. Ie suis blanche, vnderstandyng a woman. Nous sommes blancz, vnderstandyng men. Nous sommes blanches, vnderstãdyng women. & of the other pnownes lykewyse.

But note euer/adiectyues shall alter their termynacions/after the gender and nombre of their substãtyues/ For all adiectyues ending in L/ may be ioyned in their masculyn termynacions in bothe nombres vnto femynine substantyues/ so they come before the sayd substantyues in order: As Vng especial amour, une cruel defence, une gẽtyl damoiselle, par especiaulx differences, par cruelz defences, pour gẽtilz damoiselles: and suche lyke congruyte vse they also with tel, and quel, As Vne tel dame, de quel partz, par telz gens, par quelz meurs: But if suche adiectyues come after their femynine substantyues/ it is more sure to vse their Femynine termynatyons: As Vng amour especialle, une defence bien cruelle, une damoyselle bien gentille, par differences especialles, & defences bien cruelles, une dame telle, quelle ses meurs sont telles: Howbeit I fynde in the Prologue of Froissart/ En memore perpetuel, and in Johñ le Mayre/ Les sept ars liberaulx. But as for le uous ay icy attẽdu, toute iour and ie uous ayme sur, tout riens, and suche lyke. Where toute in his femynin gẽdre is ioyned vnto iour of the masculyn gẽdre/ and in his femynin vnto rien, ỹ I fynde onely vsed betwene these two wordes/ & in the synguler nõbre. And all beit ỹ I fynde this rule syldome broken of any authour that writeth in prose/ yet suche as writeth in ryme/vse in this thyng their lyberte/ as best furnysheth to make the iust syllables of their ryme. Leuesque dangoulesme en le epistre de Medee a Iason, et subiuguer par subtilles cautelles, les fiers thoreaulx dangereulx et rebelles. Where he hath nat onely vsed subtilles for subtilz: but also ioyned rebelles, with

adiectiues in L, ioyned to femynin substantyues.

with thoreaux, whiche in proſe were playne incongruꝫ coulde nat be ſaued. And in lykewyſe the ſame auctoꝛ in the pyſtell of Hermonie mais quelle iniure ay ie fait a noꝛ dieux dont ilꝫ ſoiẽt cõtre nous odieux ne quel plainte neſt ores ſi contraire, where I e hath vſed quelle and quel, though bothe the ſubſtantyues be of the ſemynine gender.

But as foꝛ quelquõques and quelꝫ conques I fynde euer vſed with ſemynine ſubſtantyues and neuer quelle conques noꝛ quelleſconques, as apereth by Jehan le Maire in the thirde chapiter of his firſt boke of Illuſtracions: ſans faire fraude ou corruption quelconques.

Quelcon= ques et q̃lꝫ cõques w feminynes Grant w fœminy= nes.

Alſo grant in his maſculyne termynation in bothe his nombꝛes may be ioyned befoꝛe ſubſtantyues of the ſemynine gender/ as vne grant pitie, en grans lamentacions, but after ſuche ſubſtantiues they vſe alway grande, as lariſee fuſt grande, les matieres ſont grandes, titea la grande, Howe be it I fynde ma mere grant, and ſuche as wꝛite in ryme obſerue nat alwayes this rule: euer foꝛ leueſque en lepiſtre de Dido ſaythe/ primierement des vndes degette ie tay receu en ma grande cite.

Alſo they vſe to ioyne vert in his maſculyne ſinguler with herbe/ though he be of the ſemynine gender Jehan le Maire/ puis apres Paris ſe mettoit a luicter tout nu auecques les plus fors ſur lherbe vert.

Vert with herbe.

Note alſo that bon in his ſinguler nombꝛe is ioyned with ſubſtantyues of the ſemynine gender if they begyn with a vowel oꝛ with H/ nat hauyng his aſpiration/ as par bon amour, vne bone habitacion, but after their ſubſtantyues they vſe bonne, as mon amour eſt bonne, ceſt habitacion eſt bonne.

Bon with feminynes begynning with a vowell oꝛ with H/ hauyng his aſpiracion.

And note that the maſculyn gender cõcepueth the ſemynine in this tonge lyke as it dothe in the latyn/ as appereth by Jehan le Maire in the thirde chapter of his firſt boke of illuſtrations: Quant dõques le bon pere Noe, Sem, Cam et Iaphet et leur femmes: Titea la grande, Pandora, Noela et Noegla, ſe virent eſtre tous ſeuletꝫ au monde ilꝫ furent ententifꝫ aux euures de mariage, where tous ſeuletꝫ and ententifꝫ be of the maſculyn gendꝛe/ nat withſtandyng the names of women that come next in the ſentence to them/ and in lyke wyſe il paia en maniere de tribut cent thoreaux et cẽt vaches blancꝫ, but if there come any other ſubſtantyues beyng of dyuers gendꝛes rather by reaſon of their termynacion than by reaſon of their ſignifycacion/ befoꝛe any adiectyues they ſhall agre in gendꝛe with their next ſubſtãtyues and in nombꝛe with the verbe if there come a verbe bytwene them/ els in nomber alſo with the next ſubſtantyue/ as apereth by Alayn chartier in his exile. Tu vois donques cõme les regnes et les puiſſances eſtablyes ſans doctrine ou conduꝫ par de raiſon ſont non certaines et tirẽt le roy

Cõcepci= on vſed in this tõge.

et le royalme a mort: Where eſtablies and certaýnes be of the feminyn gendze/ bycauſe that puiſſances whiche comyth next vnto them is of the feminyn gendze though that regnes is of the maſculyn gẽdze by reaſon wherof they ſay/ par deliberation generalle et conſentement general par conſentement et deliberation generalle par lenhortemens et parſuation fraudulente, par la parſuaſion et enhortemens fraudelent ioynyng alwayes the adiectyue to his next ſubſtantyue bothe in gendze and nombze.

And note that if many adiectyues belonge to one ſubſtantyfe they ſhall agre with hym in gendze & nombze/ as en vng furieux mauſade et inferty l deſert deau troublee puante et terreuſe.

One adiectiue plurel vvith many ſubſtãtiues ſingular.

Note alſo that I fynde moche vſed of ſuche as be writers aboute this tyme to ioyne an adiectyue in his plurell nombze to .ii. ſubſtantyues of the ſinguler nombze/ as apereth in Johan Mechinot that made les lunettes des princes in his ſupplication made to the duke of Bzetayne: a la fureur deſquelz atouſiour iuſques cý reſiſtee par les bons ſupport et aide quil vous a pleu luy faire.

Note alſo that if this rule be founde in any poynte bzoken in any auctour/ of eſtymation it is rather by ignozaũce of the pzinters that knowe nat their owne tonge thãn default in the auctours ſelfe/ ſaue that ſuche as wziteth in ryme in this behalfe alſo vſe their lyberte as apereth by the byſſhop in the pyſtell of Hypermeſtra: Si que de puis pour toy las qui tant vaulx, Iay endure mains paines et trauaulx.

¶ Annotacions vpon the fourth accident be-longynge to nownes adiectyues.

Though I fynde greigneur and moindre vſed ſomtyme foz the comparatyues of grant and petit, yet moze ſuer it is foz a lerner to vſe plus grant and plus petit, but as foz meylleur is euer vſed indifferently / and as foz, interieur, inferieur, maior, minor and ſuche lyke be rather latyn comparatyues than fozmed after ỹ right frenche tonge.

And note that if they wyll extende the qualyte of any thyng without makyng of comparyſon to a nother thynge/ they vſe one of theſe wozdes/ trop, tres fort, autant bien, tant moult, ſi dauantage, & ſuche lyke/ as tropbon, to good/ treſbon, tyght good/ fort bon, very good/ bien bon, very good/ moult bon, full good: and in lyke wyſe if they wyll dyminyſſhe the qualyte of a thyng they vſe peu, guayres, goutte, and ſuche lyke / as peu bon, ſmall good / guayres bon, but a lytell good: and lyke as plus added to an adiectyue maketh comparation by augmen-

by augmẽtyng / ſo dothe moyns make comparation by dyminiſhyng as moyns ſage, moyns diſcret, moyns ſobre que luy.

¶ Annotacyons vpon the fyfthe accident belongynge to adiectyues.

DEclynation of adiectyues hath euer ſuche as I haue afore in the ſeconde boke in this place declared: and therfore where Alayn Chartier ſayeth in his exile / Et qui ceſte voye vouldroyt fuir pour leſperance de meilleure proſperite.

And in his Quadrilogue En meilleures gardes a il de grans pertes, the boke wolde be corrected / for in all other auctours and in him ſelfe in all other places I fynde meileur and meileurs onely vſed for bothe the gendres / as I haue afore declared: but ſuche as wrte in ryme ſomtyme breake this rule / as leueſque in the epiſtyll de Medea a Iaſon Car ie ne ſcay aultre voye meilleure fors que me venge ou que bien toſt ie meure, and alſo of ſome auctours whiche be nat to be reproued I fynde meilleure vſed whan he is the laſt worde in a ſentence / his ſubſtantiue beyng of the feminyn gendre / as Vous debuez conoiſtre voſtre cas et aduiſer de deux voies la meilleure.

Meilleur and meilleurs with fœminynes.

¶ Annotacyons vpon the ſyxthe accident.

ADiectyues endyng in U / whiche be formed of ſubſtantyues in this tonge I fynde no mo but .x. Barbu, corſu, cornu, herbu, fueillu, fourchu, membru, teſtu, cheueulu, oſſu, vellu, becqu, poyllu, whiche beformydde of Barbe, corne, herbe, fuille, fourche, membre, teſte, cheueul et poyl, and of velu and cheueu I fynde no ſubſtantyue in vſe / and they ſignifye plenty or ſtore of the ſubſtantyue that they be formed of / as barbu, plentuouſly or moche berded / cornu, plẽtuouſly or moche horned / herbu, plentuouſly or moche ſtored of yerbes / and ſo of the reſydue: and the trewe formacion for kepyng of trewe ortography is eaſy to be obſerued / for if the ſubſtantyue ende in E / the adiectyues chaũge E / into U / if the ſubſtantiue ende in a cõſonant they double the conſonant & adde to U / and as for Crochu, eſperdu, pellu, poyntu, reuolu, and ſuche lyke be partycyples vſed ſomtyme lyke adiectyues / and dru, agu, menu, and ſuche lyke be primptiues and be fourmed of none other partes.

Alſo lyke as of ſubſtantyues in the latyn tonge beformed adiectyues endyng in oſus, ſo of the lyke ſubſtantyues in frenche be fourmed ad-

med adiectyues endyng in eux, lyke as the latyns say of aqua, aquo-ſus, ſo saythe the frenchmen of eaue, eaueux, but if any ſuche adiectyues in the frenche tonge in ieux, they be fo3med of the latyn adiectyue endyng in ioſus, and nat of any frenche ſubſtantyue/ as odieux, ma-licieux, furieux, ingenieux, and ſuche lyke whiche come of odioſus, malicioſus, furioſus, ingenioſus, ſo that all ſuche as be fo3med of their frenche ſubſtantyues if the ſubſtantyue ende in E/ by addynge to of U/ and X/ fo3me their adiectyues / as terre, terreux, argille, argil-leux, foire, foireux, if their ſubſtantyues ende in any other termyna-cion by addyng to of eux, they fo3me their adiectyues/ as of paour, paoureux, of miel, mieleux, vertu, vertueux, but I fynde cheualereux and nat cheualiereux, fo3med of cheualier, and vicieux fo3med ra-ther of vicioſus than of vice: but many other adiectyues they haue endynge in eux, whiche be otherwyſe fo3med than I haue here re-herſed.

And note that the moſte parte of ſuche adiectyues as ende in eux, in the frenche tonge haue their englyſſhe adiectyues endyng in yſſhe o3 in y/ as eaueux, watery ſſhe o3 watry/ pierreux, ſtony o3 ſtonyſſhe.

Alſo of euery adiectyue partycipie in the frenche tonge endyng in ant, may be fo3med an adiectyue by chaungynge of ant, in to able, as of muant muable, honorant honorable, conuertiſſant cõuertiſſable, faiſant faiſable, fermant fermable, and ſo of all other whoſe ſignifyca-cion may ſerue bothe actyuely and paſſiuely/ as muable, apte o3 mete o3 able to chaũge/ o3 apte o3 mete o3 able to be chaunged/ honorable, apte o3 mete o3 able to honour o3 apte o3 mete o3 able to be honoured/ and ſo of all the reſydue: but amiable is rather fourmed of amabilis, than of amant, lyke as viſible, flexible, comprehenſible, ſoluble, dui-ſible, vendible, be fo3med of latyn adiectyues and nat of any par-tycyples.

Note alſo that in this thyng the frenche tonge is moche mo3e par-fyte than our tonge is/ fo3 where as they may fo3me of euery party-cipie in their tonge an adiectyue endyng in ble, in our tonge we haue none ſuche but muſt nedes vſe circomlocution by theſe wo3des/ apte/ mete o3 able/ and our infynitye mode ſaue that we haue admitted as well adiectyues of the frenche tonge endyng in able and ible, as cõmendable, viſible &c.

Alſo of euery latyn adiectyue endynge in icus, may be fo3med a frenche adiectyue in icq, after Johan le Mayres o3tography/ o3 in ic, after the mo3e comen o3tography/ as of magnificus, mirificus, bel-licus, gallicus, tyrannicus, mathematicus, olimpicus, bucolicus, dia-bolicus, publicus, ſophyſticus, be fo3med magnificq, mirificq, bellicq, gallicq,

gallicq, tirannicq, mathematicq, olimpicq, bucolicq, diabolicq, publicq ſophyſticq, whiche kynde of formation is moche vſed of the ſayd Johan le Maire.

Alſo of latyn adiectyues endyng in iuus be formed adiectyues in thys tonge endynge in if, as of vegetatiuus, ſenſytiuus, intellectiuus, motiuus, fugitiuus be formed / vegetatif, ſenſitif, intelectif, motif, fugitif.

Alſo of certayne feminyn termynacions of adiectiues I fynde formed other adiectyues whiche be demynutyues in ſignyficacion by addyng to of T/ as of grande is formed grandet, of molle mollet, of groſſe groſſet, of belle bellet, of vermielle vermillet, but as for loygnet is formed of loyng the aduerbe.

Alſo lyke as of nombres in the latyn tonge be formed adiectyues endyng in iuus, betakynge ordre with nombre/ ſo in lykewyſe of the nombres in the frenche tonge be formed adiectyues of lyke ſignyfication endynge in eſme, as of deux deuſieme, but of theſe I ſhall haue better occaſyon to ſpeake of in the later ende of the pronowne in this boke.

I fynde alſo certayne other formacions of frenche adiectyues out of latyn adiectyues as of criſtallinus criſtallyn, iuuenilis iuuenil, difficilis dificil, docilis docile, amabilis amable, affabilis affable, paſturalis paſtural, amiablis amiable, beſtialis beſtial, and by lyke formacyon of ſeigneur ſeignorial, and certayne endyng in ien, as Iunonien, Venerien, Herculien, whiche bycauſe I fynde nat many mo than I here reherſe I ſuppoſe to be ſufficient onely to warne the lerner of/ and howe of latyn adiectyues endynge in dus and in dis, be formed adiectyues endynge in T/ I haue afore touched in the ſeconde chapiter/ where I ſpake of adiectyues endyng in D.

Annotacions vpon the ſeuenth accident.

If an adiectyue be ioyned with a ſubſtantyue/ as to put a difference or to auoyde confuſyon bycauſe there is dyuerſe of ſuche ſortes as the ſubſtantyue ſignyfieth/ than the adiectyue ſhall euer in the frenche tonge followe the ſubſtantyue/ as if I wolde ſpeake of the ſygne of horſe or ſuche lyke/ bycauſe ſome ſigne may be of a blacke horſe and ſome of a whyte/ in ſuche ſpeakyng they vſe to ſay le cheual blanc, le cheual noir, and in lyke wyſe if I wolde ſpeake of breed for bycauſe there is dyuerſyte/ for thus they ſaye: payn blanc, pain bis, pain ten-

pain tendre, pain raſſis, pain bourgois, pain de chapiſtre, & in al ſuche lyke where the adiectyue hath lyke ſtrength and effecte.

Cꝛere endeth the table of the Adiectyues / and herafter foloweth the Pꝛonowne.

¶ Annotacyons vpon the fiest accydent of Pronownes prymptyues. Capi. i.

ONely the pronowne of the thirde person hath dyuerse wordes in bothe the nombres to serue for dyuerse genders/ whan they be vsed as nompnatyue cases or obliques/ all the residewe as well synguler as plurell haue but one termynacion/ whiche somtyme representeth a masculyn substantyue somtyme a femynine/ but suche gendre and nombre as the pronowne standeth for suche lyke gendre and nombre shall his adiectyue be/lyke as I haue afore touched in the thyrde accydent of adiectyues.

¶ Exemples of this rule.

Il est bon, elle est bonne, ilz sont bons, elles sont bonnes, ie le regarde, vnderstandyng a man/ ie la regarde, vnderstanding a woman/ Ie suis blanc, tu es blanc, vnderstandyng masculyn substantyues synguler: nous sommes blancz, vous estes blancz, vnderstandyng masculyn plurelles/ Ie suis blanche, tu es blanche, vnderstandyng femynines synguler/ nous sommes blanches, vous estes blanches, vnderstandynge femynines plurel.

¶ Annotacyons vpon the thirde accident of pronownes prymptyues. Capi. ii.

¶ Nat onely adiectyues folowe the nombre of ỳ pronowne but also verbes as Ie parle, nous perlons, Ie parleray, nous parlerons, allons for alons nous en.

But where as in comune speche they vse to saye/ Ie allons bien, Ie ferons bien, Iauons fait vng grant exploit, and suche lyke toynyng the first person plurell of the verbe in to ie, whiche is the first person singuler/ suche kynde of spekyng is vsed of none auctour approued no more than girons demayn, ginciterons, gimaginons, and suche lyke/ where by takyng away the E/ of ie, they chaunge the I/ in to G/ by cause it is agaynst the nature of the frenche tonge to haue any worde begynnyng with a double I/ the first of them beyng a consonant as I haue afore touched in the first boke: howe be it I fynde in all good writynge in ryme in the stede of ie, y, gv. the Romant of the Rose. Ne cuides pas que gy faillisse, for ie y fayllisse. Alayne Charrier in his Hospital/

Hospital: Iamays nyray plus gy renonce, and Johan le Mayre in the seconde epistyll de lamant uert. Si sommes nous quand bien gy auray pence, but in prose I fynde no suche kynde of writyng vsed amongest good auctours.

¶ Annotacyons vpon the fyrst accydent of Pronownes. Capi.iii.

SUche nombre and person as the pronowne is suche lyke nombre & person shall the verbe be/ as il parlera, ilz parleront. And note ỹ for so moche as in maner thorough al the tenses in euery verbe personal there be four dystincte wordes ỹ serue onely for ie, tu, nous and vous, they vse often to leaue the pronowne on written/ as a thyng that may easly be vnderstande to be included in the person of ỹ verbe as Iy parleray primier, Or conterons le demourant, & many suche lyke.

But if two pronownes of dyuerse gẽdre come bothe byfore a verbe they vse in all suche sentences conceptions of persons/ suche in all poyntes as the latyns vse.

¶ Exemple as.

Ie vouldroys quelle et moy fusmes maries eux et vous feriez bonne chyere.

¶ Annotacyons vpon the fourth accydent and to knowe whan we shall vse ie, whan me, and whan moy. Capi.iiii.

Regula prima.

¶ Whan so euer we vse I/ in our tong as nominatyue case to a verbe if the frenche tonge vse the same verbe as personal they vse euer ie.

¶ Exemple/ the first.

Regula secũda.

I loue/ I speke/ I eate/ ie ayme, ie parle, ie mengus, ie boys. If we vse a verbe as a personal and they vse the same verbe as impersonal/ than vse they suche lyke maner of speakynge as we do by our impersonalles.

¶ Exemple/ the seconde.

¶ Lyke as we say it behoueth me/ it irketh me/ so say they il me fault, il me cuyt, il me mengeut, though we vse them as personalles/ sayeng: I must/ I pyche/ I smarte.

Whan

Whan so euer we vse/me/in our tonge as gouerned of a verbe/what so euer case the same verbe requyre in ẏ laten tonge they vse euer me. Regula tercia.

¶ Exemple/the thirde.

¶ He loueth me/he beholdeth me/he telleth me/ il mayme, il me regarde, il me dit.

In all other maners of speakyng/ ẏ is to say after interrogations/ answers made by this verbe suis, yteracyons of the pronowne/imparatyue modes/ aduerbes/ preposytions/ coniũctions/and interiections/whether we vse I/or me/they vse euer moÿ. Regula quarta.

¶ Exemple/the forthe.

¶ Who shall go I/ qui ira moy, it is I/ cest moy, it is I that speake/ knocke or crye / cest moy qui parle, heurte ou crie, I wotte nat I/ ie nescay moy, I sawe hym nat I/ie ne le vis pas moy, helpe me/beholde me/folowe me/ aydes moy, regardes moy, suiues moy, nowe I/ to morowe I/ well I / maintenãt moy, demayn moy, bien moy, to me/ with me/ for me/agaynst me/ amoy, auecques moy, pour moy, contre moy, he and I/you or I/luy et moy, vous ou moy, there is but I/ il ny a que moy, hey/me myserable, hey, moy miserable.

¶ Annotacyons to knowe whan we shall vse tu, te, and toy. Capi. v.

¶ The selfe rules that I haue afore shewed be ie, me, and moy, serue in all maner condycions to knowe whan we shall vse / tu, te, or toy, Regula vnica.

¶ Exemple.

¶ Thou spekest/ tu parles, thou must/ il te fault, he beholdeth the/ il te regarde, he meteth the/ il te rẽcontre, qui ira toy, cest toy, tu nescays toy, aides toy, aseure toy, pour toy, luy et toy, hey toy miserable.

¶ Annotacyons to knowe whan we shall vse il, le, and luy. Capi. vii.

¶ Whan we in our tonge vse/he/as nomynatyue case to a verbe/the frenche tonge vsynge the same verbe as parsonal/they vse euer il, if they vse the verbe with them as impersonal they vse euer luy, as I haue afore shewed in the seconde boke. Regula prima.

Exemple.

¶ Exemple/ the firſt.

¶ He loueth/ he ſpeketh/ he beholdeth/ il ayme, il parle, il regarde, He muſt/ he ytcheth/ he ſmerteth/ il luy fault, il luy cuit, il luy mangut.

Regula ſecúda. Whan we vſe hym in our tonge after a verbe/ as gouerned of the ſame if the verbe be ſuche as of his owne nature in the latyn tonge requyreth an acculatyue caſe they vſe le, if the verbe wyll haue a datyue caſe they vſe luy.

¶ Exemple/ the ſeconde.

¶ I loue hym/ I beholde hym/ ie layme, ie le regarde, I mete hym/ I tell hym/ ie luy rencontre, ie luy dis.

But for ſo moche as this rule is very darke for a lerner/ and alſo that it is nat generall/ for many tymes in the frenche tonge they vſe luy. whan the latyns vſe an acculatyue caſe: I ſhall in ỳ table of verbes whan I haue reherſed them and ſhewed of what conugacion they be/ ſhewe alſo whether the ſame verbe wyll haue le, or la, or luy, before hym/ ſo often as we vſe theſe wordes/ is/ hym/ or her/ before the ſame verbe in our tonge.

Regula tercia. But ſome thyng to lede the lerner in this behalfe by a generall rule/ whan ſo euer we vſe hym/ or her/ after a verbe in our tonge where the ſentence of him ſelfe may be parfyte without addyng any mo wordes therunto/ we ſhall in the frenche tonge vſe le, or la.

¶ Exemple/ the thirde.

¶ I loue hym/ I beholde hym/ I folowe hym/ I ſe hym/ I here hym/ ie layme, ie le regarde, ie le ſuis, ie le voys, ie los.

I loue her / I beholde her / I folowe her/ I ſe her / I here her/ ie laime, ie la regarde, ie la ſuis, ie la voys, ie los.

Regula quarta. But if there be requyſete to adde alſo a ſubſtantyue/ outher alone or with ſome other partes of ſpeche after hym or her or euer ỳ ſentẽce can be parfyte/ than vſe they in the ſtede of hym and her luy.

¶ Exemple/ the fourth.

¶ In theſe ſentences/ I tell hym/ I make hym/ I ordayne hym/ I purpoſe hym/ I do him/ I tell her/ I make her/ I ordayne her/ I purpoſe her/ I do her/ and ſuche lyke: for ſo moche as the ſentences requyre or they be parfyte that I ſholde expreſſe what I tell or make/ or ordayne/

ordayne/or purpose/or to do hym/ or her/I shall before all suche verbes vse luy, So ỹ some verbes wyll haue nat onely le, or la, but also luy, before them/by reason that in some sence they make aparfyte sentence without addyng of any other substantyue in some sence they do requyre a substantyue to be expressed. Regula quinta.

¶ Exemple/the fyfthe.

¶ God made hym/god made her/dieu le fit, dieu la fit, I made hym a gowne/I made her a gowne/ie luy fis vne robe. So ỹ comenly whan it is all one sence to put these wordes/hym/ or her/next after a verbe/ and than bring in a substantyue belongyng to ỹ same verbe/ or els to put the substātyue next after ỹ verbe/and than any of these prepositions/ to/or for/before ỹ sayd hym/or her/in all suche sentences for hym or her/ they vse luy. Regula sexta.

¶ Exemple/the sixth.

¶ Bycause it is all one sence in our tonge/ I make hym a gowne/ and I make a gowne for hym/ I telle hym a tale/ and I tell a tale to hym: therfore they say/ ie luy fais vne robe, ie luy compte vng compte. And by lyke reason: where we say/ I am good to hym: they say/ ie luy suis bon, but this thynge as I haue afore sayd/ shall more playnly appere in the table of verbes/ whan euery suche verbe shall come in hys order. In all other maners of spekyng they vse euer onely luy, whether we vse outher he or hym. Regula septima.

¶ Exemple/the seuenth.

¶ Qui yra luy, cest luy, il neschāt luy, aides luy, asteure luy, pour luy, et luy, que luy, hay luy miserable, ilz monterent a cheual luy sa fame et son train. But howe they vse il, before all their verbes impersonalles in the frenche tonge/ lyke as we vse it before our impersonalles I haue all redy touched/ and shall here after apere: and where I fynde/ par quoy nul ne penia que ce fuist il, this rule dothe rather requyre that we shulde say/ que ce fust luy, but il is better vsed here.

¶ Annotacyons to knowe whan we shall vse elle, la, or luy. Capi. vii.

¶ Whansoeuer we vse she/in our tonge as nompnatiue case to a verbe whiche is personal/ in the frenche tonge they vse euer elle. Regula prima.

Exemple.

WHan ſo euer we vſe hym or her after a verbe in out tonge & gouerned of the ſame/ if the ſence be all one whether we adde this worde ſelfe to hym or her or nat than ſhall we in frenche vſe/ ſe. Regula prima.

¶ Exemple.

¶He kylled hym with his weapen/ ſhe ſcratched her with her nayles/ they ſay in frenche/ il ſe tua de ſon glaiue, elle ſe gratigna de ſes ongles. So that all be it that it make all one ſence/ I kyll me/and I kyll my ſelfe/ thou hurteſt the/ & thou hurteſt thy ſelfe/ yet it is nat all one ſence to ſay/ he kylleth hym/and he kylleth hym ſelfe: for I may by the firſt him/ſignyfie a nother perſon/but the ſeconde hym is lymyted by the worde ſelfe/ſo ỹ we ſignyfie therby that ỹ acte retourneth agayne to the doer. And to expreſſe this difference in the frenche tonge/ whan ſo euer they vſe hym/or her/after a verbe meanyng a diſtyncte perſon from the doer/they vſe le, or la, or luy, accordyng after ỹ conſtruction of the verbe/& whan they vſe hym/ or her/after a verbe meanyng that the acte of the ſame verbe retourneth to the perſon that was nomynatyue caſe to the verbe/than vſe they ſe, or ſoy, as the nature of ỹ verbe requyreth/ ſo that ỹ frenche tonge is moche more preſyce in vſyng reciprocacion than is the latyn/as ſhall herafter in this accydent apere. Regula ſecũda.

¶ Exemple.

¶He kylled hym/ he beheldе hym/ſhe ſcratched her/ ſhe beheldе her Alyſander comforted hym/Berſabee bathed her/ my maſter aduyſed hym/my lady apparaylleth her/in all theſe ſentẽces if ỹ nomynatyue caſe and tye accuſatyue ſtande for diſtyncte perſons/ we ſhall vſe for hym le, and for her la, if the acte of the verbe retourne agayne to the doer & that it is all one perſon that is ment bothe by the nomynatyue caſe and the accuſatyue/ we ſhall vſe ſe, or ſoy, as the nature of ỹ verbe requyreth: as il le tua, il le regarda, elle la gratigna, elle la regarda, Aliſandre le recomforta, Berſabée la baigna, mon maiſtre laduiſa, madame lappareylla, meanyng diſtyncte perſons/ il ſe tua, il ſe regarda, elle ſe gratigna, elle ſe regarda, Aliſãdre ſe comforta, Barſabée ſe baigna mon maiſtre ſaduiſa, madame ſapareilla, meanyng all one perſon. Regula tercia.

¶ Exemple.

¶And that I had lene the englysshe kyng glorifye hym or glorifye hym selfe: et que vóisse le roy anglois soy glorifier, and rather he had to suffre hym selfe to perysshe with the comen welth/than for the same to put hym selfe to parell/ et mieulx vouloit soy laisser perir auec la chose publique que pour ycelle soy exposer a peril.

¶To knowe whan we shall vse nous, and whan vous. Capi. x.

Regula vnica. ¶Han we vse we/or vs/ in our tonge/they vse euer nous, & whan we vse you/they vse euer vous, in all maners of spekyng without any difference: so that in this thyng our tonge is more parfyte than the frenche/ for we vse/we/as a nompynatyue case/ and/vs/as an accusatyue or an oblique.

¶Exemple.

¶We loue/ we speke/ he loueth vs/ he beholdeth vs/ nous aymons, nous parlons, il nous ayme, il nous regarde, with vs and you/ auecques nous et vous, you loue / you speke/ he loueth you/ he beholdeth you/ with you and vs / vous aymez, vous parles, il nous ayme, il nous regarde, auecques vous et nous.

¶To knowe whan we shall vse ilz, les, leur, or eulx. Capi. xi.

Regula prima. ¶Han so euer we vse they/ in our tonge as nompynatyue case to a verbe vnderstãding masculyne substantyues/they vse euer ilz, except whiche or that/ come betwene ỹ verbe & they/ for than they vse ceulx, as I wyll hereafter shewe/ where I wyll also shewe howe they vse somtyme ce, for they.

¶Exemple.

¶They loue/ they speke/ they beholde/ ilz ayment, ilz parlent, ilz regardent.

Regula secũda. Whan so euer we vse them in our tonge after a verbe as gouerned of the same/if the verbe wyll gouerne an accusatyue case they vse les, if the verbe wyll gouerne a datyue case they vse leur, whether we vnderstande masculyne substantyues or femynine.

Exemple.

¶ Exemple.

¶ We loue them/ we beholde them/ nous les aymons, nous les regardons, we gyue them/ we anſwere them/ nous leur donnons, nous leur reſpondons.

In all other maners of ſpekyng whan ſo euer we vſe they / or them vnderſtādyng maſculyn ſubſtātyues/ they vſe euer eulx, except after inparatyue modes/ for than they vſe les, or leur, after the caſe that the verbe requyreth. Regula tercia.

¶ Exemple.

¶ Qui iront eulx, ce ſont eulx, il neſcauent eulx, regarde les, reſponde leur, maintenāt eulx, pour eulx, et eulx, que eulx, hay eulx miſerables,

¶ To knowe whan we ſhall vſe elles, les, or leur. Capi. xii.

Whan ſo euer we vſe they/ as nompynatyue caſe to a verbe vnderſtandyng fempynine ſubſtantyues/ they vſe euer elles, excepte whiche or that come bytwene the verbe and they/ for than they vſe elles, as ſhall here after apere. Regula prima.

¶ Exemple.

¶ They loue/ they ſpeake/ they beholde/ elles ayment, elles parlent, elles regardent, they whiche be good / celles qui ſont bonues.

Whan we vſe them after a verbe as gouerned of the ſame verbe/ they vſe les, or leur, after as the verbe requyreth/ as I haue here afore touched/ whiche they vſe alſo after imparatyue modes. Regula ſecūda.

¶ Exemple.

¶ I loue them/ I beholde them/ ie les ayme, ie les regarde, I gyue them/ I anſwere them/ ie leur donne, ie leur reſpons, beholde them/ regarde les, anſwere them / reſponde leur.

In all other maner of ſpekynges whan we vſe they or them/ vnderſtandyng fempynin ſubſtantyues/ they vſe euer elles. Regula tercia.

¶ Exemple.

¶ Qui iront elles, ce ſont elles, elles ne ſcauent elles, maintenant elles, pour elles, et elles, que elles, hay elles miſerables.

¶ To knowe whan we ſhall vſe/ ſe, and whan ſoy, in the plurell nombre. Capi. xiii.

Regula prima. WHan ſo euer we vſe them in our tonge after a verbe as gouerned of the ſame verbe/ if the ſame ſence be a lone whether we adde this worde ſelfe or nat/ we ſhall in frenche vſe/ ſe.

¶ Exemple.

¶ They kylled them with their weapens/ ilz ſe tuerent de leur glaiues, they ſcratched them ſelfe/ vnderſtanding a fempnin ſubſtantyue/ elle ſe gratignent. So that the rule that I haue afore gyuen ſerueth to lede the lerner in this behalfe.

Regula ſecūda. In all other maners of ſpekyng where it is all one ſēce to vſe them or themſelfe/ whether we vnderſtande maſculyn ſubſtantyues or fe-mynine they vſe euer ſoy.

¶ Exemple.

¶ As they aſke no greater happe than to fynde them in his preſence/ et ne demandent plus grant eur que de ſoy trouer en ſa preſence. He dyd hym reuerēce in humbling him/ il luy fit la reuerence en ſoy humiliant.

He hath no cauſe to maruayle/ il na point cauſe de ſoy emerueiller. So that whan any verbe ỹ is a mere meane is vſed in his infynityue mode/ they put ſoy, before hym in frenche more than is in the ſame ſentence in englyſſhe/ but here of to ſpeke I ſhall herafter haue more occaſyon agayne in the ſyxth accydent.

¶ Annotacyons vpon the fyfthe accydent. Capi. xiiii.

Regula prima. NAt onely whan one pronowne followeth ỹ verbe in our tonge he ſhall come next byfore the verbe in frenche/ but alſo if there come two pronownes with/ vs/ after the verbe they ſhall bothe come byfore the verbe with thē/ but whether of ỹ twayne come next byfore the verbe maketh no diffyculte / nomore than we kepe none order in that behalfe in our tonge/ and this order is neuer broken in frenche/ for it is their maner of ſpekyng euer to put all the pronownes gouerned of verbes byfore the verbes that gouerne them.

¶ Exemple.

¶ He ſhall

¶ He ſhall ſende it vs/ il le nous enuoiera, we wyll ſhewe you hym/ nous vous le monſtrerons, I ſhall gyue hym it/ ie le luy donneray, we ſhall ſhewe it them/ nous le leur monſtrerons. Excepte whan a pronowne followeth any imparatyue mode in our tonge for than he ſhall folowe alſo the verbe in frenche. Exceptio.

¶ Exemple.

¶ Helpe me/ beholde hym/ tourne you/ ayde moy, regarde moy, tournez vous.

Except alſo interrogacions/for in them ỹ pronowne whiche is nompnatyue caſe to the verbe ſhall euer in frenche come after the verbe whether we in our tonge kepe that order or nat. Exceptio.

¶ Exemple.

¶ Whyther go you/ ou allez vous, howe do you/comment vous portez vous, whan go you/ quant vous en allez vous, whan wyll you gyue it hym/ quant luy donnerez vous, what haue you ſayd to hym/ que luy aues vous dit. By reaſon wherof ſythe euery verbe vſed as impaſſonal in the frenche tonge muſt nedes haue/ il, for his nompnatyue caſe lyke as our verbes impaſſonalles haue it/the ſame/il, ſhall in all interrogacions made by any ſuche verbe vſed as an impaſſonal come after the verbe though the other pronownes come euer before. Regula ſecũda.

¶ Exemple.

¶ What eyleth hym/que luy fault il, remembre you nat/ne vous ſouuẽt il pas/ where of ſhulde he remembre hym/ dont luy ſouuiendroit il.

¶ Annotacyons vpon the ſyxthe accydent. Capi. xv.

When ſo euer we vſe any verbe whyche of his owne nature in the frenche tonge is amere meane/ that is to ſay that the acte of the verbe retourneth to ỹ doer agayne/as I haue ſome thyng afore touched in the ſeconde boke/and ſhall herafter whan I intreate of the verbe more playnly declare/though we in our tonge vſe no more but onely one pronowne before ſuche verbes as nompnatyue caſe to them in the frenche tonge in the ſame ſentence they adde alſo the accuſatyue caſe of the ſame pronowne/ expreſſyng therby that the acte of the Regula.

verbe retourneth agayne to the doer/lyke as we do whan we vse verbes actyues as meanes.

¶ Exemple.

¶ I beate me/ thou tourmentes the/ he chafeth hym/ they say ie me bas, tu te tourmentes, il se eschauffe, bycause that the pronownes that cometh after the verbe expresseth playnly that the acte of the verbe retourneth agayne to the doer/so that though the verbes of their owne nature be actyues/yet in this sence we vse them as meanes.

So say they for I dye/thou goest/he walketh/ I fare well you fare yuell/ie me meurs, tu ten vas, il se promaine, ie me porte bien, vous portez mal, and in lyke wyse doublyng the pronowne before all the persons of any suche verbe/whiche in the frenche tonge is vsed as a mere meane/lyke as I haue shewed by exemple of ỹ contugatyng of/ ie me sie, in the seconde boke/ what verbes in the frenche tonge be vsed as mere meanes/shall as they come in order apere in the table of verbes.

Nota. But for so moche as that it shulde be harde for the lerner nat withstandyng any generall rule ỹ I coulde gyue/suerly to knowe whiche verbes be vsed in the frenche tonge as mere meanes and whiche nat: so often as any suche verbe shall fortune to come in place in ỹ table of verbes after his order I shall shewe that he is a mere meane.

¶ Annotacyons vpon the seuenth accydent. Capi. xvi.

Regula prima. When so euer we vse the nompnatyue case of our pronownes primytiues and adde this worde/selfe/ to them/ though we vse to adde also their pronowne dyrtuatyues before/selfe/sayeng I my selfe thou thy selfe/ he hym selfe &c. In frenche they vse but ỹ nompnatyue case of their primytyues/addyng to onely meſmes.

¶ Exemple.

¶ I my selfe sawe it/ ie meſmes le vis, thou thy selfe dyddest it/ tu meſmes le fis, he him selfe shall do it/ il meſmes le fera, she her selfe sawe it/ elle meſmes le vit, and so forthe/ nous meſmes, vous meſmes, ilz meſmes, elles meſmes. In all other maners of speakyng/that is to say comyng after verbes/prepositions/or conũctions/ whan we vse to adde this worde/selfe/to our pronownes derytuatyues they adde meſmes, to the oblique cases of their primytyues.

Regula secũda.

Exemple.

¶ Exemple.

¶ I wyll do it my ſelfe/ ie le feray moy meſmes, thou ſaweſt hym thy ſelfe/ tu le vis toy meſmes, he ſhall do it hym ſelfe/ il le fera luy meſmes, ſhe made it her ſelfe/ elle le fiſt elle meſmes, for our ſelfe/ pour nous meſmes, agaynſt your ſelfe/ contre vous meſmes, for vs and them ſelfe men/ pour nous et eulx meſmes, agaynſt you and them ſelfe women/ contre vous et elles meſmes. So that though it make all one ſence whan ſo euer they vſe any verbe actyue as a meane/ outher to vſe the acculatyue comyng before ỹ verbe or their oblique caſe with meſmes, after the verbe/ yet whan they vſe meſmes, the oblique caſe muſte euer folowe the verbe. Regula tercia.

¶ Exemple.

¶ Ie me ayme, ie ayme moy meſmes, tu te eſchaufes trop, tu eſchaufes toy meſmes trop.

And note ỹ meſmes, many tymes is toyned to ſubſtantyues beyng of this ſignyfycacion/ as il fait mention dugne aultre cite de meſmes nom, ceſt le meſmes aigneau que iay perdu.

¶ Of the pronowne dyriuatyues/ and firſt annotacions vpon their firſt accident. Capi. xvii.

Of theſe oblique caſes of pronownes primityues/ moy, toy, ſoy, nous, vous, & leur, be formed/ mon, ton, ſon, noſtre, voſtre, leur, whiche betoken poſſeſſyon/ but where as ſuche as writeth in ryme vſe no, & vo, for noſtre, and voſtre, as de guerre eſt bruit, ceſt no deuit. And Alayn Chartier in his Hoſpital/ Plaiſir ou deul paix ou diſcorde tient tout au miſericorde: in proſe and in perfyte comen langage they be but ſeldome vſed: but for our/yours/theirs/vſed after the tenſes of ie ſuis, they vſe/ a nous, a vous, a eulx, or a elles, as theſe peces be nat yours or none of yours/ ces pieces ne ſont pas a vous, all is ours/ tout eſt a nous.

¶ Annotacyons vpon the ſeconde accydent. Capi. xviii.

Of theſe fyre pronownes deryuatyues be formed other fyre/ le mien, le tien, le ſien, le noſtre, le voſtre, le leur, whiche ſignyfye in our tonge/myn owne/as myn owne deſire/ le mien deſir, myn owne eſpouſe/

¶Annotacyons vpon the thyrde accydent. Capi. xix.

Regula prima. IN gendre accordyng as I haue afore touched in the firſt dyꝛiuatyues they ſhall agre with the ſubſtantyue that next folowes them without any regarde hauyng to ỹ perſon where vnto any ſuche ſubſtantyues belongeth/ whether it be he or ſhe lyke as we haue in our tonge ſayeng/his gowne/ her gowne.

¶Exemple of this rule.

¶Thoughe we ſay her heed/ her face/ they ſay ſon chieffe, ſa face, vſyng ſon, or ſa, after ỹ gendre of the ſubſtantyue/& ſo of the reſydue.

Regula ſecũda. But if a ſybſtantyue beyng of the femynin gendre or his adiectyue begyn with a vowell/ or with H/nat hauyng his aſpiracyon/before all ſuche they vſe/ mon, ton, or ſon, and nat ma, ta, or ſa, bycauſe of the more full and redy ſowndyng.

¶Exemple/of this rule.

¶My ſowle/ mon ame, thy frendeſhyp/ton amitie, his oppynion/ ſon opinion, my bytter paſſyon/ mon amere paſſion, the blynded phantaſye/ ton aueugle phantaſie, his dwellyng/ ſon habitation, thyn horryble damnacion/ ton horrible dampnation, as for mamie, famie, famour, and ſuche lyke vſed of the Romant of the Roſe be nat to be folowed/howe be it they vſe in comen ſpeche mamour, for mon amour. Alayn Charteer in his Quadrilogue approuyng this rule. Mais tu nas pas gecte ton opprobrieuſe voix contre les deſloialles effuſions de ſang. Idem in eodem. Quant ton obſtination.

¶Annotacyons vpon the fourth accident. Capi. xx.

Regula vnica. IN nombre alſo they folowe the nombre of the ſubſtantyue that they belonge vnto/ without hauyng any regarde to the perſon lyke as we haue in our tonge.

¶ Exemple of this rule.

¶ Though we say my garmentes/ my gownes/ his hoses/ her iouels semyng to vse our pronowne in the synguler nombre because we speke of thynges belongyng but to one person/ they say/ mes habillemens, mes robes, ses cheuaulx, ses baggues.

¶ Annotacyons vpon the fyfthe accydent. Capi. xxi.

Regula prima.

When we expresse dymynisshyng or hurtyng or generally any acte to be done to any parte of a man or bestes body/ in all suche sentences they resolue the pronowne deryuatyue in to his primytyue vsynge the artycle/ le, in the place where the pronowne deryuatyue was vsed in our tonge of suche gendre and nombre as ỹ substantyue requyreth/ and whan the acte retourneth to the doer agayne in the stede of these pronownes/ his/ her/ or their/ they vse in frenche soy, whiche serueth indyfferently for bothe nombres/ acordyng as I haue afore declared.

¶ Exemple of this rule.

¶ The hangman dyd fyrst bynde his eyes and after dyd cutte of his heed/ le boureau primier luy benda les yeulx et puis luy couppa la teste, The butcher dothe put out their eyes or euer he cutteth their throtes/ le boucher leur creue les yeulx auant que leur coupper les gorges, He washeth my handes/ il me laua les mains, He rubbeth my backe/ il me frota le dos, he claweth my toe/ il me gratigne leorteil, He tykeleth my sydes/ il me catoille les costes, I haue broken my shynne & thou hast hurt thy hãde/ ie me suis escorche la greue et tu te as blessé la main, to aswage a lytle the great burnyng of the amorous desyre whiche burneth my vaynes/ pour mitiguer vng peu la grant ardeur du desir amoreux qui me brusle les vaynes. And whan the abbesse sawe that for her beaute she shulde be forced/ strayght she cutte of her nose: Et quant labesse vit que pour sa beaulté elle deust estre forcée, promptement elle se couppa le nez: And all her systers dyd ỹ same/ affirmyng that they had rather suffre their lymmes to be drawen in peces than to consent that their virgynite shulde be corrupted. Et toutes ses seurs firent le semblable, affermans quelles se laisseroyent primier les membres tirer en pieces que consentir que leur virginite fust corrumpue. Iehan le Maire, or recite Bocace au

Regula secūda. But whan we vse any suche kynde of spekyng by the garmentes/ goodes or possessyons belongyng to a person/ in all suche sentences they double the selfe pronowne/ kepynge first the primatyue and after the derivatyue.

¶ Exemple/ of this rule.

¶ He hath taken away my gowne/ il ma oste ma robe, he hath robbed my treasure/ il ma derobbe mon tresor, he hath brente my houses and distroyed his landes/ il ma brusle mes maysons et luy a gaste ses terres, he hath dispent my goodes/ il ma despendu mes biens, ¶ I disprayse his labours/ ie luy disprise ses labeurs, ¶ I pay hym his monay/ ie luy rembourse ses deniers.

Regula tercia. But if the signyfycacion of the verbe be suche in the frenche tonge that he must nedes be circumlocute in our tonge with a substantyue and signyfieth no hurte or harme to be done by any person without forthe/ all suche verbes they resolue their pronownes in to their primytyues onely.

¶ Exemple.

¶ I depart out of my lodgyng / ie me desloge, we breake our braynes for nought / nous nous escerueillons pour riens, ¶ I departe from my wyfe/ ie me demarie, ¶ I holde my peace/ ie me tays. But where as we say this is myne/ they say/ cecy̓ est a moy, cest a moy, and in lyke wyse/ cest a toy, cest a luy, cest a nous, cest a vous, cest a eulx, tout est a nous.

Regula quarta. But in any other kynde of spekyng if we vse myne or thyne/ or any of the other as the laste worde in a sentence/ they vse le mien, le tien, and so forthe.

¶ Exemple of this rule.

¶ I haue myne/ where is thyne/ ie ay̓ le mien, ou est le tien, vnderstandyng a masculyn substantyue/ and in lyke wyse/ ie ay̓ la mienne, ou est la tienne, vnderstandyng a femynine substantyue.

¶ Exemple of this rule.

¶ The man in whom I dyd put all my truſt/ lhomme en quoy ie mets toye toute ma fiance, but this of whiche I am moſt abaſſhed/ mays ce de quoy ie ſuis le plus esbahy, whan the perthe wherupon you dwell you can nat ſocour/ quãt la terre ſur quoy vous habitez ne pouez pas ſecourir, for whiche thynge it is more eaſily to be pardoned to the/ par quoy il teſt de legier plus pardonable.

¶ Annotacyons to knowe whan we ſhall vſe/ le quel, la quelle, les quelz, or les quelles. Capi. xxiiii.

WHan ſo euer we vſe in our tonge the whiche/ as nomynatyue caſe to a verbe makyng relacion to a ſubſtantyue or pronowne ſpoken of in the ſentence next goynge before/ in all ſuche they vſe le quel, la quelle, les quelz, les quelles, after ỹ gendre and nombre of the ſayd antecedent/ whether we referre ỹ ſame antecedent agayne or after the relatyue or nat/ whiche kynde of ſpekyng though it may be vſed indifferently what ſo euer maner ſubſtantyue the antecedent be/ yet is moſte vſed where the antecedent is a propre name of a perſon or place. But here is to be noted that thoughe quel, and quelz, may be ioyned with femynine ſubſtantyue/ in this relatyue that rule holdeth nat/ for it ſhulde engendre to moche confuſyon. Regula prima. Regula ſecũda.

¶ Exemple of this rule.

¶ Johan le Maire/ lyke as Anchyſes dyd the whiche incontynent after the dede went and vaunted hym/ Comme fiſt Anchiſes le quel incontinent apres le fait ſalla vanter, the whiche great ardour ſemed to ſmoke/ la quelle grant ardeur ſembloyt fumer, And than ſhalte thou haue remembrãce of Pegaſys the whiche hath tolde the/ et lors auras remembrance de Pegaſis la quelle ta compté &c.

And in lykewyſe vſe they/ le quel, la quelle, les quelz, & les quelles, whan ſo euer there cometh a prepoſycion before the ſayd whiche/ or whome/ beyng referred to a ſubſtantyue or pronowne goynge in the ſentence before/ whether the ſame ſentence be agayne referred or nat.

But here is to be noted what I haue layd afore on ỹ accident of the prepolycion in the leconde boke/ for as often as/ a, and le, cometh to-gyther/ they be tourned in to au, and in lykewyle for a les, they lay aux, for en le, ou, for en les, es, for de le, du, and for de les, des, but with all other prepolycions the artycle is written before the relatyue out at length.

¶ Exemples where the artycle and the prepolycions be confuſely compounde togyther.

¶ Annotacyons to knowe howe and whan we ſhall vſe the pronownes demonſtratyues/ and firſt whan we ſhall vſe ce. Capi. xxb.

When ſo euer we vſe theſe wordes/this/or theſe/ in our tonge before a ſubſtantyue wherof we haue made mencyon before/ or ſhewyng a thynge/ they vſe in frenche/ ce, of ſuche gendre and nombre as the ſubſtantyue requyreth.

And here is to be noted that if a ſubſtantyue of ỹ maſculyn gendre or his adiectyue begynne with a vowell or with H/ nat hauyng his aſpyracion/ that than they vſe nat ce, but ceſt, lyke as I haue ſhewed whan I declyned ce, in the ſeconde boke.

¶ Exemple

¶ Exemple of this rule.

¶ For this way/ this houſe/ theſe wayes/ theſe houſes/ they ſaye/ ce chemyn, ceſte mayſon, ces chemyns, ces mayſons, And for this man/ this horryble caſe/ ceſt home, ceſt horrible cas. Whan ſo euer we vſe theſe two wordes it is hauyng regarde to the thyng or mater ſpoken of byfore/ they vſe ce eſt, and by abreuyacion/ ceſt, as I haue at the length declared in the. li. chapiter of the firſt boke.

But if we vſe the ſayd two wordes rather to expreſſe the qualyte of a thyng than a thynges ſelfe/ they vſe il, and nat ce.

¶ Exemple of this rule.

¶ For it is well ſayd/ it is myne/ it is my deſyre/ they ſay/ ceſt bien dict, ceſt a moy, ceſt mon deſir, and for it is good/ it is naught/ they ſay il eſt bon, il ne vault rien. But where we vſe it/ before a verbe impar-ſonall or as accuſatyue caſe gouerned of any verbe parſonall/ in all ſuche ſentences they vſe il, le, or la, as the ſentence dothe requyre.

¶ Exemple of this rule.

¶ For it rayneth/ it thonderyeth/ I loue it/ meanyng a maſculyne ſub-ſtantyue/ I hate it/ meanyng a femynin ſubſtãtyue/ they ſay/ il pleut, il tonne, le layme, le la hays.

Whan ſo euer we vſe to double this worde that/ in our tonge where as vnto the firſt that/ may be vnderſtande the ſubſtantyue thyng the ſeconde that/ beynge a conjunction in the ſtede of the firſt that/ they vſe euer/ ce.

¶ Exemple of that rule.

¶ For I ſhall helpe hym in all that I may/ they ſay/ ie layderay en tout ce que ie puis.

Whan ſo euer we vſe theſe two wordes in our tonge/ they be apoyn-tyng or ſhewyng ſuche thyng as we haue ſpoken of beyng in ſyght/ or whan ſo euer they make anſwere to a queſtyon demãded of thyng beyng in ſyght what thynges they be/ the frenchemen vſe/ for they be/ ce ſont, but if we vſe/ they be tellyng or declaryng of a thyng without ſhewyng/ they vſe ilz ſont, or expowndyng/ ſo that the worde ſolo-wyng expownd the wordes that go before/ on ot deloing les cliquet-tys de voz harnois, ce ſont voz botellettes, on ſe reſueille au ſon de voz cleres trompettes, ce ſont voz fluttes, voz doulcaines et voz ioyeuſes muſettes.

¶ Exemple of this rule.

¶ They be no men for vs/ ce ne ſont point gens pour nous, they be no men ỹ we ſe comyng they be ſhepe/ ce ne ſont point des gens que nous voyons venir ce ſont des brebis, they be of our folkes that croſſe ouer the fyldes/ ce ſont de noz gens qui trauerſent les champs, they be wyſe men/ they be fooles/ ilz ſont ſaiges gens, ilz ſont folz.

And note that by the ignoraunce of prynters I fynde often ſe, wrytten with S, for ce, wrytten with C, whan he is vſed in this ſence/ by cauſe they thynke that ce, wrytten with C, in his ſinguler nombre/ ſhulde nat be ioyned with a verbe of the plurell nombre/ but their tonge is ſuche in this thynge.

¶ Annotacyons to knowe whan we ſhall vſe cecy, and cela. Capi. xxvi.

WHan ſo euer we vſe theſe wordz in our tonge/this/ or that/ without a ſubſtantyue where the ſence ſhulde be all one whether we adde this worde ſame or nat to them/ they vſe euer for this/ cecy, and for that/ cela, varyeng ce, after the gendre and nombre of ỹ ſubſtantyue that he belongeth vnto/and addynge cy, and la, to his ſmall termynacion.

¶ Exemple of this rule.

¶ For gyue me this/or gyue me this ſame/take away that/or ỹ ſame/ they ſay/ bailles moy cecy, oſtes cela, But if they adde the ſuſtantyue than put cy, and la, after ỹ ſubſtantyue they deuyde cy, and la, from ce, and put the ſubſtantyue bytwene them / as A ceſt homme cy, en ce temps la, pour ceſte femme cy, contre ces gens la, et ie trouue par eſcript que le roy Priam ne cõmiſt iamais cruaulte que ceſte la.

¶ Annotacyons to knowe whan we ſhall vſe cyl, celuy, ceulx, celle, or celles. Capi. xxvii.

WHan ſo euer we vſe in our tonge theſe wordes/he that/ him that/ the that/ her that/ or them that/ vnderſtandyng men or women/ they ſay one of ỹ fyue wordes here a fore reherſed/ with qui, next folowynge hym/ of ſuche gendre and nombre as the prepoſycion is that they ſerue for.

¶ Exemple of this rule.

¶ For theſe

¶ For theſe ſentẽces/ he that hath his helth is ryche ynough/ ſhe that is good and fayre nede none other dowrie/ I wyll fyght agaynſt hym that ſayeth ỹ contrary/ I wyll gyue it to her that is fayreſt/ they that go a warrefare haue a paynfull lyfe/ they that ſpyn all day wynne but a lytle/ I holde with them that deale trewly/ they ſay/ cil, or celuy qui a ſa ſancte eſt ryche aſſez, celle qui eſt belle et bonne na meſtier daultre douayre, ie combatray contre celuy qui diſt le cõtrayre, ie le bailleray a celle qui eſt la plus belle, ceulx qui vont a la guerre maynẽt vie penible, celles qui filent tout le iour ne gaygnent guayres, ie loue ceulx qui ſe mayntiennent loyallement.

But whan ſo euer we vſe this ſame or that ſame/ addyng a ſubſtantyue where of we haue made mẽcion byfore/ they vſe cil, celuy, ceulx, celle, or celles, without qui, of ſuche gendre & nombre as the ſubſtantyue dothe requyre.

¶ Exemple of this rule.

¶ Where we ſay/ this ſame chylde wherof I haue afore tolde you/ this ſame dragon/ this ſame woman: they ſay/ cil, or celuy enfant dont ie vous ay cy deuant compte, celluy dragon, celle femme &c. Where celuy, and celle, includeth le, or la, and ỹ ſubſtantyue that went before/ as et le duc et la loy. Regula.

¶ Annotacyons to knowe whan we ſhall vſe ceſtuy, yceſtuy, ycelluy, or ycelle. Capi. xxviii.

WHan we vſe this man/ they vſe ceſtuy, & for this ſelfe ſame man/ yceſtuy, and for this ſelfe ſame thyng of the maſculyne gendre/ yceluy, as yceluy dragon, yceluy iugement, & for the femynine gendre/ ycelle, as ycelle condemnacyon, this ſelfe ſame condemnacyon.

¶ Annotacyons to knowe howe and whan we ſhall vſe their nownes partytiues and diſtrybutyues and what ſondry maners of ſpekynge they vſe in the frenche tonge whan we vſe any of the ſame wordes in our tonge/ and firſt to knowe what wordes they haue for any. Capi. xxix.

The Pronowne.

¶ Whan we vſe any/ before a ſubſtantyue they vſe aulcun, of ſuche gendre and nombre as the ſubſtantyue requyreth.

¶ Exemple.

¶ If you haue any mater/ ſi vous auez alcune matiere, knowe you any remedy/ cognoiſſez vous alcun remede. But I fynde ſomtyme aulcun, and aulcunė, for ſome man or ſome woman or ſome body/ as if you ſe any man there/ ſi vous voyez alcun la.

For this worde any/ in our tonge by ſydes aulcun, they haue alſo nul, quelcun, quelconque perſonne, and de, and poynt de, of whiche the vſe ſhall apere by exemple.

¶ Exemple.

¶ And if any man or woman aſke/ et ſi nul ou nulle demande, ſo that nul, in all his gendres and nombres where the verbe hath nat ne, before him ſtandeth for any man or any woman or for any/ as il eſt pardu ſans nul remede, he is loſt without any remedy/ il le ſcait faire mieulx que nul aultre, if you ſe any body paſſe this way/ ſi vous voyez quelcun paſſer par icy, without fraude or any maner corrupcion/ ſanz fraude ne corruption quelconques, ordonna la feſte leſpace de trois iours continuelz ſans intermiſſion quelconque, ſo that quelconques, for this ſignyfycacion muſt euer be the laſt worde in the ſentence: Haue you any money/ auez vous point dargent, ſans faire tort a parſonne, ſo ỹ whan we vſe any before a ſubſtantyue and enquyre or demaunde if we haue any parte or porcyon therof/ they vſe euer point de, as for any breed/ any fyre/ any water/ point de payn, point de feu, point de aue.

¶ What wordes they haue for ſome.

¶ Whan we vſe ſome body or ſome man or woman/ they vſe quelqun, or quelqune.

¶ Exemple.

¶ There is ſome body at ỹ dore/ il ya quelqun a luys, loke if you can ſe ſome woman/ regerdez ſe vous pouez veoir quelcune.

For this worde ſome in our tonge beſydes quelqun, they haue alſo les vngz, or les aucuns, les aultres, les aulcunes, quelque, de, and tel.

By many meanes men fall in to pouertie/some by theues/some by foztune of the see/some by fyze/some by prodigall expences/ par plusieurs moyens les hõmes tumbent en pouerté, les aulcuns par larons, les aulcuus par fortunes de la mer, les aulcuus par feu, et les aulcuns par prodiguement despendre, so that whan we vtter some/ oftener than twyse / they vse les aulcuns, oz les aulcunes, after the gendze of the substantyue/ and nat les vngz, et les aultres. Some be begyled / les aulcuns sont trompez/ it is some beest oz some tree/ cest quelque beste ou quelque arbre, so that quelque, serueth foz vnreasonable creatures/ lyke as quelcun, and aulcun, foz raesonable/ howe be it I fynde/ quelque fol, quelque prestre, quelque dame, but alwayes ỹ substantyue must be expzessed.

¶ Gyue me some bzeed / go fette water / baille moy du pain, allez querir de leaue, so ỹ whan some signifieth ỹ parte of any thyng they vse/de.

Some hath shauen his berde ỹ is nat very fayze/ tel a faict sa barbe qui nest guayres beau, some speke full swetely that meane full yuell/ tel parle tresdoulcemẽt qui a tres maluaise intencion, so that whan we vse some/nat touchyng any certayne person but speke in a generalte/ they vse tel, I thynke I am as wozthy as suche a man/ ie me pense aussi digne que vng tel.

¶ The vse and signyfications of chascun.

¶ Whan so euer we vse in our tonge eche man oz euery man/ they vse chascun chascune, chascuns oz chascunes, after as we speke of a man oz a woman of one oz of many.

¶ Exemple.

¶ Euery man ought to do in all places that whiche he knoweth becometh hym best/ chascun doyt faire en toutes places ce quil scayt que mieulx luy aduient, after dynner men auaunced them to daunce eche man with eche woman / apres disner on sauanca de dancer chascun a chascune, euery man on his behalfe/ chascun en droyt soy, foz eche oz euery ioyned to any other substantyue/they vse chascun, also of suche gendze and nombze as the substantyue requyzeth/ but after a prepo-

¶ Exemple.

¶ Euery byde/chaſcun oyſeau, by euery light occaſyon/par chaſcune legere achoiſon, I fynde alſo tout chaſcun, and vng chaſcun, whiche ſignyfye eche or euery alſo/but with a more expreſſyng that all/euery and all togyther do an acte/ or that euery man on his behalfe dothe enforce hym ſelfe to do any acte.

¶ Howe many ſondry wordes they haue for none/ and no / in our tonge. Capi. xxx.

¶ Whan ſo euer we vſe no body/they vſe nulluy, addynge ne, before the verbe.

¶ Exemple.

¶ No body may abyde his condycions/ nulluy ne peult endurer ſes condicions, I wyll nat dõ it for no body that lyueth/ ie ne le feray pour nulluy qui viue, I am bownden to no man/ ie ne ſuis oblige a nulluy, and ſo after all other prepoſycions/ as pour nulluy, en nulluy, contre nulluy.

For theſe wordes no/ or none/ beſydes nulluy, they haue alſo nul, ame, perſonne, quelconque, neſſun, riens, ne poynt de, or pas de, but to all theſe wordes it is generall ỹ the verbe in the ſentences where they be vſed ſhal euer haue ne, put before hym more than is in our tonge in the ſame ſentẽces of whiche wordes ỹ vſe ſhall here apere by exemple.

¶ Exemple where nulle, nulz, nulles, may ſignyfie no man/ no woman/ no men/ or no women acordyng as the ſentence requyreth.

¶ No man

¶ No man is bounde aboue his power/ nul neſt tenu oultre ſon pouuer, no man demaundeth what he ſhulde do in his offyce/ nul ne demande que il doybt fayre en ſon office.

¶ Exemple where nul is ioyned to a ſubſtantyue and ſignyfieth no/or none.

¶ No loue may be greater than the loue of the mother to the chylde/ Nulle amour ne peult eſtre plus grande que celle de la mere au filz. For there is no graunt made lyberally if it be demaunded neglygently/ Car nul octroy ne ſe faict liberallement ſil eſt demande nonchaillanmēt. I wene that in trouth there is none ſuche. Ie croy que en loyaulte ne eſt nul tel.

¶ Exemple where ame, or perſonne, betokeneth no man or no body.

¶ Ie ſe no man or no body/ ie ne voy ame, I wyll do no wronge to no bodye/ ie ne feray tort a perſonne, there is no body at home/ il nya ame a la maiſon.

¶ Exemple where quelconque, ſignyfieth no maner.

¶ He hath no maner of grace in hym/ il na en luy grace quelconque, alſo I haue ſene no maner auctour/ ſi nay ie veu aucteur quelconque, ſo that quelconq; ſignyfieth no maner: but as for neſſun, and neſſune, as he maketh no maner chere/ il ne fait chiere neſſune, and ſuche lyke be nat to be followed/ for neſſun, is an olde romant worde/ lyke as neant, is/ in ſtede wherof they vſe euer nowe riens, for they ſaye nat nowe/ Ie ne le ſeruyray toute lannée pour neant, but pour riens.

¶ The vſe

¶ The vſe and ſignifycacion of tout, treſtout, and quanque. Capi.xxxi.

When we vſe all/ in our tonge they vſe tout, of ſuche gendre and nombre as the ſubſtantyue dothe requyre.

¶ Exemple.

¶ With all my herte/ with all my myght/ de tout mon cueur, de toute ma puiſſance. But where as ỹ Romãt ſayeth/ a ceſte porte ſans ſeiour, la muſe muſant toute iour, in that tyme he folowed the vulger people/ whiche ioyne toute, in his femynyn termynacions to iour, though he be of the maſculyne gendre in the ſinguler nõbre onely as they ſay/ il lüy defendit ſur tout riens, though riens, be of ỹ teminyn gendre/ but they ſay/ tous les iours, acordyng to the trewe congruite or the tonge.

When we vſe all togyther or all that euer there is/ they vſe treſtout/ Exemple/ put in all togyther/ mettez treſtout dedens, but as for quanque, whiche alſo ſignyfieth all togyther or all that euer/ as you leſe all that euer you playe for/ vous perdez tout qũanque vous iouez, it is a worde of the olde Romant ſpeche/ & nowe in the pure frenche tonge is clere out of vſe.

¶ Exemple.

¶ Was neuer man had ſuche a nother martyrdome/ onques nul neuſt autel martire, ſhuche lyke wordes were bytwene them/ itellz parolles auoyent ilz entre eulx.

But where

But where as the byſſhoppe of Anguilleſme bſeth moche in the pyſtels of Duyde/ tieulx, and itieulx, for telz, and itelz, that worde he hath vſed of his owne naturall tonge/ for the vyght frenche tonge is rather telz, and itelz. And howe tel, and telz, maye be ioyned with femynine ſubſtantyues I haue afore touched in this thyrde boke in the thirde accydent belongyng to nownes adiectyues. Regula.

¶ The vſe and ſignyfycacion of aultre, and aultruy. Capi. xxiii.

WHan we vſe other/ they vſe aultre, as a nother man/ vng aultre homme, a nother woman/ vne aultre femme, an other reaſon for other cauſes/ vne aultre raiſon pour aultre cauſes, in other maters/ en aultre matieres. But ſo often as they vſe an other man or an other body after a prepoſycion/ they vſe aultruy, as do to an other man or body/ faitez a autruy, truſt nat to moche in an other body/ ne vous fiez trop en aultruy, he thynketh to do diſpleaſure to a nother body/ il penſe faire deſplaiſir a autruy.

¶ The vſe and ſignyfycacion of quelconques and quelque. Capi. xxiiii.

WHan we vſe what ſo euer/ they vſe quelconque, or quelzconques, or quelque, after the nombre of the ſubſtantyue/ what ſo euer gendre the ſubſtantyue be of/ ſo that where as he is declyned in the ſeconde boke/ quelconque, quelleconque, quelzconques, quelleconques, that was done by the errour of the prynters/ for he foloweth the rule of adiectyues endyng in L/ as what ſo euer excuſe you alledge it ſhall nat ſerue you/ quelcóque or quelque excuſation que vous alligez elle ne vous ſeruira de riens, and I wyll be ware to make any maner mencion of it to any creature lyuyng/ ſi ie men garderay de faire menſcion quelconques a perſonne qui viue, for of them I force nat what ſo euer goddes or demye goddes that they be/ car deulx ie nay cure quelque dieux or quelconques dieux ou demy dieux que ilz ſoyent, as for il ya quelque vingt ans, for it is aboute. xx. yere/ is onely vſed in ſuche ſpekynge with nombres. I fynde alſo/ O déeſſe ſpecieuſe quelque que tu ſoyes, Si men garderay a faire a aultruy mencion quelconques.

¶ The vſe and ſignyfycacion of maint, and pluſieurs. Capi. xxv.

¶ Maint,

The Pronowne.

QAint, and plusieurs, signyfye in our tonge many/but with this difference maint, altereth his gendre and nombre after ỹ substantyue that he is ioyned vnto/ as for many a man/ many a woman/ many men/ many women/ they say/ maint hõme, mainte fẽme, maintz hommes, maintes femmes, but plusieurs, is euer ioyned to substantyues of the plurell nombre onely/ as plusieurs hommes, plusieurs femmes, also plusieurs, alone may signyfye many men/as a man had nede beware howe he playeth with many men/ len se deueroyt bien garder cõment il se iouue a plusieurs: Si y errent les plusieurs.

Here endeth the Pronowne: and hereafter foloweth annotacyons to knowe all maner sortes of numeralles in the frenche tonge/and howe and whan they shulde be vsed.

OF frenche wordes whereby nombres be expressed there be thre dyuers sortes lyke as I haue in partye in the seconde boke as I haue had occasions to speke of them all redy touched: for by vng, deux, troys, quatre, and suche other they vse to reken howe many thynges there be in any sõme togyther.

And by le premier, le seconde, le tiers, le quart, and suche other they vse to shewe in what order or place one thyng is to an other.

And by vne foys, deux foys, troys foys, and suche other they vse to shewe howe often a dede is done.

And of all these thre sortes of numeralles what & howe many they haue in the frenche tonge/ and howe they be vsed whan one of them is ioyned with a nother/shall here consequently apere.

Here folowe all suche nombres as the lerned men in Fraunce vse to sõme or reken thynges by/ and by what names and figures they be expressed bothe with vs and them.

¶ So ỹ ſeptante, octante, & nonante, be neuer vſed of ỹ voulger people/but iuſted of thē ſoixante et dix, quatre vingtz, quatre vingtz et dix.

And note that from four ſcoze they recken by ſcozes to .xx. ſcoze and from four hundzed where they ceaſe to reken by ſcozes they recken by hūdzedes oz thouſandes/they name them as ỹ lerned men do ſayeng/ cent, deux cens, troys cens, quatre cens, mille, deux mille.

Note alſo that ſuche lyke maner of accountyng by ſcozes and hundzedes as they vſe from fourſcoze to two thouſande/ſuche lyke maner of reckenyng they vſe bytwene two thouſande & two millions/ and bytwene two millions and two millions of millions/ in all other thynges they agre with the lerned men.

And lyke as they ſay/ vingt et vng, cent et deux, deux cens et quatre, ſo ſay they/ quatre vingtz et vng, ſix vingtz et deux, onze cens et quatre, addyng the conjunction by/ bycauſe vingt, endeth in a conſonant accozdynge to the rule afoze reherſed.

¶ Rules to knowe the trewe and certayne vſe of all theſe afoze reherſed numeralles in the frenche tonge.

Firſt al numeralles of this ſozte be indeclynables without gendze oz nombze oz any other alteracions of their laſte letters except/ vng, vingt, cent, mille, et million, of whiche vng, ſo often as he repzeſenteth oz is toyned to a femynine ſubſtantyue is chaunged in to his femynine ſinguler onely/ as foz one god/ one kynge/ one fayth/ one lawe/ they ſay/ vng dieu, vng roy, vne foy, vne loy, and foz one and twenty men/ one and twenty women: vingt et vng homme, vingt et vne femme. So that vngz, and vnes, be neuer vſed as numeralles/ but onely as artycles/ and therfoze I ſhall nat ſay vingt et vngz hommes, vingt et vnes femmes, vingt, whan he ſignyfyeth twenty is neuer vſed in his ſinguler nombze/ and whan he ſignyfieth ſcozes he is euer vſed in the plurell nombze onely/ as foz twenty men/ twenty women/ they ſay/ vingt hommes, vingt femmes, and foz fourſcoze men/ quatre vingtz hōmes, quatre vingtz femmes, without any chaūgyng of vingt oz vingtz, nat withſtandyng any dyuerſyte of gendze that their ſubſtantyues be of.

Cent, whan he ſignyfyeth one hundzed/ is euer vſed in his ſinguler nombze/ as cent millions, cent mille et cent, whan he ſignyfyeth many hundzedes/ is euer vſed in the plurell nombze/ as deux cens millions, deux cens mille et deux cens: but foz any dyuers gendze of his ſubſtantyue he hath no maner alteracyon/ foz they ſay/ cent hommes.

cent femmes,

cent fẽmes, deux cens hommes, deux cens femmes.

Mille, of all ſuche auctours as wꝛite in pꝛoſe remayneth euer on chaunged/ whether he ſtande foꝛ one thouſande oꝛ many and what ſo euer gendꝛe his ſubſtantyue be of/ ſaue that vſe hath optayned ſo often as mille, cometh next byfoꝛe hõmes, is chaunged in to mil: Iehan le Mayre, qui auoyt cent quatre vingtz mil hõmes en armes, alſo whan ſoeuer an, is his ſubſtantyue outher compnge next befoꝛe mille, oꝛ in the yeres of our loꝛde/as mil ans, vingt mille ans. Iehan le Mayre, mil neufcens quatre vingtz ans auant lincarnation. Alayn Chartier, lan mille quatre cens cinquãte, but if mille, folowe hommes, oꝛ ans, they vſe mille, lyke as they do with other ſubſtantyues / as des hommes plus de mille, des ans plus de cent mille. But ſuche as wꝛiteth in ryme ſo often as the ſubſtantyue to mille, oꝛ the nexte woꝛde folowyng him begynne with a vowell oꝛ with H/nat hauynge his aſpyꝛacion be at their lyberte whether they wyll vſe mil, oꝛ mille. The Romant: ſi mil yen alumeroyent ia moins de feu ne troueroynt, and this thyng is ſpecially to be noted/ foꝛ the pꝛinters herin do greatly erre/ vſyng mil, and mille, vncertaynly: and therfoꝛe where in the thyꝛde boke of Johan le Mayres illuſtracions is wꝛitten. Si furent occis ſur le champ quatre vingtz mil nobles hommes et ſoixante mil varletz, it wolde be quatre vingtz mille, & ſoixante mille, but where as I rede in the Quadꝛilogue of Alayne Chartier/ trente deux-milles combatans, the boke wolde be coꝛꝛected foꝛ mille, neuer releueth s, foꝛ no maner of ſpekyng/ but if we vſe to ſay they be kylled by hundꝛedes oꝛ by thouſandes/ oꝛ he ſelleth his ware by hundꝛedes and by thouſandes/ not expꝛeſſynge any ſubſtantyue/ they vſe in all ſuche ſayenges/ cens, and milliers, as ilz ſont tuez par cens et par milliers, il vent la marchandiſe par cens et par milliers, and ſo of ſuche lyke.

Million, in all thynges is vſed lyke cent, foꝛ they ſay/ vng million, deux millions. And note that cent et mille, whan they ſtande foꝛ one hundꝛed oꝛ one thouſande haue neuer vng, befoꝛe them/ though million, haue/ and whan million, is ioyned to any ſubſtantyue they adde de, befoꝛe hym/ as vng million de hommes, vng million de femmes.

Here foloweth all ſuche numeralles as be of ſeconde ſoꝛte / by whiche they ſhewe in what oꝛdꝛe oꝛ place one thyng is to a nother.

All numeralles of this ſorte be adiectyues and forme their fe-mynynes out of their maſculynes their plurell nombres out of their ſingulers/accordynge as in the adiectyue I haue all redy de-clared / as premier, premiers, premiere, premieres, troyſieſme, troy-ſieſmes. But lyke as in our tonge we euer vſe byfore ſuche numerall-les or artycle ſayeng/ the fyrſt/ the ſeconde/the thyrde/the fourth/ and ſo of all other: So in the frenche tonge theſe numeralles haue euer their artycle byfore them of ſuche gendre and nombre as the ſubſtan-tyues whyche they ioyned vnto dothe requyre/as le premier chapitre, la premiere raiſon, les premiers hommes, les premieres fundacions &c. but where as I rede/ il eſt le cinquantainier de ſon blaſon, I wolde haue ſayd/ le cinquantieſme, for of this ſorte endyng in ier, they haue no more but le premier, and le dernier.

℣ Here foloweth howe ſuche numeralles as be of the thyrde ſorte ſhall be vſed.

In nume-

IN numeralles of the thyrde ſorte wherby is expreſſed howe often a dede is done/ is no maner difficulte in the frenche tonge but addynge foys, to the numeralles of the firſt ſorte may be expreſſed any maner nombre/ as for ones/ twyſe/ thryſe/ foure tymes/ fyue tymes/ ten tymes/ twenty tymes/ a hundred tymes/ a thouſande tymes/ they ſaye/ vne foys, deux foys, troys foys, quatre foys, cinq foys, dix foys, vingt foys, cent foys, mille foys, and ſo of all other reherſyng the nombre and addyng to foys.

Here foloweth certayne exemples to knowe farther howe they expreſſe nombres or thynges in a multytude.

They be taken bothe two/ ilz ſont prins tous deux, they were bytwene eyght and nyne thouſande horſes/ ilz eſtoyent de huict a neuf mille cheuaulx, there is vpon a thurty or fourty men/ il ya quelque trente ou quarante hommes, they be aboute twenty/ ilz ſont enuiron vingt, I haue to the nombre of thurty or fourty houndes/ iay vne trentayne ou quarantayne de chiens, I haue halfe a douſayne/ a douſayne or a ſcore/ iay vne demye douſayne, vne douſayne, ou vne vingtayne.

Thus endeth the Numeralles: and here after foloweth the chapiters of the Pronowne.

WHan they ſhewe oz declare a dede to be done they vſe euer ſome tence of the indycatyue mode/ as foz I ſpeke/ I ſpake/ I haue ſpoken/ I had ſpoken/ I ſhall ſpeke/they ſay/ ie parle, ie parloye, iay parle, iauoye parle, ie parleray, and whan they ioyne two ſentences togyther with this conıuction/ que, whoſe engliſſhe is/ that/ the verbe that cometh in the latter ſentence and foloweth next after que, ſhall be of the ſubiunctyue mode/ as wyll you that I do it/ voulez vous que ie le face, he cõmaunded me that I ſhulde do it/ il me cõmanda que ie le fiſſe.

And whan they cõmaunde a dede to be done/ they vſe euer ſome tence of the imperatyue mode/ as ſpeke to me / parlez a moy, let me ſpeke firſt/ que ie parle premier. ¶ whan they wyſſhe a dede to be done they vſe ſome tence of the optatyue mode/as well may he do/ bien face il, well myght he haue done/ bien fiſt il. And whan they condyſcion if a dede be done that a nother thyng ſhall therof folowe/ they vſe ſome ſuche tenſes as may belonge to the condiſcyonall mode/ as if I ſpeke with hym/ ſi ie parle a luy.

And whan two verbes come bothe togyder in one ſentẽce of whiche the firſt is no ſigne noz the ſeconde no partyciple/ the latter of them ſhall be of the infynitiue mode/ and ſo ſhall all ſuche verbes as haue to/ oz foz to/ byfoze them and folowe a nother verbe in the ſame ſentence/as I can ſpeke well/ ie ſcay bien parler, I am come foz to ſpeke with you/ ie ſuis venu pour parler auecques vous.

¶ Annotacyons vpon the ſeconde accydent belongyng to verbes actyues parſonalles/ and firſt to knowe howe and whan they vſe any of ỹ ſyxe tenſes of their indycatyue modes.

¶ Whan

When they shewe an acte or dede to be at this present tyme in doynge/ they vse euer the present tence of this mode/ as if they wolde shewe howe at this presente tyme a man speketh or beholdeth or dothe any other acte/ they say/ vng homme parle, vng hõme regarde, vsyng suche nombre and person of this present tence as the nompnatyue requyreth.

And here it is to be noted that though we vse to cyrcumlocute the presente and preter imparfyte tenses of all our verbes actyues parsonalles with the same tenses of this verbe/ I do/ so that with vs it is all one to say/ I spekе/ and I do spekе/ I spake/ & I dyd spekе/ I beholde/ and I do beholde/ I behelde/ & I dyd beholde/ the frenchymen haue no suche lyke thyng in their tonge but euer vse ỳ tense selfe onely accordyng as the sentence requyreth: but many tymes the frenchmen vse the tenses of ie men vas, and ỳ partyciple of a verbe or his infenityue mode for the tenses of verbes: the Romant/ que vous yroye deuisant, for que vous deuiseroye, ie voys mourir, for ie me meurs, ie voys danser, amours va ses soulas doublant, et vont chantans a voix iolie, howe be it suche maners of spekyng may signyfye a preparynge or begynnyng to do a dede.

¶ To knowe whan the frenche men vse the preterit tenses of their indycatyue modes.

In the vsynge of/ of their preterparfyte and preter plus parfyte tenses is vnto vs no difficultye/ for lyke as we in our tonge circumlocute these two tenses with the persons of/ I haue/ and I had/ and our partyciples preterit so do/ do they in frenche cyrcumlocut the same tenses with the persons of/ ie ay, and ie auoye, and their partyciples/ as for I haue spoken/ I haue beheide/ I haue herde/ they say/ iay parle, iay regarde, iay ouy, and for I had spoken/ I had beheide/ I had herde/ iauoye parle, iauoye regarde, iauoye ouy, & so of all other verbes actyues parsonalles thorough bothe ỳ tonges lyke as I haue afore touched in the first accydent/ but to knowe whan they vse their other two preterit tenses it is vnto vs some thyng more difficulte.

¶ To kus we therfore howe and whan the frenche men vse their preter imparfyte tence/ and whan their indiffynyte tence/ whiche name I borowe of the grekes/ for they haue a tence whiche they call Aoristus, that is to say indifinitus, wyche moche resembleth this tence in ỳ frenche tonge.

When the frenche men wryte an hystory or make reherſall of any acte or mater that is paſſed/ intendyng to declare the circumſtances or maners howe the ſame hystorye or acte was done/ haue chefely their conſyderacion vpon the tyme whyche was preſent whan the ſame actes were in doynge. And all ſuche partyculer dedes as aboute that tyme were begon/ and incontynently aboute the ſame preſent tyme ended and ouer paſſed/ all ſuche maner of dedes expreſſe they by their indyfynyte tence/ and all ſuche dedes as at the ſame tyme were in doynge and had contynuaunce after the ſame preſent tyme/ all ſuche actes expreſſe they by their preter imparfyte tence. So that their preter imparfyte tence ſerueth to expreſſe ỹ chefe actes that they wyll ſpeke of and their indiffynyte tence to declare ỹ partyculer actes and circũſtances whyche ouerpaſſed in ỹ meane whyle/ as if I wolde ſhewe one ỹ I was yeſterday at yorke/ & what thynges chaunced me in ỹ meane ſeaſon ỹ I was there/ as I met there with a man whyche ſalued me & talked with me of many thynges/ they ſay/ Ie eſtoys hier a Yorke la ie recontray vng homme qui me ſalua et men parla de pluſieurs choſes.

¶ Exemple taken out of Johan le Mayre in his ſeconde boke of Illuſtracions for a declaracyon of this rule.

¶ Endementiers Achilles trayna villainnemẽt le corps du noble Hector iuſques au tumbeau de Patroclus et illecques le collocqua ſur la terre par maniere de vantiſe et glorifiãce, a la veue de tous les grecz, auſquelz il plaiſoit beaucoup de le voir ainſi, cõme celluy qui ſouloit eſtre le plus redoubte de leurs ennemis. Et cõme ceulx qui peu priſoient le demourãt: Et pour ce que le fait de la guerre eſtoit deſormais ainſi come en ſurete, ilz ſadonnerẽt a toute lieſſe. Et le lendemain Achilles pour faire honneur a feu ſon amy Patroclus miſt ſur vng grand tourney, et celebra les ieulx funebres de toutes manieres deſbatementz au tumbeau dudit Patroclus, en deſtribuant par grande largeſſe diuerſes manieres de pris a ceulx qui mieulx deſſeruirent. Et quant les ditz ieulx furent fines chaſcun ſe retourna en ſa tente.

Here in this matter is/ plaiſoyt, priſoyent, ſouloyt, et eſtoyt, of the preter impfyte tence/ for here is chiefly intẽded by the auctor to ſhewe howe moche it pleaſed the grekes at that tyme to ſe ỹ body of Hector ſo trayned by Achilles/ bycauſe he was wont to be ſo redoubtabe to them/ and howe lytle they than eſtemed the reſydewe of the force of Troye/ and for ſo moche as they were from thence forthe in maner in ſauetye what ſportes and feeſtes were alſo at the ſame tyme made for the ho-

for the honour of Patroclus and here is trayna colloqua adonerent, mit sus cela desseruirent furent et retourna. of the indiffynite tence/ for all these actes be but passyngly brought in/ as thynges that were done and ouerpassed in the meane whyle that these chefe actes were in doyng.

This rule therfore is so generall thorowe all the frenche tonge that I suppose this exemple to be suffycient/ saue onely that I thynke it requisyte here to aduertyse the lerner that if the rehersyng of any actes that be passe shewe an hundred dedes togyther/ whiche all were in doynge and contynued attones at any season whiche somtyme was present/ he shall expresse all these dedes by the preter imparfyte tence.

¶ Exemple taken out of Alayne Chartiers byble whiche he sent to the nobles of Fraunce/ spekyng of peace.

¶ Quant en France estoye, Ie entretenoye, Seurte par voye, Par les villes quoye, Si que nulz ny meffaisoient, toutes gens alloyẽt, quel part qui vouloyent, et ne se melloyent, ne ia ne parloyent, fors de lieſſe et de ioye, de gens la peuploye, la foy augmentoye, iustice gardoye, ſience y mettoye, et tous en surte venoyent, Les marchans gaignoyent, nobles voyagoyent, et chascun planté de monnoye, riche la tenoye, les bons sustenoye, honneur mayntenoye, gens y amenoye, tous estrangiers y venoient, les princes donnoyent, les grans despendoyent, pouers y parloyent, tous en amendoient, cestoyt de honneur la mont ioye, las trop faict memore &c. In this place hath Alayne Chartier styll contynued the preter imparfyte tence/ for his intent is to declare that durynge the tyme that peace was honoured in Fraunce/ all these actes by the meane of her were in doynge in the realme/ and by her preserued in contynuaunce so longe as she endured.

¶ That our tonge with the seconde boke helpeth vs also to knowe the vse of all other tenses saue of the indiffynite subiunctyue.

HOr the vse of any other tyme in any of ỹ modes is no difficulty saue onely whan they vse their indiffynite subiunctyue.

¶ To knowe whan we shall vse the indiffynyte tence of the subiũctyue mode.

The indiffynite of the ſubiunctyue mode foloweth euer the indiffynite or the preter parfyte tence of the indycatiue/ or optatyue/ ſo that he haue this ſigne that/ byfore hym/ and one of theſe ſignes in englyſhe/ wolde/ ſhulde/ coulde/ ought/ or myght/ wolde haue/ ſhulde haue/ coulde haue &c. as the verbe folowynge que, ſhall requyre.

¶ Exemple taken out of the epyſtle of Phylles to Demophon/ where the indiffynite ſubiunctyue folowety the indiffynite indycatiue.

¶ Mays pour quoy fut ce amy a ton aduis, qui ne la print pour femme en tel deuis. Ce fuſt affin que poynt tu ne heritaſſes a tous ſes biẽs, et que ne ſuccedaſſes a ſon royalme come filz naturel et te laiſſa baſtard et viure tel. Here is fut, and print, indiffynites indycatyue/ and heritaſſes and ſuccedaſſes, indiffynites ſubiũctyue/ bycauſe they come after que, but where the boke is/ Ce fuſt affyn, in the ſtede of/ ce fut, that is by the ignorauce of priters/ whiche fayle in no one thing more than in this/ for fuſt, is ỹ indiffynite ſubiunctyue/ & fut, the indiffynite indycatiue/ whiche may nat be confounded as ſhall herafter apere where this errour of priters is more euydently declared. And ſhortly after in the ſame epyſtle folowethe et ne pluſt aux dieux que plus toſt fuſſẽt ceulx, Mors auãt terme a leur naiſtre angoyſſeux, Que p leur viure en maniere auſtere, Tu perdiſſes ta part hereditaire. Herafter ỹ optatyue foloweth the indiffynite ſubiunctyue/ but theſe ſignes/ wolde/ ſhulde/ coulde/ ought or myght/ & wolde haue/ ſhulde haue/ coulde haue/ ought haue or myght haue/ and the ſigne ỹ dothe chefly helpe vs to knowe whan we ſhulde vſe this tence & all other/ as I haue ſayd/ maye be knowen by the ſeconde boke/ ſaue onely that in the preſent infynitye is a difficulty to knowe whan we ſhall vſe a, de, or pour, byfore hym/ or vſe the infynitye without any ligne atall.

¶ To knowe the vſe of the preſent infynitye in the frenche tonge.

The frenche tonge though they vſe their preſent infynitye immedyatly after an other verbe as the latynes do/ for the moſte parte, as I wyll do it/ ie le vueulx faire, yet they vſe to put alſo one of theſe thre prepoſycions a, de, or pour, byfore their infynitye/ lyke as we ſomtyme do/ for as it is all one with vs to ſay/ I am come to ſpeke with you/ and I am come for to ſpeke with you.

To knowe

¶ To knowe whan we ſhall vſe the infynitpue mode without any ſigne.

When the ſentence falleth ſo that two verbes come togyther all in one ſentence wtthout any accuſatpue caſe/ the laſte of them ſhall be of the infynitpue mode lyke as it is in latyn/ without outher a, de, or pour, and though we adde nat this ſigne/to/byfore our latter verbe in our tonge. The verbes that comenly come byfore an other verbe all in one ſentence be theſe/ I wyll/ I may/ I ought/ I can/ I am wont/ & verbes impartonalles/as I muſte/ it behoueth/ it becometh/ as ie vueil parler, ie puis parler, ie doybs parler, ie ſcay parler, ie le voys venir, ie ſens approucher, ie ſouloye parler, il fault parler, il cõuient parler: ſo that vnto clerkes to open this thyng/verba proeretica, that is to ſay electiua, et verba ſenſus et imperſonalia, wyll haue an infynitpue without any ſigne.

Regula.

When the ſentẽce falleth ſo that there cometh this relatpue whiche/ and his verbe/ & than an infynitpue mode with this ſygne to/ byfore hym/ than they vſe their infynitpue mode without any ſigne/ as ie cognoys bien la choſe qui te faict venir, il ny a rien ycy qui te doybt greuer, I knowe well the cauſe whiche cauſeth the to come/ there is no thyng here whiche ought to greue the.

¶ To knowe whan we ſhall vſe pour, de, or a, byfore an infynitpue mode in the frenche tonge and firſt where we ſhall vſe pour.

When the ſentence falleth ſo in our tonge that we vſe this ſigne to/or for to/byfore a verbe/ ſo that the ſame verbe may ſerue to make anſwere to this queſtyon wherfore/ demaunded of the verbe and nompnatpue caſe that went byfore/ the frenche men adde than pour, byfore their infynitpue modes/as if we ſay: he is come to ſpeke with you/or for to ſpeke with you/if we aſke why is he come or what is the cauſe or wherfore is he come to ſpeke with you/ maketh a dyrecte anſwere/ and therfore I muſt ſay in frenche/ il eſt venu pour parler auecques vous.

¶ Exemples of this rule.

¶ Tout droyt men viens pour repaſſer la mer, lors tout acoup naigent et cultre tirent pour paruenir au loyer quil deſirẽt, puis ieſcoute pour mon cueur reſiouyr, here and in all ſuche lyke is pour vſed before repaſſer, paruenir,

¶ Whan we ſhall vſe de.

¶ But whan the ſentence falleth ſo in our tonge/ ỹ we vſe this ſigne to/byfore a verbe/ ſo that the ſame verbe may ſerue to make anſwere to this queſtyon what to do/ or wherto/demaunded of the verbe and the nomynatyue caſe that went byfore/ the frenche men adde than de, byfore their infenytyue modes: as if we ſay/he is bounden to ſerue you/ if we aſke wherto or what to do is he bounden/to ſerue you maketh a dyrecte anſwere to the queſtyon/ and therfore I muſt ſaye in frenche/ Il eſt tenu de vous ſeruyr.

So that pour, is vſed whan the infynitye mode is cauſe of the acte ỹ goeth byfore hym and de, is vſed whan the infynitye mode is the effecte of ỹ dede that went byfore hym.

¶ Whan we ſhall vſe A/byfore infynityues in the frenche tonge.

When the ſentence falleth ſo that we vſe this werbe/ I am/ with an adiectyue before this ſigne to/and his infynitye mode/ the frenche tonge vſeth a, as il eſt bon a veoyr, it is good to ſe/ la rayſon eſt bien ayſée a entendre, the reaſon is very eaſy to vnderſtãde/ le quel ſeroyt a nombrer difficille, et ma mayn certes eſt mieulx apriſe et duicte a me donner par mer voye et conduicte et a naiger pour ſouuent te reuoyr, but this rule is nat ſo vtterly generall as the other here afore/ but they may gyue the lerner occaſyon to conſyder further howe to vſe a, in this behalfe.

Alſo whan ỹ verbe that cometh byfore/to am/ the infynitye mode in our tonge/ betokeneth a begynnyng of the dede or paſſyon of the mynde/

¶Annotacyons vpon the ſyxth accydent.

THe theme of the firſt cõiugacion endeth euer in E/ except that I fynde ſuche as wzite in ryme to vſe apocope/ wzityng/ ie te pry, for ie te prye, and in the future indycatyue and pzeſent potenciall I fynde ſomtyme Syncopa vſed/ as pouruoyray, donray, pouruoyroye, donroye, for pouruoyeray, donneray, pouruoyeroye, donneroye, vpon the ſeconde coniugacion I note in this place nothyng/ for here after I ſpeke of this ſeconde coniugacion in my annotacyons vpon ie conuertys.

¶I note theſe thynges vpon the thyrde coniugation.

THe theme of the thirde cõiugacion ỹ is to ſay his pzeſent tence indicatyue dothe nat euer ende in S/ for there be ſome themes whiche ende in ay, as ie ay, ie ſcay, ſome in oy, as ie croy, ie appercoy, ie voy, and ſuche lyke/ howe be it ỹ analogye of the tonge requyzeth that we ſhulde ſay/ ie ays, ie ſcays, ie croys, ie appercoys, ie voys.

Alſo the pzeſentes infynitynes of the thyrde coniugacion haue nat onely re, and yr, for their termynacions/ for I fynde dyuers endynge in oyr, as chaloyr, vouloyr, faloyr, debuoyr, cheoyr, veoyr, pourueoyr remanoyr, manoyr, comparoyr, ramenteuoyr, and ſuche lyke.

But where as I ſaye that all verbes of this thyrde coniugacion of many ſyllables be compownded of verbes of one ſyllable. Of this thyng I ſhall herafter haue better occaſyon to ſpeke.

¶ Annota-

¶ Annotacyons vpon the conſ iugacion of ie parle.

Here I fynde in Alayne Chartier/ doniſmes, and enfermiſmes, W for donaſmes and enfermaſmes, that is nat to be folowed: and alſo where I fynde in the ſame auctour/ que ie demourge, for que ie demeure, of ie demure, that is nat to be folowed.

Where as they vſe to ſay / dieu vous doynt, and dieu vous gart, and ainſi mayt dieu, for donne, and garde, and ayde, that fynde I onely in theſe thre verbes/ whiche dyffer from the generall rule of preſentes optatyue in this behalfe.

¶ Annotacyons vpon the conſu gacion of ie conuertys.

Here as in the conſugacion of ie conuertys, in the ſeconde boke W the preſent ſubiũctyue and the future imperatyue/ and the preſent optatyue/ haue ie conuertye, the prynters haue in ỹ thyng corrupted my boke/ as it is vnneth poſſyble that they ſhulde in all thynges ſatiſfye in ſo newe and vnacuſtomed worke vnto them. But for conuertye, the boke wolde be corrected/ conuertiſſe, whiche is thus declyned perſonally/ que ie conuertiſſe, que tu cõuertiſſes, quil conuertyſſe, que nous conuertiſſions, que vous conuertyſſies, quilz conuertyſſent, and ſo of the reſydewe.

Regula. And I note many verbes in ſuche auctours as wryte nowe a dayes whiche they vſe nowe euer of this ſeconde conugacion onely/ whiche Alayne Chartyer and ſuche as wrote aboute his tyme/ dyd vſe of the firſt conugacion/ as where they ſay nowe adayes/ ie affoyblys, affoyblyr, ie affranchys affranchyr, ie demolys demolyr, and ſo of dyuers other/ in Alayne Chartiers tyme I fynde them wrytten/ ie affoyblye affoyblyer, ie affranchie affranchier, ie demolie demolier.

¶ Annotacyons vpon the fyrſt rule after the conſugacion of ie conuertys,

If the verbe in this tonge be nat a normal/ as ie vas is/ ſuche cõſonant as the theme begynneth with/ ſuche lyke conſonant ſhall all his tenſes/ nombres and perſones kepe/ ſo that it is the ignoraũce of the prynters whiche wryte ieu, for geu, of ie gys, as I fynde in the epyſtle of Zenone vnto Paris: Si nes tu pas le premier qui as eu, Playſyr dicelle et auec elle ieu, for geu, and as for auoyr courſe, in Johan le

Mayre

Mayze for auoyr corrouſe, and many ſuche be fygurate by ſyncopa/ lyke as he hath/ vouldroy, and tiendroy, and ſuche; for vouldroye, and tieneroye, and aymeron, eſchaperon, eſperon, and ſuche lyke/ for aymerons &c. by Apocope that thynge dothe he and all ſuche as wzite in ryme by lycence poetycall to kepe their ryme/ and ſuche lyke fygures vſe they in all other partes of ſpeche/ as onc, for oncques, donc, for donques, auec, for auecques, and ſuche many other.

In the meane ſyllables alſo the conſonantes be vn chaunged/ and therfoze where I fynde in Alayne Chartier/ que ie ſequeuure, for que ie ſecourre, of ie ſecours, Alors la requeult, for recueilt, of ie recueil, he is nat therin to be folowed. But in vowelles I fynde ſomtyme addycion of a vowell/ as ie me ſoulace, ie me ſoulaceoye, ie farce, ie farceoye, ie menge, ie mengeoye. So that whan the theme of a verbe of the firſt conjugacion endeth in ce, oz in ge, than all ſuche termynacions fynall as ende in a vowell/ as oye, ay, er, kepe ſtyll E/ of their theme contrarye to the generall rule/ leſt that C/ oz G/ comyng byfoze oye, ay, oz er, ſhulde be ſounded/ Koye, kay, ker, goye, gay, ger, but where as I fynde/ ie me ſoulacioye, I ſuppoſe that it wolde be ſoulaceoye, and this thynge haue I alſo touched in the firſt boke. I fynde alſo in ſome verbes takyng away of a vowell/ as ie grieue, iay greué, creroye, for croyeroye, and in ſome verbes chaungyng of one vowell for an other/ as Ie pleure, ie plouroye, ie demeure, ie demouroye, ie treuue, ie trouuoye, kepyng ou, in all their other tenſes/ and ie choys, I fall/ il chiet, and ie maſſis, il ſaſſiet, and ie croy, ie creus, iay creu, and ie tays, ie me teus, ie gys, ie geus, ie fiers, ſay feru, ie oſe, iay oſé, and iay auſé.

But auſe, is onely vſed of Johan le Mayze/ for all other ſay ay oſé, and mayne, iay mené, mener, and his compoũdes/ ie amayne, ie pourmayne, ie me peyne, ie me ſuis pené, ie croy, ie creus, and ſo of dyuerſe other/ wherof to be certayne the table of verbes ſhall declare theſe thinges at length in euery verbe partyculerly as he foztuneth to come in ozder.

Annotacyons vpon the firſt of the .x. generall rules/ ſeruyng for the thyrde conjugacion

The verbes of this thyrde conjugacion if they be ſymples/ be for the moſte parte but of one ſyllable/ and they be compounde with prepoſycions/ as ie prens, is a ſymple whiche hath for his compoũdes/ ie reprens, ie ſurprens, ie comprens, ie entreprens, ie apprens, ie emprens, and ſo of their other ſymples.

And generally the compounde verbe foloweth the conjugacion of his symple/ saue that I fynde of ie fuys, a compounde ie affuyé, of the first conjugacion/ and of ie viens, ie viégne bien.

¶ Of the fyxt.

¶ The first and seconde persons of this tence muste euer be lyke/ in so moche that where as I fynde certayne verbes endynge in ✠/ as ie veulx, ie vaulx, ie faulx, ie deffaulx, ie assaulx, bycause that after aul, the orthographye in this tonge admytteth nat S/ and ỹ these verbes muste nedes haue aul, may apere by their latyn verbes that they come out of volo, valeo, saleo, and be lyke faulx, as thoughe the latynes sayd saleo. So that this thyng may be bozne bycause that ✠/ contayneth in hym selfe an S. But where as I fynde in Johan le Mayze dyuerse prefentes of this conjugacion wzitten with Z/ as ie oyngz, ie metz, ie poyngz, and suche lyke/ vndouted that is by the ignozaunce of the pzinters/ foz Z/ is no letter fynall foz any verbe in his synguler nombze.

And note that where as I fynde in Johan le Mayze/ il conclud, il tend, il rend, il vend, and so in the thyzde persons of all other verbes whose latyne verbe endeth in do, oz in deo, after myne oppynion he leaneth in this thyng to moche to the orthographye of the latyne tonge/ foz the trewe etymologye of the frenche tonge requyzeth generally S/ in the seconde person synguler of this pzefent indycatyue/ and T/ in the thyzde.

But where as suche as haue pzinted the sayd Johan le Mayze and dyuerse other auctours vse somtyme Z/ fynall in the seconde persons synguler of verbes of this conjugacion/ that is vtterly eyther their negligence oz their ignozaunce/ foz Z/ is the fynall letter of seconde persons plurell of all verbes in this tonge/ to declare the dyuersyte of accent bytwene the seconde person synguler and the seconde person plurell/ as I haue shewed in the first boke.

¶ Annotacyons vpon the thyzde of these tenne generall rules.

I fynde ie vesquis, and ie vescus, indiffynites indycatyue of ie vis, and of ie escrips, ie escripuis, and of ie ramenteue, ie ramentus, and ie ramenteuay, where I fynde the thyzde persons synguler of this tence in Johan le Mayze wzitten somtyme with S/ bykoze T/ as assonagist, rongist, noyrcist, blanchist, dist, suffist, and suche lyke/ whyche maner of wzitynge I fynde also in dyuerse other auctours/ that thyng

that thyng is by the ouerſyght of the prynters/for the addynge of S/ byfore T/ is the onely difference betwene the ſeconde perſon ſinguler of the indiffynyte ſubiūctyue/and this indiffynite indycatyue/ as fit, is indycatyue/ fiſt, ſubiunctyue/ and ſo of but buſt, deceut deceuſt, print prinſt, noyrcyt noyrciſt, blanchit blanchiſt.

But if the indyffinyte ſubiunctyue be formed out of the prenſent of the ſame mode/ as I declare that certayne be here folowyng in the ſeuenth of theſe tenne generall rules than I ſuppoſe that S/ myght be added afore T/ as il reluyſt, il induyſt, il yſt, il ryſt, il rayſt, il gyſt, and ſuche lyke.

And where as I fynde in Mayne Charter/ teniſmes, and veniſmes, for tuiſmes, and vniſmes, of that the lerner is to be warned/for of ie tyns, and vins, after the declynacion perſonall cometh tuiſmes, and vniſmes, rather than teniſmes, and veniſmes, thoughe theſe latter be more vſed.

Nat onely ſuche verbes as haue N/ before S/ in their firſt perſon ſynguler haue D/ byfore rent, in their thyrde perſon plurell/ but alſo all indiffynytes comynge of preſentes endyng in yngs, bycauſe their latyne verbes ende in ingo, as ie fayngs, ie paygns, ie taygns, ie refraygns, ie playngs, for thoughe their indiffynites be/ ie faignys, ie paignys, ie taygnys, ie refraignys, ie playgnys, their thirde perſons plurell be/ ilz faingdrent, ilz payngdrent, ilz tayngdrent, ilz refrayngdrēt, ilz playngdrent, in whiche I fynde the G/ ofte tymes left out/as ilz fayndrent &c.

¶ Annotacyons vpon the fyrſte or the tenne generall rules.

I Fynde ſome firſt perſons ſynguler of the preſent tence of the ſubiunctyue mode whiche ende in ſe, and they be moche to be noted/ for the formacyon of their indiffynytes of this mode/ as ſhall apere in my annotacions vpon the ſeuenth of theſe tenne generall rules next immedyately folowynge.

Preſentes that ende in ſe, ſo ferforthe as I haue yet noted be theſe/ que ie cloſe, que ie deſcomfiſe, que ie ennuyſe, que ie gvſe, que ie induyſe, que ie inſtruyſe, que ie introduiſe, que ie yſſe, que ie lyſe, que ie occiſe, que ie reluiſe, que ie reduiſe, que ie raiſe, que ie ſuffiſe, que ie tayſe, que ie touſe.

But where as I fynde in Mayne Chartier in his Hoſpitall/ que ie acquierge, for que ie acquiere, he hath ſo done for his ryme/ whyche we ſhall nat folowe/ luy preſentant vng ardant cierge, affin que ſa grace acquierge, and note that I fynde in ſome verbes two dyuerſe wordes for this tence/ as que ie die, que ie diſſe, que ie tonde, que ie tonſe.

¶ Annotacyons vpon the ſeuenth of theſe tenne generall rules.

Here as the generall rule whiche I haue gyuen in the ſeconde
W boke/ is to forme the indiffynite ſubiunctyue out of the indiffynyte indycatyue/ by addyng of Se, ſes, T, ſions, ſiez, ſent. If the preſent ſubiunctyue ende in ſe, as I haue noted in the fyrſte annotacyons here next byfore/ than this indiffynite ſubiunctyue ſhall be formed out of him by chaungyng of ſe, in to iſſe, as que ie cloſiſſe, que ie diſcomfiſiſſe, que ie ennuyſiſſe, que ie gyſiſſe, que ie induyſiſſe, que ie inſtruiſiſſe, que ie introduiſiſſe, que ie yſſiſſe, que ie lyſiſſe, que ie occiſiſſe que ie reluiſiſſe, que ie reduiſiſſe, que ie raſiſſe, que ie ſuffiſiſſe, que ie taiſiſſe, que ie tonſiſſe. Wherby they moche differ from their indiffynites indycatyue/ but generall it is alſo vnto theſe indiffynites to forme all their other perſons out of their firſt/ all after one lyke maner/ as ie cloſiſſe, tu cloſiſſes, il cloſiſt, nous cloſiſſions, vous cloſiſſiez, ilz cloſiſſēt, and ſo of all other: and therfore bycauſe that ie dis, and ie tonde, haue a double preſent ſubiunctyue/ therfore they haue a double indiffynite ſubiunctyue/ as of que ie diſſe, preſent ſubiunctyue is formed/ que ie diſiſſe, & of ie dys, indiffynite indycatyue is formed/ que ie dyſſe, and ſo of que ie tonſe, que ie tonſiſſe, and of ie tondys, indiffynyte/ que ie tondiſſe, and he hath alſo que ie tonde. And by lyke reaſon bycauſe/ ie ramenteue, hath two indiffynites indycatyue that is/ ie ramentus, and ie ramenteuay, he hath alſo two indiffynites ſubiunctyue/ que ie ramentuſſe, and que ie ramenteuaſſe, alſo verbes that haue L/ in their theme/ make their ſubiunctyue indiffynite contrary to ỹ generall rules/ as ie vueil, maketh voulſyſſe, and by lyke reaſon imparſonais ỹ haue L/ as il ne men chault, il me fault, make/ quil ne men chaulſiſt, quil me faulſiſt, though they make/ quil ne men chaille, quil me faille, but of this thyng I ſhall herafter ſpeke whan I come to the verbes imparſonalles.

¶ Annota-

¶ Annotacyons vpon the eyght of the tenne generall rules.

Here as I sayd in the seconde booke that the seconde person
W present of the imperatyue mode was for the moste parte lyke vnto the person present of the indycatyue/ that I fynde in maner euer to be trewe/ saue that if the seconde parson of the present indycatyue haue a vowell afore s, outher a lone or in a dyphthonge/ they vse euer in the imperatyue to put the s, a waye/ as bycause they say/ tu vas, tu dis, tu fays, tu voys, tu boys, they say in the imperatyue va, dy, fay, voy, boy, but if the sayd person indycatyue ende in a consonant/ though for the moste parte they euer leaue out s, to sayeng/ preu, reu, sort, met, yet I fynde them also with s, as preus, reus, sorts, mets, but howe suis, is out of rule I haue shewed in ỹ seconde boke/ for his seconde person present indycatyue is es, and that his imperatyue is suis, apereth in ỹ epystle of Penelope: Seul a toy suys ayes ensouuenir.

¶ Annotacyons vpon the tenth and laste of these generall rules.

Not onely the infynitiue present of this coniugacion is vncertayne/ but also I note certayne verbes whiche haue a double present infynitiue of the whiche the one is ancyent/ and was in vse vnto Alayne Chartiers tyme/ whiche I wyll in order first reherce/ and that whiche is nowe in vse I wyll reherce laste in order/ ardoyr, ardre, remanoyr, remayndre, touldre, tollyr, benoystre, benyr, queire, queryr, conquerre, conquerir, acquerre, acquerir, cousdre, cousyr, cremyr, crayndre, comparoyr, comparer, remouuoyr, remuer, but for them I fynde two dyuerse themes/ ie remouue, and ie remue, as courre, for courryr, is fygurate.

¶ Annotacyons vpon the thyrde rule after the coniugatyng of ie fays, after the.x. generall rules.

These thre coniugacions in the frenche tonge be nat so vtterly distyncte amongest them selfe/ but that I fynde/ accordyng as I haue afore noted in the annotacyons vpon the coniugacyon of ie conuertys, certayne verbes that in Alayne Chartiers tyme were of the first coniugacion/ whiche nowe be vsed of all writers of the seconde/ and some I fynde bothe of the first and thyrde coniugacions/

as ie raſe, ie rays, and ie confonde, and ie confons, ie cloſe, and ie clos, but theſe verbes of ỹ firſt cõiugacion be but vſed of Johan de Meune and nowe out of vſe: and howe ie rays, ie confons, and ie clos, be conſugate I ſhewe ſuffycyently in the table of verbes/ in I ſhaue/ I confounde/ I ſhytte/ and I cloſe.

And ſome verbes I fynde whiche in their theme be of the thyrde conſugacion/ but their partyciple preterite and all the tenſes circumlocute by hym/ſeme to be of the firſt conſugacion/ as ie accors, iay accorde, ie rys, ie meſmes rye, and one I fynde in his theme of the fyrſt cõiugacion and in his partyciple preterit of the thyrde/ as ie compere, I a bye/ iay comparu, to differ from iay compare, of ie compare, I compare. And as for ie coeuure, for ie couuers, and ie apparoys, for ie appars, and ie deduiſe, for ie de duis, I fynde them vſed onely of Johan de Meune/ and as for ie conqueſte, and ie conquiers, be of diſtyncte ſignyfycacion.

As for ie mangeue, whoſe conſugacion I haue touched in ỹ ſeconde boke in this place/ is thus cõiugate indiffynite preſent/ ie mange, and ie mangeue, imparfyte/ ie mengeoye, ie mengeus, and ie mengeay, iay mange, iauoye menge, ie mãgeray, mange, que ie mange, or que ie mangeue, que ie mangeuſſe, or que ie mangeaſſe, manger. And in his declynacion perſonall he foloweth the exemple of ie ayme, ſauyng that in his preſent indycatyue I fynde/ ilz mãgeuſſent, where he ſhulde make ilz mangent, or ilz mangeuent, after the exemple of ie ayme, and where as he is wrytten in ỹ ſayd ſeconde boke with E/ as ie menge, he muſte be wrytten with A/ for he cometh of manduco.

Annotacyons vpon the fourth rule.

Here as I noted no mo defectyues in the ſeconde boke/ but ie
W ſeulx, and ie enſeuelys, I haue noted ſythe/ ie remayns, whiche wanteth his preterite partyciple and all his tenſes formed by hym/ and ie pays, of him ſelfe/ neyther indiffynite tence nor tence that is circumlocute with his partyciple preterit/ ſaue that he borowyth theſe tenſes of his compounde/ ie repays, and ie reluis, wanteth alſo his partyciple preterit/ howbe it ſomtyme I fynde iay reluy. I fynde alſo poſe, and poſons, for put ỹ caſe or ſuppoſe a thyng to be by waye of conſugacion/ and prens, whan he is of that ſignyfycacion hath no more but prennez, and prennons.

But where as Johan le Mayre ſaythe in the fyrſt boke of his illuſtracyons: Neant moyns puis quil a pleu a ſi haultes dames ſubir ton iugement, and after in the ſame boke/ Couraige de meritrice polu dung legier pro-

legier promettre, vsyng ſubyr, whiche cometh of ſubeo, & polu, whiche cometh of polluo, theſe verbes be nat as yet admytted in the comen ſpeche of the frenche tonge.

And note that I fynde in Johan le Mayre/ cõment ilz conſacrent et enſeueliſſent leur mors auec leur feſtes, as thoughe enſeueliſſent, were the thyrde perſon plurell of the preſent indycatyue/ but as for any of the other perſones/ I haue nat yet redde.

¶ Annotacyons vpon the fyfte rule.

I fynde nat onely/ ie pleure, ie demeure, and ie treuue, ie preuue ie appreuue, ie meurs, ie mourray, whiche in their meane ſyllable change E/ of their theme in to O/ and ie appers, whiche chaugeth E/ in to A/ but alſo dyuerſe other chaũgynges I fynde from one vowell in to an other/ as I haue noted here afore in this thyrde boke/ in the latter ende of my annotacyons vpon the firſt rule/ after the conjugacion of ie conuertys. And farthermore ie compere, turneth E/ in to A/ as iay comparu, comparoyr, & ie viens, maketh venoye, viens, ie ſuis venu, venir, ie me peyne, ie me ſuis pene, ie croy, ie creus, and ie mets, maketh ie meys, and que ie meyſſe, and ie fays, ie feys, and que ie feiſſe.

And note that a generall thynge it was in Alayne Chartiers tyme to wryte the themes and infynitye modes of ſuche verbes as nowe ende in che, ge, or ſſe, as ie arrache, ie abrege, ie adreſſe, with an I/ as ie arrachie arrachier, ie abregie abregier, ie adreſſie adreſſier, but in this thyng Alayne Chartier at theſe dayes is nat folowed.

And howe Syncopa & Apocope be moche vſed in verbes/ eſpecially of ſuche auctours as wryte in ryme/ I haue alſo declared vpon the ſayd firſt rule in this thirde boke. Exemple of Syncopa. Amenront donront, pardonront, and ſo demourroyt, larroyt, layna, bauldray, bailleray, retourna, voirra, for ameneront, donneront, pardonneront, vouldra. Exemple of Apocope. Los, for loſe, doy, for doybs, but indifynytes endyng in is, leſe oftentymes their s, in tymes/ as pardy, vy, dy, and ſuche lyke/ for pardis, vis, dys.

¶ Annotacyons vpon the ſyxte rule concernyng the conjugatyng of ie vueil, or ie veulx.

Where as Alayne Chartier often tymes/ and Johan le Mayre in his ſeconde epyſtle of the Lamant vert/ vſeth voult, in the thyrde perſon ſynguler of ie voulus, the indifynyte indycatyue/ as qui iadis veult manger, Andromeda, they vſe voult, fyguratly by Syn-

by Syncopa for volut.

And in the ſubiunctyue mode I fynde ofte tyme/ que ie vouluſſe, but voulſyſſe, is moze to be vſed.

Annotacyons vpon the ſeuenth rule/ alſo concernyng the contugatyng of ie puis.

Thoughe tu puis, be moſte comenly vſed in the ſeconde perſon pzeſent indycatyue/ yet I fynde in Johñ le Mayze/ que peulx tu auoyr raporte &c. and for ilz peuuent, the thyzde perſon plurell of the ſame tence/ Johan le Mayze in his thirde boke/ ilz peuſſent, whyche I wolde nat vſe.

And where as I ſayd in the ſeconde boke ỹ the pzeſent ſubiunctyue of this mode wanteth/ I haue ſythe noted that they vſe the pzeſent tence of this mode lyke vnto the indiffynite tence of the ſame mode/ as que ie puiſſe, that I maye/ and que ie puiſſe, that I myght/ as the ſentence dothe requyze.

Annotacyons vpon the ſeuenth rule.

What ſo euer chaungyng there be in the meane ſyllables of any frenche verbes outher from one vowell in to an other/ oz addyng oz dymynyſſhyng of any maner letters/ yet the firſt letter of the theme of a verbe is kept thozoughout all his cõugacion/ whether the verbe begyn with a vowell oz with a conſonant/ except onely ie ay, and ie men vas, and therfoze where Johan le Mayze ſayeth/ iay auſe, of ie oſe, he dothe ſo moche folowe the latyn wozde audeo, that he remembzeth nat this generall rule of the tonge/ whyche is a great and ſpecyall ſtaye foz the tonge to be come by.

Annotacyons vpon the eyght rule after the contugatyng of ie ay.

That onely ỹ frenche tonge hath no mo ſoztes of verbes but only actyue/ paſſyue/ oz meane/ ſo ỹ verbes deponentes oz comens they haue none noz neuters nouther/ except we wyll call ſuche verbes in the frenche tonge meanes as the latynes call newters/ but alſo they knowe neyther frequentatyues noz inchoatyues noz no ſuche ſoztes of verbes/ ſauyng ỹ whan they wyll expzeſſe an acte to be in begynnyng they vſe the tenſes of ie vas, and the infynitiue mode of ỹ verbe whoſe acte dothe begyn/ as I begyn to dzinke to you/ ie vas boyre a vous, he

vous, he begynneth to dye or he is at the poynte to dye / il va mourir. Note that at all tymes whan ỳ tenſes of ie vas, is ioyned to an infynitiue/that he dothe betoken inchoacion/for many tymes ie vas, hath his owne ſignyfycacion/as Johan le Mayre in the firſt epyſtle of the Lamant vert/ elle va veoir la noble Germanie, whiche is nat/ ihe begynneth to ſe/but ſhe goeth to ſe.

Alſo in theſe verbes/ ie me dueils, ie me iouys, ie vis, and ſuche lyke/ they vſe to take ỳ ſubſtantyue and the tenſes of ie mayne, as ie mayne dueil, ie mayne ioye, ie mayne vie, and ſuche lyke/ I ſomtyme I fynde ſuche cyrcumlocution vſed of ſuche as wryte in ryme onely to ſupply the quantyte of ſuche ſyllables/et mayne tel grondellemẽt, for et grondelle tellement, alſo whan the frenche tonge wanteth a verbe proprye they expreſſe the acte by the ſubſtantyue/ and ie mayne, as for I rule/ ie mayne ruſterie, I make a noyſe / ie mayne bruit, for they haue no ſuche verbes/as ie ruſtrie, or ie bruyte.

¶ Annotacyons vpon the ſeuenth accydent.

Thoughe I haue chefely gyuen exemple of verbes compounde with en, as enterrer, ennuier, yet there is a great nombre of verbes in this tonge formed out of their ſubſtantyues/ as of ancre, ancrer, aulne, aulner, and ſo of many other/ whyche may beſt apere in the frenche vocabuler.

¶ Annotacyons vpon the eyght accydent.

As for compoſycion of verbes with prepoſycions I ſhall differ to ſpeke tyll I come to ỳ thyrde accydent of prepoſycions.

¶ Annotacyons vpon the nynth accident/and firſt to knowe whan we ſhall vſe this ſyllabycall adiectyon en.

When a verbe indycatyue alone or with an infynytiue mode after hym maketh a parfyte ſentence/than for a more affyrmacyon of the dede they vſe to adde en, next byfore the verbe/nat that of neceſſyte en, muſt euer in all ſuche ſentences be expreſſed: but it lyeth in the choyſe of an accuſtomed eare to vſe en, or leaue hym out as he ſhall thynke good. So that of ſuche auctours as wryte in ryme I fynde hym more vſed than in comen ſpeche/ rather to ſupplye their iuſte ſyllables than for any neceſſyte. And yet I note that Johan de Meun and

Meun̄ Alayne Chartier vſe en, moze oftenner than ſuche as wzite aboute this tyme. But ſome thynge to inſtructe ſuche as be lerners howe they ſhulde vſe en.

If the verbe in the ſentence be a meane verbe and haue his theme/ that is to ſay/ his pzeſent indycatyue begynnyng with a vowell/ co⸗menly they put en, bytwene the accuſatyue/ pzonowne/ and ỹ verbe/ as ie men eſbahys, tu tabuſes, oz tu ten abuſes, il ſen orgueillit.

But of all meane verbes I note chefely/ ie men vas, and ie men fuys, whiche foz the moſte parte haue euer en, byfoze them/ though they be⸗gyn nat with a vowell/ and in their pzeterit tenſes they double en, as il ſen eſt en allé, il ſen eſt en fouy.

Wherfoze ſythe I can in this thyng ſhewe no rule vtterly certayne bycauſe the thyng reſteth/ as I haue ſayd/ vpon the iudgement of an accuſtomed eare/ yet I ſhall here declare certayne thynges/ wherby tye lerner maye the better marke ſuche auctours as he ſhall rede/ to come to a moze parfyte knowledge herin/ foz the moſte parte/ though the auctour wzite in ryme/ the verbe whiche hath en, byfoze him/ hath a pzonowne pzimatyue comyng next byfoze en, outher as his nomy⸗natyue caſe oz accuſatyue caſe/ and ſeldome of his oblique caſe.

ℂ Exemple of nomynatyues.

℣ Ien doybs bien auoyr pytié, tandis que tu en as le loyſyr, il en doybt moyns eſtre eſmayé, elle en auoyt tel dueil au cueur, Nous en ſommes trop empeſchez, vous en aurez pour vng denier troys, ilz en vauldront du mieulx.

ℂ Exemple of accuſatyues.

℣ Sy men allay ſeul eſcouſtant, tu ten vas de moy eſloygnant, quant nul ne ſen peult prendre garde, lors luy en bailla il ſa foy.

So that all be it as I haue ſayd/ that ſuche as wzite in ryme vſe en, moze oftener than ſuche as wzite after the comen ſpeche/ yet I note that foz the moſt parte there cometh a pzonowne pzimatiue byfoze en, outher expzeſſed oz vnderſtande/ as Sy en puis bien trouuer garrant, lors men allay par my la prée, Sy en eut tel dueil et tel yre. But yet ſom⸗tyme I fynde en, vſed whan the verbe is ſubiunctyue oz hath ſome ſubſtantyue to his nomynatyue caſe/ as nul neſt ſi ioyeux ne ſe haytie, S'il ne la veiſt qui nen euſt pitié, Sa douleur en doybt eſtre moyndre. So that by this laſte exemple may appere/ that en, may be vſed byfoze the verbe whan he is negatyue / and thus foz vncertaynte in the thynges

ſelfe am I compelled to remytte the lerner to obſeruacion in redynge of auctours.

¶ To knowe whan we ſhall vſe pas, poynt, or mye.

WHan the ſentence is negatyue in our tonge/ that is to ſaye that the verbe hath nat after hym/ as I wyll nat/ I ſe nat/ I wotte nat whyther to go/ and all ſuche lyke: the frenche tonge remoueth the negacion and putteth hym byfore the verbe/ and immedyately after the verbe putteth pas, poynt, or mye, eſpecially if the verbe be indycatyue/ and the laſte worde in the ſentence. So that pas, poynt, or mye, be vſed for a more clere expreſſyng of negacion/ and as though the ſpeker wolde byde by ẏ thyng whyche he denyeth: in ſo moche that if ẏ ſpeker do but fayntly denye a thyng/ they vſe than to leaue out pas, poynt, or mye.

¶ Exemple.

¶ Ie neſcay, ie neſcay pas, ſe ne le puis voyr, ie ne le puys pas voyr, Sil ne la faict ie vous donneray vng eſcu, ſil ne la pas faict ie vous donneray vng eſcu.

But herin alſo is requyred a farther iudgement than can be gyuen by any rule/ onely this is moſte ſuer to be folowed if the ſentence be negatyue and the verbe indycatyue/ to vſe pas, poynt, or mye, whyche pas, and poynt, be ryght frenche wordes/ and mye, a romant worde/ and nat to be vſed of a lerner.

And here is to be remembred ẏ often tymes the frenche tonge vſeth ne, byfore their verbes whan we vſe nat/ byfore our verbes/ in the ſame ſentẽce whyche cometh by reaſon of iamays, onques, riens, plus, moyns, or ſome ſuche worde folowynge the verbe/ as I ſhall more playnly declare vpon the firſt rule of accydentes perſyculer belongynge vnto aduerbes.

Here is alſo to be noted that whan we aſke a queſtyon in our tonge whyche we doute nat but the anſwerer muſte confeſſe/ bycauſe we knowe our ſelfe it is ſo in dede/ in ſuche queſtyons thoughe we adde nat/ byfore our verbes: as dyd I nat tell you/ lo is he nat hurte nowe/ dyd nat I ſe the there yeſterdaye. In ſuche queſtyons ẏ frenche tonge dothe nat vſe to put ne, byfore their verbes/ but yet they adde pas, or poynt, after the verbe/ ſayeng: vous dis ie pas, agardez eſt il pas bleſſé mayntenãt, te vis ie pas la hyer. But if we aſke one a queſtyon whyche he hym

he hym ſelfe ſhewed vs/and haue no farther knowlege but his owne repoꝛte/ in ſuche queſtyons we vſe nat to put/nat/ byfoꝛe ꝟ verbe/ but yet in frenche they haue pas, oꝛ poynt, after the verbe.

¶ Exemple.

¶ Can he playe theſe pagentes well / Sayt il pas bien faire ces tours, hath he made you good chere than? vous a il faict bonne chiere donc. But in the frenche tonge vnto theſe two dyuerſe queſtyons they haue dyuerſe maners to anſwere/foꝛ to the firſt they anſwere/ ſy fiſtes, ſi eſt, oꝛ ſuche lyke: and to the other they anſwere ouy, playnely/and alſo I note this maner of demaundyng a queſtyon: you haue ſolde the aſſe haue you nat? vous auez vendu lauſne aues pas, but foꝛ queſtyons demaunded to knowe the thyng they be vtterly ingnoꝛante in/ there is no dyuerſyte in woꝛdes bytwene our tonge and theirs/ as where is the kyng/ ou eſt le roy, haſte thou made my bedde yet? as tu fayct mon lict encore, but as foꝛ vous parles ſans poynt ceſſer, & ſuche lyke/ there poynt, is vſed bycauſe ſans, contayneth in hym in maner a negacion/ but herof I haue ſpoken afoꝛe in the pꝛonowne/and oft tymes foꝛ denyeng/ they vſe poynt poynt, alone referryng it to the mater in queſtyon afoꝛe.

¶ Annotacyons vpon the chapiter whiche begynneth of the meane verbes

Where as I foꝛtuned to haue comunycacion concernynge the nature of theſe verbes/ whiche I haue called meane verbes with mayſter Gyles/ whoſe iudgemẽt (concernyng ꝟ frenche tonge) I can nat to moche pꝛayſe: he affyꝛmed ꝟ the vſyng of a verbe ſo as I do meanes/that is to ſay whan we double the pꝛonownes byfoꝛe them/ than dothe the verbe betoken a begynnyng oꝛ a towardeneſſe to do the acte that he ſignyfyeth/and that ſame verbe vſed in all thynges lyke an actyue/ ſignyfyeth the acte pꝛeſently oꝛ foꝛthwith to be in doyng. And foꝛ exemple he gaue me/ Ie vas, and ie men vas, il va, and il ſen va, of whiche he ſayd/ ie vas, is I go nowe actually in dede/ ie men vas, I ſhape me to go oꝛ am at the poynte to go/ il va, he goeth nowe actually/ il ſen va, he ſhapeth him oꝛ he is at the poynte to go. So that by his mynde I gather that ie meurs, ſignyfyeth I dye nowe foꝛthwith/ ie me meurs, I am a paſſyng oꝛ aboute the poynte to dye/ ie fuys, I flye nowe pꝛeſently/ ie men fuys, I ſhape me oꝛ pꝛepare me to flye. Whiche thynge on douted is moche requiſyte to be conſyderd to

dred/ to come to the vtter and parfyte knowledge howe to vſe ſuche verbes in this tonge/as I haue named meane verbes.

I note alſo for the further knowlege howe to vſe a verbe in ỹ frẽche tonge lyke a meane verbe/ that whan ſo euer we vſe a verbe with vs lyke a verbe paſſyue/ where as in dede the nompnatyue caſe whiche ſhulde ſuffer/ is a thynge that can nat ſuffre bycauſe it is nat lyuynge/ nor hath in effecte none acte without forthe done vnto it atall ſayyng that we to fynde mater to comen of that thyng deuyſe ſuche actes to be done vnto it/in all ſuche ſpekyng vſe they their verbe lyke a meane verbe doublyng the pronowne byfore hym for the firſt and ſeconde perſons/as ie me, tu te &c. and vſyng ſe, in the thyrde perſons to declare reciprocacion.

¶ Exemples of this rule.

¶ Where as clerkes ſaye/ the erthe is deuyded in to thre partes: the Gaulles be deuyded in to thre partes. Nouther ỹ erthe nor the gaulles ſuffre nothyng by this deuyſion makyng/nor in very dede they be none otherwyſe parted than nature hath parted them/ ſauyng ỹ clerkes ymagyn ſuche a deuyſyon the more playnly to diſcryue them and comen of them. Therfore the frenchmen ſay nat/ la terre eſt diuiſée en troys partyes, nor les gaulles ſont diuiſées en troys parties, but la terre ſe deuiſe, and les gaulles ſe deuiſent, whiche thyng yet the more playnly to declare by the more plenty of exemples: for Fraunce was named Gallia/they ſay nat/ la France eſtoyt nommée Gallia, but la France ſe nommoyt, and for there ſhall a great dynner be made to morowe at yelde hall/ they ſaye nat vng grant diſner ſera faict a la mayſon de la ville, but vng grant diſner ſe ſera: and for by chaunce tourned is cauſed a great mutacyon in realmes/ they ſay nat/ par chance tournée eſt faicte vne grande mutation en royalmes, but par chance tournée ſe faict, and for whan her beaulty is repreſented vnto my memorye/they ſaye nat/ quant ſa beauté eſt repreſentée, but ſe repreſente, and by lyke maner ſay they for I am named Johan/ I am called Johan/ ie me nõme Iehan, ie mappelle Iehan, bycauſe the acte of callynge or namyng reſeth vpon my ſelfe/ and of none outwarde perſon wherby I ſuffre/ but where as I fynde/for that is to be vnderſtãde/ cela ſentent, ſuche kynde of ſpekyng fynde I onely in this ſentence.

¶ Annotacions vpon the conjugatyng of ie men ſuys.

Here as Johan le Mayre writeth the indiffynite inducatyue
W ie men fouys, I do nat alowe that orthographye/ for ie fouys, fignyfyeth I dygge/ and cometh out of fodio, where ie men fuys, cometh out of fugio, except Johan le Mayre dyd it to make a difference betwene the preſent and ỹ indiffynite/ but as I haue afore declared it is none inconuenyent ỹ they be lyke in their firſt perſons.

¶ Annotacyons vpon the ſeconde rule after the conuugatyng of ie men fuys.

THough a verbe be neuer ſo moche actyue/yet if the frenchmen vſe hym lyke a meane than dothe he circumlocute his preſent tenſes with the tenſes of ie ſuis, and his partyciple.

¶ Exemple of the auctorite of Johan le Mayre in his firſt booke. Capitulo. xxv.

¶ Mon rude concepuoyr ſeſt eſclercy, mon gros entendemẽt ſe eſt ouuert et mes organes ſe ſont ampliez comme pour receuoyr vng don ſupernaturel.

¶ Annotacyons vpon the conius gatynge of ie men vas.

FOr the vſe and conuugatynge of Ie men vas, it is nat onely requiſyte to note what I haue ſayd here a lytell afore vpon the chapiter of meane verbes/ but alſo what I haue ſayd in this thyrde boke vpon the eyght rule after ỹ conuugatyng of Ie ay, for as I haue there all redy ſayd/ where the frenche tonge hath no verbes inchoatiues/ they vſe to circumlocut inchoation with the tenſes of ie vas, and nat onely that/ but ſuche as wryte in ryme vſe ỹ tenſes of ie vas, with the actyue partyciple of a verbe for ỹ verbes ſelfe onely/ as que vous yroye deuiſant, for que vous deuiſeroye, Amours va ſes plaiſirs doublãt, for amours double ſes playſirs, et vont chantans a voix iolye, que bien leur pert de leur folye, for et chantent &c. and many ſuche lyke ſentences be vſed of all ſuche auctours as wryte in ryme.

I note alſo ſuche circumlocutyng of verbes/ with Ie mayne, and the ſubſtantyues of lyke ſignyfycacion for the verbes ſelfe/ as ie mayne dueil, for Ie me dueils, ie mayne ioye, for ie me reſiouys, et mayne tel grondellement, for et grondelle tellement.

I fynde alſo in Mayne Chartier & in Johan le Mayre/ quil voyſt, in the thyrde perſon ſynguler of the indiffynite ſubiunctyue/ as in the ende of

ende of the ſeconde epyſtle de Lamant vert / Et que flora qui de tous biens eſt playne voyſt tapiſſant de flourettes meſlees, whiche woꝛde though it may be vſed by their auctoꝛite I do nat remembꝛe me that I haue redde/ que ie voyſſe que tu voiſſes, but que ie allaſſe, tu allaſſes. and here he vſeth voyſt tapiſſant, foꝛ tapiſſaſt, by circumlocucion/as I haue here afoꝛe ſayd. Note alſo that this verbe hath a double impeꝛatyue/ foꝛ they ſay que ie aille, and que ie voyſe.

¶ Annotacyons vpon the coniugatynge of ie ſuis.

NOte euer whan we vſe/ I am/ the frēche tonge vſeth ie ſuis, foꝛ whan ſo euer we adde any of theſe woꝛdes after/ I am aſhamed/ a frayed/ a hungerde/ a thurſt/ oꝛ any ſuche paſſyon wherby the mynde oꝛ body dothe ſuffer/ they vſe the tēſes of ie ay, and ỹ ſubſtantyue betokenyng ỹ ſame paſſion/ though they ſeme in our tonge to be participles paſſyue/ as iay honte, iay paour, iay fayn, iay foyſ, but the certaynte of this thyng ſhall moꝛe playnly apere in ỹ table of verbes. And where as they vſe to ſay foꝛ/ there is/ il ya, & foꝛ/ it is good/ il fait bon, & ſuche lyke/ this thyng ſhall moꝛe playnly herafter apere whan I ſpeke of verbes imparſonals/ but ſpecially in ỹ table of verbes.

¶ Annotacyons vpon the thyꝛde rule after the verbe paſſyue.

WHere as it mygbt ſeme by my ſayenges in the ſeconde boke in this place that all infynitynes actyue maye haue the paſſyue ſignyfycacion I fynde the infynitynes actyue vſed foꝛ ỹ infynitynue paſſyue but onely after theſe thꝛe verbes in the frenche tonge/ ie ſuis, ie puis, and ie fays.

¶ Exemple of ie ſuis.

¶ Foꝛ it is to be noted/ they ſaye nat/ il eſt a eſtre noté, but il eſt a noter, and foꝛ it is to be doubted/ il eſt a doubter. But foꝛ bycauſe that il fayt, in this ſence betokeneth it is/ I ſhall gyue mo exemples herafter folowyng.

¶ Exemple of ie puis.

¶ And than the great nombꝛe of people whiche may be founde there/ et puis le grant nombre de peuple qui ſe y peult touuer, that may be vnderſtande two wayes/ cela ſe peult entendre par deux manieres.

¶ Exemple of ie fays.

¶ Ie fays, ſignyfyeth in the frenche tonge/ I cauſe/ I let/ I make/ and I am/ and in euery of theſe ſignyfycacions do the frenche men foꝛ an infynityue paſſyue in our tonge/ vſe an infynityue actyue: as foꝛ I cauſe my ſelfe to be named oꝛ to be called/ they ſay/ Ie me fays nommer, ie me fays appeller, I haue cauſed oꝛ let a caſteil to be made/ Iay faict faire vng chaſteau, I make oꝛ cauſe me to be knowen of them/ Ie me fays cognoiſtre a eulx, I make oꝛ cauſe me to be feared of them/ Ie me fays crayndre a eulx, and it is to be conſydꝛed/ et faict a conſidrer, It was to be douted/ il faſoyt a doubter. And this kynde of ſpekyng is moche vſed in this tonge/ I fynde alſo the infynityue mode vſed ſomtyme foꝛ the potenciall/ as car ayns que me abaundonner a diuulger le ſecret de noꝛ amours, whiche is in englyſſhe: oꝛ euer I wolde applye my ſelfe to publyſſhe the ſecret of our loue.

¶ Annotacyons vpon the firſt rule after the chapiter of verbes impaꝛſonalles.

Where as at ỹ wꝛityng of my ſeconde boke I noted but only eyght verbes impaꝛſonalles to be of the firſt coniugacion that is to ſay/ coniugate lyke the thyꝛde perſons ſynguler of ie ayme, of whiche I haue made mencion in ỹ ſayd rule/ I haue ſythe noted alſo il annuicte, it waxeth nyght/ and il aiourne, it waxeth daye.

And foꝛ/ it is/ in our tonge/ accoꝛdynge as I haue touched in this ſelfe rule there/ they haue nat onely il eſt, but alſo il fait, and il a, foꝛ the vſe wherof it is to be noted.

Whan the ſentence falleth ſo with vs ỹ we vſe it is byfoꝛe theſe impꝛeſſyons of the eyer/ hote/ colde/ fayꝛe/ foule/ clere/ darke/ louryng/ bꝛight/ meanyng that the wether is ſuche: in all ſuche ſentences they vſe nat il eſt, but il fayt, as il fait chault, il fait froyt, il fait beau, il fait ort oꝛ layt, il fait cler, il fait obſcur, il fayt brun oꝛ ſombre, and than if we adde in any ſuche ſentence wether oꝛ ſeaſon/ they put in their ſtede temps, as foꝛ it is a fayꝛe wether oꝛ a fayꝛe ſeaſon/ Il fait vng beau temps.

Alſo whan ſo euer we vſe/ it is/ byfoꝛe an adiectyue/ as good/ yll/ pleaſaunt/ daungerous/ oꝛ ſuche lyke/ and than adde an infynityue mode with his ſigne/ to/ as it is good to dꝛinke erly foꝛ the myſt/ they vſe nat il eſt, but il fait, as il fait bon boyre au matyn pour le brouyllas.

But if we adde nat an infynityue mode after ſuche adiectyues/ than they vſe/ il eſt, oꝛ ceſt, as foꝛ it is good ynoughe foꝛ me/ they ſay: il eſt

bon aſſes

bon asses pour moy, and for it is well sayde/ ceste bien dit. But for the vse of il, and ce, I haue afore spoken in the pronowne.

And furthermore if we vse/ it is/ before an indyfynitiue passyue with his signe/ to/ than ŷ frenchmen vse indifferently/ il fayt, il est, as for it is to be noted/ it is to be consydered and suche lyke/ they saye/ il fait a noter, or il est a noter, il fait a cõsiderer, or il est a considerer, but in suche spekynges it is more suer to vse/ il fait.

And howe that il fait, hath dyuerse other signyfycations/ as il me fait grant bien, it dothe me great good/ il me fait mal, it greueth me/ and dyuerse mo that shall also apere in the table of verbes.

Also as I haue in the seconde boke touched in this place/ whan the sentẽce falleth so that we vse/ there is/ as in this sentence: there is one at the dooze/ in all suche speking/ for there is/ they vse il ya.

And note that il fait, and il ya, may be declyned thorowe all their tenses lyke imparsonalles.

But where as I fynde in Johan le Mayze and other these rules somtyme broken/ as ayncoys quand ie seroye tellement deliberé, il nest homme au iourdhuy viuant, for il nya, and il nest au monde si bon lapidaire, for il nya au monde si bon lapidaire, and il nest riens plus certayn, for il nya riens plus certayn, the moste suer way is to folowe my rule for a begynner.

Also it is to be noted that dyuerse tymes the frenche auctours leaue out il, & somtyme y, as Na pas trop longe temps que dame Venus &c. En celle cyté auoyt pour lors vng temple.

Also I fynde dyuerse verbes parsonalles/ whiche somtyme be vsed as imparsonalles/ lyke as it happeneth in latyn/ as la ou il ne repaire que des bestes, il me vient au deuant, il me vient en souuenance.

¶ Annotacyons vpon the coniugatyng of il fault, and il ne men chaut.

These two imparsonalles haue for their indiffynite potencially quil faulsist, or quil falust, and quil ne men chaulsist, and il ne men chaillist.

¶ Annotacyons vpon the fourthe rule.

Where as I sayd in this fourthe rule in the seconde boke that I founde il affiert, vsed in his present indycatyue onely/ I haue

noted ỳthe in Johñ le Mayre/ il affeoyt, and il afferoyt, and affeans, but of the partycyples/ I ſhall ſpeke herafter.

¶ Annotacyons vpon the ſeuenth rule.

WHere as I ſeme to ſaye that there is no verbe impꝛſonall vſed as a meane verbe/ that is to be vnderſtande ỳ I note no meane verbe vſed as an impꝛſonal/ but for their thirde perſons may verbes folowe the declynyng of meane verbes/ as il me poyſe, il me tarde, il me tenne, il me vacque, and dyuerſe other/ whiche ſhall apere in their places in the table of verbes here conſequently folowyng.

¶ Here endeth the annotacyons of the verbe/ and herafter folowyth the table.

Annotacyons vpon

¶ Annotacyons vpon the Partycyple.

Regula prima,

THe same worde in our tonge whiche endeth in ynge/maye with vs bothe be a substantyue and also our present partyciple/ onely the vse and sence muste shewe the difference: as in these two sentenses. I founde hym speakynge with her: and we wyll to morowe haue a speaking togyther herof/ whyche in frēche may be expressed on this wyse. Ie le trouuay parlant auec elle, and Nous aurons demayn yng parlement de cecy ensemble. In whyche two sentences in our tonge/though we vse this worde/ spekyng/ in the firste as a present partyciple/and in the seconde as a substantyue/the frenche tonge hath two distyncte wordes as here afore apereth/ that is to saye/ parlant, their present partyciple/ and parlement, whyche two wordes maye be formed out of their preter imparfyte tence/ by chaungynge of oye, in to ant, or ement, as of trompoye, trompant, trompement, of conuertissoye, conuertissant, conuertissement, of sentoye, sentant, sentement, and of verbes that haue a double present partyciple I fynde but only ie appars, whyche maketh apparant, and apparissant, bycause they saye bothe apparoye, and apparissoye.

Regula secūda.

¶ If the sentence fall so in our tonge that a prepolycion come byfore our partyciple in ynge/ the frenche men in the same sentence vse nat their partyciple in ant, but their present infynityue. As for he troubleth me with his speakyng to hye. What haue you to do with my speakyng. He was kylled for speakyng of a worde. By sore labouring a man maye get to conyng. No man may lyue without eatyng and drinkyng/ they say: Il me trouble de son trop hault parler. Quen auez vous affayre de mon parler. Il fust tué pour auoyr parlé vng mot. Par fort trauailler peult on attayndre a sciences. Nul ne peult viure sans boyre et manger.

¶ Annotacyon vpon the thyrde accydent belongyng to partyciples in ant.

THoughe the partyciples in ant, serue bothe for masculyn and femynyne substantyues wout any chaungyng/ as in Alayne Chartiers exyle. Et la parolle tremblant et bauboyant. idem. Elle tenoyt vnes tressinglans escourges. idem. Recorde toy des sciences et tu les trouue-

les trouueras accordans. yet ſuche as wzite in ryme obſerue nat euer this rule, Leueſque, in his epyſtels of Ouyde. Ie eſtoye encore pour certayne ignorante du mal que ſeuffre vne fẽme giſante. Where he hath vſed giſante, for giſant, to agre with ignorante, the adiectyue / but this vncertaynte of ỹ partyciple apereth moze playnly by Guyllaume Dalexis en ſon grant blaſon de faulſes amours, ſpeakynge of women. A tous propos, Sans nul repos, Sont demandãtes, Pour tollir los, Pour rongyr los, Treſſort inſtãtes, Mayns rauiſſantes, Riſflantes, Puis tournans le dos, Aynſi que en fables elegantes, Virgile les arpies volantes, Deſcript au tiers de æneidos. where demandantes, rauiſſantes, riſflantes, ⁊ volantes, be vſed in the feminyne termynacion to agre with inſtantes, ⁊ elegantes, where as in comen ſpetche we ſhulde ſaye / demandans, rauiſſans, riſflans, and voulans, for as I haue ſayde / partyciples in ant, haue no feminynes / as apereth in this exemple in tournans le dos.

¶ Annotacyons vpon the fyft accydent belongyng to paſſyue partyciples.

Dowe the paſſyue partyciples ioyned to the tenſes of ie ay, in the conjugacion of verbes actyues do nat alwayes remayne vnchaũged I haue all redy declared in the ſeconde booke in this fyft accydent / but howe theſe paſſyue partyciples muſte ſomtyme agree with the antecedent to the relatyue / or with the pzonowne pzimytyue of the accuſatyue caſe / or with the ſubſtantyue that cometh after the verbe / eſpecially if a pzonowne demonſtratyue or any adiectyue that is nat compared be ioyned to that ſubſtantyue ſhall here moze playnly apere by exemple.

¶ Exemple where the partyciple agreeth with the antecedent to the relatyue and nat with the nomynatyue caſe to the ſences of ie ay.

Alayn Chartier de la douleur que iay ſufferte. Iehan le Maire. Quant elle vit lenfant quelle auoyt fait ſi beau. Leueſque es epiſtes. Douyde. Si te requiers par tes ſecrets dieux, Leſquels tu as portez en tant de lieux. idem. O doulces ſeurs que tant ay regretées. idem. Ne auſſy lamour q̃ tauoye partie, and Voycy vnes bulles q̃ ie tay apportées. But this maner of ſpeakyng is moze to be noted. Ne voys tu pas que Paris a laiſſée, Celle qui eſt a luy tant ſoulacée. And where as the ſame auctour ſayth in the epyſtell of Dydo to Eneas: Mays contre moy trop grant

trop grant hayne as conceu, Et bien deſires que ie ſoye deceu. But for the ſcpyng of ryme he ſhulde ſayd deceue.

¶ Exemple where the partycipie agreeth with the pronowne primytyue of the acculatyue caſe / & nat with the nompnatyue caſe to the tenſes of *ie ay*.

LEueſque, Tu mas vancue mays quoy ieſtoye femme. *idem*. Dido a Eneas. Ie tay receu en ma grande cyte, Helas ie lay aymée bien ſept moys et demy. Iehan le Mayre. Faunus lequel ma ſouuent arrayſonnée damours.

¶ Exemple where the partycipie agreeth with ſome ſubſtantyue that cometh after the verbe hauyng a pronowne detyuatyue or an adiectyue that is nat compared toyned vnto hym.

LEueſque. Si que pour vray ſoing et dueil ſans ſapeaux, Mont amaygri et deſſechees mes peaulx. *idem*. Et quant iay bien ces choſes pourpenſées. *idem*. Et pas nauons ceſte epiſtre traſſée. *idem*. Iay bien tel payne ou plus grande deſſeruie. *idem*. Iay ſon image paynte au vif et pourtraicte. Alayn Chartier. Et puis comme preudhomme la vie luy ay oſtée. *idem*. Il a tantoſt prinſe vne fleſche. So that in this later maner of ſpeakynge I fynde nat the tonge vtterly and thoroughly certayne / eſpecially bycauſe that ſuche as write in ryme vſe their lybertye as maye beſt ſerue for their purpoſe.

¶ And note that two ſubſtantyues ſynguler muſte haue their partyciple plurell / lyke as is vſed in other adiectyues. Iehan le Mayre. Non ſeullement Ytalie et Gaulle furent troublées.

¶ Note alſo that thoughe they vſe conception in their partyciples as they do in their other adiectyues / yet ſuche as write in ryme vſe to agree their partyciples to their nexte ſubſtantyues. Leueſque. Les grans trauaulx et les paynes porter qui iuſtement chaſcun a meritées. toyuyng meritées, to paynes, and nat to trauaulx.

¶ Note alſo that partyciples in this tonge ſerue to make comparacyon / lyke as they do in latyn / and that as theyr actyue partyciples as paſſyue

as paſſyue. As/ Ilz ſont auſſi aymans que vo⁹, Ilz ſont plus aymans que vous, ilz ſont les plus aymans que vo⁹ viſtez iamays. And Il eſt auſſi bien aymé que vous, Il eſt mieulx aymé que vous, Il eſt le mieulx aymé dhommes que vous viſtez iamays.

Here endeth the Partyciple: and hereafter followeth the annotacions vpon the Prepoſycion.

Of ỹbes cõpounde with re.

Vpon the thyrde accydent is to be noted that where re, ſignyfyeth in our tonge agayne he is very moche vſed in this ſence in ỹ compoſycion of verbes. As/ I ſhall neuer ſe hym agayne: Ie ne le verray iamays. He wyll nat come agayne this houre: Il ne reuiendra pas dune heure. I haue lente hym my money and I can nat haue it agayne: Ie luy ay preſté mon argent et ie ne le puis pas rauoyr. So that it ỹverbe begyn with an A/the E/of re, is taken away in compoſycion/ but in other vowelles I fynde it nat to be ſo.

Of ỹbes cõpounde wt entre.

Note alſo that entre, is moche vſed in compoſycion in the frenche tonge/eſpecially of ſuche as dyd wryte afore Alayne Charters tyme. As/for they loue togyther/ They ſe togyther/ They fyght togyther/ they saye: Ilz ſe entreayment, Ilz ſe entreueoyent, Ilz ſe entrebatent, vſynge the verbes compounde with entre, lyke meane verbes.

Annotacyons vpon the fourthe rule folowynge the thyrde accydent.

Of ỹbes cõpounde with des.

We vſe to adde vn/ byfore our verbes in compoſycion/ as I vnarme/ I vndo/ I vnbynde/ the frenche tonge vſeth des, as/ Ie deſarme, Ie deſſays, Ie deſlie. whiche apereth more at lengthe in the table of verbes.

Annotacyons vpon the fyfth accydent.

DE, is alſo added after moult, as/moche payne: Moult de payne and howe de, or du, betokenneth ſome/ as auec du payn, auec du vyn, auec du ſel, auec de leaue, auec de la chayr, and ſuche lyke for with ſome breed or with a courteſye of breed I haue afore declared in the chappter of pronownes.

Note alſo

Whã they vſe to put a,le,or au, byfore the eyr prepoſytyons & to put de, after thẽ.

¶ Note alſo that whan any of theſe prepoſycions/ pres, deuant, deſſus, deſſoubz, entour, encore, or enuiron, ware aduerbes and ſerue to make anſwere to this queſtyon where a dede is done/ than haue they A/and le, put byfore them/and de, put next after them and byfore the place or perſon. As/ Euander fut trouué au pres de Rõme; A celle heure ſe preſenta au deuant de ma penſée, Il dreſſa vne tour au deſſus de Babillone, Il dreſſa vne tour au deſſoubz de Babillone, Semiramis fit des muraylles a lentour de, or autour de Babillone, Elle leua vne groſſe armée pour aller a lencontre de Nineue, Elle planta le ſiege tout a lenuiron de Nineue. And in lyke wyſe whan they come byfore a perſone: as/ Au pres de luy, au pres du geant, au deuant de luy, au deuant du geant, and ſo of the reſydue/ and after this maner be formed dyuers ôther aduerbes: as/ Semiramys dreſſa vne tour au meillieu de Babillone, a vne lieue de Babillone, au long de la reuiere, Ilz courroyent qui mieulx mieulx du long, or au long de la prée. And as for vous me faictez des biens, et vous vſez deuers moy des grans priuaultez, and nous en ferons des aultres. And of Johan le Mayze. Ilz enuoyerent querir du vin dedens des peaulx de chieures. Theſe maners of addyng of de, be to be noted and folowed to vſe the frenche tonge parfetly.

Whã they vſe to put par, byfore theyr prepoſitiõs.

¶ Note alſo that whan any prepoſycion wexeth an aduerbe and betokenneth mouynge to a place/and anſwereth to this queſtyon whyther or mouynge in a place/they vſe to put par, byfore their prepoſycions: as/ Il paſſa par deuant leſgliſe, Il alla par deuers ſon maiſtre, Les cheueulx luy vollettoyent par deſſus les eſpaulles, Pour ſe monſtrer par deuant les princes, Il le frappa parmy la poyctrine, dont les plumes ſont diſparſees par deſſus lherbe.

¶ Note alſo that for the leauyng out of de, I can fynde no generall certayntie ſaue that whan they ſpeake of a ryuer or hyll or foreſt/or ſuche lyke of a countraye. As/ he dwelled nere the great foreſt of yda: He diſcended from the hyghe mountayne of Gordieus/ they ſay nat: Il demouroyt pres la grant foreſt de Yda, or Il deſcendit du hault mont Gordieus, but pres la grant foreſt Yda, du hault mont Gordieus, howe be it I haue nat redde: Il approcha la riuiere Sayne, but la riuiere de Sayne, ſo ỹ dyligent ymytacion muſte only helpe in this behalfe.

Prepoſitiõs may be compayd.

¶ Note alſo that the prepoſycions in this tonge maye be compared as they be in our touge/as for within/ more within/ moſte within/ without/ more without/moſte without/and ſo of the reſydewe/ſo ſay they: Dedens, plus dedens, le plus dedens, dehors, plus dehors, and ſo of the reſydue.

Here begynneth the table of Prepolytions.

THe table of Prepolytions in our tonge declared by exemples in the frēche tonge where euery exemple is as vayllable to ỹ lerner as thoughe I gaue a rule. Notyng firſt ỹ for ſo moche as ỹ prepolytions in bothe our tonges maye waxe ſomtyme aduerbes and ſomtyme be vſed as conjunctions I ſhall gyue exemple of al their dyuerſytes. Notyng alſo as I haue afore ſayd that whan a prepolycion in the frenche tonge hath A, le, or au, byfore hym and de, after hym he ſerueth to make anſwere where a dede is done or to what perſon. And whan par, is put byfore a prepolycion he ſerueth to expreſſe mouynge in to a place or in a place.
Note alſo that de, compynge other afore prepolycions or after maketh them to waxe aduerbes.

Here endeth the table of prepoſytions: And herafter followeth ỹ annotacyons vpon the Aduerbe.

Annotacyons vpon

Vpon the thyrde rule it is to be noted that for questyons demaunded by qui, who/ and que, what/bycause ỹ they be pronounes interrogatiues/therfore whan they come after any prepolycion/aduerbe/ or contunction/we muſt vſe their oblique cases/ſaue that as I haue afore ſhewed in the ſecõde booke qui, the pronowne wanteth his oblique cale/ and therfore we muſte ſay for in whome/ agaynſt whome/ with whome: En qui, contre qui, auec qui, & for in whãt/agaynſt what/ with what: En quoy, contre quoy, auec quoy, but as for/ Queſt deuenu Babilone, for where is Babylon become/or what is become of Babylon/ ỹ maner of interrogacyon is to be noted/& alſo Agardez quelle eſt petite, for ſe howe lytell it is. And ỹ they vſe whan they come to a mans dooze to aſke who is there/or who is within/he ỹ ſtandeth without ſayeth/ Ho la, and ſuche as be within/for who is there ſaye/ Qui eſt la.

¶ Annotacyon vpon the fourthe rule.

Here as the aduerbe of qualyte in the frenche tonge moſte generally is formed out of ỹ fempynine adiectyue by addyng to of ment, yet as I haue afore ſaid we vſe more bien, & mal, than bonnement, & mallement, & of pire, we ſay nat pirement, but pis.

¶ Note alſo that whan the fempynyne adiectyue endeth in ante, they forme nat their aduerbe of qualyte in antement, but in amment, for the moſte parte as of elegante, triumphante, meſchante, habundante, ſuffiſante, inceſſante, ignorante, they forme elegamment, triumphamment, meſchamment, habundamment, ſuffiſamment, inceſſamment, ignoramment, but whan ỹ fempynyne adiectyue endeth in ente, I fynde their aduerbe of qualyte endyng ſomtyme in emment, and ſomtyme in entement, as/ prudemment, and prudentemẽt, violemment, & violentement, paciemment, and pacientement, but it is more ſurer to vſe the aduerbe in emment. Note alſo ỹ I fynde fewe aduerbes of qualyte formed out of the preſent partycyples bycauſe they haue no fempynyne in ante, but out of ỹ fempynines of preteryt partycyples/ I fynde dyuers whiche if their theme be of ỹ firſt cõiugacyon ende in eement, as aſſuréement, celéement, vergondéement, and ſiche lyke: I fynde alſo conſequamment, and conſequantemement, and of forte, I fynde more vſyd forment, than fortement.

¶ Note alſo that by aduerbes of qualyte we may make cõparation after lyke maner and forme as we do with the adiectiues as forment, plus forment, le plus forment.

¶ Note alſo that lyke as adiectiues may haue certayne wordes addyd vnto

dyd vnto them to encreſſe or diminiſche there ſignification without makyng of any comparation in lyke wyſe may aduerbes of qualite/ as Ceſt bien ſaygement parle, It is very wyſely ſpoken. but than I haue touched in the ſeconde booke in this place amongeſt the aduerbes that betoken vehemens.

¶ Annotacyons vpon the aduerbes betokennyng vehemence.

The aduerbes of vehemence reherſed in ỹ ſeconde booke maye thus be engliſſhed trop, to/ or to moche/ fort, very or ſore/ moult, moche/ tres, very/ bien, very/ peu, lytell/ goutte, nat a whyt/ tant, ſo moche/ autant, ſo moche/ dauantaige, furthermore/ ſi, ſo tout, euyn/ as tout mayntenant, euyn nowe/ tout a propos, euyn a propoſe.

¶ Annotacyons vpon the aduerbes betokennyng ſymilytude.

Here we vſe in our tonge to put wyſe after a ſubſtantyue betokennyng a lykeneſſe or ſymylitude vnto the thyng that the ſubſtantyue ſignifieth/ as ſcryppe wyſe/lyke or in maner of a ſcryppe/ dyamant wyſe/lyke or in maner of a dyamant/ ſlope wyſe/ al ſuche expreſſe they in frenche by addyng of en, byfore that ſubſtantyue/ as En eſcharpe, en diamant, en ſurquayne.

¶ Annotacyons vpon the aduerbes betokennyng exhortyng to do a dede.

Beſydes/ ſus, and faictes le court, they haue alſo toſt, whiche betokenneth anone or ſhortly/ and or ca doncques.

¶ Annotacions vpon the aduerbes betokynnyng demõſtracion.

They vſe alſo le voycy, ſe he is here le voyla, ſe he is there la voycy, ſe ſche is here la voyla, ſe ſche is there & les voycy, ſe they be here les voyla, ſe they be there.

¶ Annotacyons vpon the firſt rule of accydentes partyculer to aduerbes.

They vſe ſomtyme de, in ỹ ſtede of que, than as Si ne ſont plus de quinze cens, And yet they be no mo but fyftene hundred.

¶ Annotacyons vpon the ſeconde rule.

¶ Whan they leaue out ſinon, & vſe onely que, yet the verbe ſhall haue ne, byfore hym/ as Mon entente neſt que de iouer. and de paour, as/ Ie ne dis riens de paour qui nauiengne. And note that ne theyr negatyue aduerbe cometh euer afore his verbe/ where as in our tonge he cometh euer after/ as/ Ie ne le dispas, I ſay it nat.

¶ The table

For ſo moche as it is harde to a lerner to diſcerne the diffe-rence bytwene an aduerbe and the other partes of ſpetche and that as well in our awne tonge as in the frēche tonge/ therfore whan ſo euer they here any worde or wordꝭ whi-che may ſerue to make anſwere vn-to any of theſe twelue queſtyons fo-lowyng / demaundynge of the cyr-cumſtaunce of a dede/ let the lerner reſorte vnto this table and ſeke out the queſtyon that the worde or wor-des ſerue to make anſwere to/ and vnder it after the order of .A.B.C. he ſhall fynde out the ſame anſwere ſet forthe.

And for ſo moche as this worde to morowe may ſerue to make anſwere to this queſtyon/ whan: as if I aſke whan wyll you come/ whan wyll you paye me/ I maye make anſwere / to morowe: therfore you ſhall fynde to morowe in the wordes contayned vnder this queſtyon/ whan. And in caſe ỹ you happe to fynde no ſuche wordꝭ than ſeke out euery worde by hym ſelfe/ as if I be aſked whan I wyll come/ I maye make anſwere: Euery day come cōmer. Let me firſt ſeke in the table of whan/ if I fynde out theſe wordes: Euery day come commer. If I ſhall nat/ that ſignyfyeth that the frenche tonge hath no different wordes nor dyuerſe maner of phra-ſys to expreſſe thoſe wordes by / ſo that than I muſt ſeke out/ Euery/ a mongeſt the pronownes/ and Daye amongeſt the ſubſtantyues/ & come amongeſt the verbes/ and Cōmer/ amongeſt ỹ ſubſtantyues/ and ſaye. ¶ And note that whan the frenſche tonge hathe many aduerbes that cō treuaile one aduerbe in englyſhe I ſhall firſt reherce howe many cōdry wordes they haue in frenſhe & than gyue an exemple for euery one of thē whiche ſhalbe to the lernar worth a lure to knowe howe he ſhulde vſe the ſame aduerbe: and in caſe that I gyue none exemple at all that ſigni-fieth ỹ I ſuppoſe it is not requiſyt.

The rules of the conjunction.

¶ A lytell proheme and certayne rules for the better vnderstandyng of the table of conjunctions.

NOwe haue we by goddes fauoure brought our worke hyther to in whiche though any fewe wordes amongest so many thousandes shall fortune in their dewe places to be wantyng/ with moste humblyte I beseche all maner persones whiche shall take pleasure or delyte in these my poore labours to cōsyder the ample largenesse of the matter whiche I here entreate/ and the great difficulte of myne entrepryse/ whiche if I haue for the chefe effecte brought to passe that is to say reduced the frenche tonge vnder a rule and grammer certayne/ the wantynge somtyme of a worde is nat of so great importance/ for it may soone be gotten/ and ones had/ maye easyly be set in his dewe place/ so the lerner be ones acquaynted with these tables/ but yet tyll he be somthyng well acquaynted with them/ the thynge maye parchaunce be in dede in his place/ whiche he for wante or dewe knowledge shall suppose to be wantyng. But in effecte if any suche worde be wantyng in dede/ if it shall than lyke hym to seke out an other of lyke signyfycacion or nere vnto it/ than may he be satysfyed/ and this booke vnto hym shall be a great deale bothe the more profytable and also pleasant.

But nowe to contynewe in the table of conjunctyons suche lyke order as I haue vsed in the aduerbe/ I thynke it first requisyte to gyue the lerner some generall rules howe he maye knowe a conjunctyon from the other partes of speche/ for els it shall be the longer or this table can stande hym in any stede.

¶ Regula prima.

FIrst if the lerner here or fortune to rede a worde in our tonge vsed twyse in one sentence: as/ What for loue what for feare: Halfe for loue/ halfe for feare: Parte for loue/ parte for feare: Nother for loue nor for feare: As well for loue as for feare/ and suche lyke: if he can nat fynde them vnder no question belongyng to the aduerbe/ let hym loke for all suche wordes here in this table of conjunctyons.

¶ Regula secunda.

¶ Whan he shall here or rede any of these thre wordes/ as/ that/ or than/ folowyng after any one worde or many/ as/ so as/ so farforthe as/ all be

as/ all be it that/ all thoughe that/moze than/moze faruently than/ oz ſuche lyke / if he cãnnat tynde the ſelfe wozdes vnder none of the tables belongyng to the aduerbe/ let hym ſeke foz thoſe wozdes here in this table of conjunctyons.

¶But here is to be noted that where as que, betokenneth with vs bothe as/that/and than: whan he ſignifyeth that/he is oft tymes lefte out in our tonge/ where the frenche tonge neuer leaueth hym out this thyng muſt be noted foz que, whan he ſignyfyeth that/ cauſeth foz the moſte parte the verbe folowynge to be of the ſubiunctyue mode: but this thyng may be knowen if the lerner wyll marke whyther the ſentence ſhalbe all one in our tonge if that be put in oz lefte out/ as ſythe it is all one to ſaye/ tary tyll I come oz tarye tyll that I come this is done ſythe I was here/and this is doone ſythe that I was here: All be it I ſe it I wyll nat ſe it/ althoughe I ſe it I wyll nat ſe it/and all thoughe that I ſe it yet I wyll nat ſe it: All be it ỹ I ſe it yet I wyll nat ſe it: So I ſe it I care nat/ and ſo that I ſe it I care nat/and this thyng muſte ỹ lerner ſpecially obſerue/foz ſo often as he ſhall ſe that/ written in the table of cõiunctyous he ſhall parceyue that our tonge may ſuffer to vſe the wozde byfoze & leaue out that/ but ſo as I haue ſayd/ may nat the frenche tonge leaue out their que, and yet nat euer que, thus folowynge other wozdes maketh his verbe to be the ſubiunctyue mode/and therfoze the exemples here gyuen in this table of Conjunctions be moſt chefely to be noted/and yet I note that where we toyne that/ with if: as if that I come/ if that you do/ if that I ſe hym/ where the frenche men ſaye nat: Si que ie viens, ſi que ie fay, ſi que ie le voys, but leaue out que, in this place.

¶Note alſo that I fynde ſomtyme the modes chaũged in our tonge and in the frenche tonge/ where we vſe that/ by reaſone of different phraſys in the tonges/ as where we ſaye/ after that he had reygned twenty yere/ after he had dyned/ oz after that he had dyned/after that he had ſauoured the noble lycour/ after that he had called in the names of the hye goddes: In the frenche tonge I maye chooſe me whether I wyll ſaye/ Apres quil auoyt regné vingt ans, oz apres auoyr regné vingt ans, and ſo of the reſydewe: Apres quil auoyt diſné, oz apres auoyr diſné. And contrarye wyſe foz our infynityue mode the frenche men vſe que, with their ſubiunctyue mode: as/ It is beſt to holde your peace: The greateſt ioye ỹ can be is to haue a quiet herte: It is a moztall payne to haue an yll wyfe. &c. they ſay: Il vault mieulx de vous tayre, oz Il vault mieulx quon ſe tayſe, oz elis they vſe/ que, byfoze de, moze than we haue in the ſame ſentence: as/ La plus grant

ioye

ioye que peult eſtre ceſt que dauoyr le cueur appayſé, Ceſt vne payne mor telle que dauoyr vne mauluaiſe femme.

¶ Regula tercia.

THyrdly and chefely if the lerner outher here or rede a worde in a ſentence whiche muſte nedes haue an other worde and alſo a ſentence/ or at the leſt an other ſentence to folowe the firſt ſentence whiche wente byfore or euer he can be fully ſatyſfyed what is ment by the firſte ſentence/ let hym ſeke for all ſuche wordes as well them that come byfore in the firſt ſentence/ as them that folowe in the latter ſentence here in this table of coniunctions.

¶ Exemple to deſerne this wordes.

THis ſentence is of it ſelfe parfyte. you haue broken couenant with me. But if I put byfore it any of theſe wordes/all be it that/all though that/in ſo moche as/onleſſe that/and/by cauſe/ bothe for/nat onely for/ or any ſuche lyke: Theſe wordes requyre a nother worde to anſwere them and a ſentẽce alſo to folowe: as/ All be it that you haue broken couenaunt with me yet I forgyue you/ or neuer the leſſe I forgyue you/ or els a ſentence without any ſuche worde: as if you haue broken couenaunt with me I forgyue you. And herin I haue ben ſomtyynge the more longer to helpe ſuche as be nat lerned in the laten tonge/that they myght by ſome generall meanes deſerne a Coniunction from an other parte of ſpetche: but vnto ſuche as be lerned in fewe wordes to expreſſe this mater here conſequently ſhall folowe the table of coniuctyons/ nat ſo precyſely as the latynes vſe them/ for I haue reduced a great meyny of them vnder the generall queſtyons/ but ſpecyally copulatyues/ and diſiunctyues/ cauſales / collectyues/aduerſatyues.&c. remyttyng the lerner chefely to the exemples to knowe howe thoſe coniunctions ſhulde be vſed.

As touchynge: Quant a. Quant est de. Au regard de. as/ Quant a moy, quant est de moy, au regard de moy, de toy, de luy, quant a cecy, quant a cela, and En tant que touche, as/ En tant que touche a moy, toy, luy. &c. Quant aux honneurs.

As touchyng the residewe: Quant au surplus.

As to the residewe: Quant au surplus.

As well as: Aussi bien que, o; aussi bien cõme, as/ Vous faictes aussi bien quil est possible, o; aussi bien comme il est possible.

But whan any wordes or a sentẽce come betwene as well/ and the/ as folowynge than: for as well as/ as they saye/ tant, que, or comme, as/ Tant villayns que gentilz hommes, tant malles que femelles, Tant pour la saluation du genre humayn comme des aultres creatures. Tant en allant comme en reuenant, Tant enuers dieu comme enuers le monde. Tant de sa merueilleuse eloquence comme de sa souueraine beaulté. Tant pour ce que cestoit vng simple peuple comme pour ce que la necessité les y contraignoyt.

Howbeit I fynde aussi bien, **and** cõme, **deuyded: as/** Et prindrent les Cebrinois tout le bestail de la enuiron aussi bien celluy des pasteurs comme celluy des aultres. **but he might haue bled** tant, **and** que, or comme, **and sayd:** Tant celluy des pasteurs comme celluy des aultres.

As well for/ as for: Tant pour, cõme pour, **as/** Tant pour leur beaulté singuliere cõme pour ce quilz sont si tres bien endoctrinez.

As well on their behalfe as: Tant de la part deulx comme de ma propre auctorité priuée.

At the moste nat aboue thus moche: Tout au fyn plus non pas pardessus cela.

Better naye than ye: Mieulx vault non que ouy.

Bycause that: Pour autãt que, pour ce que, a cause que.

Bysydes/ nere vnto a persone or a place: Pres de, **as/** Seez vous icy pres de moy. **and** Il demeure pres des Augustins, or au pres des Augustins. **and** De les, **as/** Il demeure de les le president.

Bysydes by ponde: Oultre, **as/** Il auoyt dix mille escutz en bel or oultre, sans son argẽt et aultres bagues. **and** Oultre la quelle chose ie ne demande plus riens. & Il auoyt oultre les dessus dictz plusieurs aultres.

Bysydes ouer and aboue: Sans, **as** Il auoyt en son armée cent mille combattans sans les Pionniers et aultres gens suiuans le baggaige, **and** oultre, **and** en oultre.

Bysydes as/ I shall put hym bysydes his purpose or intent: Arriere de, **as/** Ie le metteray arriere de son propos.

By so moche as: En tant que, or dautant que, **as/** Entant, or dautant que vo⁹ lauez faict sans le sceu de moy ie ne men veulx poynt mesler.

By so moche/ by so moche/ as by so moche as he is stronger than I/ by so moche am I rycher than he: Entant que, or Dautant quil est plus fort que moy entant, dautant suis ie plus riche que luy.

By so moche the more I praye hym/ by so moche the lesse he dothe for me: Entant plus, or dautant plus que ie le prie dautant moyns fait il pour moy.

Bothe: Tant, **and** que, **as/ bothe men and women:** Tant hommes que femmes. **and** Aussi bien comme, or que, **as/** Aussi bien hommes que femmes. **and** Iay mys entre ses mayns tant mon honneur que ma vie, or aussi bien mon honneur comme ma vie.

But for verbes ioyned togyther in our tonge with bothe and/ and as/ I do bothe loue hym and trust him/ they vse nat tant, and que, but outher aussi bien, and que, or comme, or els double et, as/ Aussi bien layme ie comme me fie en luy, or et ie layme et ie me fie en luy.

But: Que. Sinon. Fors. Ayns. Ayncoys. Mays. and Si. Of the whiche seuen que, sinon, and fors, maye be vsed in a sentence a lone / whiche nouther dependeth of any sentence goynge byfore/ nor bringeth in no sentence to folowe / but with this difference. For que, is vsed whan we vse but/after a verbe byfore any one parte of spetche a lone. As for he is but a foole/ she is but a beest/ my wyfe is but blacke/ I aske but the / I haue but foure / they saye: Il nest que vng fol. Elle nest que vne folle, Ma femme nest que noyre, Ie ne demande que toy, Ie nay que quatre. So that que, causeth his verbe to haue ne, byfore hym/ though our verbe haue nat not/ byfore hym in our tonge / accordynge as I haue touched in the secõde rule vpon the accydentes partyculer of aduerbes in the seconde booke.

Si non, is vsed whan we vse but/ a prepolycion and his substãtyue outher a lone or with his adiectyue / where we vse not/afore the verbe in our tonge/or some maner negacion as/ La quelle elle ne porte si non aux nopces. and Ie nen doibs prendre garde (si ie suis saige)

Si non par mesure iunyte. and Ie ne bailleray si non a la plus belle.

Fors, is vsed whan we except nat a thynge vtterly from the signyfycacion of the verbe: as/ Et nauoyt fors vng petit de barbe. &c.

But as for ayns, ayncoys, & mays, requyre an other sentence to folowe them.

But/ with this difference ayns, or ayncoys, bytwene whiche I fynde no difference / but suche as is bytwene auec, and auecques, requyre a sentence to folowe them of contrarye sence vnto the sentence that they be in/ and we vse also not/ byfore the verbe in our tonge/ or some maner negacyon that cometh byfore them: as/ Si ne scauoyt on encores mouldre le bled ne cuyre le payn, ayns cuyde, or ayncoys cuyde ie que les gens men geoyent le fourment tout crud. and A la quelle auctorité de Berosus nous ne nous sommes pas arrestez simplement ayns, or ayncoys lauons corroboré.

¶ Mays, whan he signyfyeth but/ is euer the firste worde of a sentence/ whiche hath respecte to the sentence nexte goynge byfore in suche wyse that if the chiefe verbe of the sentence byfore the affyrmatyue thanne the verbe folowynge mays, muste be negatyue: And contrarye wyse / if the verbe in the formore sentẽce be negatyue/ than the verbe also where mays, is muste be negatyue / or at the leste the verbes muste be of contrarye sence: as/ Ie ne lay pas faict encore mays ie le feray tantost. and En vostre presence

Il reſẽble a vng aigneau mays arriere de vous il fait le deable.

But for ſo moche as I fynde fewe greater diffycultes in this tonge for vs/ I ſhall here gyue dyuers exemples to proue my rules taken out of the cheffeſt auctours/and eſpecially Iehan le Mayze/ nat intendyng to proue ỹ they can nat be otherwyſe vſed for the vulgar people be nat ſo vtterly precyſe in this thynge as the lerned men be/ but for to ſhewe that they be ſo vſed as I haue here taught/and to gyue ỹ lernar a moze ample occaſyon to be moze circumſpecte as he ſhall rede auctours in this tonge to marke the truthe.
